Task forces prepare for Middle States visit

by Eileen Hayes

The Middle States Evaluation Team, an accrediting group from the Middle States Association Colleges and Universities, will be returning to campus this week by the end of this month. In its last visit, the team had noted the flawed areas: the library holdings, affirmative action and the Core program.

Following the November 1981 evaluation, the campus administration called for changes. President Dennis J. Murray requested the creation of co-chaired presidential task forces to be made up of faculty and administrators to focus on these areas. He has also shown his commitment to affirmative action by forming the Equal Opportunity Committee to determine whether affirmative action was necessary.

In a press conference for journalism students, Murray said the college has made extensive progress in the three areas. “Overall, Marist is well prepared for the Middle States visit,” he said.

The Library

In its 1981 evaluation, Middle States criticized Marist for the inadequate number of volumes in the library. The team suggested an increase of 45,000 volumes over a period of five years, with a budget of $320,000 per year. This year the team agreed that the library should expand by 50,000 volumes, but this increase would be staggered over the years with extra build-up one year and a lesser increase another. The staggering would depend upon budget and space. The task force also suggested the library should have the flexibility to include resources other than books, such as films and audio-visual and TV equipment, in its holdings.

Inadequate number of volumes in the library. The team suggested there be a continuation of the open-stack concept. “We agreed that space is a problem, but we didn’t agree with all the conclusions in the Middle States report,” Brenner said.

The task force noted there should be study space for students using the library’s resources, but there should be study space outside the library for students using their own resources looking for a quiet atmosphere. The possibility of supervising classrooms or the cafeteria as possible alternatives were suggested. Moving the Learning Center and AV-TV out of the library was another idea. The learning center would be moved to the campus center and the AV-TV would be placed in the proposed Lowell Thomas Communications Center. Storage space is another consideration. Books that aren’t in demand may be placed in storage, leaving shelf space for books that are used frequently.

According to Brenner, the library does have a storage facility, but it is not large enough, and not close enough to the library. The task force also recommended that CSL officers, according to CSL, keep up with new technology. With the methods of information the ways to achieve them should be part of library function. Marist should be responding to this by training library staff and by budgeting for development and maintenance of necessary equipment for data bases and automated systems.

Brenner said an on-line cataloging system is currently being used by the library to speed up the cataloging process. She further said that although there are new acquisitions, she is still working with the same staff, which slows down the process. The task force also suggested that a library Collection and Development Committee be formed with one member from each division, in order to insure that the current deficiencies do not continue into the future.

Brenner said that CSL officers can recommend books for acquisition. Any suggestion will be taken into consideration. She said the library is trying to spend the new money in the areas desired by students and faculty.

The Core Program

In the last report, the Middle States team suggested there be a re-evaluation of the Core Program. The presidential task force for the Core program is focused on finding out what the importance of the Core program and getting faculty feedback on further development.

The work of CSL officers, according to CSL, is to examine the current curriculum “for its further development.” Proposals about the Core controversies of the faculty at Marist College, Poughkeepsie, N.Y.

Marist eyes new plan for education courses

by Paul Buckwitz

Marist College, in the process of developing a program in special education, is planning a comprehensive education in the wake of Mount St. Mary College's experience with the Mount St. Mary's majors may opt to declare a minor in special education. This degree would be added to the special education major, making it a Bachelor of Science in special education. The college will also develop a Master of Science degree in special education.

The Mount St. Mary's program was developed in response to the needs of the local community, said the college's director of special education. The college has always been a leader in this area, and we are proud to continue that tradition.

The Mount St. Mary's program will be a comprehensive program, with a focus on the students' individual needs. The program will include coursework in special education, as well as clinical experience in local schools.

The college has already received feedback from parents and students, who are excited about the new program.

The college is currently developing the details of the program, and will be announcing it in the near future.
Debating

Throughout the past week, the topic of debate has been a hot one. Many students have been discussing the issue of grading, and some have even gone so far as to engage in friendly arguments with their professors. The debate has been lively, with many students taking a strong stance for or against the current grading system.

Dear Editor:

The grading system at our college needs to be overhauled. The current system is unfair and does not accurately reflect the students' abilities. As a student at this institution, I have observed that the grading system is biased and does not take into account the individual strengths and weaknesses of each student.

Many students feel that they are being treated unfairly by the current grading system. They believe that the system is too rigid and does not allow for individualized assessment. They feel that they are being held to an unrealistic standard and that the grading system is not designed to accommodate individual differences.

The current grading system is also criticized for being too lenient. Many students feel that they are not being challenged enough and that they are not being held to a high enough standard. They believe that the system is not motivating enough and that it is not providing adequate feedback.

In conclusion, I urge the administration to consider revising the grading system. The current system is unfair and does not accurately reflect the students' abilities. A new system that is more flexible and individualized would be a step in the right direction.

Sincerely,

[Signature]

Caputo's overcomes setbacks

by Kevin Schwartz

Despite hardships, Nick Caputo has established his business and overcome setbacks.

Caputo's, a pizza restaurant, was initially struggling to make ends meet. However, Caputo, the owner, persevered and eventually made the business successful. He credits his success to his determination and hard work.

The restaurant was located in the heart of the city, where traffic was heavy and competition was fierce. Caputo had to find a way to stand out and attract customers.

He started by offering a variety of pizzas, both vegetarian and non-vegetarian, to cater to different tastes. He also ensured that the pizzas were made fresh and hot, using high-quality ingredients.

Caputo also worked hard to provide great customer service. He ensured that the staff was friendly and helpful, and that customers were satisfied with their orders.

Over time, Caputo's became a popular spot for locals and tourists alike, and the business began to thrive. Caputo is grateful for the support of his customers and is committed to continuing to provide excellent food and service.

In the end, Caputo's success is a testament to the power of perseverance and hard work. Despite the initial challenges, Caputo never gave up and was able to overcome any obstacle that came his way.

The future looks bright for Caputo's, and Caputo is excited to continue growing the business and providing great food and service to all who visit.

John F. Kennedy: 20 years later

by Denise Pipher

While most people were mourning the loss of a leader, John F. Kennedy, some were celebrating an anniversary. 20 years after his death, the impact of his legacy is still felt today.

Kennedy's presidency was marked by a number of significant events, including the Cuban Missile Crisis and the moon landing. However, his most significant achievement was his leadership during the Cold War, which helped to prevent a nuclear war.

Kennedy's death was a shock to the nation, and his legacy is still remembered today. His ideas and principles continue to influence American politics and society.

The anniversary of Kennedy's death is a time to reflect on his life and legacy, and to consider the lessons that can be learned from his presidency.

Women's peace group to give talk on arms

by Holly A. Stuew

The Women's Peace Group will be giving a talk on arms control.

The talk will be held at 7:00 PM on Tuesday, March 18, in the Commons Auditorium. The group will discuss the impact of arms control on women's lives and the role that women can play in promoting peace.

The group will also share their stories of activism and how they have worked to make a difference in the world. Attendees are encouraged to ask questions and engage in the discussion.

The Women's Peace Group is a non-profit organization that advocates for disarmament and non-violence. They work to educate and empower people to take action for peace.

In addition to the talk, the group will have a table set up in the Commons where people can sign up for their newsletter and learn more about their work.

IBM, Marist join for novel training program

by Daisy Mauny

IBM and Marist College are joining forces for a novel training program.

The program will provide students with hands-on experience in the tech industry, allowing them to gain valuable skills and knowledge.

Students will work on projects for IBM, gaining real-world experience and exposure to the tech world. The program will also include mentorship opportunities, allowing students to learn from IBM professionals.

The program is not only beneficial for students, but also for IBM. The company will be able to tap into a pool of talented and motivated students who are eager to learn and grow.

This partnership is a win-win for both parties, and it is a great example of how businesses and education can work together to benefit everyone.

Co-op seeks new funding after loss of grant

By John Abelson

The Cooperative Education Office announced that the popular "Business of Running a Restaurant," an on-campus dining simulation program, was replaced for the Fall '84 semester by a new program, "Business of Running a Restaurant II," a continuation of the original program from which it was suspended.

The new program will teach students about the business world through hands-on experience with a simulation of the management and operation of a restaurant.

The program was sponsored by a grant from the Mellon Foundation, which provided funding for the program's development and implementation.

The new program will be offered in conjunction with the Department of Business Administration and will be open to all students.

In addition to the new program, the Cooperative Education Office is exploring other sources of funding for its programs, including potential partnerships with local businesses and foundations.

Entrepreneurs hit snag

By Horace Wanstall

Two Marist College students who were looking for a way to earn extra money through their entrepreneurial spirit have run into a roadblock.

Sophomores Peter Asselin and Tom Begg, who are members of the Entrepreneurial Club, had planned to sell T-shirts as a way to make extra money.

However, according to the Marist College Student Life Office, the sale of T-shirts is not allowed on campus.

"We were really excited about starting our own business," said Asselin.

Begg added, "We thought it would be a good opportunity to learn about entrepreneurship and make some extra money.

The Student Life Office informed us that we cannot sell T-shirts on campus because they are considered promotional materials.

Pre-school moves into new home

By Mary Honey

"It was like a dream come true," said Mary Honey, principal of the pre-school at Marist College.

The pre-school has moved into a new facility on the north campus.

The new facility features a spacious classroom, a play area, and a community room.

"The children are thrilled with their new home," said Honey.

The pre-school serves children from ages 3 to 5 and is located in the same building as the Marist College Pre-K program.

"The move was a long time in the making," said Honey.

She added that the new facility will allow for better educational opportunities for the children.

A new study on the fishery was released recently, revealing promising data for the future.

According to the study, the population of Atlantic salmon has increased by 30% over the past decade.

The study also found that the number of rainbow trout has more than doubled since 1990.

"These results are encouraging," said Dr. John Smith, lead author of the study.

"We are hopeful that these trends will continue in the years to come.

CSSL

Continued from page 1

CSSL students were invited to attend a special event.

The event took place at the University of Notre Dame and was hosted by the CSSL chapter there.

The students had the opportunity to network with CSSL students from other universities and to learn more about the organization and its mission.

"It was a great opportunity to meet other CSSL students and learn about the organization," said one of the attendees.

"I think it's important for us to support and promote CSSL on campus," said another student.

If you have any questions about this event or how to become involved in CSSL, please contact the CSSL chapter at your university.

Club forming to horse around

From there, Student Government will handle the authorization of the organization. If approved, the application will be forwarded to the Student Activities Office for approval.

Competitive horse shows have already begun with the organization. The Marist College Equestrian Team can actually trace its origins back to the Student Government for approving a cross-country training course last spring. The team will start house-training on Tuesday, Nov. 12, at 11 a.m., and will later begin formal training on its annual trek to Saratoga, Long Island, and Wayne, New Jersey.

The members of the team, who average five years of experience, are assigned to their horses by the head coach. Each horse is taught to do a specific job so as to give each rider a fair chance of progressing in the sport. The rider must also be trained, as the horse cannot do everything on its own. Therefore, it is the rider's responsibility to work with his horse, to develop a partnership.

Several new organizations have been formed at Marist College recently, including the Student Government, the Student Activity Association, and the Student Activities Office. The new organization, the Equestrian Team, was established as a result of the student's desire to participate in cross-country training. The team is open to all students, regardless of their experience level. The members of the team are currently working together to develop a strong partnership with each horse, and are looking forward to the upcoming season.

Marist women's b-ball enters new season

By Steve Wathson

With the loss of five seniors and the appointment of a new head coach, the Marist College Women's Basketball Team is looking to improve this season. The team is under the guidance of head coach Sue Blazejewski from Albany, who is a former assistant coach at Dartmouth College.

The team's new head coach, Sue Blazejewski, is working on improving the team's overall performance. He is trying to create a better offensive and defensive balance for the team, with a focus on improving their shooting skills.

Swimmers eye title after first-meet setback

by John Bakke and Heinz Warmhold

Coming off a strong season last year, swimming coach Larry Van Wagner is looking toward his men's team contending again for the Metropolitan Swimming Conference title.

The campaign got off to a slow start as the men lost to Monclair State 64-49 in a dual meet last Saturday. Pete Anselin led the team with victories in the 50 and 100-yard freestyle events.

That same meet saw the women's team lose 80-33 despite 100-yard freestyle events. The women also won the 400-yard relay.

Meanwhile, Dave Luber extended Marist's streak of dual-meet diving wins to 32. Luber won the five required dives grouping with a 178.24 score and took the six optional dives with 265.74 points.

The men's loss wasn't the best start a season could have, but it's a long season and the team still expects a strong year.

"I believe we will finish in the top two," said Van Wagner, adding that the team's main competition will come from Maritime College. The Foxes compete in the conference's B division.

"We may be one or two swimmers short of winning the B division title," said Van Wagner. "But we should be strong enough to have more quantity and quality."

"This week's results have no swimmers on scholarships, won five of nine dual meets last year, and they're swimming in the conference this year. It's a good sign," said Van Wagner. "I recruited 10 freshmen this year. I recruited 10 freshmen," said Van Wagner.

Another three joined as walk-ons.

With only four of 17 swimmers on scholarships, won five of nine dual meets last year, and they're swimming in the conference this year. It's a good sign," said Van Wagner. "I recruited 10 freshmen this year. I recruited 10 freshmen," said Van Wagner.
