Marist Community Reaching Solutions to Dorm Problems

Homecoming

Submitted by Don Murphy

During what probably will be the last Homecoming to have its familiar dinner-dance on campus, more-alumni will be roaming the campus this weekend than ever before. Because the approximately 250 graduates and friends who have already snapped up all the weekend reservations in record time, it is safe to assume that next year's homecoming will also become an overwhelming success.

Native is being offered only on Saturday night. The alumni could have made reservations for either the traditional dinner-dance or for the first time, a night at the Last Chance including buffet, bar and beer.

The plus cocktails on Friday, lunch and solid refreshments during the alumni crew race on Saturday morning, football vs. Iona in the 9th Annual Homecoming game, and a picnic Sunday. Some have even asked for the reasons why the demand for the alumni events has become overwhelming.

Council News

by Ed Kissling

On Wednesday night, October 19, the Student Government held a meeting in Room 309 at 9:07 p.m.

President O'Dell's report, it was noted that the S.G. system as a whole and the bingo machines had arrived. The bingo machine will be run by the Gaelic Society for the use of all Marist students.

Ralph Ceredi wrote that he wrote a letter to Student Government chairman Kirk saying that the conference on dorm living was a good idea.

An awakened consciousness for the dorms and their goals in life will never be realized. When speaking of the dorms, Dr. O'Keefe went on to state that one can be misled into thinking that we are taking about a small segment of the community. It is easy to identify the people who flagrantly abuse drugs and alcohol and point to them as the problem. When we realize that ultimately the problem is one of negative attitude we recognize that anyone who displays lack of concern for Marist is part of the problem. This lack of concern and consideration manifested in a multiplicity of ways is what fails to make Marist a livable community.

In any attempt to move toward an orderly life the faculty will support the students. Dr. O'Keefe offered some suggestions for what can be done academically in the dorms and concluded by pointing out that students must alter the conditions in the dorms. Changes in behavior will bring about changes in attitude.

E. Michaelisson then presented the following alternative for life at Marist. Students must take it upon themselves to ask for full time education. We need a radical change in the teaching and learning here to bring about real education. Students must be given the opportunity to make their education an integral part of their existence here at Marist, whether they take the form of business majors running Saga or the budget of Poetryain, Spanish majors living the Spanish culture totally, in whatever manner it expresses itself. Meaningful experience is the utilization of education. We must relate to this campus full time.

For those who must realize that to do this we need people with energy and innovation who know what they want and are willing to get it. Students must wake up and realize we must work.

Tim Healy addressed his fellow students in this crisis of Marist in a crisis. Reform and revitalization are needed to be done away with the extreme in-convocation that has arisen. If we analyze the present structure and bear these problems in mind we must realize that we the students can no longer pass the buck.

Since March, change among students has resulted in a consensus set on change.

Marist Community Reaching Solutions to Dorm Problems

January Study Tour of Mexico

A three credit course on Mexican civilization highlighted by study visits to archaeological and cultural points of interest in Mexico will be offered during the intersemester period in January. For the first half of the trip the students will be based in Mexico City from where they will take daily tours to such places as the ruins of the Toltec civilization at Tula and Teotihuacan, the bullfight and the Ballet Folklórico can also be arranged. The second part of the trip will be spent in the Yucatan Peninsula, Costa of the Maya Indian civilization, with visits to the chief architectural sites, such as Chichen Itza and Uzmal.

This, plus cocktails on Friday, lunch and solid refreshments during the alumni crew race on Saturday morning, football vs. Iona in the 9th Annual Homecoming game, and a picnic Sunday.

Some have even asked for the reasons why the demand for the alumni events has become overwhelming.

The Council News Union has a report on its recent progress. They also stated that they in-
Don't Cop Out

This college generation is not equivalent to the older generation. The older generation realized in a better way what it meant to be a student. They believed that they had to live up to their names. This generation believes that it is okay to cop out. It is okay to say "I'm too tired" or "I'm too busy." It is okay to not study and let someone else do it for you. This generation is not willing to put in the effort that the older generation did.

Campus Folly

Although the quality of the College has not diminished since this school year, it seems that the administration has become more consistent in their decisions. The fact that this is a problem of the College is not new. It is well known that the administration has a difficult time making decisions. However, the consistency of their decisions over the past few months is alarming. The fact that they are making decisions that are consistent with their previous decisions is not necessarily a good thing. It may be a sign that the administration is not willing to change or adapt to new situations.

Commuter's Union News

The Commuter's Union's new office in lower level Chippewa Hall is now open for business. The Union has already begun organizing meetings and activities for the commuter students. The Union is trying hard to keep the commuter students happy and satisfied. The Commuter's Union is also working on a few projects for the commuter students. The Union is trying to make the commuter students feel like they are an important part of the Fordham community.

The Future Marist

Physically, I saw Marist about the way it was supposed to be. The buildings were spacious and well-lit. The classrooms were well-equipped and the laboratories were modern. The library was full of books and had a good collection of periodicals. The campus was clean and well-maintained. The college had a lot of resources for the students to use.

From an academic point of view, Marist was very impressive. The classes were well-organized and the professors were knowledgeable. The college had a lot of research facilities and the students had access to a lot of resources. The college had a lot of extracurricular activities and the students were able to get involved in a lot of different things.

The buildings were very nice. The majority of the buildings were four or five stories high. The majority of the buildings were made of brick and had large windows. The buildings were very well-lit and the classrooms were spacious. The buildings had a lot of natural light and the classrooms were well-equipped.

The college had a lot of resources for the students to use. The library was full of books and had a good collection of periodicals. The library also had a lot of research facilities for the students to use. The college had a lot of extracurricular activities for the students to get involved in. The college had a lot of sports teams and the students were able to participate in a lot of different sports. The college had a lot of clubs and organizations for the students to join.

The students were very happy with the college and they were glad to be there. The students were satisfied with the college and they were glad to be there. The students were able to get involved in a lot of different things and they were glad to be there.
In attempting to compile a complete historical account of Marist College, I have decided to explore the history of the Psychology Department. Dr. Richard P. Kowalewski, the Chair of the Psychology Department, has agreed to provide insights into the evolution of the Psychology Department and its role in shaping the college's future.

Dr. Kowalewski began by explaining the origins of the Psychology Department at Marist College. He mentioned that the department was founded in the 1960s, during a time when psychology was rapidly gaining momentum as a field of study. The department was initially small, with a few faculty members and a limited number of students.

Over the years, the Psychology Department has grown significantly. Dr. Kowalewski noted that the department now offers a variety of programs, including undergraduate and graduate degrees. He also mentioned that the department is home to a number of research labs and facilities, which provide students with opportunities to conduct research and gain hands-on experience.

Dr. Kowalewski highlighted several notable achievements of the Psychology Department. For example, the department has received several grants for research projects, and its faculty has published numerous articles in peer-reviewed journals. He also mentioned that the department has a strong record of placing graduates in top graduate programs and careers in psychology.

Overall, Dr. Kowalewski emphasized the importance of the Psychology Department in the development of Marist College and its role in preparing students for successful careers in psychology and related fields.

The interview concluded with Dr. Kowalewski encouraging students to explore the Psychology Department at Marist College and to take advantage of the opportunities it offers. He expressed his hope that the department will continue to grow and thrive in the years to come.
The College That Built Itself

The College that built itself. This is a story about the construction of Marist College and the Marist Brothers who worked on it. The estimated cost of the construction was $90,000, and was undertaken by the Marist Brothers at a cost of $3,000. This was done by Marist Brothers who worked on the project, and was completed by 1958. The estimated cost of the construction was $216,713, but since the brothers worked on it, the actual cost was $800,000.

A Study in Dedication

One man who donated a large sum of money to Marist College was Brother Paul. He was a successful business man who could have afforded to leave his money to the government or a foreign country. Instead, he chose to donate it to Marist College. In doing so, he demonstrated his dedication to the college and its mission.

Circle Interview: Donald Murphy

Donald Murphy graduated from Marist College in 1967. He was a member of the basketball team and was chosen as the most valuable player of the year. After graduating, he went on to work for IBM. He shared his experiences with us in an interview.

Circle Interview: J. Fred Eberlein

J. Fred Eberlein is a former employee of Marist College. He worked there for many years and was instrumental in the construction of the college. He shared his memories with us in an interview.

Innovations in Ecology

There have been two innovations in ecology: the construction of Marist College and the development of a new system of education. The construction of Marist College was a huge accomplishment for the Marist Brothers, who worked on it completely independent from any government grant. The Marist College system of education was a new approach to education that emphasized the importance of nature and the environment.

Aderholt: On Security

Bill Aderholt is the Director of Security at Marist College. He shared his experiences with us in an interview. He discussed the challenges of running a college campus, the importance of security, and the role of technology in modern security systems.

The Future of Marist College

Marist College is facing a number of challenges in the future. They include the competition from other colleges, the need to attract more students, and the need to stay competitive in terms of academic programs. Despite these challenges, Marist College is well-positioned to continue its mission of educating students and preparing them for success in life.
Vikings Victorious 13-0

The Vikings ran their unbeaten string to four games last Friday night by beating New Haven 13-0 on Leondoff field. The defensive unit played a fine game once again without the assistance of Blank and Joe Johnson for the second straight week. Ken Vitale had a fine day picking off a New Haven pass in the third quarter to stop a New Haven drive deep into Viking territory. Bill Owens also had an interception setting up a Viking score.

The offense had a good day despite the score, running for 223 yards and passing for 4. Many times throughout the game the Vikings stopped by penalties deep in New Haven territory. The offensive line played a fine game opening holes, enabling Davis and Milligan to pick up good yardage.

The scoring in the second quarter after a fine defensive game throughout the first quarter. At the beginning of the second quarter New Haven was forced to punt. The Vikings took the ball on their 29 yard line and marched 76 yards in 11 plays for the score. Krama added the extra point.

Davis carried for 42 yards in the drive and scored the Viking T.D. early in the second quarter. Murray Milligan picked up a big first down in the drive going for 19 yards on a third and fourth situation from the New Haven. The half ended with the Vikings leading 7-0.

The final score of the game came in the third quarter when quarterback Jim Wilkins scored from the one following Emmett Cooke through the middle of the large New Haven defensive line. The drive began on the Viking 20 yard line, Nigel Davis had the big play when he ran 44 yards to the Visitors 22 yard line. Fred Kramka's punt attempt was wide and the scoring ended with the Vikings on top 13-0.

The Vikings threatened throughout the fourth quarter and did score as Murray Milligan scored on a tremendous second effort. Unfortunately, it was disallowed because of a clipping infraction. Shortly afterwards the ball was fumbled.

New Haven's longest drive came in the third quarter as Ray Delittiano carried 27 yards. The New Haven team deep into Viking territory. At the Viking 34 yard line, the Viking defensive unit stiffened and forced a punt. The longest drive drive New Haven was able to mount during the night. Bill Owens blocked a punt by Jack Valen for a touch down for the Visitors. Nigel Davis led both teams running, with 166 yards in 22 tries.

It was a good win for the Vikings as they prepare for their Horizoncoming game against Iona this Saturday. Last week the Vikings were ranked second in the nation, while the Gaels were rated third. It looks as though it will be a good contest as both clubs are undefeated. Last year the Vikings beat the Gaels 26-0 at Mount Vernon Stadium and Iona will be looking for revenge. Tickets will be on sale Thursday and Friday at $2.60. It will be regular price of $2.90 at game time.

Booters Fall

Last Wednesday, the Marist College Soccer Team returned home for its second game of the season and the Foxes responded with a 3-0 victory over Maritime College. B. H. was a real challenge, but the Foxes continued to play well and capitalized on their scoring chances. The Traveling Band is now 4-1 and will meet a very tough Noyack team this week at the season.

The Marist College Crew Team is making final preparations for a trip to Boston this weekend. On Sunday October 31, 1971 the varsity squad will defend the Boston Mayor's Trophy in the Head of the Charles Regatta. Last year Marist won the trophy in record time of 18:00 and broke Syracuse's 1967 record by more than a minute for the 3 mile course.

An analysis of the fall rowing season at Marist indicates this trip to Boston is the goal of the season and the Lightweight and Light-weight) squad. They have been working extremely hard for this race. Their five day practice week included rowing, running and weight lifting. On at least three days a week the squad has double rowing sessions held in the morning and late afternoon.

Head Coach Austin looks ahead to the Boston trip this way: "This year they've changed the classification status which means Marist will be rowing against much stiffer competition. The majority of this year's crew, however, will help us tremendously in a 3 mile race. The heavyweight shell will have each season with at least 3 years rowing experience on the varsity level. In contrast, this is an experiment since the varsity will be rowing in a new Schanbochau in which they've only practiced for a week."

In addition to the heavyweights rowing in this classic, Marist will enter the lightweight varsity and the freshman shell. Overall, I'm very anxious and optimistic concerning the outcome of this weekend's event. The squad has the experience, leadership and ability to return home with the coveted Boston Mayor's Trophy."

Last Saturday, Columbia University came up to Marist with its fine Lightweight Varsity and Freshman Team. The Red Foxes defeated them as they won all of the races. The Freshman took three out of four from the Gryphons with Long dock and then defeated the Lightweights from New York in a fantastic time. The Marist Lightweights also took three out of four from New Haven. All by a fairly large margin.

This first rowing test is hoped to be a good sign for next week as coach Bill Austin will send a freshman crew to the Head of the Charles. The Lightweight boat will hold Frank Hoyler, Jim Cockrill, Tom Petrone, Tim Trecker, Loui Eimotre, Ken Oasey, Andy Albert and Harry Manley.

Traveling Band

The Marist harriers went 3-1 during past weekend by beating Brooklyn College and S. Francis Saturday, after losing to a power packed Toledo team Thursday.

Siena was led by Bockan, shaggin, from Africa, one of the top runners on the squad and was leading the way for the green and gold. Despite losing 23-20, both the team members and coach Len Olson were not downhearted. In the meet for Marist were Jay Doyle (3rd), Marty McGowan (10th), Bob Saloman (8th), John Petraglia (9th), Bob Nelson (10th) and Don Gillippe (11th).

Two days later at Van Cortland Park in the Bronx, the Marist Red Foxes met with the two city schools in a Triple Meet which counts as two meets for each team. Once again, Jay Doyle not a new Marist record was recording the fastest fresh time ever at Van Cortland Park (25:39), while taking first place. Marty McGowan was second, third place, the fifth time he has had this season. Bob Saloman and Bob Nelson were next for Marist, finishing the tough five mile course in the same order. Don Gillippe was next to finish for the Foxes, and became the last Marist man to score. Don has been improving rapidly during the past two weeks and should be in top shape for the important championship races at the end of the season.

by Marty McGowan

Pat Stevens and Patte Rock did very well, both finishing before either Brooklyn or S. Francis fifth man, causing their scores to balloon. The Fast Scores were:

The final Scores were:

Marist: 25
Brooklyn 31 and Marist 29
S. Francis 39. The Traveling Band is now 4-1 and will meet a very tough Noyack team this week at the season.
