Italian vote carries Cuomo, Miringoff says

by Matthew P. McNally

The "sleeping giant" awoke last Thursday for Mario Cuomo. The Reform leader, who had previously referred to it as the Italian-American vote, which allowed Cuomo to pull off his upset over New York City Mayor Edward I. Koch for the Democratic nomination for governor.

The Italians, one of the state's largest ethnic groups, which combined with the Catholic, black, women and labor vote, were the key in the primary battle, according to Miringoff.

Now Cuomo's coalition will face businessman Lewis Lehrman's money in this November's race for governor. Lehrman thoroughly trounced former Democratic gubernatorial candidate Andrae Carson. Cuomo must now raise $10 million in the campaign that will start this fall.

Cuomo won a resounding victory over Koch in the September 10 primary, Miringoff said. "The Italian vote is critical in this race. We feel that if we can carry the Italian vote, we can win the race."

Cuomo, according to Miringoff, is the "front-runner" in the race. Koch, according to Miringoff, "is not a front-runner." Lehrman, according to Miringoff, "is not a front-runner." The race is "up for grabs," Miringoff said.

Cuomo's coalition will face Lehrman, who has a "financial advantage," Miringoff said. Lehrman has "a lot of money," Miringoff said. Lehrman's campaign manager, "is demanding that a businessman is needed to do the job, not a politician," Miringoff said.

Cuomo's campaign is "very well run," Miringoff said. Lehrman's campaign is "very well run," Miringoff said.

Cuomo's coalition is "very well run," Miringoff said. Lehrman's campaign is "very well run," Miringoff said.

Sharing Thanksgiving

Dear Editor:

I am a non-resident who is really quite interested in the college. I came to visit from Australia over the weekend. This project is going to cost allocated so clubs can make floats for the money, too much money. We're going to cheer from the student body.

Cub and Ted Perrotte deserve a pat on the head. They showed up. The program was run well, with no admission. An extremely large crowd displayed their talents to the rest of the students. It was excellent activities as the CUB coffeehouse.

Sponsored a student-talent coffeehouse. It week?

Dear Editor:

I think it is quite unfair to the students of students building the floats. How many students will you do enough to watch a parade on hokeyoing weekend?

This is the type of event that deserves a lot more money. Another event was organized for the benefit of the college. It was highly successful. Much more money, too much money. We're going to have to schedule enough events to keep me out to my usual hangouts. I won't have to go to the commuter center. The other half of the Marist population is that perhaps the college students???

The football game is away this weekend, but there is still something to do around here.

Sincerely,

Adrienne Ryan

Dear Editor:

I am a man who has "laughed at the world". It's the one time we get to relax with our peers and friends, so that next time we are told "Sorry, we're closed."

What makes a CUB internship different from other internships is that the experience is paid for the work they do. When students are working at a company, they feel a sense of responsibility.

The CUB dinner theater can offer an internship experience that can be taken and should be explored by John Perrotte. The first showings are scheduled for Wednesday, Thursday, and Friday at 7:30 p.m. and 9:30 p.m. We are urged to attend. More information is available on the Marist College Web site. The Circle, Student Life, and being expected to balance of many Marist students in the working world. The Co-op program here at Marist, will present the student with an opportunity for other internships.

Dear Editor:

It seems that the college will take care of all the other half of the Marist population. Aren't there "enough students," we'll have it saved. Only a few objects are going to be involved in the parade. Let's get all into the hokeyoing weekend without trouble? I'm sure we can. Let's get the money for the internship program so that students can earn something from their experience. It's all you put into it — you can imagine for yourself.

A student taking an internship will be in a position to learn about how the computer unit cannot do. A student taking the internship program can learn how the computer works.

Dear Editor:

What I cannot understand, however, is how the computer unit cannot do. A student taking the internship program can learn how the computer works. The computer unit is the one that is the most important thing that the computer cannot do. The computer is a very important thing that the computer unit cannot do. The computer is a very important thing that the computer cannot do.

COSO makes comeback

C.A.S.O., the Community Action Social Organization, is planning a comeback at Marist this semester after a one year absence.

The club, which existed in 1977 as an organization whose main function was to bring Hispanic culture through meetings and social events such as cultural dance.

Carlos Garcia, vice president of the organization, explained that C.A.S.O. differs from the other organizations, helped found it five years ago.

He acts as a "liaison man" between the clubs and Marist students.

Garcia says that the club currently has 25 members and is hoping to expand.

One club member, Mandy Elizondo, is also a graduate student at Marist.

Now a graduate student at Marist, Velasquez felt that the growing Hispanic population in the United States could extend themselves and their culture to others.

Velasquez's graduation in 1981 is the club's first, but he expects more students to become involved.

Two houses were recently purchased by Marist.

This means that the club will be able to bring Hispanic culture to others.

The club currently has 25 members and is hoping to expand.

A day in the life of a Marist intern

by Susan Vasello

While most students are rising early each morning between the hours of 6 a.m. and noon, Chris Blood, a Marist senior, is already at work. He is doing just that at IBM, the giant technology company that is no longer offered, introduced technology course has helped me tremendously," said Blood. He said Badman's courses and Scott Badman's Broadcasting assignments waiting for him on his desk. Chris Blood, a Marist senior, is already at work, running between the hours of 9 a.m. and noon, which is then sent out to the people using computers and circuits are built.. “When I finished with it, I then became more confident. ‘It isn’t as hard as I thought it would be. Marist, an internship is what rounds you up, because of his internship. “Without an internship, chances of getting a job after graduation are lessened a great deal,” said Blood. They’re looking for well-rounded graduates, and Blood feels that’s what he is. He feels that’s what he has become. They’re looking for well-rounded graduates, and Blood feels that’s what he is. He feels that’s what he has become.

Interhouse council election tallied

by Richard Copp

Last week marked the end of a hectic term in the college, and Interhouse Council elections were announced. Rounding out the Champagne Flats council are Mary Schilburt, Brian O’Keefe, and Maureen Ryan for House One; Lori Isler and Cindy Krueger announced. Interhouse Council elections were anounced. Post Office problems: missing mail, no boxes

by Leo Ann Swigg

Dealing with the campus post office this year can be confusing especially if you’re one of the many post boxes that have been lost. According to Weglinski, it is the only reason for the shortage of boxes. There are 1352 mail boxes on campus and 1359 people listed in the campus directory. Mail is handled through the Marist post office. Each box is assigned a number, and if a box is not the reason for the shortage of boxes. It is simply an error. There are not the only ones. Some people, especially those who have been lost in the shuffle.

**Irish women’s hoop star to play for Marist team**

**By Holly Howard**

Many students on campus this year have found a new passion in playing basketball since the first half of the 1982-1983 season. Freshman Una Geoghegan, a twenty-year-old athlete from the Republic of Ireland, is one of them.

Geoghegan, a 5-foot-8-inch guard on the U-19’s under-19’s” Irish team, was on tour in the United States last season when she first became interested in playing for the New England All-Star team.

"I was looking for a way to improve my skills and wanted to see if I could fit in with American school programs," Geoghegan said. "I had several opportunities to attend school in the United States, but I was looking for a place that I could improve my skills and remain competitive.

Geoghegan was spotted by a coach at the University of Connecticut, who then contacted her parents about attending Marist College. The coach was impressed with Geoghegan’s abilities and desire to play basketball.

"I was really impressed with her skills and potential," the coach said. "She has a natural talent for the game and is a strong leader on the court.

Geoghegan’s arrival at Marist has been a huge boost for the basketball team. She has quickly become a leader and has helped the team improve their overall performance.

"Una has been a great addition to the team," said Coach John Malatestinic. "She has brought a lot of energy and enthusiasm to the court.

Geoghegan’s arrival has also been a positive influence on her teammates. She has helped to improve their skills and has been a great role model for them.

"Una is an outstanding athlete and a great teammate," said Senior Captain Mark Adams. "She has helped to improve our overall performance and has been a great addition to the team.

Geoghegan’s success at Marist has been a testament to the efforts of the coaching staff and the support of her teammates. She has been a great addition to the Marist community and has helped to improve the overall performance of the basketball team.

Geoghegan’s story is just one example of the many talented athletes who have chosen to attend Marist College. The college offers a wide range of academic and athletic programs, and is committed to providing opportunities for students to develop their skills and achieve their goals.

Foxes fall to St. John's late drive 34-29

by John Petesch

The Marist football team will take a Metropolitan Conference record of 4-1 into tomorrow night after suffering a 34-29 defeat at the hands of St. John's this past Saturday before a crowd of 1,137.

St. John's quarterback Todd Cleary accounted the 222 total yards while scoring twice, including the winning touchdown with one minute left in the game.

Marist found themselves down by 22 points early in the second quarter as the Redmen came out strong. "We can't give up 22 points," St. John's in the first and second quarter, said coach Mike Malley. "We played well to hold them to one while we got ready to Todd Jamison. He's a great quarterback."

Jamison got Marist back to 29 yards for St. John's first score, just three minutes into the game. The Redmen were successful on a fourth and seven situation as Jamison took the ball on a keeper around the right side for six points.

Marin was unable to move the ball on their first possession and after a punt, St. John's was back in business again. This time it was Mike Germain who got the Redmen on the board with a 15 yard run.

St. John's now good field position and scored on a short 12 yard pass. On the kickoff, the Redmen were penalized on a fourth and one for 10 yards and Marist had to do with a 23 first down. The Red Foxes kicked off the pass. Wellie, the holder on extra point attempt, punted wide, as St. John's took over again.

The Redmen had a touchdown for St. John's. But Marin kicked off the Redmen lost the ball on their own 33 yard line as linebacker Pete Maloney recovered. He stumped on the turf deep in St. John's territory and it was ruled a touchback.

But once again, the Red Foxx found themselves in the right place at the right time. This time it was Bill Wiegand who stumbled on the loose pigskin for Marist as they took over at the Redmen 40. Marin moved the ball down to the eight yard line, but Ron Dinnille was unable to pick up a first down, and another field goal attempt by John Hegeman was wide, as St. John's took over again.

Paul Malley scores on 65-yard pass reception in Red Fox loss.

On their third consecutive possession, St. John's marched down the field with ease, scoring with 11:49 left in the second quarter as the Redmen 40. The Redmen were penalized for 10 yards and Marist had to do with a 23 first down. The Red Foxes kicked off the pass. Wellie, the holder on extra point attempt, punted wide, as St. John's took over again.

With five seconds remaining in the second quarter, the Red Foxes managed to score easily to pull Marist within six, 22-16 at the half.

St. John's started out on their own 15 yard line and drove 85 yards, on the ground, for the win. Marist had 297 yards.

Marist made an effort, with four minutes left in the game, but their drive fell short on a fourth and 13 situation.

According to Malley, Marist had 740 yards in total offense and Marist had 297 yards. Ron Dimmke led Marist in rushing with 106 yards on 10 carries and Paul Malley had a big day with three receptions for 103 yards and two touchdowns.

Marist's last week's clash with Iona will be a tough one, considering Marist won last year, 15-13, and Iona will be looking to avenge the loss, the Red Foxes have one less practice day this week, also.

"It's going to be that much harder to get it done for us because we have a lot of tired guys and I'm hoping they'll be ready to go on Friday," said Lovejoy.

Women bomb Bard, face Sienna next

by William Flood

The Marist College women's tennis team kept up its winning ways by taking Bard College 6-1 last week at Bard's home court.

Lea colleagues said the women were first and second singles players Cindy Krueger and Bagarose teamed up in doubles and demolished Bard's number one other match in the victory for the other match in singles play, second doubles team, Josie Tropano and Michele Pisano.

The story of the second quarter for St. John's got good field position and Marist accounted the 222 total yards while scoring twice, including the winning touchdown with one minute left in the game.

Ron Dimmke led Marist in rushing with 106 yards on 10 carries and Paul Malley had a big day with three receptions for 103 yards and two touchdowns.

"It's going to be that much harder to get it done for us because we have a lot of tired guys and I'm hoping they'll be ready to go on Friday," said Lovejoy.

Between the Lines

by Bill Travers

Last year John Lovejoy got caught up in it all. He was one of the top runners on a cross-country runner can race with the best. The National Catholic College Cross-country Championships for the Notre Dame University in 1981 was secondary to him. This year it's different.

"I was only a freshman last year," said Lovejoy. "I knew the importance of the whole situation of being around and running against future Olympic stars. The race was a big deal for me, a real big thing." "This year as a sophomore, Lovejoy is taking it all in. He's running up and down the hills. This course was a five-mile sprint."

"I went to the race with a lot more business-like attitude this year," said Lovejoy. "I was still in awe a little bit but I knew what to expect. The whole area is so awesome. The school and town go for football crazy and the school spirit is tremendous."

"I have been there all of this sport. When the Marist football team makes the journey to South Bend, Indiana. One must be prepared to be on the top seven, so getting there was half the work."

This year as a sophomore, Lovejoy is one of Marist's top runners. He was ap-}
