Computer Science Major Comes to Marist

By Thomas Manning

Marist will be offering a new major in computer science, an announcement made, with the improvements made in the computer center and the forthcoming new computer system caused Marist to be coined, "Computer U." President Dennis Murray has now taken the next step in this area and the forthcoming new computer science.

The announcement was made by Dr. Andrew Molloy, Vice President and President and Director of the computer center. Murray has been instrumental in organizing the computer program. The extension of the computer program is designed to provide the students with the opportunity to discuss with faculty and staff members within this area.

President Murray said, "As the computer program grows, we will have a man of Dr. Foster's competence and interest in this field." Foster's professional background in the business world is extensive. He has been a consultant to corporations, such as the National CSS Inc., the IBM Corp., and Scientific Time Sharing Corp. He worked on the Robson Air Development Center and NASA Goddard Space Flight Center for the government. He is also vice chairman of the American National Standards Institute. Foster has been recognized worldwide as an APL authority. He is also a member of professional organizations including the Association for Computing Machinery.

With this background, Foster will head the new computer major that President Murray described as being designed to become an institutional flagship program. The program follows the systems approach to computer science and focuses on the language study, data management, computer architecture, and system design.

Located within the Marist College Library, the new computer science major follows the systems approach to computer science and focuses on the language study, data management, computer architecture, and system design. The new computer science major is designed to provide students with a comprehensive understanding of the field.

The program is designed to be flexible, allowing students to tailor their studies to their interests. Students are required to complete a core curriculum that includes courses in computer programming, operating systems, and hardware support. In addition, students are encouraged to take electives in areas such as artificial intelligence, computer networks, and software engineering.

The new major is open to all students, regardless of their major. However, students interested in pursuing a career in computer science are encouraged to complete the requirements for the major.

Communication Arts Club formed

By Louis Washburn

A club for communication arts majors has been established on campus. Seniors, Warren King, and Tina Cirigliano, are the club founders. Formation of the club came about because of the interest of students in the field. There are 246 Communication majors on campus and the club's activities focus on the communication interests of our students.

There are 246 Communication majors on campus and the club's activities focus on the communication interests of our students.

The club plans to offer courses in writing, editing, and public relations. The club will also sponsor events such as guest speakers, workshops, and film screenings. The club's ultimate goal is to create a community of students who share a passion for communication arts.

Dr. Platt, the Chairman of the Communication Arts Department, said, "It"
This is no longer high-school. This is big deposits in the dishroom for visual facts. I believe that since they paid to be entitled to an outstanding 16-1 record, which allowed Playoffs. It is not every season that a team is the Marist College. Red Foxes will represent as if winning that game was THE most im-

Gadziala Off to Wisconsin
By Ed Green
Marist completed its season on Saturday with a 4-2 loss to Fairfield in the New York State Championship game. It was a great debut for the team title and school Fairfield finished second. "It was a great game, a forty minute game," said Coach Bob McGrother. "The loss was hard on the seniors, but the rest of the team performed well," said Coach Bob McGrother.

The season is now over for everyone ex­cept Ron Gadziala. Gadziala will be competing in the Division II Nationals. The all-america from Poughkeepsie, N.Y., qualified for the meet on the strength of his

By Dennis Martin

Over the past week, Marist's soccer team broke a 22-year-old school record by going 5-0-1. They defeated Manhattan 1-0 on Wednesday, and then beat Manhattan 5-1 on Saturday, in a roughly played game. The goalies established the 1980 soccer team as the winningest team in Marist history with 16 victories. Marist ended its season with an 8-0-1 Tri-State Conference record and a 14-1 overall record.

In the game against Union, which ended 2-2 and the shorthand record at 15 victories, Raoul Verne scored the opening goal of the game. The goal was actually scored by his teammate, but Verne received credit for the goal. The winning goal was scored by Ed Isman. His game-winning goal was scored with just 4 minutes left in the game. Marist's 16th victory came against a rough and dirty playing Manhattan team.

Marist took control of this game right from the start. The outstanding midfielder, Julio Rostran, scored just 11:24 into the game. The goal came on a beautiful corner kick. Oyvind Larsen then scored the first of his two goals, with just 15:55 left in the first half. The goal was a penalty kick, and Oyvind very rarely misses from that distance. In the first half, Marist was able to outmaneuver Manhattan 10-4.

The goalies were not without criticism. Manhattan began to use a dirty style of play. Marist was able to stay poised throughout the second half, as a boisterous crowd took care of ridiculing Manhattan's Play. Marist didn't take time out to play a little soccer as they scored on a penalty kick with 36:0 left to play. Marist then put the game away for good. Scott Silvana scored on a penalty kick.
