ADA/504 Coordinator appointed

by STEPHANIE MERCURIO
Editor-in-Chief

After years of debate, Marist College has appointed an ADA/504 Coordinator.

John Gildard was named Coordinator on Nov. 4. Linda Cooper, director of the office of special services, said the appointment was made because two students brought the subject to the public.

"Debbie Alfano and Jackie Caruso were assigned to look into changing a policy for a class assignment," she said. "They helped to make the student aware of the issues."

Gildard said his position requires him to be responsible for a number of things.

"I have to receive and look into problems and complaints with accessibility and other ADA situations that arise," he said. "I am also responsible for applications of employment and for concerns of guests on campus.

Carol Coogan, director of human resources, said there will now be a more standardized procedure for people with concerns.

"There is now a centralized procedure for people to send concerns and complaints to," she said. "We will also be creating a form that can be filled out when there is a concern."

Gildard said he wants to take a proactive stance on issues concerning people, with disabilities.

"I would like to look at situations before a problem arises dealing with accessibility and other similar issues," he said. "There are ideas on the drawing board that I need to look into."

Gildard said he needs to determine where disabled students are located on campus.

"I need to make a list of where the students are living and distribute this list to security and to the fire department, so it will be easier to know who needs special accommodations," he said. "I would also like to meet with the student body president and with groups that need to deal with these issues."

Cooper said this position should have been filled years ago.

"Students often tell me about problems they have with accessibility, because I deal with them on an academic level," she said. "However, I don't have the power to make the campus respond to their concerns. Hopefully, there will now be a procedure that must be followed, so the complaints and concerns can be heard."

Cooper said she hopes this position will have meaning and will help disabled students.

"I know that John is capable of doing a wonderful job, he definitely is sensitive enough to deal with this," she said. "However, a critical part of this position working deals with that person having authority to change things. I wouldn't want someone who has authority in name only."

According to Cooper, there are about 230 students on campus who have disclosed that they are disabled. One of their main concerns is accessibility at night.

"Many of the students who have low vision can't see well at night," she said. "There is very poor lighting and marking on the ground to illustrate ground level changes. This limits activity at night for these students."

Coogan said the issue of accessibility has been discussed for a long time.

"I don't want the community or the students to have the impression there was no concern before the coordinator was appointed," she said. "This position is not required to be filled in a private institution, but there was a need for it."

The swimming and diving teams are enjoying an undefeated first of the 1997-1998 season.

Information Services takes over more computer labs

by AMANDA BRADLEY
Aest. News Editor

A newly implemented software solution will keep computer computer labs running more efficiently.

Information Services (IS) became the official administrator of all campus computer labs this fall. That job used to be shared with Academic Computing, but IS is now responsible for Lowell Thomas 126 and 211, Dyson 303 and 388, the Donnelly PC labs and DaVinci and the new McCann Pepsi Hall of Fame.

JoAnn DePoe, training and development analyst, said the management shift was nothing major.

"It isn't that big of a shift," she said. "We just say we officially manage the labs now."

Barbara McMullen, director of Academic Computing, said the change is a step in the right direction.

"The reason the computer labs were given back to Information Services was because they are able to maintain them in a fine fashion," she said.

DePoe said the changes are a result of the implementation of the new "Image" software that will keep the computer labs running efficiently.

"These computer lab responsibilities are the same," she said. "The change is the way the work is delivered to lab users."

According to DePoe, the new "Image" software will help manage server applications on campus computers where security software was originally required. Without security software, it was easy to delete or corrupt files. It was an uneconomical task to diagnose and then fix the problem when a大学生 found a bug. "We did have the security software in place, but there is always a back door to things," she said.

DePoe said "Image" software fixes technical problems in less time than ever before.

"It can rebuild in four minutes," she said. "It won't dig into the problem. It will simply replace the original files on the machine if they are missing."

DePoe said the idea of the

Jenny Murray goes by her name on television, but...well, she is known for her radio voice as Pickle J. Murray. Murray, a sophomore radio/television major at Marist College, says that it's a bit of a double life, "I'm going to school for radio/television and I use it for my broadcasting voice. I went to school for radio/television...but I didn't mean it."

But the city to which Murray is referring is New York. Murray is the radio voice of Burly Bear Network, which is a feature that is a part of MCTV. "I've heard a lot of people say that it's like a high school. But it's not, it's really a lot of fun. I've learned a lot of things that I use in my future," Murray said.

But Murray is far from the only one who has been successful with the voice of Pickle J. Murray. "I've heard a lot of people say that it's like a high school. But it's not, it's really a lot of fun. I've learned a lot of things that I use in my future," Murray said.

Burly Bear is a show that has been on the air for over 20 years and it has been a part of MCTV's programming for years. "I've heard a lot of people say that it's like a high school. But it's not, it's really a lot of fun. I've learned a lot of things that I use in my future," Murray said.

The View from Sue... by Sue Goodwin

To The Editor:

I got compelled to write in after reading an article titled “Missing Classes is Not the End of the World,” written by Assistant Professor of Student Academic Advisor, Adjunct Lessor in Psychology and an alumni of Monroe College. I have experienced these issues from “both sides of the desk,” and my perspective on the value of classroom attendance approaches quite different from Mr. Macon’s. Faculty members make why students are absent or tardy for classes quite clear at the beginning of the semester. Students who do not attend classes on a regular basis short-change their own learning, as well as the learning of their peers nor the learning of the whole classroom. It is important to realize that students who are absent or tardy for classes will not be graded on their absence, but their attendance may be documented and verified.

MISSING CLASSES ARE NOT THE END OF THE WORLD

The Office of Student Academic Advisor will notify a student’s instructors if the student is absent or tardy for classes more than four or five times. Missed attendance may be documented and verified. In this sense process may be even more important than product.

The arguments for cloning are rampant across the media. This office works with a large number of students. The registered nurses can provide quality health care for Mott College students. They also provide care to a number of members, approximately 1500 students, who are under the care of a specific instructor and the Mott College’s Medical Director and the Legal Office. These nurses care for students who are under the care of the College’s Medical Director and the Legal Office. These nurses care for students who are under the care of a specific instructor and the Mott College’s Medical Director and the Legal Office.

Director of Health Services defends tactics

To The Editor:

The article, “Student Concerned With Marist Health Care” contained comments that I cannot support. I strongly disagree with the position that public health officials are responsible for the health care of students. The registered nurses care for students who are under the care of the College’s Medical Director and the Legal Office. These nurses care for students who are under the care of a specific instructor and the Mott College’s Medical Director and the Legal Office.

Concerns or objections from students are considered important. Last year, I initiated a Mock Health Care Fair in order to educate the students about preventive health care. Students had the chance to consult with a variety of medical professionals, including nurses, physicians, dentists, nutritionists, and health educators. The fair provided an opportunity for the students to ask questions and receive information about health-related topics.

The fair was a success, and I plan to continue offering it in the future. Students had the chance to consult with a variety of medical professionals, including nurses, physicians, dentists, nutritionists, and health educators. The fair provided an opportunity for the students to ask questions and receive information about health-related topics.

Men's soccer season comes to an entertaining end; game 2 ends in a tie
by Chris O'Donnell

In 1994, the men's soccer team went out with a bang. They won their final 10 games of the season and advanced in some surprising fashion into the NCAA Tournament. And, this year, the Marist Red Foxes lost only once all season. The win was Marist's 13th of the season this year, and the Red Foxes lost only one game all season.

The Foxes were able to advance to the NCAA Tournament in part because of a tie against a strong team.

The Foxes tied the Boston University Terriers in the first round of the tournament. The tie meant that the Foxes would advance to the second round of the tournament. The Foxes then lost to the University of Vermont Catamounts in the second round.

Rugby falls short in post-season
by Jan Hickel Jr.

The Marist College rugby team continued its successful season with a win over the University of Vermont last week.

The game was against Burlington and ended in a 17-0 loss. The Marist team scored three tries, but wasn't able to get past Burlington's defense.

The Marist team is currently ranked 17th in the nation.

The Foxes will play in the national championship game on Saturday at 1 p.m.

Men's swim team still unbeaten
by Mark J. Wells

The Marist College swim team is currently unbeaten in its second season. The team has won 12 of its 14 meets this season, with a loss to Fordham University in the final meet.

The team is led by senior captain Alex Bond and junior captain Ben Green.

The team has set several records this season, including a record-breaking performance in the 200-yard medley relay.

The team will continue its winning streak when it faces Fordham University in its final meet of the season.
Football gears up for a ground show down in ’97 season finale

by THOMAS RYAN
Staff Writer

Something is going to have to give this Saturday when the Sienna Saints travel to Poughkeepsie for Senior Day. Whether it is the Saint’s Reggie Greene, Division I-AA’s leading rusher, or the other is Marist’s defense, one number one in I-AA rushing defense. At stake— an unbelievable 200-yard per game average for Greene, and a national record for the Red Foxes.

Greene, the two-time defending MAAC Player of the Year, needs 102 yards rushing to maintain a 200-yard average, and 302 yards to reach 2,000 for the season. Greene needs 102 yards rushing to match in 1994.

That last number may sound a bit far-fetched, but keep in mind 302 yards would still be 77 shy of his single-game career high of 379 yards set against St. Francis. Redd still has a chance to break the Marist single-season record for catches and yards. He needs five receptions and 115 yards against Sienna to break both records.

Marist increased its lead on their first possession of the second half, as Godfrey first covered 24 yards to move the ball to the Golden Griffins’ 16, and then followed that up with a 5-yard touchdown run which pushed the score to 13-0. A long Canisius drive was capped off by quarterback Bryan Roland’s 1-yard touchdown run early in the fourth quarter, cutting the Red Fox lead to 13-6.

Marist put the game away later in the fourth when sophomore Jack Reilly had a 1-yard touchdown run of his own, set up by Godfrey’s 18-yard run that moved the ball to the Canisius 7-yard line.

For the first game of the season, the team is 6-3-1. A month into the season, the team has a win on Saturday, and losing, 4-3, to Siena on Sunday.

Junior forward Bill Percason, junior forward Jason Caruso and forward co-captain Brian Warzecha all scored against Siena 5-1 on Saturday, and losing, 4-3, to Siena on Sunday.

Women’s basketball opens with exhibition loss to Czechs

by MARK J. WELLS
Staff Writer

The Marist College women’s basketball team opened up its exhibition season last Friday night as they hosted Roto Banca Bytynia, from the Czech Republic, at the McCann Center.

The Czech Republic, led by its swarming defense, defeated the Red Foxes, 71-52. Marist was forced into 12 turnovers over the course of the game.

The Czechs were led by Natalia Kravoiik, who poured in a team high 22 points on 6-21 shooting, some of the problems his team was having in their exhibition opener.

"We didn’t start well," he said. "Shooting 17 percent in the first half really put us in an early hole. I feel we are right where we should be after two weeks of exhibition play." The Red Foxes jumped out to an early 5-0 lead before the Czech Republic responded with a 21-5 run that put them up to stay. A six point deficit in the early stages of the second half, at 35-29, was the closest Marist would come for the rest of the game.

"I thought the Czechs played well in the first half — they were the better team," said Judson. "We need to work on our boxing out for next game."

The women’s next game is Friday at 5:30 p.m. at the McCann Center, when they will play the New York Gazelles in the first game of a doubleheader. The Red Foxes open their regular season at Boston College on Nov. 20.
