Students question ease of e-mail use

Students who wish to borrow money must fill out the FAFSA application, submit it electronically or via mail to the lender of the student loan. From there, the financial aid office will review the application, and once the financial aid administrator has sent it off via mail to the lender, the student must wait approximately one to two weeks for the refund check to be issued. Students who didn't receive the money within that time needed to buy them until later," said Amanda Mazzola, a junior, said.

"There has to be some way of working out a voucher system so these students can not gain access to their leftover loan money that is sometimes used for buying books," she said. Other students such as Amanda Mazzola, a junior, said they had to wait to purchase a book. "I had to share books with students from my class because I didn't receive the money I needed to buy them until later," she said.

At nearby Dutchess Community College the financial aid department waits one semester to make sure that students who received the loan were going to classes. Each semester after, the money left over from the loan is dispensed a week before school begins.

De Klerk is most noted for his actions involving the racially segregating policy of apartheid. During his tenure as President he lifted the ban on many political organizations and announced that Nelson Mandela would be released from prison. However, critics of the de Klerk often say that he was responsible for perpetuating apartheid while he was in office.

"It's original purpose was to bring justice," de Klerk said in a press conference before his lecture, "but MUSICB, the campus e-mail system, is only one component of the mainframe. The current mainframe in use is called the IBM Enterprise Server. This system has been in use on campus since January 1979. Harry Williams, director of technology and systems, said that while the actual mainframe was installed more than 20 years ago, it is being continuously updated. "We are constantly working on upgrading the software," he said. "The last major upgrade occurred in the summer of 1998."

There were recent upgrades completed to complement the new library. When it opened there will be 25 small computer terminals for student use. These terminals, all located on the first floor, are different than traditional computers in that they do not have individual hard drives for each. They will all be connected to the mainframe via a network.

Williams said the computers will look like small boxes.

Former South African president speaks at Marist

Former South African president F.W. de Klerk shared his views on human rights and global awareness at McCann.

De Klerk is the first South African leader to come to Marist. In other parts of the country, however, Marist College is continually diverse, according to Tomlinson, who said, "at Marist, the campus e-mail system, is only one component of the mainframe. The current mainframe in use is called the IBM Enterprise Server. This system has been in use on campus since January 1979. Harry Williams, director of technology and systems, said that while the actual mainframe was installed more than 20 years ago, it is being continuously updated. The Alpha Sigma Tau (AST) chapter at Marist College will celebrate its fifth year anniversary as a chapter at Marist and its 100 year anniversary as a national sorority during the months of November and December. Founded on the ideals of ideals of scholarship and pride, AST began Nov. 4, 1899 in Ypsilanti, Mich. The Delta Epsilon chapter at Marist College was installed on Nov. 12, 1994. The Delta Epsilon chapter was founded when two women, Monica Hobbs and Susan Kendig, decided to form a new sorority on campus. As the first Marist chapter, they had not seen a group like itself on campus. They decided the chapter would be named Delta Epsilon, and sought to recruit new members.

De KLERK: Message of progress regarding current world issues

Klerk proposed. He referred to South Africa's socioeconomic problems as an example. De Klerk was a co-recipient of the 1993 Nobel Peace Prize along with Fidel Castro. Although he played a leading role in the anti-apartheid campaign in South Africa, he had neither acquired a popular nor a distinguished role in that campaign. He is the son of W. D. Klerk, who attended the lecture. He is also the son of the late W. D. Klerk, who was a well-known lawyer and politicians in South Africa.

Three points that were key in the Klerk's speech were in support of globalization, the failure of some members of the international community to join in the progress, and the persistence of racial and religious tensions. He warned that the world cannot afford to take this situation for granted. It is the responsibility of the world to take this situation seriously.

The Klerk mainframe has its detractors, the astounded students who call it "archaic.

EMAIL: Students complain

"They will eventually be outdated laptops," he said. "This saves space and money on maintenance since they will all come from the manufacturers. This will also cut down on the amount of hardware consumed." While upgrades to the mainframe improve speed and service to the campus, most people are concerned with the new thing they could act as live-in assistants.

Many students are concerned about the ease-of-use factor in the MUSICB system. Professor Jennifer Clark said she really likes the system because it is "instant and really hard to use," she said. "I haven't been able to use it well so I don't bother. It just looks off fash-ion." Other students said the MUSICB system has limited resources, including having too many books and too few resources. The system was designed around a project that was started in the 19th century. It was created in a region of France where the music is stored in books and can be enjoyed, but it is also difficult to operate, they can only use it as a learning aid. There are currently about 12,000 MUSICB files available. Most of these belong to students, but faculty, staff, alumni and a few guests are also registered users.

Aromatherapy relaxes and smells really good

by JENGOVER Staff Writer

For many Marist College students, stress will be running high this week. The upcoming SAT's, midterms, and the holiday season all contribute to the general stress felt around the College. Aromatherapy, the use of essential oils for healing, can help relieve some of this stress.

Aromatherapy recognizes that the sense of smell is directly connected to the skin, and that aromas can have a profound effect on the mind and body. In practice, aromatherapy is used to treat both physical and psychological ailments.

Using essential oils from aromatically treated plants, aromatherapy products can be used topically for healing purposes, or inhaled, as an anti-inflammatory, or antiseptic for the skin. Customers should be aware that there are two distinct categories - aromatherapy and aromonology.

Aromatherapy is the study of aromas and how they affect the mind and body. Essential oils are the fragrant combination of minute volatile compounds found in plants. They can be used topically for healing purposes or inhaled, as an antiseptic or anti-inflammatory.

Arometerapy is the study of aromas and how they affect the mind and body. Essential oils are the fragrant combination of minute volatile compounds found in plants. They can be used topically for healing purposes or inhaled, as an antiseptic or anti-inflammatory.

Catholicism sparks debate at Marist, beyond

By MICHAEL BAGNATO

As the novelty of MTV’s “Boyz ‘N the Hood” fades, some are overlooking the development of the Marist College community. Senior sociology major, Robert H. Brown, found that students at Marist are much more accepting of the Catholic Church than in the past. Brown, a member of the Marist community, feels that the Church has been more a part of his life in recent years. Brown believes that the Church is more relevant in the world of today, and that the Marist community should be more accepting of its teachings.

The United States is presented in the media as a nation of its own in the world of Catholicism. In the recent presidential election, Catholicism was not a major factor in the election. This is in contrast to the past, where Catholicism was a major factor in the election. Brown feels that the Church should be more active in the community, and that the Marist community should be more accepting of its teachings.

Another voice on East Timor

By MICHAEL CRAIG

The face of politics is being transformed by wrestlers, actors, millionaires and wrestlers, actors, millionaires. These candidates have virtually no political history, but they are dominating the airwaves. This is the case with the recent political candidates Jesse “The Body” Ventura, Pat Buchanan, Donald Trump, and Warren Beatty. These candidates are all rambunctious wrestlers, actors, millionaires and wrestlers, actors, millionaires, and they are dominating the political scene. They are dominating the political scene because they are not afraid to speak their minds, and they are not afraid to take on the establishment. They are dominating the political scene because they are not afraid to speak their minds, and they are not afraid to take on the establishment. They are dominating the political scene because they are not afraid to speak their minds, and they are not afraid to take on the establishment. Abroad student spreads heeps of Aussie philosophy

by KIMFERMAN

I can remember snuggling up with my mom. The room was dark, and the space was filled with the soft, magical music that was playing on the rhapsodium. It was a special moment, and I knew that it was a moment that I would always remember. I had been waiting for this moment for a long time, and I was finally getting to experience it. My mom was singing me a song, and I was feeling so happy and content. It was a magical moment, and I knew that it would always stay with me. I can still remember the way that she sang the words, her voice was so beautiful and full of emotion. It was a special moment, and I will always cherish it in my heart.

The next morning, my mom was making me breakfast. She had made me a delicious plate of food, and she was sitting next to me, talking and smiling. I just sat there, enjoying the moment and the food. My mom was so kind and loving, and I felt so special that she was doing this for me. I loved her so much, and I knew that I was blessed to have her in my life.

When we arrived at school, I was feeling a bit anxious. I knew that I had a lot of work to do, and I was worried about how I was going to do it. But I was also feeling excited, because I knew that I was going to learn a lot of new things. I was excited to see my friends, and I was looking forward to seeing what was going to happen during the day. I was ready to face the challenges of the day, and I was determined to make the most of it.

The day passed by quickly, and before I knew it, it was time for dinner. My mom had prepared a delicious meal, and we sat down together, enjoying each other's company. I felt so grateful to have my mom in my life, and I knew that she was an amazing woman. I was so lucky to have her as my mom, and I was so grateful for everything that she did for me.

In conclusion, I can remember that special moment with my mom so clearly. It was a moment that I will always cherish, and I will always be grateful for the love and support that she gave me. I am so lucky to have her as my mom, and I am so grateful for everything that she did for me. I will always treasure that special moment, and I will always be grateful for the love and support that she gave me.

Software Technicians Wanted

If you want more than just a job, why not start your career with the world leader in mission-critical business computing and the Redmond, WA firm that’s revolutionizing the way we work in the 21st century. We’re now looking for new graduates with bachelor’s or master’s degrees in Computer Science or related fields for “Bootcamp.” This outstanding 36-week program starts every January and June, and includes full salary, free room and board, complete benefits package, full use of CA facilities, and transportation and free travel. At Bellevue, you will work to develop software in the hottest languages, investigate today’s operating systems, and explore the newest technologies.

---

We offer a generous compensation package with a long list of benefits that nobody else can match, including 401(k) and profit sharing plans, company-paid medical and dental coverage, relocation reimbursement, and more. If you think you could be a fit for our team, get in touch today.

---

Call us today and find out why Computeworld ranked CA as one of the best places to work in the entire computer industry! For More Information, please call:

Two straight wins keep women's soccer season alive

by JORDANE BLER
Staff Writer

The Manhattan women's soccer team, whose season seemed lost after two straight losses, greatly improved its team, whose season seemed lost after two straight losses, greatly improved its

OCTOBER 28, 1999
Georgetown Athletic Conference (MAAC) games, greatly improved its team, whose season seemed lost after two straight losses. Manhattan defeated St. Peter's yesterday and defeated Rider University Tuesday, improving their conference record to a 4-2-1 mark. Manhattan, 6-1-2 on the season, beat St. Peter's, 2-0, and Rider, 8-1, improving its conference record to a 4-2-1 mark. Manhattan played at Rider yesterday, winning its second game in two weeks.

She is pleased with the team's improvement after a summer of practice. "We've been trying to work out the kinks in the last few games, and we're getting them ironed out," she said. "We're starting to work together more as a team, and that's what's important." Manhattan improved to 6-1-2 on the season, including 4-2-1 in conference play. The team's improvement has come after a summer of practice. "We've been trying to work out the kinks in the last few games, and we're getting them ironed out," she said. The Marist football team improved to 4-3 by defeating Wagner on Saturday as Richard Zacchei's 22-yard field goal lifted the Red Foxes to a 36-17 victory over the visiting Seahawks.

Zacchei's last-second heroics capped off an impressive last minute drive for Marist that started with a 53-yard pass from Thomas Mullowney into the end zone from there on the ensuing play. Zacchei's extra point made it 17-10.

Wagner wasted no time in responding, putting together an eight-play, 67-yard scoring drive of its own that was capped off in spectacular fashion.

On first-and-ten from the Marist 25-yard line, Wagner quarterback Lou Simone was flushed out of the pocket, where he handed off to Marist defenders and lofted a high-arcing pass that was caught by Chuck Kinley at Wagner's 7-yard line. O'Rourke's extra point tied the score at 10-10 with 12:33 left in the half.

After successive punts by both teams, the Red Foxes took possession at the Wagner 42-yard line with 9:37 left in the second quarter. On third down, Chartrand found Loyzynski for an 18-yard gain to the Wagner 24-yard line. Zacchei's late field goal lifts Red Foxes.

Although the Marist defense held its ground, Matt O'Connell blocked Garret O'Rourke's 32-yard field goal attempt to set up the game-winning drive.

After the two teams traded field goals to start the scoring, Marist took over on its own 40-yard line with four minutes left in the opening stanza. Miguel Reyes (15 carries, 66 yards) exploded for three big runs to put the Red Foxes deep into Wagner territory.

Kevin Chartrand (13-23, 236 yd. 1 int.) found Brian Lozynski, who had three catches for 100 yards, over the middle at the 1-yard line. Steve Woold punched it in from there. Zacchei's extra point made it 10-7.

Wagner blocked field goal after a 30-yard gain to bring the ball to the Wagner 8-yard line.

Miguel Reyes took it in the end zone from there on the ensuing play. Zacchei's extra point made it 17-10.

Wagner's Rick Sarille, who ran for a school record 198 yards on 34 carries, took over on the next possession. The senior running back carried six times for 53 yards on the drive, capped off by his 30-yard touchdown run with 4:07 remaining to close the scoring in the first half.

The second half was highlighted by solid defense on both sides of the field, leaving up to an intense fourth quarter where tempers and flags both flew before the Red Foxes prevailed.

"I think that it can really help us as a team," Zacchei said. "It builds a lot of confidence going into the next game."
