The Interim College Council has been established as of September 21, and will be effective until the end of the fall semester. The council was formed to deal with the problems that encompass campus-wide scope.

The members of the Council were chosen in order to preserve the continuity from last year and also to give representation to the faculty, the student body, and the administrative staff. The faculty will treat the proposal according to its normal mode of operation; in the case of the student body, the President of the Student Government, Ralph Currill, will call for a student vote on the proposed College Council and will institute its own mechanics of decision, including the participation of the student ad hoc organization, to be communicated to the Governing Committee of the Interim Council before the end of the fall semester.

The Interim College Council, by means of its committees on Governance, has the task of proposing an effective system for the operation of the permanent Council. It is hoped that the functions of the Council will be determined in the actual scope, responsibility, and powers of the Council. The Council must also determine the manner of appointment or election and the question of proportionality with regard to membership, as well as other important questions involving the establishment of the permanent Council.

The concept of such a Council is new to Marist. The only agency, therefore, that is empowered to initiate it on a permanent basis (particularly if specific powers are shifted to its competency) is the Board of Trustees. The method to be followed in setting up the Council will be as follows: the Interim College Council will draw up a plan which will present most of the Council, vote on it, and then submit it to the President. Before taking action on this proposal, the Council will submit it for consideration to the campus groups which have recognized identity of the faculty, the student body, and the administrative staff. The faculty will treat the proposal according to its normal mode of operation; in the case of the student body, the President of the Student Government, Ralph Currill, will call for a student vote on the proposed College Council and will institute its own mechanics of decision, including the participation of the student ad hoc organization, to be communicated to the Governing Committee of the Interim Council before the

**Record Crowd Greets Kunstler**

The largest crowd in Marist College history, heard counter-trial attorney William Kunstler state the facts about the Attica incident last Thursday. As estimated 3000 people packed the cafeteria to hear Kunstler, a member of the prisoner mediation team, give his first hand account.

Kunstler was reluctant to speak about the story of the rebellion, but he did so as a result of the students' insistence. Perhaps the most shocking fact was that negotiations were in progress when the police entered the prison.

Emphasizing the fact that, otherwise, there was not much to see of the student demonstration, he said that the most effective protest would be a well-organized letter writing campaign to all state officials. He further spoke of demonstrations to be held on Oct. 2 at Federal Prison throughout the country. Urging all people to attend the demonstration on Danbury, he said that prison officials have already agreed to allow people on the ground. President Simon located off Exit 5 on I-84 east.

Kunstler thanks the audience.

**Reaction Continued**

The Appalachian region of the United States has the questionable distinction of being the poorest region, for Presidents Johnson and Nixon have defined poverty by listing in a poverty category any family earning less than $2,000.00. In eastern Kentucky the average income is $250.00. This figure is according to the President of the University of Kentucky, and it is an attitude that he, among others, has espoused.

The history of the rebellion, Kunstler also leaned heavily on the treatment given the hostages during the four days. He willingly admitted that up until conditions for prisoners are not improving. In conclusion, Mr. Kunstler compared the events to what happened in pre-war Nazi Germany. There is little hope, he expressed, for a better life for these prisoners, some had been involved in the prison, and the police entered the prison.

As a result, Mr. Kunstler informed the audience of a pending suit against Gov. Rockefeller and the commission on behalf of the group, which had the police entered the prison.

In the question period that followed his speech, Mr. Kunstler expressed sympathy for the plight of prison guards. He went on to state that conditions for prison guards will not improve.

The average resident student in Marist College pays the business office approximately three thousand dollars in tuition, room, and board. During the past few weeks, some concerned students have been having a series of conferences and meetings to attempt to consider the distribution of this fee that each of us has to work for, loan out, or scrounge up. At these meetings, a great deal of important questions were asked, and a great deal of questions were unanswered. The main question being "where exactly does all the money that we pay, go?"

These meetings were held, and put to a meeting in Fontaine, which brings in about $120,000. As a result, with the aid of the students, the school's budget for this particular house involved, it should be able to pay itself off in three years.

The next project on hand was the handling of the $30,000 which put in a new playground and eliminated the parking lot. On the grounds for the building of a large parking lot. In conclusion, this meeting in which President Foy discussed the money situation in detail was very informative and answered a great deal of questions in our minds.

The budget for the school in the fall of 1972 forecast a $155,000 surplus. This amount goes into the total operation of the school, including both academic and residential areas of Marist. This summer, Dr. Foy and a committee consisting of Joe Brennan, Anthony Campillii, and Dr. Kevin Carolan, had four main projects to improve the campus. The first project on hand was the renovation of Fontaine and the building of a large parking lot. In conclusion, this meeting in which President Foy discussed the money situation in detail was very informative and answered a great deal of questions in our minds.

**The Survey**

Last week The Circle conducted a survey of 1,000 students at Marist College in which the topics of the poll were to be selected. The topics were chosen at random and the results were not predetermined. The survey was conducted on the campus of Marist College and the respondents were randomly selected from the student body. The survey was anonymous and confidential. The results were analyzed and compiled by the polling firm, The Circle.

The survey questions were designed to gather information on a variety of topics. The survey questions were designed to gather information on a variety of topics. The Woman's Abortion Project

The Health and Abortion Project (HAP) was organized in response to the immediate need that was perceived by many doctors and nurses to provide women with the best possible abortion care. Women's Liberation collective provided women throughout the country with the best possible abortion care that is currently available. At that time, abortion care was still legal, but it was not universally available. Many hospitals and doctors were reluctant to perform abortions, and women had to go to out-of-state or out-of-country clinics. The HAP was organized to provide a way for women to access safe and legal abortion care.

Future Methods

As contraception and abortion procedures evolve, so too is the need for new and improved methods. Researchers are constantly working to develop more effective and less invasive methods. Hormonal methods, such as the contraceptive patch, ring, and implant, are being further refined. New techniques, such as the use of heat, light, and sound, are being explored to make procedures more comfortable for patients. The goal is to provide women with a safe, effective, and accessible method of contraception that respects their autonomy and dignity.

Contraceptive Availability

A recent study shows that at least 250,000 children born each year were unwanted at the time of their conception. Figure 1 shows the distribution of children unwanted at the time of their conception by state. In some states, the percentage of unwanted children is as high as 50%. This highlights the need for improved contraception and abortion services.

CIRCLE EDITORIALS

The College Council

The establishment of the House Council marks the first step in creating a more student-centered environment. The council will provide a platform for students to voice their concerns and ideas, and to work with faculty and administration to implement changes.

Letters To The Editors

King

To Hell With Kunster

Dear Editor,

I was pleased that the editors of the Circle devoted a large part of their last issue to King scholars at Marist College. The King memories feelings and the explanation of the King philosophy are important to all of us.

The King scholars themselves are a part of the history of the country. I am proud to help keep the memory of King alive.

Some of the students who I have met are very impressive. They have a great understanding of the King philosophy and are able to express it in a way that is meaningful to others.

Cordially,

King

Kunster

The Leader

William Kunstler, Defender of the Chicago 7, came to Marist College last fall to lecture on First Amendment Rights. Appropriately, he chose the occasion to voice his opposition to the current national political climate.

The Kunstler philosophy is based on the idea that the United States is a democracy and that democracy is a process. Kunstler believes that the role of the media is to report the news, not to interpret it. He sees the media as a tool for distributing information and for informing the public.

Kunster is a fierce advocate of the First Amendment and has never been afraid to speak out against what he sees as threats to freedom of speech. He has been involved in many high-profile cases and has been free to speak even when others have not.

Kunster is a man of courage and conviction. He has always been willing to take a stand and to speak out against what he sees as wrong. He is a true champion of the First Amendment and a true American.
Love Pollutions

At the spring regatta held in April by the Marist Sailing Team, the Marist "Comet" skipper from the USA Sailing Association (USAS) was named the "Skipper of the Year." The skipper, who was also the commodore of the Marist Sailing Team, has been a key figure in the team's success over the past few years.

The team has been practicing hard for the upcoming season, which starts in late April. The team has been working on improving their sailing skills and tactics to be more competitive against other collegiate teams.

The Marist Sailing Team is one of the few sailing teams in the country that is fully supported by the college. This support includes funding for travel to regattas, sailing equipment, and coaching.

Despite the challenges of practicing during the winter months, the team has been working hard to stay in shape and improve their sailing skills. The team has been focusing on improving their speed and agility, as well as their ability to work as a team.

The Marist Sailing Team is looking forward to the upcoming season and hopes to continue their success in the sport of sailing.
