Despite an energy crisis, Champagnat Hall manages to illuminate the campus.

All-Rolled Out
By Jeanne Caliguiri

A sudden realization that all the anticipation, planning, and enthusiasm that culminated on the weekend of Nov. 16-18th, has now settled into a sigh of relief. More than 500 exhausted students of House 1 had long anticipated the relief gained by the Thanksgiving Vacation and thrived on the relaxation offered after successfully achieving the plans of rolling a beer barrel 250 miles.

There were many highlights for the students individually but collectively there were few moments which were shared and will be remembered for quite a while. One incident which will be remembered is the gracious hospitality by Anheuser-Busch as the barrel was rolled down Route 9 in Bergen County, New Jersey.

One other event that not only House I, but the whole Marist College campus was able to participate in was the last half hour of the roll-a-thon. As the barrel was rolled down Route 9 toward the campus a police escort obligingly assisted all who joined in the massive parade of cars and students as the barrel was received at Roosevelt’s Estate in Hyde Park.

Although it was anticipated that the barrel would arrive at approximately 3:00-5:00 p.m. on Sunday, it did arrive at Roosevelt Estate at 3:15 p.m. on Sunday. This delay was due to the trouble they had in the Bronx with a broken axle. There were several other occasions in which the axle gave the rollers trouble or the frame, on the verge of breakage, was at fault. Also, the fact that Bergen County, New Jersey, would not allow the barrel to be rolled in the county hindered somewhat a time lapse. Hence, a reconstruction of an addition to the route in order to fulfill the designated mileage to break the world’s record.

Another occasion, the final of the previous events, the victory party which occurred on Tuesday night, Nov. 30th, was the visually and gastronomically the feelings and excitement of House 1. At this event the money collected from the pledges was given to the American Cancer Society. Likewise, the American Cancer Society awarded each participant of the beer barrel roll-a-thon for their courageous efforts in their fight against cancer. The festivities began when the first of the one and half kegs was tapped. A good time was had by all.

Petition For Boycott Grows
By Tom Page

The petition for the boycott of all lettuce which does not have the United Farm Workers Union seal has been going around the campus for quite a while. Thus far there have been approximately 20 resident signatures accumulated. This work has been done by a group of concerned students here at Marist. Their goal is to get enough signatures which will represent a majority of the resident students. This petition will then be presented to Jim Ladota, manager of Saga Foods.

Marist Affected By Fuel Shortage
By Maryanne McQuade

Marist, like other places, is beginning to feel the affects of the fuel shortage, which is plaguing homeowners, businessmen, and government officials across the nation. The shortage, due primarily to a lack of oil being exported from the Middle East, is greatly taxing our own oil supply, and has caused serious setbacks on the amount of fuel which is available.

The administrators of Marist are seriously concerned as to how the shortage will affect Marist. As it stands right now if we consume fuel at the normal amount we will be out of oil by February. Recently the Inter­dorm Council held an emergency meeting to discuss what possible solutions there were to this problem. The major alternative given was a lengthening of Christmas vacation from four to eight weeks. This solution would get us through the largest part of the cold period. Lengthening the vacation would mean the addition of two more days to the end of the school year. Since this seemed unnecessary to all other possible alternatives had to be suggested and discussed.

The final decision came with a conservation program suggested by the Council. This school will remain open during February with a possibility of closing for three days during the month if necessary. The decision was based on the hope that the students. To achieve this, certain areas of the campus will be covered again since the main campus is considered to be too large to find people when they are in their dorms. Students who are optimistic in reaching enough signatures.

Jim Ladota has stated that if a substantial amount of the resident students sign the petition, he will honor it. However, the boycott will probably not go into effect until next semester. We hope Saga’s food orders go out one month ahead of time.

Marist Participates In Blood Bank
By Gregory Conmach

On November 15, Marist students, faculty and staff once again participated in the semi­annual blood bank drive sponsored by the Greater New York Blood Program and the Greater New York Chapter of the American Red Cross. The program sponsored by the Red Cross has collected blood for the past eight years collects annually an estimated 300,000 pints of blood. The blood program which operates in the seventeen counties of Greater New York and in New Jersey comes to Marist twice a year. The program which represents the efforts of the two groups combined collect annually an estimated 300,000 pints of blood, and together with the community blood centers of Greater New York work to provide three services in the area of blood processing, they are:

1. To obtain an adequate supply of donated blood.
2. To collect it in the area centers.
3. To provide an orderly system for making it available and when needed.

In collecting 300,000 pints of blood yearly this makes the organization the biggest in the world, while it also operates one of the foremost research centers in the United States which carries on the continuing research on many components that make up the human blood and process five of these centers for the treatment of hemophilia, anemia, leukemia, burns, and special uses in surgery.

The benefits derived from donating blood not only affect the donor, but members of the donor’s immediate family. By making the donation annually you give not only the donor his family unlimited blood transfusions but you save from the date of donation. There is never a charge for the blood. There is an immediate benefit to you which covers the processing of the blood and the distribution of blood should the situation arise.
Students were requested to fill out Marist’s food service which was very good to poor respectively, at dinner last month. Students completed processing the four surveys, which included on the survey and most were also rated between good and fair, with ratings of 1.5 and 2.5. Students took advantage of the food service, except for very little distortion. With a 141 square foot room, it can be a very enjoyable-meal with 147 votes. **200 Club Arrives To Aid Handicapped**

By Deborah Turner

There are signs and posters all over campus announcing a new addition to the "200 Club." This new addition sounds very good but the price of admission sounds too high. It is a $10 membership fee for all students who are partially blind or blind. The club was started for many reasons but mostly to help those who are presently reading to the visually impaired.

The manufacturer of the new addition to the "200 Club" is the San Francisco School for the Blind in San Francisco, California. They manufacture and sell a variety of products, including LVA 840 (14 inch across θ,320 characters on a 3 inch tape), PC-300 (8 inch across θ,200 characters on a 3 inch tape), LVA 800 (8 inch across θ,200 characters on a 3 inch tape), PC-300 (8 inch across θ,200 characters on a 3 inch tape), and a 3 inch tape, all of which are produced in the United States. The LVA 840 is designed for use with computer terminals and printers, and it can be used with a variety of software programs. The PC-300 is designed for use with personal computers and can be used with a variety of software programs.

**Epidemic Proportions Reached By America’s Social Diseases**

By Lynne Osborne

It has been referred to by a "social" disease, and that is very much in mind, and the group that is most at risk is the underprivileged. In America, most of the people who are considered to be underprivileged are African Americans. African Americans are at a higher risk of developing diseases such as diabetes, cancer, and heart disease.

There are many factors contributing to this issue. One of the main factors is poverty. Poverty can lead to a lack of access to healthcare, which can result in an increased likelihood of developing diseases.

Another factor is lack of education. People who are less educated are less likely to know about preventative measures and are more likely to engage in behaviors that increase their risk of developing diseases.

Lastly, environmental factors play a role. African Americans are more likely to live in areas that are polluted, which can increase their risk of developing diseases.

In conclusion, African Americans are at a higher risk of developing diseases due to poverty, lack of education, and environmental factors. It is important to address these issues in order to reduce the impact of diseases on this population.

**Bureau Looks For Consume Fraud**

By Gregory J. Garville

Consumer Fraud is a very serious issue that affects many people. It is important to be aware of the signs and symptoms of consumer fraud in order to protect yourself from becoming a victim.

Some common signs of consumer fraud include:

- Being offered a product or service that is too good to be true
- Being asked to pay in advance for a product or service
- Being pressured to make a decision quickly
- Being told that they will receive a reward if they agree to a request

It is important to be cautious when dealing with unfamiliar people or businesses, and to do research before making any decisions.

In conclusion, consumer fraud is a serious issue that affects many people. It is important to be aware of the signs and symptoms in order to protect yourself from becoming a victim.

Letters To The Editor

To the Editor,

The recent issue of the College News has been disappointing. The article about the new student residential program was not informative, and the report on the solid waste reduction efforts was not helpful. In my opinion, the college should be doing more to address these issues.

Sincerely,

[Signature]

Dear Editor,

I would like to express my disapproval of the recent article on the history of Marist College. The article was inaccurate and did not provide a fair representation of the college's past. I believe that the college should do better in providing accurate information about its history.

Sincerely,

[Signature]

Solidarity Workshop

BROTHERS & SISTERS:

Solidarity Workshop and the Black Student Union are hosting a workshop on the history of the civil rights movement. The workshop will be held on [date] from [time] to [time] in [location]. All students, faculty, and staff are welcome to attend.

Sincerely,

[Signature]

Where Have All The Flowers Gone?

by Mitchel Wyckoff

When all the flowers gone?
Long gone! Long since.
As I look at all the flowers in the world and relish my days, I find myself asking, "Where have all the flowers gone?" I find myself pondering this question to myself for I find it very touching.

The flowers do exist, but where are they? We must admit that this is a very difficult question to answer. The flowers do exist, but the question of where they went is difficult to answer. The flowers are gone, but where are they? We must say that this is a very difficult question to answer. The flowers do exist, but the question of where they went is difficult to answer.

Sincerely,

[Signature]

New World's Fair coming in 1974

The theme of the 1974 New World's Fair will be "Progress, Understanding, etc." It will be held in Seattle, Washington. The fair is expected to attract millions of visitors from around the world.

Third Year View

By Bob Nelson

Even the day I arrived in Geneva, I was impressed by the...
Little Red Foxes Romp

The Marist College J.V. hoopsters look like they are heading for an excellent season. They easily defeated the Iona J.V. in their opening game 76-61. Excellent execution of the defense and tough defense kept the Red Foxes in control all the way. The first period saw the spark plug of the team,switched off and the game lost its rhythm until midway through the second quarter when the Foxes took over and coasted to a big win.

The J.V. showed great promise in its first game and showed a well-drilled attack, hitting the open man, good shooting and strong rebounding. Cirasella was Marist's top scorer with 28 points and he and Murphy held both 7 rebounds each. Murphy hit all 10 free throws as he led in that department with senior Jim Osika.

The first half was a see-saw battle as the lead changed hands many times. Tenacious defense and percentage shooting kept the Red Foxes close. It was a low scoring first half ending with Iona on top 35-30. Freshman Kevin Bass scored 12 of the Gaels first half points. Marist's scoring was balanced by the two leading scorers, Allen Fairhurst with 8 and Joe Nibbia with 6.

The second half was closer than the first half. The lead continued to exchange leads as no team could break the game open. The Red Fox deliberate offense kept finding the open man and their excellent defense kept the Iona scoring down. Clutch performances by Keve Bass, Joe Cirasella and Ed Conlin helped build an 8, and 7 points respectively. With 1:19 left to go in the game the Red Foxes led 67-64. A jumper by Kevin Bass brought the Gaels to within one point. The Red Foxes had the bad again with 1:19 to go. They failed to score and Iona brought the ball down with a clutch foul by Ed Conlin which was the go ahead point.

The final score was 70-67.

This past week Marist's Intramural Basketball program began.

INTRAMURAL NOTES

On Monday, Nov. 18, New Paltz State defeated Marist 30-7 in an eleven year series with Marist and split in last year's two meetings, King's has a new coach in Hal Smith, who has been promoted from a successful tenure as J.V. coach. The King's veterans are 6-2 Karl Conlin, Bob Miller, and John Perry. They were selected to the Central Atlantic College Conference Soccer All-Star Team. Hayes is a lineman, while McGraw is a halfback.

Hayes, a former Orange County Community College star, pumped in 13 goals this season, giving him a two-year total of 24 goals in 21 games this season. His highest goal-scoring game was against Dowling College in which he scored three goals in leading Marist to a 1-0 victory. In only two seasons, Hayes has become the leading scorer of all the Marist record books. During the 1973 soccer season Hayes was Marist soccer co-captain. The 1973 conference season was a repeat of the 1972 team for Hayes. McGraw is a product of Island Trees High School. Lewittown, N.Y. John's finest conference performance came against King's College (N.Y.) in which he scored the game winning goal. John was fourth on the team in scoring with 13 goals.

Of McGraw and Hayes, Coach Howard Goldman calls them: "...a pair of big game performers. Both Ken and John have the ability to rise to the occasion against tough competition."

Named as honorable mention selections were junior fullback Tom McDonald of Rochester, N.Y. and sophomore goalkeeper Phil Palladino of SeaFord, N.Y., and halfback Bill Putra of Wappingers Falls, N.Y., also a sophomore.

THIS WEEK IN MARIST SPORTS

TEN YEARS AGO... Coach Tom Wade's Marist College Basketball Red Foxes won their initial game of the season by dumping visiting Western Connecticut State 77-73 at the Poughkeepsie High School Gym. The North Road Raiders went into the contest with an 0-2 record, having lost to King's and Iona. Later in the week, Marist College took it on the chin, dropping a 68-66 overtime squeaker to Yeshiva University on the winners court.

THE MARIST COLLEGE WRESTLING TEAM tied Yeshiva University 30-30 at Yeshiva.

FIVE YEARS AGO... New York University scored a 37-7 victory over Marist in the season's opening wrestling match. Ken Thompson netted 15 points, 17 in the first half, to lead Marist to an 8-7-3 decision over Queens in the conference battle at the Westchester County College Gym. Lee's in the week, a basket by Ed Traylor and a free throw by Jerry Pastrate in the final minute gave Bloomfield a 71-68 victory in a Central Atlantic College Conference game. Also Iona, rushed to a 38-point halftime lead and coasted to a 100-52 victory in a non-conference game at Mt. St. Michael's High School in the Bronx.

ONE YEAR AGO... Marist ripped King's 119-77 in a conference basketball game. Later in the week Brooklyn beat Marist 81-71. Jim Osika scored nine of his 15 points within a seven minute period late in the second half when the Red Foxes had nearly rallied for a 23-18 victory in a conference game at Mt. St. Michael's High School in the Bronx.
