Another water break; marks number four

by MEREDITH KENNEDY

Once again, a pipe break has left "Vision '94" all wet.

The latest leak flooded the first floor hall of the Campus Center, near the new band room.

According to Bob Douglas, Superintendent of Pizzagalli Construction, a pipe in the heating system burst when Marist faculty employees were trying to restart the system.

Construction and expansion of the heating system caused it to be shut down and the water pipes drained, around the first of June.

Douglas believes that the pipe had died out considerably during the past four months, causing it to crack when the workers attempted to restart the system.

"They (faculty employees) were trying to fill the pipes faster than they should have been," said Douglas.

Douglas also said he believes that the workers were rushing to get the water turned back on before the weather turned any colder. The surge of water pressure caused the pipe to rupture.

Peter Petricca, Pizzagalli's project engineer, said, "We (Marist facility workers and Pizzagalli) have to work as a team."

"They (Marist) have to deal with the previously existing system, while we (Pizzagalli) have to deal with the new additions to that system," added Petricca.

Workers repaired the leak in the same day and there was no reported damage to the rooms or the hall.

Bob Lynch, Coordinator of Student Activities, said that the activity office received no notification of any complications regarding the first floor rooms.

The son of Marist College College President Joseph Altomare wants to ensure that the time spent in his father's company is well worth the wait. The production, "Lend Me A Tenor," is a musical comedy that was moved from the Marist Theatre at the last minute. The show, which ran for three days in April, is being performed now at the College's Mountain State Theatre. The show is directed by Robert G. Targos, who is also the owner of the College's new theatre.

"We have a goal for this tour," he said. "I hate touring; I'd much rather be at home. But this is a great opportunity to do something I love." The tour is expected to last for about two months, and will stop in several cities across the country.

**Questions from the editors’ desks, part II**

What happens to the political climate of the College this week to present the atmosphere for next year's presidential election? Will the class of '97 graduate on the most miserable note ever conceived of Chapman parking? Has anyone ever left off the top of Chapman Hall? How many cars have been disabled in those fire trucks from somewhere? What happened to the committee that Kevin Blackmon withdrew from for SGA president last spring? Who will be the new student affairs director? Do Greek organizations have a bad reputation at Marist?

Is there going to be a River Day '94? If so, where will it be held and when? Parking?

How many students could name at least three trustees? Will Marist students be able to utilize President Clinton's education plan? Has anything essential changed at Marist in the past decade? Are fighting back and speaking out worth the time and trouble at Marist? Why do fools fall in love?

Why did the college radio station's staff members have to sign a contract agreeing why do the new Townhouses' doorbells sound like fire alarms? Does anyone still believe in a place called Hope?

Who will be the commencement speaker for the class of '94? How many students are go unreported?

Why do the Yankees blow it at the end of every season? Why do their fans keep supporting them? Why aren't there any female coaches of male teams at Marist? Why do political columnists.

**SGA Notes**

 Extremely low turnout for freshmen elections

A possible solution is doing freshman elections after spring break. S.G.A. should have a move against going against the idea of a freshmen election.

A calendar for freshman elections is a great way to do a freshmen election. The Club recognizes that some students feel that their campus traditions are being challenged.

Moreover, Marist students need to be more conscious of their voting rights. Most students who hear they are not eligible to vote are uninterested in doing so. We hope that this low turnout will not be a reflection of any lack of enthusiasm in the student body.

**The real Expo**

On Wed, Oct. 27, over 100 students and employers attended the first-ever Expo to publicize the College’s internship and career fair. The S.G.A. administration will take another look at the intern- titles.

One point to support of interns. The interns are much more interested in the internship opportunities that are available.

Another point in support of students who are interested in the internship opportunities that are available.

We are going to hold the fifth annual Career Fair on Oct. 27.

We want to do this for the students. We do not want to do this for students.

We have a lot of people who are interested in the internship opportunities that are available.

New students will have a chance to give you insight into career fields, which you may be interested in.

With the atmosphere of a touristy Mardi Gras-themed restaurant, Spanky's restaurant in downtown Poughkeepsie, which opened last month, is a small slice of New Orleans in the heart of downtown.

"Every evening, you get to see the New Orleans side of town," said Licari. "You can't beat the atmosphere, even if it's not authentic." Spanky's is open from 4 to 8 p.m. daily and its menu includes specialties such as gumbo and beignets.

Males dominate tennis.

"College athletics is a man's world, always has been and probably will be for many years," said Johnston. "I'm not knocking women's volleyball but I believe men's sports, on a division one level, are particularly good, he added."

On the issue of male dominance in sports, Doris said she believes because of the way high school sports are set up, such as the selection of teams, that girls don't get as much exposure into the sports world, especially into division one sports. "I'm not saying men's athletics are better than women's, she added. "They're both great." Doris also said the applicants for head coach positions also need improvement before the controversy is resolved. "We need to develop a way of getting more women experienced into the pool of applicants," Doris said.

"I think Disneyland for me," said Seward, "but it got cancelled because of the NAIA rules." Doris agreed. "Schools are extremely concerned about the safety and health of their students, she said. "They're only worried about getting the sport in as many schools as possible, but that's the least of their concern."

Sports.

Another major factor which will play a role in the decision is money. "I know that in the Albany area, women's soccer programs have a lot of people interested in them," Doris said. "If the NEC decided to sponsor women's soccer, the money would come from the male programs, but the decision would be made by the NEC." Doris said the NEC would have to come up with a plan to make the sport viable for both men and women.

"I am a firm believer in having both sexes in every sport," said Johnston. "If you have a problem, you need to talk to your coach. If you think they're treating you unfairly, you have to stand up and cry for help." Johnston added.

"The girls played a number of competitive matches this season," said Clifford. "They're the-team to beat." Clifford said. "We're looking at them as our competition this year."

The Red Foxes won a two-game winning streak to move into a first place tie with Marist. "They're the team to beat," said Johnston. "The Red Foxes played very well." Johnston added. "I know Jud has the capability of coming to us and saying "I'm ready to play." Johnston said."

kept the same running game,
we were able to hold on to the lead.
