Research Funded on Playback

Dr. David Miller, Director of the Testing and Counseling Center, presented a summary of the research he has been conducting with immediate and delayed audiotape and videotape playback of group counseling. The research was part of Dr. Miller's Doctoral Dissertation which also served as the basis of a $10,000.00 grant from the I.B.M. Corporation in the research he has been doing. Professor of Zoology at Duke University, Dr. Livingstone served as the basis of a $10,000 research grant to which also served as the basis of Miller's Doctoral Dissertation

BABA Proposals Discussed Before College Community

BABA also wanted to determine this status since the Poughkeepsie community and thus the surrounding community out for opinions about the proposal. The result of this inquiry was a public statement issued by Reverend Jenkins of 'The result of this inquiry was a public statement that if the center was not made for Poughkeepsie people, the center would be desired by the black community of Poughkeepsie. Mr. Tarver, a black teacher from the Middle School, responded that a cultural center for Poughkeepsie was definitely needed by the culturally deprived blacks of the area and that such a center would be welcomed by the community. Mr. Frumkin, an assistant professor of Business, asked if it would be practical to perform the renovations involved with the storefront by using a labor force from the Marist College community. Rudy Silas, a member of BABA, pointed out that the center was not made for BABA and the program would fail. Ronnie Pearson noted that the labor needed for renovation would require more than just a temporary commitment no matter how enthusiastic and that the need for such prolonged labor would not be supported by the Marist College community. Ronnie Pearson noted that the labor needed for renovation would require more than just a temporary commitment no matter how enthusiastic and that the need for such prolonged labor would not be supported by the Marist College community.

Livingstone Speaks on Lake Study

Livingstone attended a lecture on his work in the field of ecology in lakes in Africa, and the world of his domain, Mr. Robert Kendall, who discovered a new method of counting pollen grains through the ecological process involved in the thousands of years old on the bottom of African Lakes. It is not available for both balsa and fifteen feet in diameter, and it is available for both balsa and fifteen feet in diameter.

Peace College-College Program Extended

The officials of the Peace College and the State University of New York at Brockport announced cooperation on a Peace College-Brockport Program, which is expected to attract many students from the Peace College's thirty-five-year history. The program was announced at the Peace College Board of Trustees meeting held recently. The Peace College Program will extend the Peace College's thirty-five-year history and will be open to all students who have completed their Peace College coursework.

Peace College and Brockport officials said the new Peace College-Brockport Program will provide an opportunity for Peace College students to continue their education at the State University of New York at Brockport. The program will enable Peace College students to earn a bachelor's degree in a variety of fields, including education, business, and social sciences.

Intellectual in Residence

By Edward O'Neill

Van Pansers, Agnew is a name that has stirred up a number of discussions these past few weeks. What is the root of the problem? Perhaps it is a case of intellectual in residence. Whatever the reason, it seems that the students here have a lot to think about.

My point is that some students, particularly those who are involved in intellectual discourse, often find themselves questioning the nature and function of language. For example, in the case of Van Pansers, there is a tendency to interpret his words as reflecting a certain type of attitude or perspective. It is important to remember that language is a social construct, and that our understanding of it is shaped by our cultural and historical contexts.

It is also worth noting that intellectual in residence can be a source of inspiration and challenge. It can provide us with new ways of thinking about the world around us, and can help us to see things in a different light. However, it is important to approach these ideas with a critical eye, and to be aware of the potential for intellectual in residence to be a source of dissatisfaction and frustration.

I hope that my remarks have been helpful, and that they have stirred up some thoughts and discussions among the students here.

Closed

Barking Up a Tree

By Tony Barker

Now that the open house has passed, many people have asked me about my thoughts on it. They have asked me if I thought it was a success, and if it would be successful in the future.

I believe that the open house was a success, and that it will be successful in the future. The event was well-organized, and it provided a good opportunity for people to learn more about the school. I also believe that it was a good way to show the school's values and mission to the community.

In my opinion, the open house was successful because it was well-planned and executed. The organizers did a great job of making sure that the event was accessible to all attendees, and that they were able to ask questions and get answers.

I am optimistic about the future of the open house, and I believe that it will continue to be a valuable event for the school. I hope that it will continue to grow and develop, and that it will continue to be a source of pride for the school.

For the Week of November 29, 1969

Calendar of Events

Lecture - Dr. Charles Hoyt of Bennett College will speak on "The Rise of the Experimental Film: The Forties". 475-3240

Lecture and Discussion - Committee of the Black Experience: Friedman Campus Center.

THURSDAY - November 27, 28, 29, 30

SUNDAY - November 30

Film - Sponsored by Marist College Film Program. Three films in the Fargo. Title: "The Rise of the Experimental Film: The Forties". Le Temple: "TOSCANINI".

Closing Urgent

By Louis E. Fernandez

Uncle Sam's budget includes too many areas that are not part of the school's mission. I have a hard time understanding how this is possible.

I believe that the school should be more involved in the community, and that it should be doing things that are beneficial to the community. This is why I am so concerned about the school's budget.

I think that the school needs to make some changes, and that it needs to focus on things that are important to the community. I hope that the administration will take my concerns into consideration.

EDITORIAL

BABA

The Circle fully endorses the proposal for a storefront in the Highland area submitted by Black American Studies Department. This proposal is in line with our goals and objectives.

We strongly recommend that the Circle support this project.

And The Beat Goes On

The steps are again flying along George Washington's Monument and trunkic rest of the Red Sox in a pickup on the Washington Monument. The story is that the team will leave the field at the end of the season, and that this is the last time that they will play.

I enjoyed also the quotations by Peter Masterson, James Newman, Paul Browne, Bill O'Reilly, Raymond Pasi, Peter Dovi, and others. The book was a delight to read.

I have been very impressed with the work of these people, and I hope that they continue to do good work. I believe that they are doing a great service to the community.

Zoot Suits And Major Weekends

The era of the big band has been over for some time, but the zoot suits are still in fashion. The zoot suits are a symbol of a bygone era, and they are a reminder of the past.

I believe that the zoot suits are a good thing, and that they should be preserved. I hope that the people who wear them will continue to do so.

And the major weekends are still going strong. The weekends are a time for fun and relaxation, and they are a great way to spend time with friends.

I hope that the weekends will continue to be a popular activity, and that they will continue to be enjoyed by all.

Although he is noted for his...
Vikings HUMBLE FRIARS, 31-0

The Vikings ended their 1969 football season on a high note by defeating Providence 31-0 on a rain-soaked field this Saturday. Although the field was in bad condition it did not affect the Vikings as they played up their second highest point total this year against a defense ranked seventh in the nation. It was also a good day for the defense as they played flawlessly in holding the Friars to no touchdowns and only 113 yards rushing and only 24 yards in the air. It was a big game for the Vikings because the win gave them a winning season with four wins against three setbacks.

This game was also the last game for fourteen seniors, who played fine ball for the Vikings the past four years. They will surely be missed as the Vikings will have to fill many positions with inexperienced players. Coach Ron Levine will lose nine of those fourteen seniors from his offensive unit. These are Tye, McGarr, Atlanioto, Cooney, Towars, McNama, Hurley, Iacobellis and Daouda. On defense Ritz, McGarr, Harper, Ronchi, Leber and Iacobellis will be leaving.

The scoring started in the first quarter as the Viking offense led by Hurley ran all over the Providence defense. The first score came on top 60 as the PAT was wide. The Providence team could not get moving in their offense and prevented them from getting a first down in the first quarter.

In the second quarter with the Vikings on top 40 yard line Hurley went around end for 45 yards to bring the ball deep into Providence territory. A few plays later Hurley hit Cooney in the endzone. The PAT failed and the Vikings led 120 as the half ended.

The Vikings received the second half kickoff and Cooney returned the ball 60 yards before being tackled on the Providence 15 yard line. The Vikings moved on the ground to the one yard line before a fumble cost the Vikings what could have been a touchdown as Providence fell on the loose football. From then on both teams played heads up defense and neither team was able to score.

In the fourth quarter Dean McCutie made a 40 yard field goal to lead the Vikings 15-0. Vuy took over for Hurley in the fourth quarter and wanted no time as he hit Tye for 40 yards and a touchdown as Tye broke two tackles in scoring his first touchdown of the season.

Later in the fourth quarter Voy hit Pascale as Pascale ran it by the Providence secondary and went 65 yards. The last touchdown of the day. The PAT failed and the game ended with the score 31-0 in favor of the Vikings.

Another fine performance was turned in by the Viking secondary. They intercepted four Providence passes turning one into a touchdown. This backfield consisting of McKinley, McDonnell, Gerlak and Rooney will return next year. Blum and Rita looked real good showing in to drop the Providence quarterback many times throughout the game.

Cahill, Hasbrouck, Keeley, Cooke, Blum, Sullivan, Owen, Nash and Vanacore to name a few will return next year to make the Vikings a team to be reckoned with in the season to come.

CAGE SEASON OPENS VS. YESHIVA-DEC. 1 HOME DEBUT DEC. 3-IONA

Coach Ron Petro has decided on a 14 man basketball team this year. With five lettermen returning, the team is confident of having a good season, with a definite objective being to better last year's fine 19-8 record.

The starting five looks solid and will have to fill many positions. With a strong desire and good competition will be a vital cog in the season. They are very strong. They should be able to handle the taller forward men.

At center will be Ray Manning. Manning is not as flashy as some of the others but he gets the job done. He did average 13.3 last year and was second on the team in rebounds. Ray was also named to two tournament teams last year. Although giving away a few inches in height and weight, Ray makes up for it with his knowledge of the game and his great anticipation.

Heading the backcourt will be Bill Spenla, co-captain. Spenla is a transfer last season from Suffolk Community College, averaged 12.0. He is in great shape now and looks as though he will lead the team in the backcourt as well as in shooting. The other backcourt position will probably go to sophomore Ray Clarke. Clarke averaged 10.5 for the freshman last year. He is a steady player who can shoot, ballhandle and screen for the man next to him in the backcourt.

Others who will play important roles in the foreseeable future are sophomores Terry McAdams, a tough 6'2. 200 with a strong desire and good rebounding ability. Brian is a good shooter and good rebounder. Terry, a 6'4 center who will get better, is a tough ballplayer, who, once he gets set to varisty competition will be a vital cog in the Marist attack.

For the first time in Marist's history the backcourt will be a strong one. Bob Ulrich, a 6'4 junior letterman from last year will be seeing a lot of action. Bob can fill in at center or forward and he gained valuable experience last year as a sub. He has a great limp shot and can take the bigger men away from the basket. They should be sophomores Brian McGowan, Ray Manning, Bill Spenla, Joe Scott, Terry McAdams, Bob Ulrich, J. Tkach. Manning is not as flashy as some of the others but he gets the job done. He did average 13.3 last year and was second on the team in rebounds. Ray was also named to two tournament teams last year. Although giving away a few inches in height and weight, Ray makes up for it with his knowledge of the game and his great anticipation.
