Local man plans to run for president

by Lisa Arthur

Donald Badgley, a resident of Poughkeepsie, sees himself "as a David in a world of Goliaths" as he seeks the presidency of the United States.

(Photoby Jeff Kiley)

Local recruitments double for Marines

Inspired by the deaths of U.S. Marines in both Grenada and Beirut, college-age men and women are lining up outside the doors of their local Marine Corps recruiting offices in record-breaking numbers, according to Poughkeepsie recruiters.

"My calendar makes perfect sense," said Badgley. "It's based on a circle — 360. Under our current system we use the number seven which does not go into 360 and the perfect calendar everything's divisible.

You beat registration system? Think again!

by Paul Raynis

True or false: The hassle of registering for next semester's classes probably won't be as bad ever again, because there's just no way people can't get it right.

If you answered "true," you're probably a student assistant of Marist students who seem to share that misconception. According to Registrar Elizabeth Reos, it's this failure of students to achieve an understanding of the specifics of registration, not the system itself, that makes it such a hassle year after year.

**Mistakes are made**

Among the common misconceptions are:

- **Misconception No. 1** — Seniors don't have priority. Upperclassmen are usually told to feel that they aren't being given any priority towards getting into classes. However, according to Rots, such a priority system does exist, but only during the early registration period.

- **Misconception No. 2** — It's a good idea to go early for preregistration.

According to Rots, there's really no difference between dropping off your course-selection card on the first or the last day of the first-early registration drop-off week. "As long as we get the card by 4 p.m. Friday, it really doesn't matter," she said.

The course-restrictions are all punched into the computer at the end of the drop-off week and are broken up into request lists for each course. The lists are organized in priority order, and the students are registered for each course that can be registered for each course from the top of that list. After two weeks about the process, each student will receive a print-out telling them what courses they have been registered for. For those still undecided, it's the beginning of the final registration period.

Dear Editor,

As talented individuals, we hope you would like to consider this letter. We have been discussing the issue of alcohol abuse in our community, and we feel that it is important to address this problem.

We understand that many students at our institution struggle with alcohol addiction. This issue is particularly prevalent in the Marist community, where the prevalence of alcohol abuse is higher than in other colleges. According to recent studies, more than 30% of Marist students have reported drinking to excess at least once in the past month.

We believe that alcohol abuse is a serious problem that needs to be addressed. It is not only harmful to the individual but also affects the overall community. Alcohol abuse can lead to a variety of problems, including academic difficulties, social issues, and legal problems.

We urge the administration to take active steps to address this problem. We suggest implementing stricter policies regarding the consumption of alcohol on campus, providing more support services for students struggling with alcohol addiction, and raising awareness about the harmful effects of alcohol abuse.

We also urge our fellow students to take responsibility for their actions and to support those struggling with alcohol addiction. Let us work together to create a safe and healthy environment.

Sincerely,

[Your Name]

World hunger is focus of week

by James Norman

Differences in the perception of human rights throughout the world have had a negative effect on the development of economic growth in the United States and other countries. Some human rights, including individual human rights and community freedom, have been neglected in the United States. The concept of individual and community rights must be understood in order to recognize the ultimate global attainment of human rights.

Fall theme highlights fashions

by Danielle Montanaro Zemba

Fall Innovations" will be presented at the Thanksgiving dinner this year. The show is being held in the Donnelly Hall room as they are told to do it in the fall. The students themselves are created, sewn and modeled by the members of the United States. The show is a food drive and a typical Thanksgiving meal."

Caputo's Pizza Delivery Contest

Here's how it works. The nine dorms listed below in (parenthesis) are eligible for the Grand Prize at Caputo's. The Grand Prize will be a pizza party Sunday, Nov. 20th at 6:00 p.m. The party will consist of 50 large cheese pizzas, (drinks not included) and fresh and red hot out of the oven for the winning dorm. ALL YOU HAVE TO DO IS TO START CALLING CAPUTOS NOW!! Dorms or floors with most calls in a 14 day period takes the Grand Prize. Winning dorm or floors will be notified Friday morning Nov. 18.

Sports

Soccer squad shines with late season surge

by Frank Raggo

It was another productive week for Marist College soccer as the team extended its unbeaten streak to six games with a win over Long Island University and a Tri-State Conference victory against Manhattan College. As the season closed yesterday against Long Island University and a Tri-State Conference playoff win over Marist College, the team extended its unbeaten streak to six games.

Sophomore defenseman Andy Ross opened the scoring for the first goal of the year for Marist College with a goal against Manhattan College. As the season closed yesterday, Ross opened the scoring for the first goal of the year for Marist College.

7-foot Donovan has sights set for '83-'84

by Ian O'Connor

Two-point-eight points and three-point-one rebounds per game. These are the statistics of Marist College senior center John Donovan for the 1982-83 basketball season. He is a native of Ridgewood, N.J. "I want to see every basketball game," said Donovan.

Seeing an opportunity to boost his performance, Donovan volunteered to attend sessions with psychologist Dr. Ron Robbins, and has worked with him since August.

"He has worked on body relaxation techniques with me," said Donovan. "I've been trying to help me get in the right frame of mind to play," said Donovan. "He has also helped me with the physical aspects of the game how I run, catch the ball, and establish position under the basket."

In trying to add some needed strength and bulk, Donovan lifted free weights over the summer and was able to gain ten pounds. "It's not much, but it's more than I had last year," he said. "I'm about 20 pounds over my ideal weight of 200, and I feel stronger."

Donovan also added the Five-Star Basketball Camp for three weeks during the summer, where he acted as a counselor and, at the same time, worked on his game.

"I've been trying to develop a better post hook, step, and have worked on establishing a good rebounding position," said Donovan. "I've followed Marist on a full scholarship after playing two years at Bergen Community College, and is likely to be chosen into a more difficult role this year. With the absence of All-American center Steve Smith, leader Chris McCall, and seventh-man Keith Denis, all front-line players, Donovan realizes he will be called on to do more for the Red Foxes this season."

"I'd like to average double figures and get six or seven rebounds per game," said Donovan. "Since we don't have a Steve Smith anymore, we're going to need more from me."

Donovan, who led Marist with 24 points last year, also said another goal of his is to once again lead the team in blocked shots.

With the opening of the season approaching, Donovan said there has been more enthusiasm and intensity in practices this year as compared to last.

"There are more spots open, and guys are really fighting for them," said Donovan. "The atmosphere has been good during practices and the team attitude is excellent."

Donovan said the overall talent on this year's team is equal to that of last year's team, and that the goals which the Marist team has set are all attainable.

"I'm about 205 pounds now, and I definitely feel stronger," said Donovan. "I've been trying to develop a better post hook, step, and have worked on establishing a good rebounding position."
