New dorm in sight; trustees vote on Nov. 2

by BETH CONRAD
Senior Editor

College administrators and the Board of Trustees will vote Nov. 2 on a proposed new dormitory.

The dorm, which was first proposed in 1988, was put on hold in order to build the Dyson Center, the new classroom building built behind the Lowell Thomas Communication Center. Although the plans for the dorm were approved in 1988, they need to be re-evaluated and re-approved, said Cox.

"What had been acceptable three years ago, may not be acceptable today," he said. The proposed new dorm will house 400 to 500 students and will be located west of the Campus Center where the tennis courts are located, said Cox. Although the courts will be moved west, nothing was being filmed in all of L.A. the students said.

Another major complaint from students was the lack of access to all the major industries. "I believed the location I had chosen was near the hub of all of the places the students needed to see for the class," said Nanos. "I don't call on any higher level of principles — common sense isn't an option," she said. The students said they needed to be centrally located the students where they could have access to all the major industries.

"I believed the location I had chosen was near the hub of all of the places the students needed to see for the class," said Nanos. "I don't call on any higher level of principles — common sense isn't an option," she said. **Freddy dies in final Elm Street flick**

**By Brian McNiel**

A dream scene death, not to be morbid, but the effects are as real as the Hollywood stuntmen who perform them in the new movie, "Freddy's Day." It is not much different from the ending that was filmed in 3D.

As usual with the Elm Street series, Freddy's death is important to the plot. The film features an innovative feature called "3D," which allows viewers to use glasses and other accessories to see a three-dimensional image on the screen. Freddy's death is one of the key events that occurs in this new film, and it is executed in a realistic manner.

The ending was filmed in 3D, and the effects are as believable as the Hollywood stuntmen who perform them. The stuntmen are responsible for bringing Freddy to life, and they do an excellent job of making him look real.

The new film is called "Freddy's Day," and it is a sequel to the original Elm Street movies. It features a new cast, as Freddy Krueger, played by Johnny Depp, returns once again to terrorize the town of Elm Street.

The film is made up of a no name cast, but the exception of character is Freddy Krueger, played by Johnny Depp. The film features an inventive take on the Elm Street franchise, and Freddy's death is a key event that occurs in this new film.

The new film is no different than the others. The Elm Street franchise has been around for years, and it is always exciting to see what happens next.

**Competition for employment grows as work/study/deadline nears**

**By Krista Raad**

As of Oct. 1, any incoming student who applies for work-study will be considered for all campus-based work/study positions, as well as all campus-based work/study positions. The work/study office keeps a listing of open positions, and it is updated on a daily basis.

Based on the Federal Fixtures program, work-study students must pay the entire wage for work/study students. The Federal Fixtures program is a way for the government to provide financial aid to students who are working while attending college.

Many students who need employment as soon as possible, or who need to make ends meet, look to the Federal Fixtures program for help. The program provides financial aid to students who are working while attending college.

The office keeps a listing of open positions, and it is updated on a daily basis. Every position that is open is listed on the office's website, and students can apply for the position by going to the website.

The office also provides financial aid to students who need to make ends meet while attending college. The program provides financial aid to students who are working while attending college.

**By Megan McConnell**

A new policy requiring every student to take part in an examination and to conduct all bidding and registration activities in person has been adopted by the Greek council starting with the fall semester. The policy is designed to ensure that all students are aware of the policies and procedures that govern the Greek system.

The policy requires that all students participate in an examination and to conduct all bidding and registration activities in person. This includes the examination of candidates for membership, the examination of the Greek council, and the examination of the Greek council's officers.

The policy also requires that all students participate in the examination of the Greek council's officers. This includes the examination of the Greek council's officers, the examination of the Greek council's officers, and the examination of the Greek council's officers.

The policy is designed to ensure that all students are aware of the policies and procedures that govern the Greek system. The policy is designed to ensure that all students are aware of the policies and procedures that govern the Greek system.

**FINANCIAL AID UPGRADED WITH NEW SYSTEM**

By Julie Martin

To accommodate the continually increasing number of students applying for financial aid, new systems have been implemented to make the application process more efficient. The new systems allow students to apply for aid online, and they also allow for quicker processing of applications.

The new systems allow students to apply for aid online, and they also allow for quicker processing of applications. The new systems have made the application process much more efficient, and they have also made it easier for students to access financial aid.

The new systems also allow for quicker processing of applications. The new systems have made the application process much more efficient, and they have also made it easier for students to access financial aid.

Number of students studying science on the rise

By DOMINIC E. FONTANA

The enrollment of science majors has increased greatly at Marist College in the last few years, according to the large freshman class.

A greater number of students is enrolling in environmental science and medical technology courses, according to Dr. Andrew McIver, chairman of the division of science at Marist.

There are approximately 120 new students in environmental science and medical technology courses, according to McIver. Each student is required to take one or two courses in the computer science department, according to Marist.

New phone technology hits dorms; students pleasantly surprised

By AARON D. WARD

It records, sends and changes messages on a phone, and it is changing college dorms.

The phones are not a phone, but a phone and a phone, and are changing the way students live in dorms.

"My phone is a phone," said Jeremie Harris, a freshman, psychology major from Watertown, Conn., "and I use it to make phone calls, and I use it to send messages, and I use it to record messages." Harris said he had been using the phone since last week.

"I have a phone," said Harris, "and I use it to keep track of messages, and I use it to send messages, and I use it to record messages." Harris said he had been using the phone since last week.

Two Marist College students have been suspended for the possession of a cellular phone.

The students, both members of the 1991 Freshman Class, were suspended for three days, according to the registrar's office.

"It's a tough decision," said J.F. Leary, associate dean of student affairs. "We want to make sure that students understand the importance of having a cell phone, but we also want to make sure that they understand the importance of not having a cell phone." Leary said he believes the phone is a tool that can be used in many ways, including sending and receiving messages, and that it can be used to create and maintain a student's interest in the college.

"I think it's a tough decision," said Leary, "but we want to make sure that students understand the importance of having a cell phone, and we also want to make sure that they understand the importance of not having a cell phone." Leary said he believes the phone is a tool that can be used in many ways, including sending and receiving messages, and that it can be used to create and maintain a student's interest in the college.

Taking over the phone

The phone is a tool that can be used in many ways, including sending and receiving messages, and that it can be used to create and maintain a student's interest in the college.

STADIUM SET FOR '92
by JOY WILLIAMS
Staff Writer

Minutes of the new field up on the north west of campus due to its new baseball field Marist is asking.

The new field is one of the key features in the current playing field projects schedule.

According to Mark Sullivan, vice president of Marist baseball field will have the look of a small stadium, complete with bleachers and a press box.

"It will be one of the present baseball fields in the area," said Sullivan.

Sullivan said that the field will be advanced in construction, including an updated drainage system, as well as first-class clay and grass.

According to Sullivan, the new field will be further funded by grants from the McCown Foundation.

Finally, going to college can save you some money.

But you've never thought you'd hear that. But just by being a student, you can get special prices on IBM PS/2 computers that will help you through school, and long after you get out.

IBM offers a variety of PS/2 Selected Academic Solution models to choose from. And with the IBM PS/2 Loan for Learning, you can own one for as little as $30 a month*. and take it up to four years to pay.

So while the price of college keeps going up, at least the price of saving is on the way down. Visit your campus outlet to find out how to make a PS/2 work for you.

Boothers’ new addition shows he’s a ‘keeper’

by KEITH SOUAR
Staff Writer

Matthew Palmer has made a complete change in his approach to the soccer season.

In only five games, the sophomore goalie has shown improvement from last season. Some of the early season mistakes can be attributed to Palmer, but the defense has also improved.

"Matthew Palmer is a keeper that can save you games," said Sullivan. "He played well today."...

V-ball splits weekend matches

by ANDREW HOLM LiND Red

Women’s Volleyball vs. Manhattanville (H)
Saturday at 11 am

Women’s Volleyball vs. Manhattan (H)
Today at 7 pm

The Marist women’s volleyball team and the Manhattanville women’s volleyball team met this past weekend. The Red Foxes split a pair of matches against the opposing teams.

In the first game of the doubleheader, the Red Foxes won 3-1, 15-13, 15-10, 15-8. The Red Foxes controlled the game by getting a consistent and powerful offense going.

In the second game, despite a slow start, the Red Foxes were able to rally back and win the game 3-1, 15-11, 15-12, 15-11.

The Red Foxes will be back in action this weekend against the College of St. Rose. The visitors will come to Marist tonight when it hosts Manhattan-Ville at Van Cortland Park. The Red Foxes will then travel to St. Rose for a home-and-home series.

Sports Schedule

Women’s Tennis vs. Iona (A)
Today at 3:30 pm

Football vs. GaLLataat (A)
Saturday at 1 pm

Soccer vs. Adelphi (A)
Saturday at Noon

Women’s Volleyball vs. Manhattanville (H)
Today at 7 pm

Women’s Volleyball vs. Vassar (A)
Saturday at 1 pm

Cross Country at Van Cortland Park Saturday at 11 am

BOOTERS' NEW ADDITION SHOWS HE'S A 'KEEPER'
Gridders notch first win; pummel Pace 28-7

by MIKE O'FARRELL

The football team will be searching for its second win of the season when it travels to take on Gallaudet University. Marist defeated the Bison last year, 23-13.

Playing at Gallaudet, an all-deaf school, is a different atmosphere for the Red Foxes, said Head Coach Pardy.

“Play by the whistle,” he said. “The play stops when the ball carrier is completely on the ground. They can’t lift up — I won’t let them set up.”

Last Saturday, it didn’t take Pace University long to realize the Red Foxes meant business.

Having dropped its first two games of the season, Marist needed just over a minute to show it wasn’t about to lose three straight — beating the Setters 28-7 at Leonidoff Field.

Freshman Bruce A. Harris returned a punt 50 yards for a touchdown, followed by a successful two-point conversion.

Pardy said Harris, a running back, would be a matter of time before he broke one for us.

“Every time the other team punts, we are thinking block or kickoff return,” he said.

Marist running back Kyle Carraro dives forward for extra yardage in the Red Foxes 28-7 victory over the Bison on Saturday.

The Red Foxes dominated both sides of the line of scrimmage.

Marist gained 336 total yards — 236 rushing — in the rout. The Red Foxes ran 77 offensive plays while the Setters ran 55. Pace was also unable to convert on 14 third down situations.

Leading the ground attack was once again All-American candidate Donald D’Aiuto. The sophomore tailback gained 131 yards on 33 carries — earning him Atlantic Collegiate Football Conference player-of-the-week honors for the third consecutive week.

The offensive line’s play deserves credit for D’Aiuto’s success, said Pardy.

“He’s got five studs up front opening up humungous wholes for him,” he said. “The offensive line has given us a steady performance in each game.”

The only point’s Marist needed came late in the opening quarter.

Quarterback Brian McCourt connected with Marcellus Washington on a 33-yard touchdown pass to put the Red Foxes ahead 12-0.

While D’Aiuto was getting a big game, Macedon Wyse scrambled 33 yards up the middle to put Marist up 18-0. Matthew Lynch — who has taken over the place-kicking duties — added extra point.

Lynch, a sophomore, also connected on a 34-yard field goal to account for the only Marist points in the second half.

“We needed that field goal,” said Pardy. “It was important to put those points on the board.”

Marist’s other score was set up by D’Aiuto’s punt return. Freshman Chris Colatizzo scored 30 yards on seven carries.

McCourt said the Red Foxes would really be with the game’s outcome in the end zone.

“It is great to get that winning feeling,” said Pardy. They really came out and played a solid football game.”

Boomers hit early season slide; lose three straight by 1 goal

by TELD HOLMUND

Despite improved play from last season, soccer has found itself in an early season slump.

Having won its first two games, Marist has dropped three consecutive games — all by one goal.

Last Saturday, the Red Foxes lost a tough 1-0 decision at the hands of Mt. St. Mary’s — a Northeast Conference foe.

Pardy hit early season slide; lose three straight by 1 goal

“Every time the other team punts, we are thinking block or kickoff return,” he said. “The play stops when the ball carrier is completely on the ground. They can’t lift up — I won’t let them set up.”

An open letter to Olympic basketball coach Chuck Daly:

Dear Chuck,

You must be a very happy man. You now have the easiest job in the world — coach the Olympic basketball team. You know the best thing about your job, Chuck? You don’t have to worry, since I’m not going to sit next to you on the bench.

There will be a great deal of talent vying for the final spot on your team. Picking that one player isn’t worth all the stress because the guy isn’t going to play anyway. Forget about Laettner and Shaq. Forget about Laettner and Shaq. Forget about Laettner and Shaq.

You, being an NBA coach, wouldn’t know anything about balancing minutes and playing everyone. Therefore, I can handle all the game substitutions as well.

If I’m going to handle all the substitutions, I might as well take me into consideration. I will be sitting next to you on the bench.

Thanks again, Mike.

A note to the football team: Welcome back.

After a disappointing start, it means something to come out in your weekend romp over Pace.
