85 percent of education directly from student tuition

by DIANNE PAPA
Staff Writer

Marist students occupying two buildings in Canterbury Garden Apartments will have to relocate to different apartments, according to Jim Raimo, director of housing and residential life.

"Giving up the lease will save money and get rid of 50 unused spaces in Canterbury," said Raimo. "Approximately 30 to 50 students will withdraw every spring semester."

Because Marist's lease with Canterbury expires on Jan. 15, two buildings won't house Marist students. Students in the two of the apartments, said they were angry about the situation.

"I feel very upset because we've been here for four years and they (housing) should've put students who are leaving in January in these apartments," Anne Nevins, a junior from Stamford, Conn., said. "By next fall, according to Raimo, new townhouses will be constructed which will house 144 students and take the place of the two Canterbury buildings.

Housing officials contacted the transfer students living in those buildings through a letter which said they would live in those apartments for first semester, and would be relocated for the spring semester. However, housing failed to tell the returning students that they would be displaced in those buildings about the situation — until after they moved in.

"Hopefully it goes to help keep the buildings clean," Kirstin Rinn, a junior from Charleston, S.C., said. "I feel it helps to pay security, too.

Football game draws crowds of all kinds.

"Hopefully it goes to help keep the buildings clean," Kirstin Rinn, a junior from Charleston, S.C., said. "I feel it helps to pay security, too.

Many students might be surprised to know that 85 percent of Marist's spending comes directly from the student tuition. Where does the money go? asked Burtson. "I never really thought about our taxesintendo clean," Kirstin Rinn, a junior from Charleston, S.C., said. "People with less priority points and lower gpa's (grade point average) get to live in apartments where they don't have to move. That's not right," Nevins said.

85 percent of education directly from student tuition

by CARI OLESKIEWICZ

Todd Burtson, a first year commuter student from Wadsworth, Ohio, said that he was upset by his tuition once he mailed in the check. "Where does the money go?" asked Burtson. "I never really thought about where our money goes."

But Burtson said that he would be willing to pay a little more money if it meant that the campus would be clean.

"I feel excited about doing something to help people."

Peace Corps educate volunteers and recipients

by KRISTEN McCADDE
Staff Writer

Not too many Marist professors have experienced teaching class in the middle of a movement to overturn the government.

Jim Helmreich, assistant professor of history, remembers the experience clearly from his days as a Peace Corps volunteer in the Central African Republic.

"In the classroom, the windows were holes in the wall. So we could hear what went on outside." Helmreich said.

"All of a sudden, a crowd of people walked into the streets yelling, 'copa d'eat!' Helmreich said.

Helmreich said he told the students to stay because if they wanted to, but that he was going to finish teaching. A couple of people left, but he finished his lesson.

Helmreich said he is teaching a history course, "Peace Corps volunteers between July 1981-July 1983." He joined the Peace Corps after college because he wanted to do something different.

"I was sick and tired of everything, and nothing really appealed to me. It was an adventure and there's so little of that in life," Helmreich said.

Peace Corps representatives were recruiting at Marist College last week and, according to the office of Peace Corps enrollment in New York City, the Peace Corps "continues to rely on the dedication and commitment of Americans of all ages who volunteer to spend two years helping the people of developing countries to meet their basic needs for health care, food, shelter, and education."

Helmreich said that 85 percent of Marist's spending comes directly from the student tuition. "I was throwing away everything for two years and starting over with people who felt excited about doing something to help people."

David Lillie, a public affairs employee at the Peace Corps office in New York, said that there are three goals the peace corps has to explain their efforts. "Our first goal is development of the countries."

"Volunteers have to be emotionally stable and be in good physical condition to be effective under stress. Lillie said. "They have to be friendly and patient in order to... see page 9
the audience. Therefore, the movie was not as exciting as it could have been. Overall, the ending was very cheesy and predictable.

In conclusion, ‘Candyman’ is a mediocre movie that fails to live up to its potential. It may be worth watching for fans of the horror genre, but it is not a movie that will leave a lasting impression. If you are looking for a thrilling and unique horror experience, you may want to avoid ‘Candyman’ and look for something else.
Tradition campaign gives way to television

by KIRILL A. LAKINIAN

After over 13 months of ongoing negotiations, each of the three firms involved produced the final cuts in its own way for the advertising campaign.

While independent bookkeeper Bruce Neff was busy working on the final cuts, the FTW (Future Technology Watch) team was working overtime to ensure the quality of their work.

"We've been working diligently on this project for over a year," said Neff. "It's a large block of work that requires a lot of attention to detail."

Meanwhile, advertising executive Dan Ackerman was busy working on the final touches for the campaign. "This is a major undertaking, and we're working hard to make sure everything is perfect," said Ackerman.

Despite the challenges, the team is confident that their efforts will pay off. "We're excited to see how this campaign will perform," said Ackerman. "We've put a lot of effort into it, and we think it will be a success."

The campaign will continue to run for the next year, with updates and changes made regularly. "We'll be making adjustments based on feedback," said Ackerman. "We're looking forward to seeing how this campaign evolves over time."
WONDERING ABOUT: THE "GINKO BILoba" AND DONELLY

Merve Dornemann

Editor:

Worried that hopefully the "Ginko Biloba" and Donald Donnelly will do well next year? For those of you who are interested in our campus and the things that happen here, the "Ginko Biloba" is a supplement that is published by the Banyan, a publication of the student newspaper, the College Voice. The supplement is named after the "Ginko Biloba" tree, which is a large deciduous tree native to China and Japan. It is known for its distinctive fan-shaped leaves and its ability to grow in a variety of conditions. The supplement is a good source of information on campus news, events, and happenings. Donald Donnelly is a local politician who is running for a position in the state legislature. He is a member of the Democratic Party and has a campaign slogan of "Putting People First." He has a strong record of supporting education and healthcare, and he is known for his advocacy for the environment. If you are interested in his background and platform, the "Ginko Biloba" is a good resource to read. If you are interested in the "Ginko Biloba," please let me know, and I can provide more information.

E-mail: HZAL LT 211
Mondays between 11am and 6pm
Security briefs

the "beat" description of the rape is a Black male, with a hairy chest and approximately 250 pounds. Lt. Gary Leary said the man has a "thin nose, beard and a large head." Raimo said this is different from Greek life. Craig Reisert, a senior from 8.
DON'T LET HEPATITIS B HAPPEN TO YOU

Five months after graduating from college, Cindy, a young Woody Creek, CO, resident, was diagnosed with hepatitis B. In the wake of this revelation, she wisely chose to inform her close friends and family about their risk of infection. They learned the signs of hepatitis B and how to protect themselves.

"I think it's good to be testing," Cindy admitted. "It's a chance for us all to see if we have the disease." In her story, we can see the importance of testing and education in preventing the spread of hepatitis B. So, why should you know about hepatitis B?

- It is caused by a virus that strikes 300,000 Americans each year.
- It can cause serious illness and even death.
- Hepatitis B can be prevented with vaccination.

If you're not sure if you're at risk, the hepatitis B vaccine is recommended for all adults, including people who are sexually active or at risk for exposure to infected blood or body fluids, including healthcare workers and persons at risk for sexual exposure. 

- Sexual activity: Engage in sexual activity with an infected person.
- Intravenous drug use: Engage in intravenous drug use or have used drugs intravenously in the past.
- Professional exposure: Are a healthcare or public safety worker who may be exposed to blood or body fluids of infected people.
- Household contact: Are the household contact of an infected person.

In this case, hepatitis B vaccine is the best way to prevent hepatitis B. You should get vaccinated if you:

- Are an infant or child under 18 months and at high risk for exposure.
- Are a household contact of someone with hepatitis B.
- Are sexually active with someone who has hepatitis B.
- Are a healthcare or public safety worker who may be exposed to blood or body fluids of infected people.
- Are a parent or sibling of a child with hepatitis B.

But the good news is that the disease is preventable. So, make sure you're up to date on your hepatitis B vaccination.

Thank you for reading about hepatitis B. Together, we can prevent this serious illness and save lives.
Women v'ball squad splits, finishes 14-14

by ANDREW HOLMLUND
Staff Writer

The women's volleyball team finished its 1992 campaign by splitting its final two matches (14-14) ended in nine. "We were feeling pretty good," said Coach Sally Johnston. "We're not sure what we're going to do, but we're going to work hard, and we're going to work hard to win." Johnston said some of her players have improved, and she was "really happy" with their performance.

Red Foxes nip FDU on late INT

by J.W. STEWART
Sports Editor

Backpedalling to his own 35-yard line, Fairleigh Dickinson quarterback Mike Miles sent the ball in the air for a play that could have gone either way. But at the last second, just as the ball was about to hit the turf, Senior Bob Angrilla did something that didn't happen to him often: "I felt the ball," he said. "I got the ball." And with that, the Red Foxes took the lead, 15-11.

POPE STARS AS LADIES GRAB FIRST WIN

by TERI L. STEWART
Staff Writer

The women's swimming team won its first meet of the season against Fairleigh Dickinson University (14-14) ended in nine. "It was a good race," said Head Coach Howard Goldman. "The ladies have been practicing hard, and they're getting better every day." Goldman said some of his players have improved, and he was "really happy" with their performance.

Fall '92: The good, the mediocre and the rest

by J.W. STEWART
Staff Writer

As the leaves start to fall, so do the fall sports — fall from sight. The most successful team this fall is the football team. But it was the Red Foxes who brought home the victory, 15-11.

important middle stretch of the season as the Foxes were without star quarterback Bob Angrilla for four weeks. "I think we're going to be really strong this season," said Head Coach Ken Harrison. "We have a lot of talented players, and they're all working hard to win." Harrison said some of his players have improved, and he was "really happy" with their performance.

For the full story, see SWIM page 11.

THE CIRCLE'S INSIDE GUIDE TO THE 1992 - 1993 SEASON
Cagers hope experience will finally lead to success

by TED HOLLIMUND
Staff Writer

Last year, Dave Magarity thought the program was going to be
ready to take the next step up, but it didn’t happen.

Post highs, who averaged 18.4 points a game last season for Marist
College, led the way, but in the end the Red Foxes were
beaten by the fourth-place team in the Northeast Conference for the
second year in a row, 10-20 (9-7 in the Northeast Conference)
season, and that was the end of the year.

Now it’s 2001 and Magarity
thinks this team is ready to take
the next step up.

Magarity believes the Foxes, who
won the Northeast Conference Tournament (2-0) and the NCAA's (1-0)
last year, have the experience to compete with the
biggest teams in the country. The 6-foot guard
from Harrisburg, Pa. “I kept asking myself, ‘Where’s the next Amy?’”, he
said.

She has an awe about her.

Stacey Dengler

HOOP SCOOP

Modesty may prevail but Fields is still a dream'

by J.W. STEWART
Sports Editor

Sitting among her teddy bears, Charlene Fields is very much at home. Like her smiling bears, Fields is quiet, almost bordering on the shy. "I think I generally am (a shy person)," said the soft-spoken senior guard from Schenectady, N.Y. "If I get to know someone, I can be real talkative. But outgoing easy-win. I'm not that type of person."

While she may be quiet off the court, she is the complete opposite on the court — except it is her actions that speak volumes, not her words.

"I'll never have that quickness," marveled junior Cindy Carroll. "I remember watching her play when she was in the sixth grade. She was just a lot of things. Sometimes when the team's in a huddle or Coach is talking, I don't hear it because I'm in my own little world," she said sheepishly. "What goes on in that little world?"

"It's all self-talk," said the psychology/special education major. "If it's a good game, I talk to myself about the good things. If it's a bad game, I keep saying, 'Come on, you can do better than that.'"

Fields may have the chance to do better than she has — she's within reach of becoming the women's all-time leading scorer. "I think I generally am (a shy person)," said Babineau. "It's a thing in high school, in college it's something to be proud of, too."

"She has an awe about her," said Stacey Dengler. "It's the type of player you'd always want to be." Using her quickness and dead-eye shooting, Fields poured in 497 points last year, the highest-scoring season point total in the history of the program.

After averaging 17.8 points a game, she is only 80 points away from breaking the 1,000-point mark for her career. Chances are she will get her 1,000 points at the University of San Francisco Classic just before Christmas.

"It probably won't be a big thing because it will be out there. It's just like another house to me," she said modestly. "It didn't seem like a big thing in high school, in college it may be bigger."

While Fields is just as comfortable with a ball at her heels (she's been playing since the sixth grade), she often gets "lost" on the court.

"When I'm on the court, I'm very concentrated — I block out a lot of things," explained sophomore Lori Fields ended and never shook it until her senior year — but to student-teach, not to play. "I might have her go get some plastic surgery so she can jump out of the stands and help us," joked Babineau.

"It's all self-talk," said the psychology/special education major. "If it's a good game, I talk to myself about the good things. If it's a bad game, I keep saying, 'Come on, you can do better than that.'"

Fields will return to campus next year — but to student-teach, not to play. "I might have her go get some plastic surgery so she can jump out of the stands and help us," joked Babineau.

"One thing I have learned is to take the ball to the hoop instead of not shooting," she added. That piece of advice came from her own mother.

"Before last year's game against Lehigh, she sat down to talk to her about her game and what she should do differently. The mother-daughter chat was well worth it. On that night, the mother scored a 37-point explosion from the field that set the single-game scoring mark. "She's very protective of me," said Fields. "She just wanted to help me get better.

"Fields, however, stressed her parents are "on the fence."

"They know their place — they just give me pointers every now and then," she said.

It may be the program that goes into shock next year and not her body.

"It'll be like losing someone in your family," said Babineau. "I'll hurt for a while, but you gotta go on.

"She has an awe about her," said Stacey Dengler. "It's the type of player you'd always want to be."
