The present editorial staff announces that Bernard R. Brogan will be Editor-in-Chief of the Circle effective February 16. The new editor-in-chief has been on the staff of the Circle for two years, serving as lay-out editor for this last year.

During the past year, Mr. Brogan's energetic work as a Circle interviewer, as well as his organizing abilities have been invaluable to the current Circle staff. He was also most active writing features, and editorials. Besides his work on the Circle, Mr. Brogan serves as treasurer of the Gaelic Society and is a member of the food committee. With Mr. Brogan, the Circle’s lay-out and make-up were soon one of its outstanding features. Mr. Brogan started on the Circle early in his first semester as a freshman in the capacity of beat reporter, and assisted 1970-71 editors Joe Rubino and Sal Piazza in layout and make-up of the paper. Soon after, Mr. Brogan took over the full-time job on lay-out and paper make-up. His initiative, imagination and reliability led him to the position on the Circle's editorial board of 1971-72.

Under the present editorialship, Mr. Brogan has expanded his journalistic range to include writing and organizing four page feature specials that appeared in the campus weekly. The present staff feels that with this knowledge and experience he best fits the title of Editor-in-Chief of the Circle, 1972-73.

KATHY HARVEY

Also announced as an associate editor in Kathy Harvey, a sophomore English major and second year Circle staff member. She has worked as a news reporter, feature writer, proof reader, and typist. Her position as an associate editor will involve the four page interior feature section and will also serve as a member of the editorial board. In view of her experience in the theatre, Miss Harvey will function as the critic for productions put on in the area of dramatic art. Besides contributing to the Circle, Kathy is also involved in Children's Theatre, Theatre Guild, Literary Magazine and the Steering Committee of the Residence Convocation.

ANNE TRABULSI

Anne Trabulsi, a freshman, has been an invaluable asset to the Circle since September. She began with the thankless job of staff typist and eventually rose to the position of a feature writer as well as news reporter. Although Miss Trabulsi has been at Marist for less than one year, she has already involved herself with many aspects of campus governance and life. Anne is currently a member of the Steering Committee of the Residence Convocation. She is also a member of the food committee and has been instrumental in arranging student opinion. Miss Trabulsi will share responsibility as a member of the Circle's editorial board, will serve as a feature writer, and aid in the mechanics of the paper.

J. FRED EBERLEIN

J. Fred Eberlein will be the associate editor in charge of developing news stories. Though Mr. Eberlein has only been here a short time, he is already well known on campus. He is a member of the Interim College Council and has worked on this year's Circle as a news writer. Fred is an efficient worker who goes behind the scenes in order to bring about complete journalistic coverage. His work in formulating a new governance structure for Marist has prepared him to take over coverage of the campus political scene.

Kathleen and Anne and J. Fred will be invaluable in the development of the Circle's feature section and will also serve as associate editors of the supplement section of the Circle. Their diverse experiences with the different groups on the campus, as well as their ability to view happenings from a fresh outlook will be invaluable in the development of feature stories. Stuart is a commuter student and will be able to better incorporate the views of that segment of the community so long forgotten by the Circle in past years. As a member of the editorial staff, Mr. Gross wishes to open the Circle more to the participation of the entire community and plans to increase the faculty's participation with the paper.

ED KISSLING

Freshman Student Government Representative, Ed Kissling, has been named associate editor in charge of business and fineness. In addition to this, Mr. Kissling will contribute by writing news and feature articles as well as editorials. Ed Kissling brings to the Circle his excellent sense of organization and efficiency. It was Mr. Kissling who was instrumental in getting the freshmen class organized.

Ed has served on this year's Circle staff in the capacity of a news reporter. For the future he hopes to be able to do investigative reporting, thus bringing to the campus a broader scope of current events and their consequences.

Bernard Brogan

The present editorial staff announces that Bernard R. Brogan will be Editor-in-Chief of the Circle effective February 16. The new editor-in-chief has been on the staff of the Circle for two years, serving as lay-out editor for this last year.

Convocation a Success?

At the Convocation held on October 17th to change names of departments and to give awards, the Department of Psychology was selected to give a good deal of the credit. It is argued that this is because the Department of Psychology has shown a great deal of interest and involvement in the academic community. The Convocation dealt with two major problems on campus: incompatibility of the departments and the lack of unity among the students. The summer of 1971, psychology, with two aims in methodological approach to psychology and two aims in methodological approach to psychology, was the summer of 1971. A Fordham law professor has charged that the unborn fetus is a distinct being, every self. It does not believe in the antagonistic or competitive nature of the fetus, or children, and thus the fetus cannot be treated as a separate being. They are treated as being one, the whole being, and the law is applied.

They relax to classify people, or analyze them. Each person has his or her own way of looking at the world, and we cannot use someone else's way of looking at the world.

Ward's Words

The Fordham law professor has charged that the unborn fetus is a distinct being, every self. It does not believe in the antagonistic or competitive nature of the fetus, or children, and thus the fetus cannot be treated as a separate being. They are treated as being one, the whole being, and the law is applied.

Report on a New Experience

Increasingly discussions regarding the college curriculum have overlapped with discussions of student involvement in the community. For this reason, it is essential to provide appropriate education in the college curriculum.

The original plan attempted to introduce the introduction of courses in political science and political economy. This was done because the rules for the majors were not defined at the time of the original plan. However, the rules for the majors were not defined at the time of the original plan. This was done because the rules for the majors were not defined at the time of the original plan.

Foxes Bow to Sacred Heart and Monmouth

Foxes Face Encounters by the M.S.I.

This weekend the basketball teams will travel to Long Island to meet Southampton (Friday) and Dowling (Saturday), in two key Central Atlantic Conference games.

The Red Foxes 4-1 in the conference are currently in first place, with Southampton 3-2, Dowling's 2-3 and Fayerweather's 1-4. Last week, Marist split a pair of outings. First the Red Foxes defeated Fayerweather 70-64 at home in a conference affair, and then they traveled to West Long Branch, N.J. where they dropped a 74-66 non-conference decision. Marist continues to be one of the leaders in defense (7th in the N.A.A. and 11th in the N.C.A.A.) with a .645 defensive average.

Senior Captain Joe Scott continues to lead the Red Foxes in scoring with 17.2 average, followed by seniors Clark 12.0, and Brian McGowan 11.8. With the loss of 12 points against Southampton raised his overall total to 1023 career points, raising him into the first place all-time scoring from four and five years ago.

Bill Spemla (Class of '71).

The Southampton College field hockey team is one of the biggest fronts in the nation. They are led by 6'7 Junior Center Parnell Campbell with a 13 point average. Earlier in the season the Red Foxes defeated Dowling 85-64 in Poquettive.

Harriers Ready for Sat. Opener

by Richard Stevens

The Marist College Indoor Track team opens its 1972 campaign this Saturday, February 5. The track team, which has been working out daily since the end of last season, is competing in the JV division against such teams as Adelphi, University of Bridgeport, Brooklyn College, Fairleigh Dickinson, Hofstra, New York University, Pace College, Southern Connecticut, and Central Connecticut.

The versatile John Jasinski may find his home here. Best nucleus of the team will be our leaders in the hurdles, flat events, and throws.

Bob Nelson. Now it is hoped and expected that the Marist team will be able to take a close look at the running times of the distance men when meet results are reviewed. The distance runners have looked steadily better and are expected to match their "peak" in the CTC Championships on March 11.

Although the nucleus of the team is small, the men out are seasoned veterans. For the 1972 spring season the best overall possible, the weight men are led by Bob Nelson and John Jasinski, an 11 lb. powerhouse who can sprint and also do distance chases very capably.
