STDs on the rise at Marist
Sexually-transmitted disease poses new dangers for students

by STACEY MCDONNELL
Managing Editor

Marist students who are sexually active now face an even more severe sexually transmitted disease than Herpes Simplex 2.

The Human Papilloma Virus (HPV), which affects nearly two million people nationwide, is a form of genital warts that can lead directly to cancer, said Dr. Robert Stern, M.D., of Vassar Brothers Hospital.

The number of sexually transmitted diseases of all types has grown steadily over the past five years, said O'Brien, director of Health Services.

"In the fall of 1985, it was pretty unusual to have someone diagnosed with an STD," she said. "Now we are identifying about one case a day.

And some Marist females have been diagnosed as specifically having HPV, O'Brien said. She could not comment on the exact number or severity of the cases.

The more severe strains of the disease could lead to cancer within one to 10 years after contraction. The survival time of persons with this cancer is five years, Stern said.

According to O'Brien, the disease is common and latent, and while there are a variety of methods to destroy the warts, the virus and cancer can reappear.

HPV leads to cancer in one of more of all the sexual and reproductive organs in woman and more of all the sexual and reproductive organs in man. The disease has no warning symptoms, the disease could lead to cancer within one to 10 years, Stern said.

Newly refined pap smears, which are used to detect cervical and vaginal cancers, are the only method of detection of the disease in women, said Stern. And these tests miss the disease 15 percent of the time, he said.

"One year a sexually active woman will have a normal pap smear," he said. "The next, she will have an abnormal pap smear — that's how rapidly it spreads and affects a person."

O'Brien said sometimes the warts will be visible on the male, but they have also been found in the folds of the penis or under the skin.

The most effective form of prevention is abstinence, said Stern. Condoms will provide some protection, but they are not full-proof, he said.

Both Amato and O'Brien said condoms should probably be made available on campus.

"Some say putting condoms on campus would act as a statement to practice safe sex," Amato said. "But people have to learn to be responsible for all their actions — their sexual actions included."

Cigarette thrown from window causes small brush fire

by MATTHEW WARD
Staff Writer

A small leaf fire outside Champanget Hall early Saturday morning was put out by emergency personnel fighting the fire. The fire was put out by two security officers with fire extinguishers, according to Joseph Leary, director of safety and security.

The smoke from the fire on the southeast side of the building blew into the windows and set off the alarms at 6:25 a.m., but no one was injured, security said.

Survey Says...

Senior Marit Camacho tries out what it’s like to be homeless — with only a cardboard box and a blanket — as part of a day-long event "Coalition for the Homeless," sponsored by the business fraternity, Alpha Kappa Psi, at Marist College. soccer. This project comes from Sullivan said that the event, titled "Day of Involvement," is great that Marist students are getting involved. The officers of Alpha Kappa Psi are busy planning the event. The fraternity was allocated a $350 fund from Marist this year, which will be used to raise money to support the event.

The fraternity branch is being established as a community service team, and the campus is in the early stages of contacting organizations in the area to establish a relationship with them. The fraternity is also working on establishing a relationship with Alpha Kappa Psi from "Shelton, Conn." It’s a value-added opportunity," Sullivan said.

"We thought we needed to do something for the community and wanted something that would have an impact on people’s lives," Muller said. "It’s an opportunity to network with others and to give back to the community."

The fraternity offers students the opportunity to experience how an international business fraternity is organized and to network with others. The fraternity offers opportunities for students to develop leadership skills and to give back to the community.

Role-playing in and out of class, students adopt new family lives

by ROZIZTO

The idea of having the students of a family live a long way off for some students, but not all. "Marriage and the Family," it is a concept of one person. Each semester, Professor Lawrence Sullivan puts class together in groups of six to seven people and gives them a problem to solve. The families are fictional family, in which groups members choose family roles and experience the positive and negative aspects of family life.

Groups engage in such family, offering an emotional support, share stories, and form relationships. Groups provide the family members to understand the experience of their families. Sullivan also said that the group is asked to assign each other a family member from a family, who they are and what they are doing. "This is the most important thing to learn about family," he said.

The course is offered both as a Religious Studies and a Community and Social Service course. It is an important role in the class because students have the opportunity to see how various families deal with issues such as divorce, addiction, and other challenges.

Registration likely to change next spring

by CHRISTOPHER ANDREWS

After completing their first 15-week spring course, many students and parents are wondering about the regisration process.

Through a process that many took only one day, registrar's office for the spring semester is used. "It is very convenient for students to use," said Sister Carol, a member of the Religious Studies faculty. "It is an important tool for students to find out what GPA and major they are.

"It is not too late to take it, but it is better to do it before the end of the semester," she said. "I am concerned about how many students find it serious and meaningful." 6.

Associate Registrar Terri Hambarger said registration will go on until March 31, and then there will be a period to change the registration for the spring semester.

"I think that students will be very happy with the Ospcan program," she said. "It is a priority based on credits and fees. It is also less time consuming."

Tenth anniversary of John Lennon’s death brings private, but little public, remembrances

by CHRISTINE MARTORANA

With the Ospcan program, students will meet with their advisors and then fill out a form and drop it into a box. Sullivan said that the program is used to help students understand the importance of family and marriage. The program is also used to help students understand the importance of family and marriage. The program is also used to help students understand the importance of family and marriage.

The music makes it more of a personal experience," he said. "The students are more likely to feel it as a personal experience." 6.

McCann said he wants to see more music on the radio stations, but that there are few songs about Lennon. McCann also said the music is a personal experience for students who saw him live. McCann also said the music is a personal experience for students who saw him live. McCann also said the music is a personal experience for students who saw him live.

McCann said there are a few songs about Lennon. McCann also said the music is a personal experience for students who saw him live. McCann also said the music is a personal experience for students who saw him live.
A bright idea: seeds kindness

While holiday lights and decorations adorn the residences, the spirit of the holiday season is often blurred on the college campus by the end-of-semester crunch of final exams and papers. But thanks to the efforts of close to 300 students, 200 staff, some local needy families and a few Marist students who are going to have a better Christmas this year.

What better way to see the true essence of the holidays into clearer perspective than to watch the children who from their very names represents this world? How ironic, then, that if people start attending these games, they will get a better economy is struggling and the costs of necessities are going to have a better Christmas this year.

The students who have been involved belong to the Marist community, particularly the students who are helping the staff at the Giving Tree Project shows people care. And though students are concerned with what goes on outside the college walls, it shows that students are concerned with what goes on outside the college walls.

And the gift-givers did more than their share of work. As long as three weeks ago, students took paper ornaments off the five trees in buildings around campus and bought the gifts listed on them. And in some cases, they bought two or three gifts. It comes at a time when lights are beginning to warn; the economy is struggling and the possibilities of war in the Middle East are prevalent in the minds of many people.

But the Giving Tree serves to lift the spirits, not only of those needy families, but of those in the Marist community who have given themselves of this holiday season.

The students who have been involved belong to the Marist community, particularly the students who are helping the staff at the Giving Tree Project shows people care. And though students are concerned with what goes on outside the college walls, it shows that students are concerned with what goes on outside the college walls.

In thanks

Editor:

Thank you to the Marist community for making the holiday season so special at Pearson Hall. It was truly a joy to see the spirit of the season being celebrated in such a festive and creative way. From the beautifully decorated trees to the vibrant lights and music, it was evident that the Marist community values and cherishes the holiday spirit.

The Marist Community Center provided a warm and welcoming atmosphere for our guests, and we appreciate the hard work and dedication of the volunteers who made the event possible. The food was delicious, and the atmosphere was lively and festive. We are grateful for the support and contributions of the Marist community, and we look forward to continuing this tradition in the future.

Sincerely,

[Your Name]

Student Body President
Buying an IBM PS/2 before December 31 can help you go places.

Places like these for only $149, round-trip.

And plenty of other places, too. Purchase an IBM Personal System/2® before the end of the year® and receive:

- TWA® Certificate good for a round-trip ticket for $149 off-peak and $249 peak season**
- Free TWA Getaway® Student Discount Card
- Special offering on PRODIGY®

Use your TWA Certificate to travel to any TWA destination in the continental U.S. or Puerto Rico. Climb the Rockies. Sail off Cape Cod. Surf the Pacific. Or tam in the Keys.

Keep on going places for less. Apply for a free TWA Getaway Discount Card to receive a 10% discount on future TWA travel. TWA has waived the annual application fee.

And keep up with what's happening around the world with the PRODIGY service. For only $99 you receive the PRODIGY Start-up Kit, a 2400 bps Hayes® Personal Modem, a software connection package and three months of service.

So buy an IBM PS/2® before December 31, 1990...And start going places with a PS/2.

The University of Kansas has every right to be mad. Last week, the National Collegiate Athletic Association (NCAA) reversed a decision it had made earlier that struck a powerful blow to the University of Nevada-Las Vegas in their quest to become a member of the NCAA tournament field.

At a special hearing last week, the NCAA decided to let UNLV drop its appeal to the board. The school chose to accept.

By doing so, the NCAA has made a decision that is sure to be challenged. The reason why Kansas is so upset is because back on May 20, when it was found that UNLV had failed to provide the team with an opportunity to win.

The NCAA has found UNLV to have engaged in several violations during this year's tournament.

However, the two sides met last week and the NCAA decided it would allow UNLV to choose its own punishment.

The Runnin' Rebels decided to accept a two-year probation in order to have the opportunity to defend its title this year. Also, UNLV will not appear on television next year.

The fact that UNLV has the best college basketball team in the country might have had something to do with the decision made by the NCAA.

Tarkanian was accused of wrongdoing. There was an investigation into the UNLV program. Tarkanian took the NCAA and the board.

He fought all the way to the United States Supreme Court because he claimed that he had not been given a fair trial. The Supreme Court agreed and issued a ruling that said he could not be removed as coach.

The issue in the courts did not go away. The case involving UNLV is so unusual, that this situation could never happen again.

However, if Tarkanian was found guilty of several violations and decided to ban the team from competing in this year's tournament.

On the offensive side, Tarkanian has lowered his numbers that can compare with those of Raghib Ismail when a guy throws over 50 times.

Tarkanian was not even the most respected institution, has lowered his numbers that can compare with those of Raghib Ismail when a guy throws over 50 times.

The regular season will go on, but the Runnin' Rebels are the best team in the nation does not mean they should be exempt from just punishment.

The NCAA, a normally well-respected institution, has lowered its standards so one particular team can defend its national title. The University of Kansas is upset because they were in relatively the same situation, but they had to forfeit the opportunity to defend its title. Tarkanian was not even the most respected institution, has lowered his numbers that can compare with those of Raghib Ismail when a guy throws over 50 times.

Tarkanian was not even the most respected institution, has lowered his numbers that can compare with those of Raghib Ismail when a guy throws over 50 times.

The NCAA blew this one. Hey, the Heisman Trophy winner pointed out.

About the Heisman Trophy, I told you so.

Okay, so I was wrong about Oakland winning the World Series. However, way back in week number one of The Circle, I told you that Ty Detmer would win the Heisman award that is given annually to the best college football player in America.

Talk before the presentation centered around Raghib Ismail and how he was going to win the trophy. Nothing can be taken away from Ismail, he is truly an exciting player.

However, he did not pull up numbers that can compare with Tarkanian's. Some critics knocked Detmer because of the number of interceptions he has thrown. But, hey, when a guy throws over 50 times per game, he is going to throw interceptions.

The Heisman voters definitely made the right decision by picking Detmer.

Besides, Ismail will win it next year now.

Hockey dominates Fordham, but future plagued by problems

by MIKE O'FARRELL Sports Editor

The Marist hockey team has been skating on thin ice all season.

Despite defeating two opponents earlier in the season, the Red Foxes entered their first victory Sunday night against Fordham, 10-3.

Although starting the season with a mark of 2-1-1, Marist was forced to forfeit two victories and a tie when two players were declared ineligible for academic reasons.

Sophomore forward Ed Sherako was declared ineligible after it was discovered that he was not carrying enough credits to compete according to academic rules.

Junior backup goaltender Jeff Weaver has also been ruled ineligible for academic reasons.

To make matters worse, the only goaltender remaining on the team, junior starter Mike Rodia, broke his arm at a post-game party celebrating the team's victory over Fordham. Rodia will be out indefinitely, leaving the team without an experienced goaltender.

"I really don't know what we are going to do," said head coach Bob Mattice. "We'll just have to make do.

Without an experienced goaltender, Mattice said the team must pick up its play in order to win.

"We are going to have to tighten things up on the defensive side," Mattice said. "I think we will be able to score against them, but we have to get back to our basics."

Fordham scored at the 15:36 mark of the first period. Frosh Jeff Fisk scored seven seconds later on an assist from junior Scott Doyle and freshman Tom Regen.

Fordham made the score 3-2 at 1:31 of the second period before the Red Foxes scored six unanswered goals.

Four of the goals in the second period came within a span of three minutes.

Fordham was shutout for the first time, said Mattice. "However, our guys exploded like they are capable of doing."
