Champagnat Heat Problems

Temporary solutions and long range suggestions on the winter freezing conditions of Champagnat Hall have been reached.

The real problem of the crisis lines in the poor construction of the building, its insulation and ventilation systems. For the past week, the heating systems have been on and pushing full capacity. A survey of the building showed that the cold air was rushing in from open cracks in the windows and other areas by the poor construction of the building. Especially the upper half and the windows which were originally intended for washing only.

The main problem is the inability of the north side of the building to withstand the high winds and below-freezing temperatures.

Student action came Monday after almost all north side residents complained about not being able to sleep, study, or live in their rooms on Sunday night. When the wind chill factor drove temperatures to 25 below zero.

After unsuccessful attempts to contact the right people, Jim Landale and Terry Cubtin organized a student committee to study the Hall, and try to settle the issue. A Monday night meeting of about 150 students was held.

"Nothing can be done to prevent another cold night" prevailed. Students were advised to sleep in blankets from the campus. The Campus Center could have been opened if anyone wished to use it. It was a unanimous feeling, however, that something had to be done to correct the "tomorrow night inconveniences."

Students at the meeting offered many suggestions ranging from "Let it be" attitude to more radical suggestions, and decided to form an ad hoc committee to draw up a proposal and to meet with President Foy and the maintenance department.

After the meeting, the committee formed which included Landale, Cubtin, John Lyons, Bill O'Connell and Bill Owens, Thomas Strain, Joseph Rasser, Patrick Martin, and Raymond Berger also consulted in drawing up the proposal of the students.

The committee met after temperatures during the cold spell to form the ad hoc committee to propose a proposal and to meet with President Foy and the maintenance department.

The immediate problem is the Champagnat Hall which is most affected by the extremely low temperature during the cold spell.

Residence Living

By Jim Keegan

Since September, Marist has been faced with many problems concerning the resident student population and the direction in which it is heading. Many myths have been created concerning students dropping out, dormitories being closed, and financial disaster on our doorstep. Before we do our part, however, it is important that we seriously analyze the problems facing us.

It has been said that a good number of resident students have been leaving the campus. Consequently, students have become fearful and as a result a dormitory will have to be closed down. This is unanimously against the financial loss. To begin with, there is some truth behind students moving off campus. The actual number of resident students who did leave number thirty-eight. This puts the total number of resident students at 838, when the capacity of all six dormitories totals 978.

With thirty-eight students moving off campus and another twenty students who are now living at home, graduated, working at Dover Plains, married, or doing Psychology work-study, the need to make up the financial deficit that has been created by their loss is becoming evident.

The type of student leaving the dormitory, or the college for that matter, is not the college's "best" student. The average cumulative index of the student withdrawing from Marist is a 2.05 which is not the student moving off campus. It is a 2.3. For the resident student, the average is between 2.6 and 2.7. This does not necessarily mean that these students who go home are academically inferior to those who stay, but it does somewhat imply that a good number of the college's resident students are academically involved and staying in the dormitory. Another rumor that must be cleared up is that of a dormitory being closed for room assignments for resident students leaving. According to Residence Director Fred Lambert "No dormitory is scheduled to be closed down for next semester and if students from the Culinary Institute and Delphina Community College wish to live on campus they may do so provided there are the rooms."

Unlike most other small private college resident students living at Marist is following a unique pattern. Most of the other colleges in our category are closing dormitories and desperately trying to fill empty rooms. However, Marist has expanded itself in the past by opening new dorms such as: LaPoint, Diamond, and Gregory. Although some people might be concerned that they're not financially disastrous move to keep these new dorms open, the three latest dormitories have proved to be an interesting alternative in living at a time when the future of the small private college has become a major problem in American education.

Upon reaching the aforementioned we tend to think of residence life at Marist as making great progress. It is true that the resident life at Marist has come a long way in only a year's time, but the progress leads to the minds of the students, faculty and administration who see great value in residence life.

RESIDENTS -

Now it is your chance to have a formal picture taken if you wish. The photographer from Classic Studios will be here to take them for you. There will be no charge to take them, and you can order special packages from him if you want. These can be taken in a cap and gown or a suit or your favorite dress. He will be here on Feb. 27, 1973 between the times of 10:00 a.m. - 2:00 p.m. and 3:30 p.m. - 7:00 p.m. in room 110 in the Campus Center.

Space Planning

By Brian Morris

The recommendations of the Space Planning Committee are now in subject to the scrutiny of any interested member of the Marist Community. The committee, composed of Joe Brogan, Fred Lambert, Ann Hoyt, Kevin Caviness, Andrew Pavelko, and Bill Roberts, has submitted a four page, seven point plan which if enacted would substantially improve the present use of building space.

Hinged primarily on the need to relocate the library to make room for expansion, the recommendations would alter space configurations in Donnelly, Fontaine, and Adrian halls and might possibly affect use of Champagnat's first floor as well. The committee has suggested that the library be moved to Fontaine hall where in expansion needs could be more easily met. The security and comptroller offices in Fontaine would be given over to the Library and Mr. Adelstein and Mr. Russell who would relocate their offices in another building. The art program would move its activities from Fontaine to the Donnelly library cavity. In addition, President Foy, the A.T.V. center, and the computer centers would take up the area vacated by the Library. The committee also envisages that informal classrooms would be created in the unused parts of the Donnelly library cavity.

Since the computer center would under the committee's scheme, be transferred to Donnelly Hall, that portion of Adrian which now houses the computer center would be open for other purposes.

The committee recommends that maintenance make up for any anticipated deficit in the present library, noting that the increase in the present library might possibly be acceptable as is, perhaps with the addition of a small book and architectural education. The committee also envisages that the overcrowding of Greystone might be alleviated if History would relinquish some of its St. Peter's space in the move to Donnelly.

The final move made would be to place what the committee views as undesirable for residence purposes also been suggested for remodeling.

The hope of the committee is to reach a decision on the broad outlines of the plan. Perhaps it may be acceptable as is; perhaps certain improvements would be made; perhaps the entire plan is overreaching. One thing is certain, however, whatever happens will back can help the committee. The hope of the committee is to reach a decision on the broad outlines of the plan. Perhaps it may be acceptable as is; perhaps certain improvements would be made; perhaps the entire plan is overreaching. The hope of the committee is to reach a decision on the broad outlines of the plan. Method: The Think Tank is conceived as an alternative to traditional think tanks. Its purpose is to provide an environment where students can engage in critical discussion and analysis of political, social, and economic issues. The Think Tank is open to students from all majors and backgrounds, and it aims to foster a spirit of intellectual inquiry and debate.

The Think Tank meets weekly, typically on Tuesdays, to discuss a range of topics. The topics are selected by the students, who are encouraged to bring their own perspectives and ideas to the discussions. The meetings are led by a faculty sponsor, who provides guidance and support.

The Think Tank also organizes guest speakers and panel discussions, bringing in experts from various fields to share their insights and perspectives. These events are open to all students and provide valuable opportunities for students to engage with professionals outside of the classroom.

In addition to the weekly meetings, the Think Tank sponsors a variety of other activities, such as debates, writing contests, and public service projects. These activities help students to develop their critical thinking skills and to apply them to real-world issues.

Overall, the Think Tank is a community of students who are committed to exploring and understanding the complex and challenging issues that shape our world today. It is a place where students can come together to learn, to grow, and to make a difference.
**Marist Indoor Track Team**

The Marist indoor track team made its strongest showing yet in the Collegiate Track Conference (CTC) Saturday at Flemington. The Marist relay teams placed fourth in the CTC Division. The two Marist relay teams ran a 3:09 and won, and the team also defeated the Red Foxes because of center Jeff Rush’s fourteen points and the Red Foxes in the first half. The Hawks were led by Gary Massa with 23 points and Jeff Rush’s 10 points.

In the first half, the Hawks seemed to keep pace with the Red Foxes because of center Jeff Rush’s fourteen points and the Red Foxes in the first half. The Hawks were led by Gary Massa with 23 points and Jeff Rush’s 10 points.

But on Saturday, the Red Foxes met a strong and talented Dowling College starting five, who are currently ranked seventh in New York State and seventh in the nation by poll of 14-2. The “Golden Lions” employing a disciplined defense game, which stopped the outside shooting of Jerry Finestone and Dr. John Dillon, controlled the game in the second half. At the end of the game, the Red Foxes figured on a good running pace with Dowling sparking small and dropped them out of contention for the league championship. Dowling boosted their league record to 8-4 and were led by Kent Johnson’s 31 points.

Despite the loss, the Marist showed strong potential and poise for such a young team. They have strong potential and poise for such a young team. They have team unity which will make them truly fine all-around team effort.

**Fontaine Openings**

For those of you who are not undecided as to where you will be attending college and you are accepting applications. Upon receipt of the application by the house, interviews will be conducted. These interviews are not meant to discourage any person from applying but merely to give prospective residents a genuine interest in contributing to the expression of the University. The House, i.e. to create a good up- to-date home suitable for the pursuit of both academic and social endeavors.

We do not claim to be a ‘living- learning experience’ but as most people who are familiar with Fontaine will agree, the House offers a living style unique to the Marist dormitory system.

The frontcourt is very strong in talent and depth besides Murphy and Sullivan, they now have from Yonkers H.S. 6’6 Ron Glackin. Ron has just started playing this semester and has already contributed much to this team’s success. He is a strong rebounder and has the second highest point average per game with 12 points. The team in Marist history and gives great promise for the future. The team in Marist history and gives great promise for the future. This well-balanced team is led by scoring and rebounder 6’3 Kay Murphy. Ray is a dedicated player and a true student of the game. He is averaging 14.9 points per game with 12 rebounds and is a former Holy Cross high school star. Another former Holy Cross star is 5’11 Steve Sullivan. Steve is a tough rebounder and has a mean outside shot, currently averaging 8.6 points per game with 5 rebounds. The guard that makes this team go is 6’2 Joe Nebbia. He is averaging 15 points per game and is tied for the team lead in assists. Joe comes to Marist from Don Bosco H.S., Ramsey, N.J. which has sent former greats Joe Scott and Bill Spilka to Marist. Another smooth guard is 6’3’ Rich Schaner, from St. John the Baptist High School, Brentwood, N.Y., now averaging 7.7 points per game. Rich is also known for his great defensive work. A solid back to those guards is 6’6 Sky Klusman. Luckily is very quick and has a great ability to shoot the ball in any set.

One of the many reasons for the J.V.’s success - Fresh Joe Nebbia.

**Matmen Defeated**

Giving away three weight classes by forfeit, the wrestling team suffered defeat at the hands of Hunter College, 34-0. This has been the second consecutive season the members of the Ad Hoc Committee.

The other team

By Jim Donnelly

I wanted to write this article to give credit to a team that has not been given enough recognition - The Jayvee Basketball Team. This talented group has put together a solid 11-4 record against some real tough competition. The long hours of conditioning and practice has paid off in some impressive wins over some name schools like Manhattan and Iona. This team is probably the best Jayvee team in Marist history and gives great promise for the future of basketball at Marist.

This well-balanced team is led by scoring and rebounder 6’3 Kay Murphy. Ray is a dedicated player and a true student of the game. He is averaging 14.9 points per game with 12 rebounds and is a former Holy Cross high school star. Another former Holy Cross star is 5’11 Steve Sullivan. **Vanity Splits**

Last Wednesday night, the Red Foxes (6-4) battled the "Hawks" of Colgate (6-13), at Dutchess Community College. The game was sparked with hands of Allen "The Touch" Fairhurst and his running mate, Jerry "The Joker" Finestone. In the first half, the Hawks seemed to keep pace with the Red Foxes because of center Jeff Rush’s fourteen points and the Red Foxes in the first half. The Hawks were led by Gary Massa with 23 points and Jeff Rush’s 10 points.

But on Saturday, the Red Foxes met a strong and talented Dowling College starting five, who are currently ranked seventh in New York State and seventh in the nation by poll of 14-2.
