FACULTY VOTES ON CLASS ATTENDANCE

For Marist Students

On Friday, February 11, the Faculty, acting in formal Plenary Session, voted by a majority of almost 2 to 1 to adopt a new attitude toward absence. This attitude, perhaps best summarized in the phrase “responsible attendance,” will go into effect for the current semester. Essentially, the system places the total responsibility for attendance at class squarely on the individual student. It is he who must pass each course through an understanding of the materials presented in the course; it is he who is “responsible” for all of the matter and assignments of the course. Further explanation of the system will be forthcoming from both Brother John Shea and the individual instructors. The text of the motion passed by the faculty last Friday follows:

"Regular class attendance is a primary responsibility for all students since perhaps the most meaningful experiences promoting the realization of the purposes for which Marist exists are achieved through thoughtful considerations and discussions provoked by classroom lectures. Failure to participate fully in classroom activity cannot help but result in a loss for the student. Absences from class for whatever reasons or duration do not, therefore, free the student from the responsibility for the full content of the courses and for all class assignments.

"Irregularities in attendance on the part of the Freshmen will be brought to the attention of the Dean. Appropriate action will be taken to make them aware of their responsibilities in this regard.”

Peace Corps to Visit Campus

A representative from the Peace Corps will visit Marist College on Monday, February 28.

Miss Roxane Foley, a returned Peace Corps Volunteer from Malaysia will be on campus to explain the Peace Corps, its training and service programs, and the opportunities it offers students. They will also accept applications.

Art Reception

by Ray Stewart

Sunday, February 12 saw Marist College’s largest Art Show Reception take place in the Student Center. The group exhibition entitled “Out of 210b” had a marvelous turnout of approximately a hundred and fifty people, including the college itself and the neighboring area. The works represented the artistic endeavors of Mrs. Fish, Mrs. Eva Plaut, Mr. Tichelman, Mrs. Solomon and many of the students from Art Workshop.

The three most dominant mediums in the exhibition were collage & painting which all “Marist Students are so familiar with, and sculpture an innovation on campus by Mr. Tichelman.”

The art pieces represent the varied and imaginative concerns of the individual artists who are not catering to the tastes of the public but rather their own. This independence, which is the expression of personal reflection, gains significance in the ‘doing’, this ‘act of creation.’ The set is typical of today, in keeping with themes expressed in the Futurism, Cubism, Surrealism; of Picasso, Kandinsky, Klee and others. Just as typical was Litan, Michaelangelo, and others of their respective times.

The Art Reception was further enhanced by prose & poetry reading. Singing & musical recitals. Provided by the best cultural event of the year that was ignored for the most part, by the 800 students on campus.

Marist Day Reviewed

by Dennis Lammens

The purpose of Marist Day is to acquaint different high schools with Marist. Juniors and seniors from various schools are invited up for a day to inspect the campus. The students who come are permitted to sit in on classes, visit the dorms, with a traditional look at “Rocco’s Room” and eat in the cafeteria.

It is felt that this is the only way a true close-up picture of Marist can be obtained by future students.

The students, upon arriving, are greeted and introduced to Marist by Brother Edward J. Cashin, P.M.S., the Academic Vice President, and also by several class officers and student government members.

The Committee Chairman of Marist Day is Mr. Kennedy Franco-Kelly, under the guidance of Brother Cashin.

On Past Marist Days held in this semester, the following schools were in attendance: Christ the King, St. Mary’s, and Mount St. Michael’s. The students who came showed great enthusiasm and were appreciative for a first hand glimpse of college life. There were three such Marist Days last semester, and it is hoped that there will be at least two more this semester.

The success of Marist Day is attributed to the Men of Marist, the willing co-operation of the professors, and to those who worked so hard organizing it.

Students Off To Model U. N.

by Al May

At 12:15 am Feb. 9, eight Marist College students boarded a train and left for the University Model United Nations in Montreal, Canada. Prior to the departure of these students, members of the Marist College Young Republicans Club, a reception was held for them at the college with Mrs. Hamilton Fish, Jr., as the guest of honor. She is a former resident of Montreal and wife of Hamilton Fish, Jr., Republican candidate for Congress in the 28th district.

Marist is one of the only eight colleges in the United States to attend this event, along with such colleges as Georgetown, Yale, and West Point. This is Marist’s second year at this event. This year Marist sent delegations representing Turkey and Pakistan. The Turkish delegation is made up of Peter Walsh, John Zottoli, Peter Higgins, and William Skula. The Pakistani delegation is Richard Care, Peter Petrocelli, George McKee, and Robert Scott.

The delegates were well prepared for the trip before they got on the train. In order to properly represent their respective countries, they not only did research on their own but visited the United Nations and the Turkish and Pakistani Embassies in the United States. Mrs. Fish further helped them prepare in informal talk by giving them such information as what weather to expect and where to go for a good meal. She also outlined various points of interest in Montreal and told of the attitudes of Canadians for Americans.

The Model United Nations is run and sponsored by the International Relations Clubs of the University of Montreal, McGill University, and George Williams University.

Marist and the other participating colleges hope to foster an appreciation for the United Nations in this way.
A UNIVERSITY OR A COLLEGE?

by Jack Brotin

Marist College. Every wonder whether, when you graduate from high school or go to a college or university, it will be worth the cost? The answer is a resounding yes. Marist College offers a wide range of programs designed to help you achieve your goals.

The university offers a variety of degree programs, including business, communications, education, health sciences, and more. With a focus on hands-on learning and real-world experience, Marist provides students with the skills they need to succeed in their chosen fields.

Additionally, Marist College offers a variety of extracurricular activities, including clubs, sports teams, and organizations. These opportunities allow students to pursue their interests and build valuable skills outside of the classroom.

In conclusion, Marist College offers a unique education that prepares students for success in their personal and professional lives. Whether you are interested in pursuing a degree in a specific field or simply want to explore new experiences, Marist College is the place for you.

Extension Volunteer Speaks At Marist

The nature of the challenge and the advantage of the service is described by Extension Volunteer Larry McMillan in his presentation to the students at Marist on Tuesday, February 17.

Larry visited the college campus and the activities of 50 volunteers engaged in 150 locations throughout the state, north, southeast, and mid- part of the U.S., plus Puerto Rico.

If the challenge being met by these people could be measured, Larry would say it is an amazing project.

On a basic schedule of 38 hours a month, United Flight volunteer earns $750 a month after two years. The hours needed for a private pilot’s license averages 15 hours a month.

For some years an agreement has been arranged with the United Air Force Flight Training Center in Denver upon obtaining their own the required private and commercial pilot licenses at a Federal Aviation Administration safety pilot school.

In the case of a needed flying a scholarship have been provided through a Chicago bank and funds have been available and used to obtain a license.

Several positions are available for persons who are interested in the position of a United Air Force Flight Training Center.

Jobs in Europe For The Summer

Job opportunities in Europe this summer... Work this summer in the forests of Germany, on construction in Austria, or in several other countries in Europe.

We will arrange for you to work with one of the leading companies in Europe, and you will be able to live and work in a beautiful forest setting.

The job involves cutting and transporting firewood, and you will be responsible for delivering it to the customer.

In addition, you will have the opportunity to learn about the local culture and customs, and you will be able to experience a different way of life.

The job will provide you with a valuable work experience and will help you gain valuable work experience, as well as give you a chance to see the world.

In conclusion, this job opportunity in Europe will provide you with an excellent opportunity to work and learn in a beautiful forest setting.

Art And Artist

The media of artistic expression are varied. Each medium speaks to the artist in a different way, and provides the individual with an opportunity for the development of an artist. The development of this opportunity is possible if the artist can develop an understanding of the nature of the medium, which is the artist's goal.

The artist's goal is to develop an understanding of the nature of the medium, which is the artist's goal.

In conclusion, the development of artistic expression is possible if the artist can develop an understanding of the nature of the medium, which is the artist's goal.

GAT

by Patrick Andrews

GAT has been a constant in the lives of many students for years. It stands for Graduate Admission Tests. GAT is a standardized test that is used to evaluate a student's readiness for graduate school.

The test measures a student's ability to think critically and solve problems. The GAT is divided into two sections: verbal and quantitative.

The verbal section tests a student's ability to understand and analyze written information. The quantitative section measures a student's ability to solve mathematical problems.

In conclusion, the GAT is an important tool for evaluating a student's readiness for graduate school. It is a standardized test that measures a student's ability to think critically and solve problems.

CAREERS DAY

Under the joint sponsorship of the Knights of Columbus and the St. Mary's High School, a Careers Day will be held on Thursday, February 17, in the cafeteria. The event will feature representatives from various industries and organizations, and students will have the opportunity to learn about different career paths and opportunities.

In conclusion, Careers Day is an excellent opportunity for students to learn about different career paths and opportunities. It is a chance to explore different industries and organizations, and to gain insight into the world of work.

"OFF THE TOP..."

by Bob Brich

Do one thing a day for a month, and you'll have 30 more to work with. This is the challenge that is being given to students across the country by the National Institute of Mental Health.

The institute is asking teachers to challenge their students to do one good deed every day for a month. The goal is to encourage students to think about the impact of their actions and to consider how their behavior can affect others.

In conclusion, "OFF THE TOP..." is a powerful reminder of the importance of thinking about the impact of our actions and how we can make a positive difference in the world.

Times and Information for February

On Thursday, February 17, the Marist College will host an important event. The event will feature speakers from various industries and organizations, and students will have the opportunity to learn about different career paths and opportunities.

In conclusion, the event will provide students with valuable information about different career paths and opportunities. It is a chance to learn about different industries and organizations, and to gain insight into the world of work.

"OFF THE TOP..." is a powerful reminder of the importance of thinking about the impact of our actions and how we can make a positive difference in the world.
A UNIVERSITY OR A COLLEGE?

by Jack Bocci

March 17, 1966

Page 2

MARIST COLLEGE

By the end of their second week of classes, most MARIST students get a little discouraged. Knowing that they are not going to make the 1968 Olympic games, that they have to pay their own expenses, and that they have to pay $100 a semester for the privilege of going there is simply too much to bear...

Leroy Benske checks his schedule

Extension Speaks At Marist

by Larry Benske

The nature of the challenge and the advantage of service is that, as Extension in Marist College, I have the opportunity to be a full-time "missionary" worker. My main function is to make the volunteer more aware of and interested in the opportunity to make a meaningful commitment more meaningful to the community. This commitment includes the development of new opportunities in the local community for more people to participate and to feel useful to the community. Extension's awareness of the possibilities of a fully integrated Christian life.

STEPLIGHT

by Larry Benske

I think the easiest thing for a man to do is to留言板 the possibilities of Christianity. The challenge is not the material test of the mission field, because the man who fails to come to his own house.

United States

from BOC:

Pilot Drive

A program whereby "veteran" pilot applicants - those with no flying experience - can obtain a private pilot's certificate is now being sponsored by the American Airline Flight officer division. The program is designed to prepare young men for a career in the airline industry.

Arthur Mason and the expansion of the American Airline Flight officer Program (AAMAP) was established in February, 1966. The program provides basic instruction in flight for those interested in a career in the airline industry. In May, 1966, the program opened to the general public.

The program, which is under the supervision of Airline pilots in the Federal Aviation Agency, is designed to prepare young men for a career in the airline industry. The program is open to those who have completed their secondary education and are at least 18 years of age.

The emphasis is on the development of basic skills needed for flight, and the program provides basic instruction in flight for those interested in a career in the airline industry. The program is open to those who have completed their secondary education and are at least 18 years of age.

FROM THE CAVE

by J. Barry & W. Zabicki

We're here to go again: new semester, new topics, new students on campus. In regards to the latter, is closing our fieldhouse any way to show them how their activity fee works for them? Though a cardboard coliseum it be, it is filled with tradition, most noteworthy being the F.N.L. (Forelli Night League). Let's have our gym open once again! At least it keeps us off the streets, Mr. Athletic Director! It is about time that some space in our paper was devoid of the intramurals. Currently leading "B" division in basketball is the C-Men (carrot men), closely followed by Tom Murray's All-Stars, and the Ovens are keeping the pot boiling. The Rejicts, possessors of a 21-game winning streak excluding over a two-week period, are the pace setters in "A" division. They are being hard pressed by Kidmen's Kixxers, Econonemies, F. D. L. and Bob Dylan's Desolation Row. It should be quite a group of playoffs upcoming . . . Soon follow the intramural basketball season is the opening day of the softball season. To anyone interested in competing in the latter sport, try to form a team now before the quantity of ballplayers diminishes. Variety basketball is slowly drawing to the close of another season. At the time of this writing, our record stands at 4 and 12 for the season with 7 games remaining on tap. Three of the seven are home games. Wouldn't it be nice if you took some time out to see one? (Hunter College brings a lot of females along, to those concerned.) . . . In the spring most young men turn to thoughts of summer but a select few at Marist turn their sights on the Hudson. As soon as the ice melts on the river, the rhythmic sounds of the crew team will echo over the stilled valley at their morning practices. The crew will be capped by the traditional Dad Vail Regatta in Philadelphia sometime in May but already practice has begun . . . A rumor spreading around campus has a baseball team in the works for the spring. We of the Cave have been informed that 4 games are scheduled for this season with a tentative expansion to 18 for next year. If rumor is true, we wish to extend our best wishes to the founders in their endeavors to bring baseball to Marist. We hope you have better luck than was experienced in the past. The Football Club under Bob Bus has begun a drive to raise additional money for next year. Pledge your key to the club and enjoy another season of football against bigger name opponents. Watch the Jasper turn green again! A tentative schedule will be given as soon as we have it.

ICE-OUT

With well founded hopes for an early thaw of the Hudson, the Marist College Crew Team is beginning its difficult training schedule this week. Diversified P.T. and miles of running are to be the regular fare of those in pursuit of a seat, until that fateful day of "ice-out." Then early risers will hear the familiar cry of the coxswains breaking the chilly stillness at 6 A.M. (shudder!) But all the strain and pain will be slightly alleviated by the memory of our outstanding victory in the "Autumn Gold Regatta." The Frosh are evidently intent on repeating their Fall performance this spring by maintaining a training schedule through the off-season months. Thanks for the effort, Frosh, and look out Varsity -- they could be tough!

Marks have taken their usual toll of starmen, but the team is not dispirited. The fighting five senior core is "ball-bent" on making their last season the most successful one for Marist. They will be aided by some who will provide the experience and spirit when the "grads" depart. With practical confidence, this looks like a good year for the crew team.

INTRAMURAL BASKETBALL

by Raul Kuno

While the winter has made the campus a dormant scene, the intramural program has been showing a great deal of life. As expected, the Rejicts and the C-Men have dominated play by being the only undefeated teams in both leagues. This, of course, was not done easily. In Division A, The Rejicts had to fight off a strong Kidmen Kiddie team who were short their two stars, Tony Powers and Richie DePetri, and then subdue a red-hot Desolation Row team before reaching the 10-0 mark.

In Division B, the C-Men have shown time and time again why they are the team to beat. Displaying a well-balanced offense and strong board control, they have forged an 8-0 record and provided the spectators with the most dramatic play of the season when Richie Dickerman tapped in a jump ball with five seconds to go and beat a strong Overlook 50-53 for first place. The season has now lasted three months and soon will be summarized with the playoffs. The C-Men and the Rejicts have both earned the right to meet in the finals for the title as a result of their play. However, due to a league rule, these two teams must play teams that have already beaten in order to prove their right to the finals. It is unnecessary for these playoffs to occur. This reporter can only see a Rejict, C-Men final and feels that when the playoffs are completed, that is the way the finals will stand.

WRESTLING

by Bob Condon

Coming off its defeat at the hands of Rutgers' College of New Jersey this past weekend, the Marist College Wrestling Team avenged itself to some degree by overpowering Yeshiva University of the Bronx. It was a very impressive victory with Marist winning 6, losing 2 and tying one.

The team has the problem of facing very stiff competition, but when matched with a school of relatively equal caliber, it has proved that it can come out on top. Here's hoping that the Wrestling team will have a very successful season and perhaps add a trophy or two to the collection of other outstanding sports achievements.

John Forbes and John Goegel are a special kind of athlete. They are distance runners in a school that doesn't seem to want them. They are trackmen who would be lauded at Villanova or at St. John's but are limited to near obscurity here at Marist. They are two young men who could gain our school recognition on their own, but the poor training and coaching. They have the finest attitude about what they are doing and what they are doing is this: on April 18th, they will journey to Boston to compete in the Boston Marathon. This is an event in which just one college trackman has ever finished in. Forbes and Goegel will finish the 26-mile ordeal because they are athletes in the true sense of the term. If you can read this and do agree that running to Hyde Park or even to Rhinebeck in the cold of the afternoon is a grueling task and worthy of just a bit of praise and support from this school, then answer this question: why are they doing this? Why are they doing this for the school? Why are they doing this for themselves?
