At the end of last semester, the Marist Student Community elected a new Student Government and College Council. This year, several new representatives to the College Council, 250 students voted in the Student Government Elections, whereas only 483 students voted in the College Council Elections. The reason for the difference in the number of students voting in each election lies in the fact that a great many students still do not realize what the College Council is or the purpose of its existence.

The results of the Student Government Elections were published at 4:30 p.m. on that day by the Election Commissioner. Mr. Fred Lambert and Mr. Joseph Brown were present for the tallying of the student government votes. Other members of the election committee, besides Bob Sammon were Hank Hammer, Paul Pifferi and Marybeth Greenhalgh.

For the office of President of Student Government, Jim Elliott was elected with 345 votes. Jerry Maryou followed with 332 votes and Richard Fox with 134 votes. There were a total of 48 abstention votes for the office, which was the lowest abstention rate when compared to the other offices.

Juan Campos was elected Vice President to the Executive Board by 169 votes. The other two candidates' totals were very close. Paul Pifferi followed with 185 votes and Richard Fox with 114 votes. There were a total of 46 abstention votes for this office, which was the highest abstention rate when compared to the other offices.

The abstention vote totaled to 95 over the College Council. The abstention vote was 132 over the Student Council. Jim Elliott (143), Jerry Maryou (142), and Richard Fox (117) were elected President, Vice President, and Secretary, respectively.

Food Crisis At Marist
by Jerry Maryou

Currently, our nation is in the throes of a meat shortage. What is causing it is the subject of much speculation and remains.

Always interesting to observe peoples' reactions to a new situation, as is this shortage. As the prices rise between each freeze (Flaide Ended Sept. 12),

Despite the nation-wide food crisis a Marist student still manages to eat very little!

by Peter J. Costigan

As the prices rise, more and more families cannot afford to buy meat. Other families buy their meat and froze it for many weeks; still others have replaced it entirely, by other protein-enriched foods.

While it has been a blessing, the fishing industry has not seen such a lucrative business since the period of compulsory abstinence on Fridays. The deep freezers are heating up too, in terms of sales volume. A few enterprising businessmen have opened up shops to cold store their catch, but McDonalds and Carrolls have not followed.

The shortage has struck Marist, as well as any other place. The Director of Food Service, Jim Elliott, has stated that the only available beef is from Canada, but the Canadians are keeping the meat for themselves. When the freeze lifts, Laddie is confident that American beef will soar, at least a dollar a pound. So the advocates of the rich, for families cannot afford to buy it, so the prices will come to more realistic levels. That price, Marist will again buy beef and reduce the Saturday night steak buffet. In a more optimistic vein, the cafeteria is planning to introduce more menus, particularly canners.

On the subject of shortages there is something we students can do. We can say that food waste around here is ridiculous, and it's true. Often, people take seconds of desert or drinks, have one, and throw out the rest—other students cannot take them. It is expected that a few people will dislike the main course and discard it; this is anticipated and provided for. Often, however, students overload their plate and find they can't eat it all, so good food is needlessly discarded, a solution is to just take some food, instead of overcharging, and many shoppers can sell their families cannot afford to buy it, so the prices will come to more realistic levels. That price, Marist will again buy beef and reduce the Saturday night steak buffet. In a more optimistic vein, the cafeteria is planning to introduce more menus, particularly canners.

A New Housemaster Meets Marist

Modern thought tells us that something is not as real as we perceive it to be. To some people, the idea of an older man as the new Housemaster of Marist College, Mr. James Kenney, decided to challenge this idea. In his first editorial, Mr. Kenney stated, "So, it will be presumptive of me to say that the students and faculty of Marist College have produced a vibrant community that I believe is second to none in the entire country."

The absence of women students from the student body was also a point of discussion. Mr. Kenney stated, "We are dealing with an institution that is simultaneously complacent at some points and experimentally at others."

The duties and responsibilities of the new Housemaster are to oversee the daily operations of the residence halls and to work closely with the administrative staff. Mr. Kenney is expected to bring new ideas and perspectives to the Marist community.

Para-Professionals Prepare For Classroom Through Marist

by John W. Steiler

To look at the history of the City of Poughkeepsie and its current problems, one must first consider its population and the needs of its residents. In this article, I examine the role of para-professionals in addressing the challenges faced by the community and explore the potential for partnerships between the City of Poughkeepsie and other organizations. The City of Poughkeepsie is a diverse community with a population of approximately 30,000 people. The City has a long history of social and economic challenges, including poverty, unemployment, and a high crime rate. These challenges have been exacerbated by the recent economic downturn, which has led to increased unemployment and a decrease in city revenues.

The City of Poughkeepsie has responded to these challenges by implementing a number of programs and initiatives aimed at improving the lives of its residents. One such initiative is the Para-professional Program, which provides job training and placement services for individuals who are interested in pursuing careers in the field of social work.

The Para-professional Program is administered by the City of Poughkeepsie Department of Social Services and is designed to help individuals gain the skills and knowledge necessary to work in this important field. The program provides job training and placement services for individuals who are interested in pursuing careers in the field of social work.

For more information on the Para-professional Program, please visit the City of Poughkeepsie Department of Social Services website or contact the program directly.

Community Invitation

The start of the 2017-2018 school year is just around the corner, and we would like to extend an invitation to all of our students, faculty, and staff to come together and celebrate the beginning of a new academic year.

This year, our school is hosting a variety of events and activities to mark the start of the academic year. These events will include a Welcome Back Lunch, a Faculty and Staff Meet-and-Greet, and a series of workshops and seminars. We encourage everyone to attend these events and to help us welcome our new students and to support our returning students.

We hope that you will be able to join us for these events and that you will enjoy the start of a new academic year. We look forward to seeing you soon.
**Harriers Are Optimistic**

The 1973 Marist Running Red Foxes will face a challenging season with some seasoned athletes returning and others stepping up to fill the roles of the departing seniors. Coach Howard Goldman is optimistic about the team's prospects this year, as they prepare to compete against some strong teams with runners of high potential.

Largely intact from last season's (4-6-2) squad, the Marist College soccer team is led by Coach Jerome Wilson, a political communicator. Bruce Joyce, professor of legislative process, and Tony Wilger, the GTC two-mile champion, are returning to the team. Last season, Hayes, who hails from the Marist scoring records after winning the intramural program, is shaping up to be one of the best ever. Last Saturday the Red Foxes held the New Paltz State on Monday, September 27th.

The 1973 Marist Running Red Foxes will be another highly successful campaign, as the team have a tremendously bright future and cross country looks like a solid sport at Marist for a long time coming now.

**Boots Packed With Potential**

Largely intact from last season's (4-6-2) squad, the Marist College soccer team is led by Coach Howard Goldman. Bill Putre, who is a graduate of Poughkeepsie Park Ridge, N.J. came on strong last season, and has run impressive miles in the mile (4:58) and two-mile (9:34). Bill is expected to give the team added depth and balance which it will need to win the close ones. Pete Wilderotter, a specialist in the trackman and cross country runner while running for St. John's High School in Maine, had been a top-notch high school trackman and cross country runner and was as a teacher on the team. Pete is 30 years old, and is a graduate of John F. Kennedy College in Maine, had been a top-notch high school trackman and cross country runner and was as a teacher on the team.

He is improving steadily and is expected to give the team added depth and balance which it will need to win the close ones. Chris Williams, a transfer from Kansas State University, leads a group of talented athletes entering Marist. Chris posted the fourth fastest two-mile time in the nation for freshmen in high school last year and has the fastest steeplechase time in 1970 in New York State (9:57). He ran for Roy C. Ketcham High School in Wappingers Falls and also John Jay High School before going to Kansas State. He is selling his way up to the top spot where he had been in his high school days before he contracted mononucleosis and another rare injury which have hurt him in the past. If he can recover from the injury, he will definitely make his presence known on the top of the team. Jim Gibbons rounds out the team. Jim has a 25.3 quarter and is still improving on the long-distance runs. He is expected to help the team, as well as certainly help himself, from the daily practices and meets.

The team has lost four of its top six runners from last year but it has gained more quality runners in this season. Tony Wilger, the GTC two-mile Champion, is staying away from defeat (also themselves). This season and will be another highly successful campaign. The young runners on the team have a tremendously bright future and cross country looks like a solid sport at Marist for a long time coming now.

**New Outlook For Intramurals**

This year's intramural program is scheduled to be the best ever. In the past the intramural program has been plagued by many problems. Lack of organization in the past has led to trouble with scheduling and referees. There is especially a need for bringing more interest to the intramural program by the students themselves. Without student interest the program looks like a solid sport at Marist for a long time coming now.

**Security from Page 1**

The protection of the security fence is the most important thing to remember about the security on campus.

**Intramural Office**

For Intramurals... there will be an organizational meeting at 7:00 P.M. on Thursday, Sept. 13 at 7:00 P.M. in the Intramural Office (Room D-16). There will be a male league (6 man teams) and a female league (6 man teams - 3 men - 3 women). Deadline for returning the roster will be Thursday, Sept. 13. There will be an organizational meeting on Thursday, Sept. 13 at 7:00 P.M. in the Intramural Office (Room D-16). The teams must send a representative...
