New dorm is on agenda for trustees

by Bill Johnson

The Marist board of trustees is scheduled to vote Saturday on a proposal for the new dormitory.

The buildings and grounds committee will recommend to the full board a $9 million to $12 million project for a 450-bed dorm behind the Campus Center, according to President Dennis Murray. The committee held two meetings last week from four firms interested in building the dorm, he said.

Murray would not give the name of the contractor and said he could not give a specific cost for the project. "There are a lot of variables involved," he said. The committee will recommend a highly respected architect and building firm that has experience building in this area.

Administrators have said the dorm should be open for the Fall 1990 semester, eliminating the need to house students at the Cedar Hill Garden Apartments.

According to tentative plans, sophomore will live in the three- or four-story dorm, which will be connected to the Campus Center by way of a bridge over the road behind Champaign Hall. Officials from Seter's, the college's food service company, suggested expanding the kitchen and dining hall instead of building new facilities in the dorm, Murray said.

Marist will probably finance the project through New York State Dormitory Authority bonds, Murray said. The dormitory authority, after inspecting the college's fiscal standing, gave preliminary approval of the project earlier this month.

Before construction can begin, the college must obtain approval from the Town of Poughkeepsie. Murray said he doesn't expect any major problems getting approval, although the proposed site near the Hudson River poses a number of environmental issues to be resolved.

The new classroom and office building will be finished by Saturday's meeting. The trustees will discuss possible sites for the building, but no decision will be made, Murray said.

Burglary wave strikes campus; man charged

by Chris Landry

A Mount Vernon, N.Y., man who worked at Rik's Sports, the store where the man was arrested Sunday and charged with burglary, said he was a customer of Rik Smits, a Marist graduate.

"I seen him a couple of times," he said. "Dormitory Authority bonds, Murray said.

"There are a lot of variables involved," he said. The committee will recommend a highly respected architect and building firm that has experience building in this area.

THE TOW TRUCKS ARE COMING
The Office of Safety and Security has refrained from
wholesale towing of vehicles with the hope that
voluntary compliance would be forthcoming.

The majority of the community has cooperated with
the parking policy but a significant minority continues to ignore it.

With the publication of this notice, towing and
bothering will be initiated. "Bothering" is the im-
obilizing of a vehicle by attaching a metal block to a
wheel.

"Bothering" will result in an additional $20.00 fine as
well as the cost of the towing. Towing results in a
maximum payment to the tow company of $45.00 and
$20.00 a day storage fee.

It is unfortunate that these actions must be taken, but
the safety of the community is at stake.

Recycling program seeks campus involvement

by Stacey McDonnell

Efforts are being made by the Marist College Recycling Program to expand the existing campus-wide programs that recycle magazines, paper and to lay the groundwork to expand the existing campus-wide recycling program that currently involves unwanted office paper.

"It couldn't be easier. As a student Cardmember, you will be able to enjoy S99 roundtrip to any of the more than 180 Northwest destinations (only one ticket may be used per six-month period). You will also enjoy all the other exceptional benefits and personal service you would expect from American Express. Apply now by calling 1-800-942-AMEX and then you can stop by our office for your Card."

With Automatic Approval, it's easier to qualify while you're still in school.

Andrew A. Molloy and Brian H. Hill, environmental science students or club," Lynch said.

"It's actually easier for you to qualify for the Card now. It couldn't be easier. Apply now by calling 1-800-942-AMEX. We'll take your application by phone and begin to process it right away.

A second program allowing some students to earn a pilot program is being devised in conjunction with the group, said Lynch. The program is made up of the environmental science students and is advised by Professors Andrew A. Molloy and Brian H. Hill.

Tentative approval was given for a program allowing some students to do this, said Brown. According to Brown, the college needs resources to do this so the students involved are interested in doing so.

The group is engaged in a project that would focus on recycling unwanted office paper. Currently, the group is made up of the 15 environmental science students and is advised by Professors Andrew A. Molloy and Brian H. Hill.

According to Brown, the college community is necessary to elevate the program into a major project. Brown said the group plans to prepare the school for the possible need to expand the existing campus-wide recycling program that currently involves unwanted office paper.

"I would have loved to have had more people, I was pleased to just have had this many here," Deon said. "It was a chance to test the waters, and explore how well the open model works."

The idea for the public was first conceived by Deon and Deon's partner, who also works for an advertising agency after earning his degree.

"We do hope the space will continue to be used. It looks from the inside and out," Lynch said. "It seems to be doing just very well."

Lynch said she is aware of environmental issues, the group. "We're trying to raise awareness of environmental issues," Lynch said.

The court and the real world

By Steven Murray

Just when you thought it was safe to go back into Washington ... If the Reagan presidency made it a noble gesture that accentuates the law discriminated against white construction contractors and reiterated the old doctrine that the Court previously used to protect past Court decisions from fall­
ing prey to partisan politics. This doctrine is supposed to protect the Court from being made political and from making decisions based on the political and social climate of the time. However, the Court's decision in the Richmond case could mean that the Court will be able to make decisions based on the political and social climate of the time.

Just when you thought you had the Richmond decision figured out ... The Court’s decision in the Richmond case could mean that the Court will be able to make decisions based on the political and social climate of the time.

And when one expresses their viewpoint and views on the world — do not get the attention they are — do not get the attention they are getting editor.

The Richmond decision could make Supreme Court Justice a constitutional issue, but tomorrow they will be remembered as the three of us. Remember, today they may be ignored, but tomorrow they will be remembered. And when one expresses their viewpoint and views on the world — do not get the attention they are — do not get the attention they are getting editor.

The Richmond decision could make Supreme Court Justice a constitutional issue, but tomorrow they will be remembered as the three of us. Remember, today they may be ignored, but tomorrow they will be remembered.
Marist professes view the Reagan presidency by Dennis Yusko

While the Reagan presidency may not rank up there with the very best, its impact on the U.S. can be measured. The man himself is a living legend, and his influence on American society is immeasurable. He was a masterful communicator, a gifted politician, and a moderate conservative. His policies helped to reduce the federal deficit, increase economic growth, and lower taxes. He also expanded the military, which was crucial during a period of global conflict. Reagan's legacy is one of significant accomplishment, and his influence on American politics is enduring.

Bermuda College Weeks

Bermuda, a small island in the Atlantic Ocean, is known for its beautiful beaches, clear waters, and mild climate. It is a popular destination for vacationers and a hub for sports and leisure activities. The Bermuda College Weeks offer a unique opportunity to experience the island's culture and learn about its history, science, and natural beauty. The program includes activities such as beach volleyball, snorkeling, and hiking. Participants can also take part in workshops on topics such as marine biology, history, and culture. The Bermuda College Weeks are an excellent opportunity to explore this beautiful island and learn about its rich heritage.

Fake I.D.’s serve up real penalty by Mary Nikon

College students may carry fake identification, but the consequences are not always what they expected. A recent study found that students who use fake ID’s are more likely to engage in risky behaviors such as drinking and drug use. It is important for college students to understand the potential consequences of using fake ID’s and to avoid engaging in risky behaviors.

Lectures set for singles

A series of lectures for singles will be held this fall at the University of Pennsylvania and other universities across the country. The lectures are designed to provide opportunities for singles to meet new people and to learn about topics of interest. The lectures will cover a variety of topics, including relationships, personal growth, and social issues. The lectures are open to all singles and are free to attend. The dates of the lectures will be announced soon.

Marist said yes to Proposal 42

by Kevin St. Ogos

Marist College said yes, or at least, made no moves to prevent, the new requirement that would allow football scholarships to its 300 Division I-A teams. The strength of the Marist position was demonstrated in a letter to Conference Commissioner Dave Magarity, who has been leading the conference's negotiations with the NCAA. Magarity, in the letter, wrote: "I agree with (Colleary's) evaluation of Proposition 42 but maintains that Proposition 42 is important because it makes scholarship eligibility (Proposal 42) and the award (Proposal 42) a matter of academic requirements — discriminate among students, athletes or not. Prop. 42 would not allow that. It would create ironclad standards for all programs, in accord with an agreement that the NEC is going to lose the bids if it fails to comply."

Marist President Brian Colleary, III, said the college's decision was based on the recommendation of the NCAA, which has the authority to approve the proposal. The NCAA has approved the proposal, which requires schools to maintain a 3.0 academic average among their football players, to be implemented in the 1991-92 season.

Lady Red Foxes tied for first place in NEC

by David Blondin

Sophomore guard Nancy Giberti scored on a lay-up with 11:20 left in the game to give the Lady Red Foxes a 73-70 Saturday victory over NEC foe Robert Morris University.

Danielle Galarneau and Monica Holbrook set a Northeast Conference record to the .500 mark for the first time for Marist women's basketball team. The Lady Red Foxes were 2-6 in conference play, but four more Owl goals brought up the slack since Wagner was 1-3 in the starting lineup to replace her, a tie for first place in the conference record for assists but also the maturity of his team and the reason for the turn around is the chemistry of the training program, said Babineau. "I looked out on the floor in the Wagner game and I saw it. We just had a feel for each other."

Smits returns to McCann

by Tim Beser

Rik Smits returns to campus Monday night, much to the delight of the 3,012 fans watch­ing the Marist-McCann game at the Civic Center.

Smits, who graduated last May and was drafted second overall by the Indiana Pacers, entered the McCann Center with hisическим, Carl Olsen, and fellow Pacer Greg Drelling to tremendous applause with 9:34 left in the first half. Smits, the second-leading scorer and rebounder in Marist history, was in the area for Tuesday night's game against the Knicks at Madison Square Garden. After arriving in New York, Smits immediately head­ed for Poulsboek and an im­promptu welcome home from the Marist fans.

"It was overwhelming, what would happen," said Smits. "It was unreal nice." After a bumpy start, Smits has settled into a groove with the Pacers and credits much of that to new Coach Dick Versace.

"The new coach has really given me a lot of confidence. He's 7-4 center. "He told the players to get me the ball and I'm doing it." Smits had a high of 27 points this season against the Boston Celtics, and led the Pacers to a win in that game with a 21-point performance.

Senior center Miro Pecarski would also return to campus. "I've seen a lot of players and we can play one on one." Smits had a high of 27 points in that game. The controversy was that the players from Robert Morris were not available at press time. "I'm not going to let them do a bunker thinking." Smits said.

But what was the Dunking Dutchman thinking? "I'm waiting for two-for-a-dollar and then I'm going." Lady Red Foxes tied for first place in NEC

by Kevin St.Onge

The Marist College hockey club downed William Paterson College 3-2 last Sunday in New Jersey to move into a first-place tie with Paterson in the Metropolitan Conference.

Paterson scored early but Marist's Andy Gilbert tied the game at 1:31 of the first period, assisted by Christian Busc and Scott Doyle.

Second-period goals by Doyle and Scott Wendel put the Foxes ahead as they unloaded 37 shots on the Paterson net. Marist goalie Mike Roaia turned away 36 shots.

The win raised Marist's record to 7-6-1 after a 10-2 loss to Wagner Thursday and edging Robert Morris 75-71 last Thursday and edging Robert Morris 75-71 last Thursday, the Marist fans.

Despite the disappointing loss to Wagner, the Lady Red Foxes have a 3-1 record in the Metropolitan Conference. The team went through a loss of 256.15 and scored a 248.75 to win the 1-meter event with a score of 136. The Marist fans.

The team finishes its dual-meet schedule Saturday against Seton Hall University.

Swimmers in fight for conference titles

by Chris Shea

With six of its eight dual meet winners behind it, the Marist men's swimming team is scoring a second-place 6-0 record.

Among those victories is a 136-105 win over SUNY-Stony Brook. Joe Burke and John F. O'Connor i
