**President and Mr. Nixon Seen Likely To Head Parties' Slates**

Mr. William Treanor, President of the Young Republican Club released today the results of that organization's December poll of the student body. "It is quite clear that if we consider the 233 students who responded to our poll as indicative of public sentiment that President Johnson has received a strong vote of faith and confidence from our students by garnering over 78% of a favorable reaction."

Following in the other political questions, which were tabulated by the committee heads - Messrs. Hartwell, Galbraith and Hallam. - Mr. Treanor expressed the belief that the nominating conventions of the major parties would choose the following slates: Democratic...President - Lyndon B. Johnson, Vice-Pres. - Robert F. Kennedy. Republican...President - Richard Mr. Nixon, Vice-Pres. - Barry Goldwater.

The basis for these predictions are the favorable reactions, percentage-wise, that these men received: Kennedy 74%; Nixon 44% and Goldwater 33%. "Our own state did not fare too well with Mayor Wagner as fourth with 28% and the Governor coming in last with a bare 20%.

In addition to the reception that the politicians received, the organization reports finding some interesting and from their viewpoint in some cases, distressing facts. Approximately 15% favored American recognition of Communist China while only 12% favored her admission to the United Nations. Also, 35% were to some degree favorably inclined to socialization of medicine or as it is better known. Medicare. A last point that was of great personal concern was the response to the inquiry regarding an 'inevitable conflict'"

Letters to the Editor

Dear Editor:

In the interest of boosting the morale

of the entire student body I present a

suggestion which I think would improve

the present situation. The suggestion is
to establish a "Rogue Week". A "Rogue Week". During the early Spring,

our students will be allowed to select

the items they wish to wear. The only

rule will be that no one can wear the

same item as anyone else.

The effects of such a week: the

student would have had a chance to unwind

and would be more willing to settle

down and study since he had his fun.

To some it may appear that 1 am

suggestion would be the increase of

relevancy, weekday curfews, or even mas­

ter's career. But the point is that 1 am

or yielding to the forces of Communism. It is not so much the percentage of those who would surrender or had no opinion, because over 92% would fight, but the fact that there are still some people, and college students at that, who are not enough convinced of their 'way of life' to be willing to give, as in the words of Lincoln, '. . . the last full measure of devotion. . . . (so that) government of the people, by the people and for the people shall not perish from this earth.'

However, there was a number of results that offset the unfavorable and "do a credit to Marist and her ideals and teachings". Almost 74% of those students who responded to the poll believe in the right to work laws. Yet an even greater outpouring came in regards to the question concerning civil rights and whether there should be a strong civil rights program. The poll conclusively shows that Marist students realize the dignity of man by having voted overwhelmingly (60%) in favor of a strong civil rights program.

In concluding his report, Mr. Treadnor expressed the belief that the time and effort that went into this work was in his opinion some of the most well spent on this campus because it definitely proves that Marist is making her contribution to our world by producing men who really care.

The following article was written for The Record by Mr. Edward Tulsboi, a member of The New York Medical Association. It deals with a pamphlet entitled "Why Physicians Support Hospital Insurance Through Social Security."

The title why "Physicians" support hospital insurance is false. It should read why "medical politicians" non-practicing doctors support hospital insurance.

In general the pamphlet is propagandistic, not realistic. It is impractical and will take over 25 years for smooth operation, requiring many many revisions for practicability. Don't misunderstand me I am not against any good program for medical aid not only for the aged, but for all. We have the situation in education. Everyone is entitled to free education all the way through college. That is their right and privilege. However if they wish to do it privately at their own expense that too is their right and privilege. On such a basis I should not oppose medicine for all. Furthermore I would oppose bureaucracy and more and more governing bodies. The way this plan is now constructed, someone is cushioning himself and a group of his cronies for cushy jobs -- everyone wants to be a medical general.

A word about the committee. Who chose them? Were they recommended because of their competence to care for the sick or the weight of their reputations in science? Certainly, some are excellent investigators, distinguished scientists, hospital administrators, and teachers, but they are not doctors. I doubt whether many of the group could manage a patient without calling a good clinician for help.

The pamphlet states that the Kerr-Mills program is ineffective. The A.M.A. contradicts this. Who is right? I am neither for or against this particular bill. Any bill will require much time and change for smooth operation. Is there any evidence or experience that the new plan will be better? Not one bit, it is all illusory and prophetic with overtones of wishful thinking.

The pamphlet states that the quality of medical care will be improved. How? After all if the physicians in any given geographic area render a certain type of care they are not going to change that at once. The same is true of nursing homes and hospitals. There will be no overnight metamorphosis as the writers of the brochure lead one to believe.

The safeguards again overutilizations are truly naive. Really a lot of paperwork for the doctor. Secondly if a doctor has hospital privileges, it is obvious that these were granted because of his abilities and integrity. Who on the staff is going to censor his judgement in the management of a case?

---A renowned scientist or hospital administrator whose myopic viewpoint clashes with medical practice!

To meet the mechanics of medical care through any plan one must be prepared. Are we prepared? We need more hospitals--we need more medical practitioners. Let this committee and others interested in this field bend their energies to this end and when we have more available beds and doctors to man them a program of health care will have a chance of surviving. The present one is impractical, political and discriminatory and in my opinion creates more problems than it solves.

HOURS 1 P.M. to 10:30 Sunday to Thursday
Friday 6 P.M. to 6:30

Mr. Dougherty's functions will include the public relations for the college as well as assisting the president in planning the development program for the college. Bob Norman will continue to be director of publicity and Brother Andrew Molloy will remain as executive secretary to the alumni. Mr. Dougherty will be available to any faculty or staff member as an adviser and assistant on any programs which deal with the public outside the college, as well as any foundation appeals or fund raising ventures. The work of development rightly belongs with the president, and to a lesser degree with the faculty. Mr. Dougherty's role will be to facilitate such work on the part of both president and faculty.

Mr. Dougherty's office will be Room 6 of upper Donnelly. He may be reached at extension 59.
