Checking out the latest in music, for Woody

Tenor, August 14, 1992 was the day my parents finally let me go to my sixth grade class reunion. To this day, my friends and I still laugh about that day because it was the day I finally got to meet Woody, my first real crush. I had known all about him through his music since I was a little girl, and I was thrilled to finally get to meet him in person.

Woody was sitting at the front of the room, surrounded by a sea of fans. He looked just like he did on the album cover, with his sunglasses and his guitar. He began to play and sing, and the whole room just fell silent. I felt like I was in a dream.

But then he turned around and looked at me. I was so scared, but I didn't want to miss out on this chance. I raised my hand and he looked at me, and I knew I had finally met my hero.

Woody ended the show with a cover of one of my favorite songs, "Take a Giant Step." I knew I had to say something, so I stood up and walked up to him. "Woody, your music means so much to me," I said. "I've grown up listening to your songs, and they've inspired me to pursue my own dreams." He smiled at me, and I felt like the luckiest girl in the world.

I walked away feeling like my life had just changed forever. I knew that I would always be a fan of Woody's music, and I was grateful to have met him in person. His music will always be a part of my life, and I can't wait to see what he does next.
How far can you go if you buy an IBM PS/2 before December 31?

Anywhere from coast to coast for only $149.

Purchase an IBM Personal System/2® before the end of the year© and receive:

• TWA® Certificate good for a round-trip ticket for $149 off-peak and $249 peak season**
• Free TWA Getaway® Student Discount Card
• Special offering on PRODIGY®

Use your TWA Certificate to travel to any TWA destination in the continental U.S. or Puerto Rico. Go home for the holidays. Visit a friend across the country. Or just get away.

Apply for a free TWA Getaway Student Discount Card to receive a 10% discount on future TWA travel. TWA has waived the annual application fee.

Tap into a wide world of information with the PRODIGY service. For only $99, you receive the PRODIGY Start-up Kit, a 2400 bps Hayes® Personal Modem, a software connection package, and three months of service.

So buy an IBM PS/2® before December 31, 1990...there's never been a better time to get going with a PS/2.

Dominic Guadagnoli
College Representative
(914) 575-4205

There's an IBM PS/2 made for every student body.

Whether you need a computer to write papers or create graphics, charts and spreadsheets, there's an IBM Personal System/2® that's right for you.

The IBM PS/2® family of computers has everything you asked for...including preloaded software, a special student price and affordable loan payments.** All models come with IBM DOS 4.0, Microsoft Windows 3.0, 3.5-inch diskette drive and an IBM Mouse.

Try one on for size. We're sure you'll find one that fits just right.

And if you buy before December 31, you'll receive a TWA® Certificate entitling you to a round-trip ticket for $1901/$230** Plus a free TWA Getaway® Student Discount Card application. You'll also get a great low price on the PRODIGY® service.

* Not Including Marist College.

$60 Handling Fee.

©This offer is available only to qualified students, faculty, staff and institutions that purchase IBM Selected Academic Solutions through participating campus locations. Prices quoted do not include sales tax, handling and/or processing charges. Check with your institution regarding these charges. Orders are subject to availability. Prices are subject to change. IBM may withdraw the offer at any time without written notice. **For any TWA travel from September 16, 1990, through December 31, 1990, $149 off-peak and $249 peak season round-trip ticket for travel from September 16, 1990, through December 31, 1990. $157 off-peak and $257 peak season round-trip ticket for travel from September 16, 1990, through December 31, 1990. $169 off-peak and $269 peak season round-trip ticket for travel from September 16, 1990, through December 31, 1990. Seats are limited. Fare is non-refundable. 14 day advance purchase, blackout dates and certain other restrictions apply. Complete details will be shown on certificate. Applicants for TWA's Getaway® Student Discount Card must be full-time students between the ages of 16-26. A call for cooperation not competition

Competition is one of those unavoidable aspects of life for everyone is forced to contend with. In some ways, it is a healthy challenge which compels people to strive to reach the same goal in a better way — whether to be the best in a sport or to be the top student in class. This competition, however, does not necessarily mean to undermine other people's abilities in some area — whether it be sales, sports or academics. It is an attitude that is characterized by aggressive maneuvers, although it is sometimes necessary for certain situations.

To many underestimate Gorbachev

It has become a very sadistic habit to promote Mikhail Gorbachev's political death. Many people are saying he's going to be the next hardliner. It is time we put aside our personal grudges against him and understand that he has had enough of this nonsense. He has made great sacrifices for our country and we should respect him for that. The activities office would be happy to arrange a series of talks to discuss this important issue.

Letter Policy

The Circle welcomes letters to the editor. All letters must be typed and signed and must include the writer's phone number and address. The editors reserve the right to edit letters for matters of style, length, libel and taste. Short letters are preferred.

United Nations - more show than action

As a country of enormous wealth and resources, we must take the lead in ensuring that the United Nations does its job. One way is to support preventive diplomacy and to help resolve conflicts before they become crises. For example, the United Nations should have been more involved in the Middle East peace process.

Correction

The headline in this week's issue stated: "Voter fraud could have cost Bill Clinton the election." The correct headline should have been: "Voter fraud could have cost Bill Clinton the election." The error was due to a last-minute change in the headline before the issue went to press.

Poster freedom

"The Circle" is pleased to announce that posters can now be hung on walls throughout the college without the need for a permit. However, please make sure to obtain a permit if you wish to hang posters on bulletin boards or in other public areas.

Inventions for an age yet to come

Not many people know this, but I'm Tony Hull. Like Paul Coolie Fisher of the Richfield College Foundation, I've turned my mind to the future.

Five years ago, I was a young, energetic engineer just starting in the business world. With my engineering background, I had a mind for solving problems and making the world a better place for everyone.

It's always been important to me to think outside the box and not just accept things as they are. I knew there were so many challenges that needed to be addressed, and I was determined to find solutions.

About five years ago, while working for a large company, I started thinking about the future and what kind of inventions we could make that would make a positive impact. I knew it was going to be a long process, but I was determined to make it happen.

So, I started by looking at the world as it was and considering the potential for innovation. I began to see all the ways technology could be used to make our lives better.

For example, I thought about the way we communicate and how the telephone had revolutionized how people could stay in touch. I wondered what the next big breakthrough would be in communication.

I also thought about the need for energy and how we could use technology to make power more efficient and environmentally friendly. I knew there were so many possibilities to explore.

In the years that followed, I worked on developing several inventions that I believed could make a difference. One of my first projects was a device that would allow people to communicate in the water. I realized that the way we move and interact with water was changing, and I wanted to be a part of that transformation.

My next big idea was a device that could help people with hearing impairments. I designed a system that would amplify sound waves and make it easier for people to hear conversations.

I also explored the potential of technology in medicine. I was fascinated by the idea of creating devices that could help people with disabilities and improve their quality of life. I was always thinking about the ways technology could be used to help people.

Over the years, I've continued to work on developing new inventions. I'm constantly thinking about the future and what kind of impact technology could have on society.

I believe that with hard work and dedication, we can make a real difference. I'm committed to seeing my ideas come to fruition and making the world a better place.

I'm excited about the potential of technology and the ways it can be used to solve problems and improve lives. I'll continue to work on new inventions and find ways to make a positive impact.

I'm not just thinking about the future; I'm living it. I'm Tony Hull, and I'm dedicated to making a difference through technology.
New degree in psych

by JENNIFER RIVERA

Staff Writer

Added this fall to the college curricu-

lum is a new program in educational psychol-
gy. The degree is 32 credits and is one of the

largest programs being offered to students at

Marist College. The degree is perfect for stu-
dents who want to work in areas other than

education such as human resources or busi-
ness.

Williams Ellis, chairperson of the division of social and

human behavior, decided to create the program in order

to provide an educational psychology degree for both

undergraduate and graduate students who want to

work in these areas.

"Students can go into business or work for human

resources," said Ellis.

The program will help students prepare for

the future and also give them the skills to

work in these areas.

Although most of the students

are psychology majors, there are

also business and education majors

who will be interested in this pro-

gram.

Ellis said they hope to have this

program to attract more students

who want to work in these areas.

The offense line is a key part of gridiron success. Without a solid line, a

team's success is limited. Notes and quotes by Robert Palombo, "We are

on the move," and the "press" we can receive is from our own, complimentary.

Kevin McKiernan emphasized his thoughts about the offensive line.

"We owe them one," said Marzo.

"We, as a unit, are the leaders. We have to bust the frostombe for

the backfield and for the offense." Notes and quotes by Robert Palombo.

"We, as a unit, are the leaders. We have
to bust the frostombe for the backfield and for the offense."
The Hudson River has a long history or rowing. Back in 1839, Puget Sound launched its first race. The Intercollegiate Rowing Association began holding regattas here in 1891. The regatta became an annual event that grew in size until 1949, the last year of the regatta at Puget Sound. The regatta will include more than just rowing. It is a day-long event highlighting the Hudson Valley and its people, as well as its heritage.

The regatta is being sponsored by Sonuc Hudson, Inc., one of the nation's oldest non-profit environmental organizations.
