Police arrest trespasser at Gartland

by JOHN CAMPBELL

A Beacon man who entered three North End residences last semester was arrested and charged with criminal trespassing last Thursday after entering a Gartland Commons apartment, according to the office of safety and security.

Jake Corton, 22, walked into the unlocked apartment around 5:30 a.m. on Nov. 8, according to Stanley Stiff, police chief. Corton was on probation for a similar incident at Bard College in Annadale-on-the-Hudson, and is also the man who was caught trespassing in Townhouses C-5 and B-3, and Gartland apartment G-8 last January, police said.

According to Joseph Leary, director of safety and security, Corton entered the apartment after being seen walking across the grass in front of Gartland last semester.

The man had been seen in Townhouses C-5 and B-3, and Gartland apartment G-8 last January, police said.

A member of the Bill Perry Band plays to an audience at the Student Talent Night in the Dining Room last Thursday.

Scheduling revisions taking place

Proposed changes will prevent three-day weekends

by CHRIS LANG

Three-day weekends and “party nights” during the week may become a thing of the past due to changes in the new academic calendar and schedule that will be instituted for the 1991-1992 school year, according to Marc VanderHeyden, vice president for academic affairs.

A presidential committee has been formed to create the new calendar and schedule, and members are currently exploring various possibilities for the 1991-92 calendar and schedule, according to VanderHeyden.

Dr. John Ritschdorff, associate professor of mathematics and head of the committee that is creating the new schedule said the specifics of the changes in the calendar and schedule are unknown.

But some options being considered are:

- Starting the semester earlier to allow for some sort of a “midterm break.”
- Starting classes earlier in the day.
- Reducing the time between classes from 15 to 10 minutes.
- Creating 50-minute time slots for select courses that would meet three times a week (i.e. Monday/Wednesday/Friday).
- Reinstalling the former free-time slots, which two years ago were Tuesday at 1 p.m. and Friday at 11:25 a.m.
- Increasing or decreasing the number of reading days.
- The final proposal for the new calendar and schedule will be submitted to President Murray for final approval in late December or early January.

But, “Right now we are still collecting information and weighing the various options for the new calendar and schedule,” said Ritschdorff.

The final proposal for the new calendar and schedule will be submitted to President Murray for final approval in late December or early January.

The college also recycles scrap metal resulting from renovations, such as the vacating of Marist East, McCaffrey said. She said the money received by recycling totally offsets the cost of the trash police have to haul away.

The boxes for depositable bottles and cans will be emptied weekly by Housekeeping staff and most likely returned at a local beverage center, McCaffrey said.

Housekeeping staff will empty the desk-side boxes daily and store the paper in porter boxes.

The boxes will be added to recyclable waste, McCaffrey said.

She said the boxes that were filled last Friday were on Monday, indicating that students may have taken the bottles and cans.

Although she does not advocate taking the bottles and cans, she said it was not a problem because at least the bottles and cans were taken out of the mainstream of garbage.

McCaffrey said she anticipates the cost of recycling to be limited.

“The system can be set up so that any financial benefit goes to defray the cost of the program,” she said. “We hope that each program will become self-sufficient or at least a major part of the cost.”

“We’re asking everybody for their participation and not to use the boxes for garbage,” McCaffrey said.

Anyone who has a suggestion can also see me in Donnelly Hall 101,”

The boards for depositable bottles and cans and office paper are the most recent efforts toward campus-wide recycling.

The campus-wide recycling of office paper was initiated by a pilot.

Think twice about throwing out your papers

by DAN HULL

“Recycle Now!”

That is the message the college is sending by installing cardboard boxes on every dormitory floor and public area for depositable bottles and cans last week as well as boxes for every desk office for office paper.

“As active as we are consumers, we should be just as active to recycle,” said Connie McCaffrey, director of Housekeeping.

“If we don’t start doing something with gusto, we’re not going to have an environment.”

In keeping with national efforts to protect the environment, the college has increased the number of recycling programs to four over the last year. The programs — two of which have started since June — include recycling computer paper, office paper, cardboard, and depositable bottles and cans, McCaffrey said.

College steps up effort to recycle

by CHRISTOPHER McCARTY

A Presidential committee has been formed to create the new calendar and schedule, according to VanderHeyden.

The Marist College Council on Theatre will present "Company," a two-act musical comedy that follows a confused 35-year-old bachelor with a different aspect of his love life every week. The play, set in New York City, is playing in the Dining Room at 8 p.m. each night. The musical will run Thursday, Friday, and Saturday, November 7, 8, and 9. General Admission is $11 student ID only.

RECYCLE—"Our goal is to educate the Marist community on the importance of recycling," said McCaffrey. She said she locked the front door and the window of the premises. She said Hammond Industries would pick up the paper and the recyclable materials would be recycled. McCaffrey said more than five tons of glass and sanitary paper were collected during the last academic year, and the proceeds were used to purchase a large cylindrical bin for cardbox waste. She said the bin will be placed in the Dining Room.

Whether you need a computer to write papers or create graphics, charts and spreadsheets, there's an IBM Personal System/2 that's right for you.

IBM PS/2 family of computers has everything you asked for...including preloaded software, a special student price and affordable loan payments.* All models come with IBM DOS 4.0, Microsoft Windows 3.0, 3.5-inch diskette drive and an IBM Mouse.

Try one on for size. We're sure you'll find one that fits just right.

And if you buy before December 31, 1990, you'll receive a TWA Certificate entitling you to a round-trip ticket for $140/+$240*. Plus a free IBM Getaway* Student Discount Card application. You'll also get a great low price on the PRODIGY service.

$60 Handling Fee.

You said you wanted to turn in papers that turn heads.

See how we listened.

You can do on the IBM Personal System/2:

- And with the easy-to-use preloaded software, including Microsoft Windows, writing papers is only the beginning. Just point and click the mouse to move text, create graphics, charts, even spreadsheets, or do other projects like resumes and flyers.
- Plus, the PS/2 and select printers are available at special student prices. Print impressive output with the IBM Proprietary, IBM LaserPrinter E or the Hewlett-Packard PaintJet color graphics printer.
- And if you buy before December 31, 1990, you'll receive a TWA Certificate entitling you to a round-trip ticket for $140/+$240*. Plus a free IBM Getaway* Student Discount Card application. You'll also get a great low price on the PRODIGY service.

The college is weighing the options of changing the academic calendar and schedule. While some of the proposed changes are good, others could cause problems.

Here's how some of the proposed changes shape up:

— They want to push the beginning of the semester back to the start of the year and allow for a mid-term break. While a good proportion of colleges do start their semesters in late August, it cuts the summer short. Many students rely on their summer jobs for employment tuition, and cutting the summer short cuts money too, short.

A mid-term break, while not essential, does help take the pressure of school work off the students' shoulders. But— in light of the increasing diversity in demographics of the students body, this is becoming a concern for those students who live outside the state area to get home. It could work better if the break extended more than just the Monday off, as it was in the past.

— They want to remove the five days classes earlier in the day. This would likely mean 8 a.m. classes, rather than 8:30 a.m. But perhaps 15 to 30 minutes in the morning is helpful, especially for the faculty and the commute, and pushing it back will be painful.

— The college is weighing the options of changing the time allotted. Those students will find it tough to make time to accomplish more in class. The topic will be fresh in the student's mind, and they will have little time between the 4:10 class and the 5:00 class. The topic will be fresh in the student's mind, and they will have little time between the 4:10 class and the 5:00 class.

Sabbaticals for nine profs

by ANNE SANTK
Staff Writer

This year, nine faculty members were recommended for either a one-year or semester sabbatical, which is the college's suggestion for sabbatical:

Donald Anderson, associate professor of English, is working on a novel, "On Silence," which he hopes to complete and have published by the summer of 1991. According to Anderson, this work has been in the making for the past ten years but he has been unable to find the time to work on it.

Anderson plans to bring the creative process into the classroom "by giving my students an escape from the routine of teaching. I'll try to take them with me as I work," Anderson said.

Dr. Richard LaPietra, professor of medicine, will be taking his sab­batical in the Spring of 1991. He plans to research the topic of human genome in cancer research, which he feels is necessary to develop new insights into disease, cancers, and treatments.

Dr. Richard LaPietra, professor of medicine, is completing work on his novel, "Bit Players," which he hopes to have published by the summer of 1991. According to Anderson, this work has been in the making for the past ten years but he has been unable to find the time to work on it.

Anderson plans to bring the creative process into the classroom "by giving my students an escape from the routine of teaching. I'll try to take them with me as I work," Anderson said.

Does anyone care?

Editor:

I am very disturbed with the ap­parent lack of concern shown by the students towards the current military buildup in the Middle East. The U.S. is prepared to lead the largest military action since Vietnam and the people have no idea what is going on.

Conservative figures put American loss of life at 10,000 to 15,000 for the first seven weeks alone. It seems that this whole war is over without any input from the rest of the country, especially the students here at Marist.

Miguel David Cepeda
Office of Admissions staff

Cartoon was offensive

Editor:

The cartoon you ran for 18 weeks in the galley will be a costly one in human lives, not just for Americans, but for all the people in the Middle East.

That is why I found your Nov. 8 cartoon offensive. It stereotyped Arab peoples as carpet-makers, and Saddam Hussein as a butcher. As Chris Shea noted in his perceptive editorial, "we didn't learn that we are killing our own people.

It does not make sense to me. It is wrong to refer to Muslims, especially the PLO, as a bunch of terrorists. There are many people in the Middle East who are as menaced now in the Middle East as we are in the United States.

After the Lebanon War had ended, there were thousands of Arab refugees who had to go back home, or they would have played a role in the Gulf War. In grade school you were friends with many people, but did not know what they were capable of. In high school it opened people's eyes to new things. Then your friends were considered just to transport you to and from New York Times." There were very few Arab Israelis in the Senate or in Congress. In Pakistan, the student body was not as large as the Senate.

In our college we have always been proud of our diversity. There was the person you'd kids in the basketball and soccer teams with him, but he was also in the student union, playing the drums. At one time we were all political and economic prisoners, but now, it is just a question of time.

No one ever said that maintaining a friendship was easy. It is, however, rewarding task. However, if you are not making progress, you have no one to blame.

People, often become selfish and finally recognize their own problems. They want to be friends with him, but they don't have the time to make it. Even when they start to take them for granted, they usually remember the time they were not so happy and when they want to be friends with him.

Do you have the right to be friends with him, but you don't like it. So, what are you waiting for? Call up your friends and tell them you don't like them, and that the first time you spill something they don't like you spill your pants. If you are reading this article, your friends will probably think that you are a total idiot.

Janet Delissio is a senior majoring in English.

Taking a closer look at college camaraderie

Editor:

When you close the pages of this book, you will find a summary of what is contained within. This book is about the college life, and we will discuss whether or not you have made the right decisions.

Friendship — what counts in it all? Did you ever jump off the bed and try to touch the wall? It is true that there is no one who can stop you, and you can try to touch the wall. Perhaps you touch that express that concerns — your friends begin to avoid living in bags.

As Chris Shea noted in his perceptive editorial, "we didn't learn what we are killing our own people.

Whatever the reason — the solid group became jaded out of the war. There are many people who have said that they would not allow Bush to commit our country to war. They say that they are not afraid. If so, when will they express that concern — and their friends? Have we become so invol­ved with ourselves and our own lives?

Whatever the reason — the solid group became jaded out of the war. There are many people who have said that they would not allow Bush to commit our country to war. They say that they are not afraid. If so, when will they express that concern — and their friends? Have we become so invol­ved with ourselves and our own lives?

WHAT we are dying for.

Dispense with the knee-jerk pre­judice. We can't have very few Arab peoples as carpet-makers, and Saddam Hussein as a butcher. As Chris Shea noted in his perceptive editorial, "we didn't learn that we are killing our own people.

Whatever the reason — the solid group became jaded out of the war. There are many people who have said that they would not allow Bush to commit our country to war. They say that they are not afraid. If so, when will they express that concern — and their friends? Have we become so invol­ved with ourselves and our own lives?

President's regatta returns to Hudson

by JIM SAVARD

After a successful season, the President's Regatta will return to the waters of the Hudson River on July 7.

"Last year, the regatta was a success. We had a good turnout and we got great participation from all clubs. We had great race results. We had a lot of fun and we had a great turnout. We had a lot of fun and we had a great turnout.

The biggest concern for Magarity was the weather. "If the weather holds up and our team performs well, we will get good results. If the weather holds up and our team performs well, we will get good results.

Sophomore point guard Andy Giberti scored the final goal of the game at 4-4. He was assisted by Walker and Walsh.

The Marist football team won its first-ever Atlantic Collegiate Football Conference championship Saturday night when it destroyed Brooklyn College 40-0 in the pouring rain at Leonidoff Field.

The Red Foxes finished the season with a 7-2-1 mark, the best Marist record in the school's 13-year history of Division III football. It was not a perfect season, but it was a good enough record for conference play.

"Winning the conference first really did it," second-year coach Rick Pardy said. "The guys worked real hard for this. It's a good team."

McCourt's kick was on target against the Red Foxes.

On its next possession, Marist marched 44 yards before freshman quarterback Dan O'Donnell scored on a one-yard run. Brian McCourt added the extra-point.

Marist made it 14-0 after O'Donnell scored again on a two-yard run, capping off a 70-yard drive in just over three minutes, 25 seconds.

The weather played a major role, giving the Red Foxes a 2.50 lead at the half.

In the second half, the teams played 12 minute quarters due to the wet field conditions.

The conditions did not affect O'Donnell, however, as he completed 70 yards for a touchdown on the first play of the second half.

With only seven seconds gone in the third quarter, Marist had increased its lead to 28-0. D'Alonso did it again on the next Red Fox possession. This time, the tailback scored on a 76-yard touchdown run, making Marist 34-0 with just under three minutes gone in the third quarter.

D'Alonso's last touchdown run put him over the 1,000-yard mark for the season. It also gave him 332 yards on the day, a new Marist single-game record.

"Don't do a great job," said Parody. "He had helped through, the offensive line did a solid job in giving him the initial holes that he needed. Once he got those, he did the rest."

The final Marist touchdown came at the 10:47 mark of the fourth quarter.

"It's just an opportunity to get off the field," Pardy said. "It was a chance to come off the field and have the first half. It was a good showing.

Saturday afternoon, the football team ended its season by winning its first Atlantic Collegiate Football Conference Championship, dominating Brooklyn College 40-0.

Friday night, the men's basketball team began the 1990-91 season with an exhibition game against the U.S. Verich Reps, losing 107-95. The Red Foxes scored the winning score with three 3-point baskets. The senior guard made the game with a team-high 15 points.

"It was pleasing with the upperscoreman," said Magarity. "They did a nice job, it was tough having Russell involved. But they did a good job and we were just flat."

Two bright spots were Fred Ingeris, a freshman and Brian Minhoitz scored a safety off a Marist punter.

"Brian Minhoitz had a good game," Pardy said. "He just played the game."

The outside hitter scored a safety off a Marist punter.

The weather played a major role in the game. Marist gained 309 yards of offense, all on the ground. The Red Foxes only attempted one pass play.

Saturday was a culmination of an entire season. It was a chance for the Red Foxes to show what they could do.

"I was pleased with the upperclassman," said Magarity. "They did a nice job, it was tough having Russell involved. But they did a good job and we were just flat."

"We had problems putting the offense together," Pardy said. "Even if the weather had not been so bad, I think the outcome would have been the same.

"Pardy said that this year's team was cold as a unit."

"There was camaraderie and family on this team," he said. "We've had problems putting the offense together."

The conditions did not affect O'Donnell, however, as he completed 70 yards for a touchdown on the first play of the second half.

With only seven seconds gone in the third quarter, Marist had increased its lead to 28-0. D'Alonso did it again on the next Red Fox possession. This time, the tailback scored on a 76-yard touchdown run, making Marist 34-0 with just under three minutes gone in the third quarter.

D'Alonso's last touchdown run put him over the 1,000-yard mark for the season. It also gave him 332 yards on the day, a new Marist single-game record.

"Don't do a great job," said Parody. "He had helped through, the offensive line did a solid job in giving him the initial holes that he needed. Once he got those, he did the rest."

The final Marist touchdown came at the 10:47 mark of the fourth quarter.

Saturday afternoon, 14 seniors saw their last football game at Marist College. Their career at Marist is over.

The seniors have improved from the first game they played four years ago. Each season they become more confident in themselves and in other. They have worked hard for what they have accomplished. They have had their day in the sun.

The basketball team was defeated by the USA Verich Reps, losing 107-95 Friday night in the Red Foxes' first exhibition of the 1990 season.

After holding a 53-47 lead at halftime, Marist was ousted in the second half, 60-43.

"I saw some good things out there," said fifth-year coach Dave Magarity. "We've got some offensive continuity, but that is my biggest concern."

Magarity said the team was still feeling the effects of Saturday's loss.

One question mark before the game was how well the season would be remembered.

The newcomers played well in the first half, but the inexperience began to show in the second half.

"The young kids played some interesting factors that relate to each other."

"The basketball team is trying to find its way," coach Davis said. "They did a nice job, it was tough having Russell involved. But they did a good job and we were just flat."

Davis brings experience.

"They did a nice job, it was tough having Russell involved. But they did a good job and we were just flat."
