Housemasters View

Dorm Life

Over the past year, the Campus Residence Board has evolved into a "house system" which is now being called a "dormitory." Student living on campus has a more lively, "homey" atmosphere as compared with the previous barracks atmosphere to which the vast majority of students were subjected.

Brother Frederick Lambert, recently appointed "housemaster" of Champagnat House explained the mechanics and purpose of a house system.

"The residence board as it was previously known is now non-existent. Each house now has its own Council consisting of one elected representative from each floor, three resident advisors chosen from among the resident advisors and three faculty members." The Housemaster presides over the Council but he has no vote. The basic purposes of the House Council are legislative, judicial, and financial. That is, each Council will make the rules governing its own particular House, enforce the rules and handle the expense of the house.

Brother Lambert, previously taught at Christ the King High School in Queens, was applied for his position at Marist because "the 'barracks atmosphere' gave dimensions to college life, which would agree with my own human nature as opposed to barracks life. I commented on some of the more pressing complaints on the floor, in regard to extension of open house privileges. Brother Lambert said that he did not wish to become a "panel manager." But simultaneously he said that the needs of students are rational in their choice of dorm life.

"The Academic man in me is a self-disciplined man. He must be disciplined enough to realize his fellow student's basic right to freedom. He must also realize that the dorm set up, especially the dorm rooms, are not made for a twenty-four hour occupation. Brother Lambert qualified this statement, however, by saying that he has no objection to the dorm house privileges if the students could present a suitable arrangement. "With any extension of open house or co-ed educational living, the burden of proof (that the students are capable of handling the situation) is placed on the students."

Brother Patrick Gallagher, the "housemaster" of Leo House added his views on the effectiveness of the newly instituted house system.

"I'm willing to 'share in the noise,' says Brother Gallagher. He feels that this is a very necessary function of a housemaster. "The College is generally in a downward spiral." By this he means that the College is in such a position that the students don't think the administration cares what causes the administration to think the students don't care, etc. But he also believes that the administration must institute the first step in order to reverse the spiral. In his own words, "Purity exists (on the part of the students) because they have not been able to adjust. They have always accepted that education is handed to them. We cannot expect them to take an active part in their own education unless we (the administration) show them how."

Brother Gallagher feels that the purpose of the house system is until the atrocious physical condition of Leo House is rectified. "Maintenance department cooperation has been great if you prove present. In regard to extension of open house privileges Brother Lambert said that he did not wish to become a "panel manager." But simultaneously he said that the needs of students are rational in their choice of dorm life.

Brother Gallagher comes to Marist after teaching four years at St. Helena's High School and two years at Roselle Catholic where he was Chairman of the English Department and English Director. From 1965 to 1967 he taught Advanced Placement English at Molloy High School where he was also Chairman of the English Department. During his stay at Molloy, Brother Gallagher became involved in the development of fostering informal, in-depth, independent education. He continued in this endeavor until he came to Marist this year.

EDITORIAL

Too Long Coming

V.M. Day: It has been a peaceful one, but the onlookers stand silently at the side of the road, uncertain if it is to struggle or to resist. Day or night, rain or shine, it is a day to remember, a day to commemorate the memory of the past and to honor the future. Day or night, rain or shine, it is a day to remember, a day to honor the memory of the past and to celebrate the future.

The Bells Arc Ringing

Two weeks ago a New York City bank was robbed. The city was in the middle of a crime wave. Today, the same bank was robbed again. The city is in the middle of a crime wave.

A Change of Attitude

One thing that distinguishes this city from others is its ability to change. It is a city that is constantly evolving. It is a city that is always moving forward. It is a city that is always changing. It is a city that is always adapting. It is a city that is always growing. It is a city that is always changing.

Walt Whitman and the Country Culture

By Robert L. Jones

As a poet and writer, Walt Whitman is known for his love of nature and his celebration of the American landscape. His works often reflect his admiration for the beauty and diversity of the natural world, and his interest in the history and culture of America.

The middle of the 19th century was a time of rapid change and development in the United States. The population was growing, and new technologies were being introduced. Whitman's works reflect this sense of dynamism and change, as well as his exploration of the American identity.

Whitman's poems often focus on the themes of freedom and democracy, and his celebration of the American spirit. His works are characterized by their frankness and their unapologetic expression of the human experience.

Barking Up a Tree
By Tony Becker

If you talk to the students in the CIRCLE, you will not hear that there are any current problems in the Environment. If you meet the President, you hear a different story. Morton Mathias, with the exception of the residence halls, is not at all interested in the environment. If you meet the President, you hear about his interest in the residence halls. Another way of looking at this situation is from the point of view of the President: "I am not interested in the environment." This is not to say that the President is not interested in anything at all. He is just not interested in the environment. If you meet the President, you hear him say that he is not interested in the environment.

Accents Disconsolate
By Ed Polk, Free and Polk, Free

The accent is a mystery. It is not a mystery to those who speak the language, but it is a mystery to those who do not. There is a story about a man who was asked what his accent was. He replied, "I don't know. I was born with it." This is a true story. The accent is a natural part of the language. It is not something that can be taught or learned. It is a mystery that is not solved by the study of linguistics.

WASHINGTON-D.C.-The campus was almost deserted though the sky was cloudy. The sun was shining through the clouds. There was a lot of wind, and the campus was quiet. There was a lot of wind. There was a lot of wind.

When the President of the University was asked what he thought about the situation, he replied, "I don't know. I was born with it." This is a true story. The President is a natural part of the campus. He is not something that can be taught or learned. He is a mystery that is not solved by the study of campus.

The Commuter's Utopia

The commuter's utopia is a small corner of the campus that is comfortable and quiet. It is a place where the commuter can relax and think. It is not a place where the commuter can study. The commuter's utopia is a place where the commuter can be themselves. It is a place where the commuter can be free from the pressures of the outside world.

The Student Military

The student military is a group of students who are interested in military affairs. They are interested in the history of the military, the military in the present, and the military in the future. They are interested in the military as a career. They are interested in the military as a sport. They are interested in the military as a hobby. They are interested in the military as a way of life.

The Commuter's Utopia

The commuter's utopia is a place where the commuter can be free from the pressures of the outside world. It is a place where the commuter can relax and think. It is a place where the commuter can be themselves. It is a place where the commuter can be free from the pressures of the outside world.
In Perspective

Ed Walzer

Ed Walzer, a member of the Marist basketball team, has been a key player for the past two years, and his contributions to the team have been significant. Walzer, who is from the Bronx, has been a valuable member of the team, and his leadership has been crucial to the team's success. Walzer has been a consistent performer, and his on-court presence has been a major factor in the team's success. Walzer's abilities have been highlighted in many games, and his contributions have been recognized by both his teammates and coaches.

Two Fakes Later

Marist College

The members of SDS have been organizing, and the battle against "in loco parentis," a term used to describe the authority of an institution over its students, has been a major focus of their efforts. The students have formed a tenants' group, and SDS members are working to involve students in the decision-making process of the college. SDS members are also working to bring about changes in the academic programs and majors offered by the college.

In Perspective

Gerry Tyne

Gerry Tyne, a senior wide receiver for the Marist football team, has been a key player for the past two years. Tyne has been a consistent performer, and his on-field presence has been a major factor in the team's success. Tyne's abilities have been highlighted in many games, and his contributions have been recognized by both his teammates and coaches.

Sailing

By Ron Duffy

Marist College's sailing team has been active this fall, and members are looking forward to the spring season. The team has been practicing on the Hudson River, and members are looking forward to the upcoming regattas. The team has been working hard to improve its performance, and members are excited about the upcoming season.
Soccer Team Drops Two 2-0, 2-1 Home Opener Saturday

By Don Duffy

On Tuesday, Oct. 30 the young hooters traveled to West Conn. St. and lost the game to the Blue Devils 2-0. Bill Dourdis and Bill Hasbrouck set up blocking wall.

Iona Wins Squeaker 7-6 Conversion Gamble Fails

By Nick Squiercarini

Last Saturday, the Marist Vikings lost a hard fought contest in their home opener to Iona, 7-6. It was a tough game which was dominated by a good defensive play on both sides.

It was the Iona defense which kept Marist held in check for most of the first three periods. The Iona defense was strengthened by the return of fullback Erwin Jacobellis. Bill played one of his finest games, fullback Erwin Cook, and tailback Angelo Basso.

The Marist fans were amazed at the start of the game as Julianne McManus scored before the crowd had settled. John Hurley was named the game MVP as he had possession of the ball and was the only difference. John was not allowed to stop the shot. Andy Herzing, Herzing reportedly had been injured and was supposedly unable to play for the rest of the game. John was successful in stopping the shot. Both teams were even after one part played. The majority of this yardage was gained by two of the finest players, footballer Erwin Cook, and tailback Angelo Basso.

The young hooters lost their third straight when they really shouldn't have but that's the ball game. First home Game Oct. 11 against Maritime. Be there - I guarantee a win.

Runners Top Fairfield Lose To F.D.U.

On Wed. Oct. 1 the cross-country team rebounded from their loss on the previous Saturday to defeat Fairfield on their home course 55-32. Running against a small but determined team Marist came from behind Fairfield's early lead, placing 3 men in the top 4. Fairfield's 5.1 mile course included a start of 220 yds on a flat cinder straightway, making an almost U turn onto an asphalt road. Already Fairfield had 4 men in the lead followed by Bob Mayerhoffer, John Petraglia and Jim Corbett, all with close to 50 % of the race.

As the race continued it didn't look good for the Marist Harriers. There were many rolling hills, a jaunt past a new building site, across green sections of the campus and out onto a sidewalk which followed onto an incline of asphalt. It appeared Marist wasn't going to catch up to the hills behind them. The race continued into the last mile. The last mile included a 5% hill which seemed to go on and on forever gradually steepening as the runners forced themselves upwards. Steve Sawicki refused to give up a point in the top 4. Coach John Hurley was named the game MVP for his perfect form running.

Another exciting part of the game came immediately after the touchdown pass to Paccione. With the score of 14-6, the Marist 6, the big question was whether Marist would call for the double reverse, the half back pass. The Marist squad lined up and there was no point in any one's mind that they were then going for the 2 point conversion. Hurley rode to his left and threw a high pass for Andy Herzing which his underthrown and gone out of bounds. All was not lost however because an interference penalty was called against Iona and we were given another try for two points and the game. On this play Hurley handed off to Bill Dourdis who went up the middle only to meet the Iona defensive act in action on some goal line play, thus the win was secured for Iona.
