Freshmen: friendly atmosphere, lousy food

On September 9, 10, and 11, eight Circle staff members embarked on an annual project, conducting the Freshman Survey. One hundred thirteen Leo and Sheahan residents were asked about their feelings on Marist, and two overarching results were uncovered. Agreement on the friendliness at Marist, matched by an equal amount of dissatisfaction with cafeteria food.

One question asked was, "What was the most important factor in your choice of Marist?" A majority of the students cited a belief that the school offered strong major departments, while others said it was the small size, its location, sports, the Core program, and a general belief that Marist is a good school.

Another question asked of the freshmen was to name the most difficult thing about being away from home. Not surprisingly, missing family, roommates, and friends was the biggest answer. Other less popular answers included transportation, with only ten students maintaining that dorm conditions were not "generally favorable." However, those students assigned to triples expressed some dislike for their room arrangements. "It doesn't leave you very much room," commented Karen Lewis of Oakland, New York, about her assignment in Sheahan. Approval of the freshmen drinking norms was evenly divided. Leo resident Marshall Wood asserted that "the freshmen drinking norms are good—it keeps the washouts in check." Pat Barrett disagreed, insisting that "if you are of age, it doesn't make sense."

The final question was "Are you generally satisfied with Marist?" All answered "yes," many with suggestions for improvements. One complaint was from Nancy Brennan, of East Nor- thport, N.Y., who has difficulty getting into the Pub. "You shouldn't have to be 18," insisted Nancy. Cathy Kenny disliked the Core courses, saying, "It seems like I took them all in high school." However, the overall feeling was one of optimism, and it was best expressed by Marshall Wood: "Marist is a good school with a lot to offer. The freshman program prepares you for your future years, and helps you to succeed."

Hassett wins scholarship for overseas study

by Patti Walsh

Tom Hassett, a communications major, has been named the first Marist recipient of a full scholarship to Trinity/All Saints College, a British university located in Horsforth, England during the 1981-82 school year. Hassett, a junior, is one of 16 students who will be studying abroad this year through the Marist Abroad Program.

Ten foundation awards were established this year through Dr. Jeptha Lanning's efforts, which have tripled during the past year. The scholarships are government regulated and very regimented. Classes begin on September 8 and end on a trimester basis. Hassett states Trinity/All Saints College "is perfect for my education," and is looking forward to the challenge of adapting to the British way of life.

Trinity/All Saints College, a school particularly strong in communications, psychology, and education, is located in the industrial center of England, approximately two hours north of London by train. Hassett originally planned to attend school in Ireland. But after receiving the scholarship he could not turn down the opportunity, since it, in effect, opened doors to a career. Hassett will be studying in Mexico City, Paris, Cork, and Limerick. The Marist Abroad Program has expanded this year from 15 to 16 students and Dr. Lanning foresees a growing trend towards the exchange of students, and possibly faculty, among countries as "the only way of getting beyond high fees." For example, a year at Trinity/All Saints requires $4,851 pounds for tuition and roomboard (approximately $8,500), plus $2,000 for transportation and other expenses.

Dr. Lanning sees the interest of Trinity/All Saints in Tom Hassett as a test case in the cooperative efforts of colleges in compromising to enable such students to study abroad.

Although a 3.0 cum is considered necessary, other factors are important as well. "The student must be self-sufficient, inquisitive, anxious to profit from and contribute to life in a foreign country, and willing to represent the United States and the American way of life," said Dr. Lanning.

Students who are interested in the Marist Abroad Program may contact Mrs. Betty Jaycox, Donnelly 223, ext. 228 for further information and forms, or Dr. Jeptha Lanning, in Fontaine 213, ext. 241. Tom Hassett's advice to all students considering a year abroad?—"Go for it!"
First days

Well, it’s that time of year. It is time to come back to school and see who is left. You see, it’s a whole new life. Everyone has to learn to get along with people they never spoke to before. This is a time to get used to your new life and keep learning. We all have to do it.

You see, it’s a whole new life. Everyone has to learn to get along with people they never spoke to before. This is a time to get used to your new life and keep learning. We all have to do it.

Camp Marist

Here we are - of Marist. For some of us it is a new experience, for others it is a new beginning. Along with this sentence, we have, once again, the College which is in sight but is not visible. We are happy, but more importantly, we are learning. That’s how we do it. It’s the first time we have seen the whole picture.

We’ve heard Marist referred to as “The Bubble.” I don’t quite know what it means. It’s a place where you can’t see the outside world. It’s a place where you can’t see what’s going on outside. It’s a place where you can’t see the people who are around you. It’s a place where you can’t see what’s going on in the world.

It’s a place where you can’t see the people who are around you. It’s a place where you can’t see what’s going on in the world.

**Marist buys off-campus housing**

By Donna Cody &
Kathleen Sullivan

"It's one hell of a way to end your
first year in college," says Nancy Lee,
one of four upperclassmen who will
be moving into the new residence hall
that will be their home for the
next two years. The hall, located
across the street from the campus,
will house 300 students. The
students are part of the Student
government's Off-Campus Housing
Committee, which spearheaded the
project.

The house that Marist bought

The house will be constructed on
the site of the old Marist College
parking lot. The lot was purchased
by the college in 1980 for $500,000
and has been converted into a
three-story residence hall. The
hall will include 50 rooms, each
with a private bathroom, and will
be able to accommodate 100
students.

The house will be occupied by
students in January 1982 and will
be used as a dormitory for upper-
classmen. The students will
be responsible for their own
rooms and will be able to
choose their own furniture.

Expansion highlights future of computers

By Karin Magdalen

If you have been to the lower level of Donnelly Hall, you probably noticed the big change that our computer science major has undergone. The new terminals that have been installed and the introduction of the Computer Science major have made a difference.

Even though Marist's Computer Science major was approved only last September 4, the computer room went under construction in the beginning of this past August, and was completed on Friday, September 27. President Murray felt, "It was a task to get the major approved because we wanted it done so fast. It took in part to the effort of the professors because of the expense, but because the process had to be developed from scratch and the administration had to make sure that all the facilities and hardware were going to be available." President Murray was gratified to the fact that the computer room went under construction in the beginning of this past August, and was completed on Friday, September 27. President Murray felt, "It was a task to get the major approved because we wanted it done so fast. It took in part to the effort of the professors because of the expense, but because the process had to be developed from scratch and the administration had to make sure that all the facilities and hardware were going to be available." Marist College had a strong interest in the computing program was opened; in 1975, the State Education Department granted the approval for Marist to offer a major in Computer Science. In 1979, the Marist time-sharing computer network was established, and in 1980, the Marist College Computing Center was opened. In 1980, the Marist College Computing Center was opened.

Establishing Computer Science as a major was not too difficult. As Kevin Carlin, Associate Professor of Mathematics and Computer Science, said, "It was being considered for a few years, and it was thought to be a good thing. The administration for working so hard to get the major established in quickly.

First weekend raises roofs

By Joanna Rosato

"I go to parties sometimes until four. It's hard to leave when you can't find the door..." (Joe Walsh) These words rang true once again when Marist's annual Welcome Back to Marist party was held in the cafeteria on Saturday night, September 4. For some it was a taste of campus parties to come, for others it was more of a reunion, but for all it was the first chance to have a good time in the new computer room. The first computer was opened.

Along with the introduction of the new terminals there was a chance for students to get hands-on experience with their friends. The staff for this program includes about 10 full-time and part-time professors teaching math and science computer courses. Along with the introduction of the Computer Science major came John McDonald, who is now the Director of Computer Studies. McDonald is responsible for planning and teaching for the program. The cost for the new terminals and computer was that of the necessary resources and teaching for the program.

There are two major courses available for students. First in ApL, which is the primary language course in the computer, as well as Pascal, which is the language used by Computer Science majors. There are similar courses that are follow-ups to these primary courses. The staff for these courses includes full-time and part-time professors teaching math and science computer courses.

Profile: Joe Burleski

Determination, Drive, Dedication. To
the team concept as the key to a
good season, Coach Joe Burleski believes
in the team concept in its entirety.
Burleski, a member of the 1979 Cross
Country team, feels the team has its
success as a runner.

'At the beginning of the season,' says Burleski,
'we are coming off a very successful year
in high school. This past three years the
team has placed second at least twice in
usually during the season.
So when the second year of the year, he
comes as an unchallenged, preeminent
leader. As he said himself, 'I'm probably
best player on the team. There are
certain things I can do that nobody
else can do.'

Burleski had spent this past year as
a assistant coach. He learned that
there was more to taking a successful
runner than just going out and running
10 miles a day. Then when his junior
year started, Burch, as he is known,
worked with him at 7:00 a.m. three
times a week. 'There is no doubt in
my mind that Joe has increased my
running ability 100%,' says Burleski.

Once he got past this point, Burleski
began to mold a solid runner with racing skills as
described as 'a smart and workmanlike
runner.'

After the halloween experiences dur­
ing the previous few years of the Cross
Countries, Burleski said his goal for this
very successful year for the entire team
is to break the six minute mile at least
twice for the team. Burleski traveled
with the Marist qualifier team to the State
meet in Indiana. It was this team's first
ever to break the six minute mile at least
three times. The meet included several of
the best teams in the nation, but when we
missed by just 17 seconds at the finish line,
we were disappointed. A good race is a good
race, but not to be the best team, we can
be content with that,' Burleski said.

As the meet approaches, the team
must be ready to run well. "This is the
team's last race in the regionals," Burleski
said. "The team has set their goals high,
and they expect everyone else to work as
hard as they were capable of working.

This season started Burleski off to a
very successful start. Making the varsity
team for the first time was a great goal,
and to be the best team this year will not
be, but for him to be the best, the team
could be which makes the goals set for the
next year an even more realistic one.

This team is the best team in the nation
at the meet. They were well trained,
and for the first time, they were to
be the best team this year. As we
move up to the next year, the team
has set their goals high, and they
expect everyone else to work as
hard as they were capable of working.

Coach Bob Mayerhofer was also
impressed with the team's performance.
In my opinion, the team was better
than the last year, but it is greatly
improved by the team's performance.

The team's goals for the next season
are to set their goals high, and they
expect everyone else to work as
hard as they were capable of working.

### Football Preview: Older and a bit wiser

**By Pat McCullough**

The Marist College Football squad, which compteamed a 5-5-1 record in 1972, is focusing on the season with a bit more confidence in 1973. The 1973 Red Foxes are returning 21 of 22 players on offense and all 11 on defense. Not returning are two key men, quarterback Jim Cleary and tackle Joe Burleski, who have been42 and 43 starting tackles. Joe Burleski was a consensus All-America selection last year and was the leading tackler in the East. Jim Cleary was a satisfactory substitute, but he wasn't as good.

The Red Foxes are returning a lot of talent and experience. Fan interests include the mumbling of some players about 1972's 5-5-1 record. Joe Burleski and MikeSpawn, of course, were returning players and new talent on the team. Burleski is healthy and ready to play.

The Red Foxes have a jam-packed schedule. In the opener against Vassar on Saturday, September 1, the Marist College Football squad faces an arduous task this year. The key to the team's success this season will be their determination in daily practices. Captain Martin agrees saying that the team will improve if they strive to push each other in their workouts. Coach Mayerhofer said that the team is more successful because of it, and they must continue to work hard.

In recent weeks the team has competed well in the Beekman Arms Labor Day Road Race and the Fairfield Invitational where they placed second in a competitive field of nine. The fact that we have experience has been a consistent challenge for our crop of nine seniors. The Marist runners will host a large field of teams including arch rival Southern Connecticut State and Fairfield University here on campus at 11 a.m.

### New coach...new confidence

**By Denise Film**

The Marist College women's volleyball team has a new coach this year who has strong hopes for the upcoming season. Marc Piccone, a lady with quite impressive credentials, says she is "very confident that the season will be a success." Coach Piccone teaches physical education at Orange County Community College in Middletown, and also has been the coach for the women's volleyball and softball teams for the past ten years. Both sports teams have been regional champions each year. In 1973, the volleyball team went to the Junior College National Championships in Miami, Florida and finished an impressive third. Ms. Piccone has played volleyball on a United States Volleyball Association team quite successfully.

The volleyball team had a tough season last year, but with some of the returning players and new talent on the court, the games this year should prove to be scrappy and exciting to watch. Pam Green, a senior who has a good mastery of the basic skills, will be filling the middle hitter spot. Junior Linda Peter, Tonya Winstead, and Diane Trublik look formidable in practice and will also be starting this year.

Many promising sophomores and freshmen will be playing, but a complete roster is not available as yet. Coach Piccone says of the team, "They are a hard working group and are improving their skills tremendously. We hope to do very well if the team remains as dedicated as it has been." She plans to use a multiple offense, incorporating many plays.

The Marist team competes in the Hudson Valley League. The Marist College team lost the opening game of the season to Rensselaer Polytechnic Institute, but were comfortable with the game to be played.

### There is no excuse

**Coach Ron Petro argues that the players and off campus have no reason for not doing their part on the Marist squads. "We are putting money back into the students' pockets. In the past, events, even though they had already charged out of the activities fee."

Coach Petro explained that the most important ingredient in Marist becoming a winner is the student's effort and that we must improve. We must improve on our coaching techniques. We cannot be denied that 3,500 cheering fans in Leonidoff Field or The McCann Center will not hurt any Red Fox team. We must improve on our coaching techniques. We cannot be denied that 3,500 cheering fans in Leonidoff Field or The McCann Center will not hurt any Red Fox team.

How many of us watch on television college football and basketball on the weekends and cry, wishing we were there? How many of us wish we had an opportunity to be as part of the electricity that is created from a team's victory? For those of us who saw Lou Corsetti run 86 yards for a touchdown, or Todd Hassler put one up from 35 feet to tie the score, we can appreciate the fever we felt. The Marist athletic program is moving in the right direction with President Mayerhofer and Ron Petro letting the students in free. Isn't it about time we stopped complaining about the cost of everything and stepped up to the plate. The games face us each weekend. On October 3rd at 10:00, the football squad will play their first home game of the season. Wouldn't it be nice if we all showed up? There is no excuse.
