AMERIKA: To Mike Williams

"WIT THE FASCIST SHOUT EXIST IN AMERIKA TODAY, OR MUST I BE EQUIPPED WITH A GUN AND A HANDKERCHIEF TO CAN'T BACK WHEN THE FASCISTS ATTACK?" I ASKED MIKE WILLIAMS, THE горшок of "The Nation," when I saw him at a "The Nation" meeting in New York last week. Mike, it seems, doesn't want this question answered in the affirmative. He is now living in "Amerika," or perhaps his name is changed, as he was in Germany before this war. I asked Mike if he was afraid of being shot down by the fascists, if he was losing his mind being in the country. Mike said, "Yuri was a very warm person, and I didn't think he was afraid of anything. But then, of course, he was always surrounded by a lot of people. We used to talk together about politics and philosophy, and he was always very friendly to me. It's really a shame to think of him as a "fascist," because I know that he was never a political figure. He was more of a thinker, a person who was interested in helping others.

I've been thinking about this a lot lately, because there are so many people who are being denied their basic human rights in "Amerika." I think that we need to do more to help these people, to make sure that they are treated fairly and with respect.

The Paulist is ministering to some of these people, helping them to find work and shelter. But I wonder if they are really getting the help they need. I think that we need to do more to help these people, to make sure that they are treated fairly and with respect.

I've been thinking about this a lot lately, because there are so many people who are being denied their basic human rights in "Amerika." I think that we need to do more to help these people, to make sure that they are treated fairly and with respect.
Reflections On An Unhappy Child

I can see his face, sitting in his window.
Watching the snow fall, wanting to go.
He wants me, too, but I can't see.
I can see the big eyes, the big nose, and the big ears.
And then again, I can't.
Ask his mother, and with her answer he'll run.
Wishing somehow I would be able to meet
And he had little time to play with.

Because he wanted to play ball.
Always wondering when peace would come.
I remember a man whose total life
I gave him credit for having faced all that he had
With an overdose of acid.
Without lunch day after day.
Was the money he had saved by going.”

As a child wonders — I do.
Now you've done it doctor! He thinks he got another free ball.
"Give me my clipboard nurse, I must record all
of what he tells me.
I'm O.K. doc Just give me back my flipper gloves and grease and
I wish I could.

Mr. Frank Boghos, Dr. Kenia Susselau, Bro. Gehrke Wade and Dr. Bubba Douglas as Mr. Pinball Liverpool Sebastian.

Vikings Punish Pace 14-6
Hustle Hunter, Soccer Successful

Last Saturday the Vikings came a step closer to their first undefeated season by overcoming a tough Pace team at Potsdam, N.Y. Pace went ahead in the first period on a fifteen yard run by Ralph Potente, the extra point try failed and at the end of the first quarter Marist found itself behind for the first time all year. The Vikings, however, were not to be denied. On a third down play Quarterback Jim Wilkens hit flanker Chuck Browne with a 40 yard scoring pass, the extra point was blocked and at half-time the score was 6-6.

Throughout the second half the defense was superb. Pace tried 3 quarters but none could move the team. Finally at the end of the third quarter Marist got the ball and moved 53 yards. The drive was capped by a 12 yard run by Murray Milligan, the two point conversion try failed and Marist led into the fourth quarter 12-6.

CURRICULUM REVISION FROM 3 will go into effect in Sept. of 1971, if the Board of Directors of the College approve it, was recommended by a unanimous vote of the APC and sanctioned by the SAC. The proposal easily received faculty approval as the benefits to the students had been fully discussed at a colloquium which was held in regard to it. The change will not work to the disadvantage of the students who have already completed the old graduate requirements nor to the disadvantage of the department which will continue to regulate the core and major field requirements of the students, these facts seem to weigh in favor of faculty approval.

The question of a required "freshman experience" had not been previously discussed at a colloquium and it therefore stimulated much discussion at the faculty meeting. The APC proposal which was also recommended by the SAC would require all incoming freshmen to participate in a seminar composed of no more than 5 students. The seminar would serve a dual purpose of providing an opportunity for students to demonstrate oral and written skills and receive help if needed and at the same time, allowing the moderator to fulfill an advisory role to those students in the seminar. The context of the seminar, which would be determined by the students, could be a structured or unstructured course previously approved or provisionally approved by the college.

Faculty objection centered around the fact that the seminar had not been properly evaluated and according to some faculty members, the fact that the seminar would be required was in violation of the "spirit of curriculum change."

The issue of a physical education requirement was quickly disposed of when, without any discussion, the faculty voted 15-4 to drop it as a graduate course requirement.

7th Straight For Gridmen
Fairleigh Dickinson This Week

Early in the last quarter Marist was forced to punt from their own 46 yard line. Bill O'Herlihy's punt traveled 53 yards to Pace's 2 yard line and two plays later Don Hinckey dropped the Pace quarterback in the endzone for a 2 point safety. With the score at 14-6 the Viking defense held on as time ran out on them.

Outstanding last Saturday for the Vikings were linebackers Jim Fantauzzi and Mike Ehrs. The whole Viking defense deserves credit for a superb season but special praise goes to the offensive line.

These players, Coached by Mike Towers, are battered, hurt and generally unrecognized. Their spirit has given life to the whole team. Mickey Cahill, Charlie Van Norstrand, Tom Cardinale, Charlie Scott, Frank Faracuzzo, Paul D'Amico and Emmett Cooke have made a very basic Marist attack a success.

Next Saturday marks the last appearances of All-Club candidates Mick Cahill and Dean Gestal, club football's leading quarter Bill O'Herlihy, split-ends Bob Scott and Bill Paccone, co-captains, Jack McDonnell, running backs Mark Rowlinsky and Bob Durso and safety Bill Rooney, The Vikings have put it all together this season despite many obstacles along the way.

Suspended Captain Bob Mayerhofer led the Cross Country Team with a 27 minute and 27 second clocking to a 20-36 victory over Hunter College. Freshman Don Gillespie finished second with a time of 26:20. Senior Mark Des Jardins completed the 1-2-3 sweep finishing third in 28:23. Other finishers for the Harriers were

Senior Greg Howe (sixth place in 32:30) Junior Joe Noland (eighth place in 32:50) and Senior Steve Kopki (tenth place in 34:52).

Harriers Defeat Hunter

The Soccer team played two games last week which marked the end of their regular as well as home season.

On Tuesday the Booters battled tough Hunter College to a 0-0 tie. The game was a defensive struggle throughout until the final moments, when fullback Jim Heilman made a tremendous save, kicking the ball from inside the net to the out of bounds line, saving a goal when the lucky Pat Parcells was forced out of position. This was the last home game for Seniors Ray Aymanson, John Murphy, Jim Snyder and Vin Kramer.

Pat Parcells was tremendous in the goal, with 22 saves. Marist outshot Hunter 30-27, but was still unable to score. This inability to score was evident once again in their next game against Dowling College in Oakdale, New York. It took a combination of Gary Westfall and Chil Hanley to break this scoreless streak which had run a total of 20 periods. The goal was scored by Westfall on a cross pass by Wei. The goal came at 17:20 of the second period. Once again Parcells sparked in the nets with 15 saves as the booters took only 18 shots.

The victory closed out the season, giving the team a 4-4-1 overall record and a 2-2 record in the Central Atlantic College Conference.

Booters Tie And Win
In Season Finales

Electric Power And The Environment

The Office of Science and Technology has released a report by an inter-agency study group entitled "Electric Power and the Environment" recommending a program to resolve environmental problems in meeting electric power needs.

The study leading to the report was sponsored by OS & T's Energy Policy Staff in cooperation with the Council on Environmental Quality, the Atomic Energy Commission, the Department of Health, Education and Welfare, the Department of the Interior, the Federal Power Commission, the Rural Electrification Administration, and Tennessee Valley Authority.

It should surprise exactly no one that the Report's basic recommendations essentially echo what conservationists have been pleading for many years:

1) Long-range planning of expansion by electric utilities on a regional basis at least ten years in advance of construction.
2) Public disclosure of specific plant sites at least five years in advance of construction.
3) Preconstruction review and approval of all new large power plants and transmission lines by a public agency at the state or regional level or by the Federal Government if the state fails to act.
4) An expanded program of research and development, described in detail in the report, aimed at better pollution controls, underground high voltage power lines, improved generation techniques, and advanced siting approaches so as to minimize the environmental problems inherent in existing technology.

The report also stressed the need for adequate notice to the public of utility expansions, and for participation in the planning and preconstruction approval process by environmental protection agencies at all levels of government and the public.

To implement its proposed program the report recommends a coordinated system of state, regional and federal certifying agencies to assure that all substantive environmental protection requirements are met before power plants and transmission lines could be built. These institutional arrangements are designed also to assure that if environmental concerns can be satisfied, construction can proceed in a timely fashion so as to meet the nation's growing needs for electric power.

But this report, the scores before and after it will be as worthless as yesterday's campaign promises unless followed by legislation designed to implement the glowing recommendations. The Nixon Administration has promised to propose some in the next session of Congress, but on Capitol Hill at least, it's a long way from... and the resultant power shortages, its spokesmen wax eloquently on the myth of unlimited electric power production and consumption. In its final chapter, the Report commits the unspeakable horror of suggesting "A broader view is needed in which any possible alternatives to electric power or a decrease in its use are considered as well as the role of energy in our economy generally."

This kind of talk is an obscenity to an industry that as a general rule refused even to use existing, relatively inexpensive technology to minimize its pollution. The sneak-in-quick-and-get-under-construction tactic to circumvent effective public consideration of alternatives is an established fact. The industry has and will continue to vigorously oppose anything that would hamper its self-imposed environmental omnipotence.

When the industry can take time from its relentless nonsense of blaming conservationists for its own incredibly poor planning...
