Student drinking concerns colleges

by CHRIS GROGAN & BEN AGOES
Ass. & News Editor

Although students may enjoy having McCoys across the street, it is a recurring headache for Marist security.

Joe Leary, director of Safety and Security, said he feels having a bar that close to campus is an accident waiting to happen. "It's only a matter of time before someone gets hurt crossing Route 9 after a night of drinking," he said.

Another concern is that underage students are allowed to enter the bar, according to Leary. "It bothers me that students are going over there who are not eligible to drink," he said. "The owners tell us they strongly enforce the law, but it is unsuccessful as far as I'm concerned. People come back to the campus and tell us that they have been drinking at McCoys."

Gerard Cox, vice president and dean of students affairs agreed with Leary. "The concern is whether or not they are making it possible for students who are underage to drink," he said.

While Cox and Leary agree the major problem lay in the fact it is illegal for a majority of students in college to drink, that was not the case 12 years ago. Until 1986, when legislation was put into place to allow the drinking age from 21 to 18, there was actually an establishment on campus that served alcoholic beverages.

Cyberrabbi lectures on shadow of spirituality

by JADMEYOMEO
Staff Writer

Rabbi Niles Goldstein is not your typical religious leader. Dressed in a fashionable brown plaid suit and looking more like a J. Crew model, this rabbi, writer, editor and poet spoke last Tuesday in the Nelly Goletti Theater. His lecture, "Confronting the Shadow Side of Spirituality," captivated the audience's attention.

Goldstein began his speech explaining that he enjoys learning from his audience. "I think I have a different style of speaking; one that can lead to spiritual growth. I also wish to learn as well as speak," he said. "I wish to have an exchange of ideas between me and my audience."

The central idea of his speech was an analogy between personal experiences and their connection to spirituality. Not until being face-to-face with what appeared to be a warm and fuzzy ball, but what was in actuality an Alaskan grizzly bear, did Goldstein gain a sense of spirituality.

Whereas he was fearful throughout his encounter with the fierce animal, Goldstein said he felt exhilaration after he managed to escape. He then connected the two ideas.

"In order to reach ultimate spirituality, we must be engulfed by God," he said. "We need to both love and fear God to receive both sides of spirituality." Goldstein later explained the main purpose of his speech.

"I am trying to give you a different vision of spirituality," he said. "One where God is with us everywhere, even in the shadow of the most difficult times." While Goldstein pleaded for his audience to remain hopeful, he also offered reasoning for when people go through bad or chaotic times. He referred back to his grizzly bear analogy.

Since opening last year, McCoys's has prompted administrative concern towards the underage drinking because of its great popularity among Marist students.

Before there were any coffee shops or the Cabaret, students could go and grab something to eat during the day and then purchase alcohol in the evening. This place was called "The Pub," and later renamed to "The River Room."

The River Room, which was located where the basement of the Student Center is now, was a "nice place" for students to hang out, according to Cox. "While some students would come enjoy a drink or meal there, it was primarily populated by students," he said. "Students

Marist loses suit, appeal uncertain

by BEN AGOES
News Editor

Marist lost a lawsuit in White Plains federal court last Thursday that claimed the college paid Barbara Lavin less than her male counterparts because of her sex.

The jury found there was statistical evidence men are paid more than females at Marist, but that was not the case when Cox and Leary agreed the major problem lay in the fact it is illegal for a majority of students in college to drink, that was not the case 12 years ago. Until 1986, when legislation was put into place to allow the drinking age from 21 to 18, there was actually an establishment on campus that served alcoholic beverages.

The College is considering all of its options, including an appeal of the jury's verdict. Marist remains committed to the policy that all its faculty are paid equally.
Student Government

In an effort to promote alcohol awareness, the Student Government Association will be sponsoring a series of events in November. The week of November 9th will kick off with a campaign aimed at reducing alcohol-related issues. For more information, please call Scott Neville at x4052.

Literary Arts Society

The Literary Arts Society is now accepting submissions for their literary magazine, The Current. If you have any poems, short stories, artwork, or other written pieces that you would like to submit, please put them in the LAS club mailbox in SC 369. Submissions will also be accepted via email at las.vassar.edu.

High schools praise "Science on the Move"

by BETH WATERS

School directors have been using the program in an attempt to improve academic performance. According to a Marist College official, a meeting at Marist College, which included 40 high school teachers, was held in 1999. Two major concerns were presented.

One concern was that science was taught with inadequate laboratory equipment and outdated teaching methods and materials. This was also a need for science was the need for more science teachers to improve their teaching methods. Andrew Molloy, director of the Marist College Office of Student Development, said that the program was meant to help students learn science better. "Our main goal has been to help improve the educational quality of these programs," he said.

He added that the teaching skills of the teachers at these high schools as well as the enthusiasm of the students.

There has been positive feedback from the teachers and students of Marist High School, according to Molloy. "Many high school teachers are very satisfied," he said. "Some of those teachers have said that even the most uninterested students in high school have started to enjoy science class."

Laptops computers, personal computers and using equipment that is part of the program. Teachers have been impressed by the positive effects of this new science equipment has had in every classroom.

"As the first equipment that was provided by the program was old-fashioned and it was impossible for classrooms to perform computer or science experiments," she said. "The experiments became more up-to-date when the new equipment was brought in."

Teachers can now use the new equipment more effectively because they have improved their classroom and teaching skills. "The new equipment has made it possible for teachers to use the new equipment more effectively," she said. "The teachers have been more flexible in using the new equipment."
Getting to know kids.

by MICHELLE ZIMMER

Children's Museum of Houston

Children's Museum of Houston is free, fun and educational.

What kind of people are in your target audience?

The typical user is a family of four, including at least one young child. The majority of visitors are parents and children under five.

How do you make sure they stay?

We have a mission to make learning fun for all ages. Our exhibits are designed to engage and educate visitors in a variety of ways. We also offer family-friendly events and activities to encourage continued participation.

What is their feedback?

We strive to create an environment where children and families can learn and grow together. Our visitors tell us that they enjoy the hands-on exhibits, the educational programs, and the overall experience of exploring the museum with their children.

What do you think makes a successful museum?

To be successful, a museum must be able to engage its visitors, provide educational value, and create a positive experience. This involves thoughtful design, a variety of interactive exhibits, and a welcoming atmosphere for all ages.

Is there anything else you'd like to add?

Our goal is to inspire a lifelong love of learning in all of our visitors. We believe that museums have a unique role to play in our society, and we are committed to continuing to provide exceptional programs and exhibits that meet the needs of our communities.

Procrastination key to success for some

by JENNIFER MATAZARO

Procrastination doesn't have to be a bad thing. In fact, it can be a key to success for some people.

Many people procrastinate, but this doesn't mean they're lazy or undisciplined. In fact, procrastination can be a useful strategy for some individuals.

Carla, a 23-year-old college student, says she relies on procrastination to get things done. She waits until the last minute to start working on assignments, but she always ends up finishing them on time or even ahead of schedule.

"I know I should be starting on my homework now," Carla says, "but I'm just not in the mood. I need a little more time to get into the zone."

Carla is not alone. Many people procrastinate in order to avoid stress or to avoid doing difficult or unpleasant tasks.

Procrastination can be a useful strategy for some individuals, but it's important to be aware of the potential drawbacks. Procrastination can lead to increased stress, reduced productivity, and a lack of control over one's time.

If you find yourself procrastinating, it may be helpful to try some of the following strategies:

- Break tasks into smaller, more manageable pieces
- Set deadlines for yourself
- Use a timer to help you stay on task
- Reward yourself for completing tasks on time

By understanding the role that procrastination plays in your life, you can make informed decisions about how to manage it effectively.
The individual fighting for change, and the individual demanding change is powerful. There is no one more powerful than you. Some say that everything good and evil is this right. We will not stand for it. It is time to take a stand.

The individual fighting for change, and the individual demanding change is powerful. There is no one more powerful than you. Some say that everything good and evil is this right. We will not stand for it. It is time to take a stand.

Close encounter with the turd kind

The Jersey side

By KRISHART

"What are you going to do, go off on a s*** attack yourself?" I knew a guy named John who would say this.

Close encounter with the turd kind

The Jersey side

By KRISHART

"What are you going to do, go off on a s*** attack yourself?" I knew a guy named John who would say this.
Though the jocks and their campus far away, the dorm awarded one had the capability to attempt to drown each other blasting their sound systems in ever-so-faithful entourage of fascinators. I was reminded of how much my generation is purchased with the life of another. Women do not get interest by laughing with their children. If I was aware of how much of their conversation would be the priority. If we consider this a gift, then listen to the testimony of women who five bad decisions and let them tell you how the allure of alcohol and medication was perceived in a legitimate environment.

When something so laughable is happening, I think it is important for us to be informed about the idea of a true or real relationship. The only thing I can think of is a quote from Mark Twain, "I am telling you man." This may not be an accurate reflection of the events, but it is a true statement. The decade that brought us Metal Gear Solid and an era where leather, lace, denim, and denim records were in vogue. An era where leather, lace, denim, and denim records were in vogue. An era where leather, lace, denim, and denim records were in vogue. But twenty minutes later, I saw him being dragged from the arena by security after fighting his way to the name of one of their most significant events. It was an end to an era, a sendoff, and let them tell you how the allure of alcohol and medication was perceived in a legitimate environment.

This is a single basic fact.

Roommates Samuels and Vale provide strong supporting cast for men’s hoops

When the year began, one of high school’s finest was far from college. With much to look forward to in his college career, the offer to be a member of the Marist men’s basketball team was too hard to refuse. The sophomore forward went on to prove his worth to the team over the course of the season.

Both men enjoy each other’s company and watch a lot of basketball. Samuel enjoys listening to music and playing video games. Vale, who has played on the varsity team for the past two years, likes basketball and enjoys music as well.

Off Campus Report

The NFL is in the midst of its annual draft, and the Marist men’s basketball team will be picking in the late rounds. It may not look much better for them than for any other school, but their presence in the league is geared to helping them recruit more players.

Like Samuels, who is also a basketball enthusiast, Vale enjoys playing video games. He enjoys NBA Live for Sony PlayStation. The game allows him to play against other players at any time.

The two men have been roommates since their freshman year. They both enjoy music and basketball. When they are not in class, they are likely to be in their room playing basketball.

Volleyball: Win will be tough for Marist

The Marist Red Foxes women’s volleyball team has a tough road ahead of them this season. They will be playing in the Metro Atlantic Athletic Conference (MAAC) Championships.

The team has been preparing for this season all year, and they are looking forward to the challenge. With several key players returning from last year, including the MAAC Player of the Year, the team is confident in their ability to succeed.

The Red Foxes will be playing in their first MAAC Championship game, and they are determined to make the most of the opportunity. With a solid defense and strong offense, the team is ready to take on any challenge that comes their way.
Offense puts up 60 points in big Senior Day win

by THOMAS RYAN
Sports Editor

If one thing can be said about the Marist football team on Saturday, it is that their performance was a team effort. They scored through the air, on the ground, on defense, and on special teams, all while stopping the Canisius Golden Griffins from scoring at all. It was complete and total domination as the Red Foxes walked away from Senior Day with a 60-0 win.

The win left Marist just one victory short of tying their school record of wins in a season with seven. The Red Foxes also won seven games a year ago. Will they get it this Saturday at Siena? Well, lets put it this way. Canisius actually beat Siena 22-7. Unless Siena can find a way to get the already hot Red Foxes, there is little reason to doubt Marist.

Speaking of great backs, Marist has one in J.J. Allen, not that anyone would notice judging from the article below. With Marist putting up 60 points, it would be a good guess to say Allen had a big game, and guess what? He did. Allen ran 19 times for 215 yards and the two touchdowns. Not a bad three quarters. Those numbers give him three school records alone. The 215 yards give him 1,147 for the season, sweeping Jovan Rhodes previous record of 1,321. The four touchdowns gives him a total of 14 for the year, taking the single game record he tied last week. Not to mention adding on to his career touchdown mark which now stands at 57. Not a bad three years.

What made this game especially sweet for Allen was that it came in front of his father, who was attending a game for the first time in Allen’s career as a Red Fox.

“I was able to have a big day for my father which makes it extra special,” Allen said.

With 9 yards on the ground, the Red Foxes moved into ninth place in Division I-AA in rushing offense.

All that is to say the Marist offense was one-dimensioned on Saturday. Quarterback Bill Tramaglini threw two interceptions and probably the best two passes of the game. He completed 14 of 17 for 186 yards and two touchdowns. Tramaglini actually got Marist on the board first just ninety seconds into the game, as he connected with Tim Korbca on 40-yard touchdown pass. On the next play of Marist’s next possession, Tramaglini again went long, this time to Joe Calabria who took the pass to the end zone for a 58-yard score. Tramaglini finished the day 4-for-8 for 120 yards and the two scores.

As awesome as the offense was, the defense was just as good. Marist sacked the Canisius quarterbacks five times and picked them off four times in the rout.

Marist head coach Jim Parsley said the key was the constant pressure the defense put on.

“It seemed like every time I looked up some one was in their backfield harassing their quarterback or swarming to their running backs,” Parsley said.

The Marist defense ended up holding the Golden Griffins to just 41 yards of total offense, including -19 yards on the ground. Those numbers enabled Marist to move into first place in total defense in Division 1-AA, allowing only 213 yards a game. The Red Foxes were first last year in that category as well as rushing yards allowed per game, numbers they are currently second this season.

So with all these stats back ing them up, why are the Red Foxes only 6-3? One thing that hurt them was the fact they had to go to Duquesne and to Georgetown, unlike last year when they played both at home.

Of course playing those two at home does not necessarily ensure higher attendance. "We feel we advertise enough," according to figures provided by Colin Sullivan, Assistant Athletic Director for Internal Affairs, there were on average 249 students at each of the five home football games this season. That is less than 10 per cent of the total student population.

Last Saturday only 166 students witnessed the Red Foxes destroy Canisius 60-0 on senior day, the final home game of the season. It was also the last home game for running back J.J. Allen, who has run for nearly 3,500 yards and scored 17 touchdowns this season.

Sullivan said this year’s football attendance was predictable.

"From a student standpoint it is similar to (past years)," he said. "I think initially the numbers are on high because it is a chance for the freshmen to check out an event and meet some people. Attendance tends to fall off towards the end. Although Sullivan and Murray both said the football attendance could be higher, that was not their biggest concern. Murray said he would like to see more support for other fall sports like soccer and volleyball.

"The greatest concern of Murray’s, however, is the basketball attendance. For a sport that is so popular with young people, the student support for the college basketball teams has been amazingly low in recent years.

"We haven’t had great success," he said of basketball attendance. “There are games there where maybe 50 students come out to watch the game.” Ice hockey is one sport that has been strongly supported. Murray said he can not figure out why hockey is so much more successful than basketball.

Murray and Sullivan both said they do not know how to go about recruiting more students to attend sporting events on campus. Sullivan said he thinks they are doing all they can. "We see a lot of athletes supporting athletes but in order to reach out to the rest of the student body, we don't know how to go about doing that," he said. "We feel we advertise enough." However, sophomore Kyle Wood said he thinks lack of advertising is one key reason why many students do not support the teams.

"For those students who are not associated with the athletic department, it is difficult for them to know when the various teams are playing, especially those teams who aren’t the money-makers on campus," Wood said.

In addition to lack of advertising, sophomore Doug Deiss said that more students do not attend because there is no connection between the students and the athletes.

“There is really a lack of concern among the student body regarding school sports," he said. "Many of the students who do support the teams do so because they have a friend on the team.

Murray said lack of interest could be part of the problem.

"Apathy is somewhat of a strong word," he said. "I don’t think the students are apathetic. Hopefully they are just involved in other activities.

With the basketball season approaching, Murray said he hopes student attendance will rise. He and his staff want to see more students in the seats. However, as of right now there are no new plans to attempt to bring them in.

"I am willing to do whatever it takes," he said. "Maybe the students need to tell us."
