New Drug Law Meets Marist

by Tom Page

On September 1, there began in New York State a new approach to handling the users and dealers of illegal drugs. Just what does this new law mean in practice, and its effect be, not only in New York State, but here in the Marist Community?

The penalties in this new law have been proclaimed as the toughest in the nation. There are three main categories: "Mandatory Life" with possible parole after 15 years for the sale of one ounce or more of major narcotics or of one ounce or more of LSD; "Mandatory Life with parole" after serving from six to eight years for the sale of one ounce of an ounce of major narcotics, or five grams or more of LSD; and "Possession of one ounce of an ounce of major narcotics, or five grams or more of LSD." Possession of one ounce of an ounce of major narcotics, or five grams or more of LSD, will result in a term of one year minimum, or three years maximum, for first offenders and four and-a-half years for second and subsequent offenders.

The new law also states that possession of up to $1,000 will be provided to those who supply information, leading to the conviction of someone who is a perpetrator of such a crime.

It has been announced by the office of the Academic Dean and the Office of Student Affairs, that Mr. Franklin H. Hazard has resigned from his position at the close of the current academic year. This was done in consultation with Mr. Robert J. McGann and assistant directors of the Student Activities programs. Mr. Hazard's appointment was in effect for the past four years. Mr. Hazard's resignation, as much as his well-deserved retirement, is a personal one, and he is deeply appreciated by his colleagues in the education department.

The conclusion had been reached after a lengthy process that extensive changes had to be made in the school's administration. It is hoped that Mr. Hazard and Mrs. Nolan, his successor, and the rest of the student body, will be able to establish a new atmosphere of cooperation and consultation among all members of the school's administration.

The search for a new Director of the Office of Student Activities and other positions is proceeding, and the names of several potential candidates have been presented to the trustees of the school.

Ursula Free Named
Campus Center Director

By: Eric Yergan

The Campus Center is being renovated to accommodate new offices for the newly appointed Director of Student Life, Ursula Free. An essential element of this renovation is a structural addition to the present Greater Union Board. Since he was chosen on the basis of his qualifications, he proved to have the kind of creative, responsible student who might help to make future progress. Although Ursula Free is now in the process of assuming this directorship, it is impossible to estimate his likely influence on the campus. As a precautionary measure, the present student body and staff are being trained to handle any unforeseen situations that may arise. An excellent opportunity to gain such training is to be sponsored by the S.A.C. and a number of other organizations.

The Board of Student Life is committed to providing a major service of the Student Academic Committee with the purpose of studying the best methods for solving the problems of the student body. The Board is also considering proposals for the reorganization of the, Student Academic Committee, to include a number of new objectives, such as the development of new teaching methods. The Board is also responsible for the planning and supervision of all academic and extracurricular activities, and for the promotion of a strong sense of community on the campus.

The Regents recommend
Strengthening
Of New York Doctoral Programs

The report on doctoral programs in New York State was released earlier this year, and it revealed a number of important findings. The report found that the state's doctoral programs are underfunded, with a lack of sufficient resources to support the training of new professionals. The report also found that the state's doctoral programs lack the necessary infrastructure to support the needs of students and faculty. In addition, the report found that the state's doctoral programs lack the necessary infrastructure to support the needs of students and faculty.

The Circle - The Development Office

What Is The Development Office?
We invited a few friends for dinner and they helped clean up the Genesee River.

With the aid of a few thousand pounds of microorganisms, we helped to solve the water pollution problem in Rochester. Maybe the solution can help others.

The breakthrough came when Kodak scientists found a way to combine the activated sludge process with a trickling filter process and optimized the combination.

Kodak
More than a business.

At Kodak, we are working on an environmental improvement plan. And the pilot project worked well, so built a 2500-milliliter plant that can purify 36-million gallons of water a day.

Governor Rockefeller called this "the biggest voluntary project undertaken by private industry in support of New York State's pure-water program."

Why did we do it? Partly because we believe in making the world a cleaner place to live, and partly because the pollution problem is a threat to our business. And our business depends on society.

We hope our efforts will help others to solve their water pollution problems. And we'd be happy to share our water-purifying information with them. We all need clean water. So we all have to work together.

More than a business.

Campus Art Being Debated

Mrs. Fisher, chairman of Marist's art department, is to be congratulated for bringing a new addition to the campus. The new arrival is a ten-foot black steel creation located at the front entrance to the college. This marks the further-grown phase of artwork which Mrs. Fisher has designed to adorn the lovely campus grounds. She has saved many a sewer pipe, lighting pole, and girder from untimely death or sitting in obscurity.

Our efforts to cope with water pollution will inspire others to do the same. And we'd be happy to share our water-purifying information with them. We all need clean water. So we all have to work together.

High On Sports
by John Tkach

AS THE LEAVES BEGIN FALLING and the number of days begins to dwindle, it may be a surprise to some of the newcomers here at Marist but football fans are already looking forward to seeing the club football team in action. The team itself is in good shape and has compiled an amazing 23-3-1 record, including a perfect season. They were ranked No. 3 in Club Football across the nation and after winning their senior class season ranking of No. 1.

Many players may not understand what club football is all about. It is the kind of football, but good solid football where the teams are not financed by the university and the players they represent. Club football is found at the universities and is a private college which are unable to participate in the funding of a professional program. The club here at Marist was founded 12 years ago and since then has built a winning tradition at Marist.

The Marist Ravens began their 1973 cross country campaign with a two mile triangular meet this Saturday at the Cortland Park in Bronx. A large and strong New York Tech made this meet possible for the club football. As any running club does, they enjoy a fall weekend and enjoy the game and the team spirit with which Marist is usually in the right place at the right time and he gets a quick jump on the ball. He also possesses a good soccer sense. He is always aware of every situation during a game. He has a knack for reading scoring opportunities and consistently looking at the goalie."

Finally, in my point of view, I think that one of Ken's outstanding characteristics is that he is not only a good player but a good citizen. Many times last season the opposition's defense tended to double up on him. One good example of how he handled himself was in Marist's game against Cortland Park in the Bronx. Many of our readers may not know any farther than Londono Paul as an outstanding athlete. The person in which I am referring is none other than Marist's own Ken Hayes.

Have, a possible All-American, is one of the finest soccer players to wear the red and white. An outstanding lineman, he has been a valuable addition to the team and has helped his teammates and a sheer delight to Red Fox fans.

Dave Paltz at 3:30 p.m. Come on out and see an All-American at work.

As a member of the first Marist basketball team to win a post-season tournament, Dave Paltz is looking at the goalie."

The Marist defense this year is centered around a core of veterans in back. They include Tim Ogden and Sheldon Davis, who both started and finished last year. The defense will have to play with a strong running and passing game. Marist is 2-0 lifetime against New York Tech, having had another undefeated season, and climbed to the top rank in club football. They took a bid to the bowl game and to play Seton Hall College, designating the No. 1 team in the nation. Marist lost a thriller to Seton Hall 21-18 and ended up No. 2.

With the returns of many valuable players from the previous year and the return of some who are very frugal in giving up their time, this year promises to be another winner. The team really needs support and you'll enjoy every minute of it as you see them rushing for touchdowns at the Schaefer Bowl after its first unassisted season. Last year Marist turned in a strong 23-3-1 record by losing the bowl bid to a strong Westminster Community College. Marist also participated in this year's tourney and had another undefeated season, and climbed to the top rank in club football. They took a bid to the bowl game and to play Seton Hall College, designating the No. 1 team in the nation. Marist lost a thriller to Seton Hall 21-18 and ended up No. 2.
