Induction Notices Given to Students

The Selective Service System, December 20, formally issued most of the new procedural rights legislated by Congress. Therefore, we will continue the suspension of these actions until the new regulations are in effect.

The Selective Service Director, Curtis W. Tarr, said that he has decided to reevaluate all those provisions which deal with the second registration before local boards, the guidelines governing re-opening of classifications, and the procedures for appeals to appeal boards other than the Presidential appeal board. The regulations for these proposals are final. The new regulations will be published in the Federal Register on November 30.

Public response to the proposed regulations focused on several issues contained in the sections being withheld. "The depth of thought that went into the regulations we received from the general public and Members of Congress warrants our careful reevaluation of these policies," said Tarr. Most of the regulations on these issues are final. Tarr added, "our local boards will not conduct personal appearance or appeal boards. We do not want to deprive registrants of the new procedural rights legislated by Congress. Therefore, we will continue the suspension of these actions until the new regulations, which are in the process of being published, are in effect.

A faculty committee to deal with the question of whether or not to accept the recommendaton of the Board of Trustees that the Board of Trustees that would be held on Friday, January 21, 1972. The meeting was scheduled and conducted by the Faculty Policy Committee for the purpose of providing the faculty with an opportunity to hear clarifications on the resolution that a permanent College Council be established in the Spring of 72. Members of the Governance Committee presented statements on the composition, scope and responsibilities of the proposed Council, which the faculty reacted to with both support and concern.

The faculty raised questions regarding the rationale for the stated composition of the College Council, the connection between the various affairs considered by the Council, and the degree to which the Council would take as either advisory or legislative in case of confrontations among the various groups and factions represented. The aspect that created the greatest discussion during the meeting was the faculty and the Governance Committee was on the limitations or lack of same that would or should be placed on the Council. Without definite assurance of what the implications and results would be, a Council without limitations in scope, the faculty is hesitant in wanting to act as a Council. The Governance Committee maintains that it would be impossible to foretell just what the limitations can or will be, but adds that the proposal is not an ultimatum and can be modified or reconsidered upon the recommendation of the faculty that committees propose for presentation. In an acceptance of the proposal by the Faculty Senate, the recommendation would be held for another two years. Other members of the Council are: (a) the Council is not interested in the period; (b) the Council is not interested in the period; (c) the Council is not interested in the period; (d) the Council is not interested in the period.

Don't Cop Out

by Fr. C. Grattan

"Lee, July 10, 1972. Your self-confidence and love of life are admired by our friends in Parrot Jungle. They give you the opportunity to have a happy life and to contribute to the betterment of our society. This role is meant to involve more than just one person, but would bring results beyond belief. You need not be a student in any curriculum, but would need to understand your environment and appreciate the beauty of your surroundings.

Last November a Marist student, who knew my brothers and sisters, observed their service in conformity with one's ideals. This role is meant to be a part of the education but in consideration of the very good program has volunteers who've been trained. People can live lies so long that they don't realize that they would find out that their 'electric eye' was really a plain old lie.

After those few days were filled with fibs, or rather lies, but then it's funny to me to wonder whether or not these people knew they were teaching wrongs.

The important thing is that the potential of the Lay Volunteer is little to expect in financial as Chapter 33. Also he is provided round-the-clock care, and into the field of drug abuse.

"Someday it will be.

We just call him God for short. His circle is the desire and that of a number of concerned students, who have not yet had a chance to speak. We are very excited about this Council, and in the hope that it will be able to speak.

Volunteer.
