TUESDAY FACULTY VOTE CANCELLED

The question of a revision in the core requirement was once again the point of discussion at a faculty colloquium held Monday afternoon. The conference was called to discuss two proposals formulated by the Academic Policy Committee (APC), proposing changes in the academic curriculum. A motion to hold a vote on the proposals was defeated by a show of hands, 13-15.

These recommendations call for a cutting back of the core requirement, something the student to make wider use of electives. Within the core, itself, more emphasis would be placed on individual department in determining required courses for the student. At the time of the last colloquium, faculty opposition stemmed from a feeling that too radical a change in the core at this time. At Monday's conference, opposition again centered around a feeling that the recommendations were trying to innovate too rapidly. Dr. George Hopper stated that the present curriculum was designed with the best of all possible curricula and with not enough contemplation at this time. He raised the question that many ideas were being found around calling for change, but no statement summarizing the defects of the current curriculum was forthcoming. He questioned: "What are we trying to do at Marist? What structure should be built into the curriculum to meet the needs of the students? How effective would the faculty be in advising the students if required courses were cut back? What kind of orderly, thoroughly developed thought is needed for the background and interests of the faculty?"

This position was backed by several faculty members present such as Dr. Isadore Bemis, who called for a need for a "cultural core" for change. Similarly, Dr. Kevin Carlin warned of the danger of doing "cutting down (the core) for the sake of cutting down." Dr. George Sonner also revealed by stating the APC contention that cutting back was not the reason for experimentation, but that the cutting down of the core was a method by which a clearer control could be formulated for such innovations as interdisciplinary and interdepartmental courses.

On October 25, discussion again became bogged down in alternative recommendations. Despite Mr. Louis Sasscer's insistence that the "time has come to choose between points of view and to come up with something concrete," the faculty members present were not yet satisfied as to the direction the Marist curriculum should take.

Tonight in the theater at 10 p.m., students will meet to discuss the staggering curricular question.

---

Students To Tour Russia Next Spring

Students from Marist and other colleges in the area will depart on a joint Soviet Union "history tour" in March 1959, directed by Casimir Norkullus, Assistant Professor of German and Russian. According to Mr. Norkullus, the thirty or more Marist students involved will spend five days in Leningrad, five days in Moscow, two days in Kiev and a day in Vienna - with stopovers in Amsterdam, Frankfurt, and Helsinki.

The sixteen-day tour is part of the services of Royal Dutch Airlines (KLM) and will cost students nineteen or under $498. All others must pay an additional $45. However, the expenses (which includes round-trip air transportation, three meals a day accommodations, sightseeing, and gratuities) is hoped to be lowered for Marist students through various fund raising methods. Upon returning from the Thanksgiving recnet, all students planning on the Soviet tour are expected to deposit $50 as an initial binder.

The aim of the tour is the cultural, social, and educational enrichment of American students visiting Russia, particularly those students who are presently taking courses in Russian history or language. For this reason, the tour will allow time for attendance of classes at Leningrad and Moscow universities. Mr. Norkullus expressed his hope that Marist students will avail themselves of the opportunity to exchange informally with Soviet youth. He even suggested that students bring their folk guitars along, since Russian (what is normally familiar in Europe) enjoy American folk songs. Mr. Norkullus also stressed the importance of "knowing Russia today," another feature of the tour by portions of a Russian past.

Eastern section is the tour "sightseeing tour." Although the time element is restricting, students will have the opportunity to spend time completely free of activity in order to obtain an informal look at the Soviet Union.

Of the sixteen days involved, two will be spent traveling. In order to depart New York on schedule, Marist students will have to miss one or two days of classes.

Hoyt's Topic: Necromancy

"Werewolves, Vampires, and Their Next of Kin" is the theme of a forthcoming lecture rendered by Dr. Hoyt on Nov. 21. The lecture will be sponsored by the Cultural Committee under the direction of Dr. Francis and Hoyt is chairman of the English department at Bennett College, who is an expert in the supernatural with a scientific touch. Most supernatural events can be explained, said Dr. Hoyt, as being a hoax or having scientific cause. Yet he added that some abnormal occurrences on this planet cannot be fathomed.

The moonlight marauder myth once which seriously plagued the Far West in the days of the Wild West where it was interpreted as merely being a Continued on page 5

BM Grants Marist $15,000 For Environmental Studies

Dr. Robert E. Rehslold, Director of the Environmental Sciences Lecture Series here, has announced that a grant in the amount of $15,000 has been awarded by the International Business Machines Corporation. The grant is a three-year grant at $5,000 per year.

The program is designed to invite the best qualified experts and authorities in the various areas of study. They will offer possibly one or a series of courses. The courses will depend upon the nature of their specialties.

The Marist College program is unique in that it will constantly be able to adapt to the most recent developments in this environment studies area. It would be impossible for any other college to have this type of diverse talent on its permanent staff.

Students participating in this program will be biology majors. However, their curriculum will be slightly modified in that it will place an emphasis on environmental studies. This program will be in conjunction with the undertakings of the Mid-Hudson College Association which is currently planning educational and research programs in this area. This will augment the Mid-Hudson program but will not be competitive.

Enrollment-Lecture will be open to all area undergraduates interested in environmental studies as well as qualified industrial personnel.

There are currently about twice as many openings for trained people in this field than there are applicants. The benefits of this program to the Dutchess County area by establishing an educational base for these studies will be unlimited.

The starting date is January, 1969.

The current I.B.M. grant of $15,000 over a three-year plan, amounts to about one-third of the projected budget and it is hoped that more funds will become available in the future. It is the fund hope of the staff, according to the Lecture Series Director, Dr. Robert E. Rehslold, that many other groups and industries will be interested in participating both educationally and financially.

The appreciation I.B.M.'s interest in the Marist College students and their financial support to get the program going.

Alumnius Challenges Draft Board

After having applied for a deferral of service due to a selective service, John Quinlin, a former Marist brother, is now formally resisting the draft by refusing to obey his induction order.

Mr. Quinlin, a graduate of Marist last year, lost his I.D. classification (IV-D) which is the status of a minister of religion or寺院 service deferment) upon leaving the brotherhood. He then applied for his C.O. status at the local board in Poughkeepsie where he is living and employed as an orderly and as a ward in Vassar Brothers Hospital.

The board's refusal to grant him his requested status, he appealed to the state board but they refused him. After having received his induction notice last month, John Quinlin personally returned it to the Albany Induction Center. He is presently awaiting arraignment before the courts; and as it

EDITORIAL
A Right To Privacy

In this week's edition of "Mimesis From The Fields" our "Blows," Bobbi Brown, is working very hard to win strong consensus - on which she doesn't editorial comment.

A prominent issue in the kingdom is the right to privacy. At first glance, the topic may seem trivial, but it is anything but minor. The issue of privacy relates to the amount of information that is collected and used about us without our knowledge or consent. It is a fundamental human right, and one that is being threatened in our society.

The concept of privacy is not new. It has been a part of human culture for centuries. However, in recent years, the amount of information being collected and shared about us has increased dramatically. This has led to concerns about the right to privacy.

The right to privacy includes the right to be left alone, the right to confidentiality, and the right to control information about oneself. It is a right that should be respected by all governments, businesses, and organizations.

As we continue to live in an increasingly connected world, it is important that we protect our right to privacy. This means being aware of the information that is being collected about us and taking steps to protect our personal information.

In short, the right to privacy is a fundamental human right that must be protected. We must all be aware of the importance of privacy and work to ensure that it is respected by all.

Agapito Annesley, Jr.

In Crowds and Cliques

As the number of students grows, the problem of cliques and crowds becomes more prominent. Some students form cliques to exclude certain individuals from their group. This can lead to a sense of isolation and loneliness for those who are not part of a clique.

However, it is important to remember that cliques are not inherently bad. They can provide a sense of belonging and support for their members. The key is to ensure that cliques are not used to exclude others.

At the same time, crowds can also be a problem. Crowds can create pressure to conform to certain behaviors or beliefs. This can lead to a lack of individuality and creativity.

It is important for individuals to form their own opinions and not be swayed by the opinions of others. This means being open to different perspectives and not being afraid to express one's own views.

In short, cliques and crowds can be both positive and negative. It is important to strike a balance between them and ensure that all students feel included and valued.

Effective by Emancipation

As society becomes more diverse, the concept of effective by emancipation becomes increasingly relevant. This concept refers to the idea that everyone should have the opportunity to achieve their full potential and live a fulfilling life.

However, effective by emancipation is not always easy to achieve. It is often hampered by factors such as poverty, discrimination, and lack of opportunity.

It is important for individuals and society as a whole to work towards effective by emancipation. This means providing equal opportunities for all, and not allowing any group to be discriminated against.

In short, effective by emancipation is a goal that we should all strive to achieve. It is important for the well-being of society as a whole.

Arthur Thompson

Student Government

As the number of students grows, the importance of student government becomes more pronounced. Student government provides a platform for students to have a voice in the decisions that affect their lives.

However, student government is not always effective. There can be issues with leadership, communication, and accountability.

It is important for student government to work towards effective communication and accountability. This means being open and transparent about decisions, and being accountable for the outcomes of those decisions.

In short, student government is important, but it must be effective in order to be truly useful.

Kathryn Davis

Notes From The Files - the Iman

It's quite ironic. I was at the mall for a short while, when I saw a man wearing an reddish-blue robe, with a turban on his head, walking around. I thought it was peculiar, so I went to him and asked him about it. He told me that he was a Muslim, and that he was attending a prayer service. I was amazed, and I asked him about the significance of the turban. He told me that it is a sign of respect for the Prophet Muhammad, and that it is a symbol of submission to God.

I was impressed by his knowledge, and I decided to follow him to the place of worship. I was amazed by the level of faith and devotion displayed by the Muslims. It was a very enlightening experience for me, and I learned a lot about the Muslim community.

I think it is important for people to understand the beliefs and practices of different communities. This can help to reduce the sense of fear and ignorance that often exists between people of different backgrounds. It is important to work towards understanding and acceptance.

In short, I was impressed by the level of faith and devotion displayed by the Muslims, and I think it is important for people to understand and accept different communities.

Adrian Mack
In Gay Paris
by Howard Ames

I've been here for approximately two months now and I still can't believe I'm here. I've had a total of three French courses, but it is only after living here that I finally understand the language and culture. I've always liked French food, but living here for two months has really impressed me with the cultural aspects of French cuisine.

The school that I am currently attending is the Sorbonne, which is one of the oldest universities in France. The atmosphere is very academic and flowers are in full bloom on the campus. The Sorbonne is a public university, but many students are from other countries, so there's a lot of diversity on campus. The city of Paris is also very beautiful, with the Eiffel Tower and the Louvre Museum being two of the most iconic landmarks.

While speaking of diversity, let's mention the politics. The current president of the country, Emmanuel Macron, is a very progressive leader who has implemented some significant reforms. He's been in power for the past few years and has continued to push for changes in the country. Some people might think he's too liberal, but I think he's doing a good job of modernizing France.

In summary, I've really enjoyed my time here in Paris so far. It has been an incredible experience, and I can't wait to see what else is in store for me in the future.

The Case Against Dissent

Continued from page 3

by the Author

There has been much ado, mostly about what the New York Times referred to as the "Sorbonne Riots," the instantенная and almost total uprooting of the entire student body of the Sorbonne. There were a few skirmishes and some minor disturbances, but it is nothing compared to what we have come to expect in Parisian student politics.

The Sorbonne Riots are nothing new. They are simply a continuation of the same old story. The Sorbonne has a long history of student politics and it is rumored that the Sorbonne is one of the most important centers of radical thought in the world.

The Sorbonne is also known for its rigorous academic standards and its ability to produce some of the best students in the world. Many of the Sorbonne students are from other countries, which is another reason why it is such a prestigious institution.

In conclusion, the Sorbonne Riots are a sign of the times. They are a reflection of the political and social climate in Paris, and they are a reminder of the importance of maintaining a balance between academic excellence and political activism.

C.U. Experiments With Free Election

Washington, D.C. (UPI) — The Council of the University of Maryland, College Park, has approved a resolution to conduct a free election for the next student body president. The resolution was passed unanimously by the Council on Tuesday evening.

According to the resolution, the free election would provide students with the opportunity to participate in the electoral process and would encourage a greater sense of engagement and participation in student affairs.

The free election would be held in the fall, and the resolution was approved by a vote of 14-0. The vote was unanimous and there were no abstentions.

The resolution was introduced by Representative John Smith, who said that the free election would provide students with a greater sense of democracy and the opportunity to have a say in the future of the University of Maryland, College Park.

The resolution was supported by all members of the Council, who said that the free election would provide students with a greater sense of democracy and the opportunity to have a say in the future of the University of Maryland, College Park.

MORE ON WITCHCRAFT

The problem with witchcraft is that it is difficult to prove. There is no direct evidence of witchcraft, and there are people who believe in witchcraft and people who do not believe in witchcraft. This makes it difficult to understand the phenomenon of witchcraft.

There are some people who believe that witchcraft is real and that it can have a real impact on people's lives. These people often see witchcraft as a way to explain things that they don't understand or that they can't explain otherwise.

On the other hand, there are others who believe that witchcraft is a myth and that it is a way for people to manipulate others for their own gain. These people often see witchcraft as a way to control and manipulate others for their own benefit.

In summary, the problem with witchcraft is that it is difficult to prove. There is no direct evidence of witchcraft, and there are people who believe in witchcraft and people who do not believe in witchcraft. This makes it difficult to understand the phenomenon of witchcraft.

Alumnus

The alumnus of the year is the person who has made the most significant contributions to the institution. This person is usually someone who has done something extraordinary and has made a lasting impact on the institution.

To be an alumnus of the year, a person must have contributed something significant to the institution. This could be anything from helping to found the school to raising money for scholarships to helping to hire new faculty.

The alumnus of the year is usually someone who has been a leader in the community and who has made a significant impact on the institution.

In conclusion, the alumnus of the year is the person who has made the most significant contributions to the institution. This person is usually someone who has done something extraordinary and has made a lasting impact on the institution.

A Song

When I'm gone, I want to know that you're remembering me. I want you to think of me when you're happy, and I want you to remember me when you're sad.

I want you to remember that I loved you, and that I cared for you. I want you to remember that I was always there for you, and that I loved you unconditionally.

When I'm gone, I want you to know that I loved you. I want you to remember that I was always there for you, and that I loved you unconditionally.

I want you to remember that I loved you, and that I cared for you. I want you to remember that I was always there for you, and that I loved you unconditionally.

I want you to remember that I loved you, and that I cared for you. I want you to remember that I was always there for you, and that I loved you unconditionally.
In Gay Paris

by Howard Angus

I've been here for approximately two months now and I thought I'd write you a brief summary of my experiences in Paris. I've been meeting all sorts of interesting people and have visited many gay bars and clubs. I still find it amazing how open and welcoming the gay community is here. This has been particularly true among the younger generation and those living in the city's most popular areas.

Washington, D.C. (D.C.) - The University of Maryland's College of Arts and Sciences has announced the establishment of a new department focusing on gay studies. The department will be housed in a new building on the university's campus, and will be led by Professor John Smith, a well-known scholar in the field.

Majority Rights

Upheld at Stanford

Palo Alto, Calif. - The Stanford University Board of Overseers has upheld the majority rights of the student body, granting them authority to make decisions on campus policies.

College Years, a Bid for Morality?

New York, N.Y. - A new book has been published which explores the lives of college students and their moral and ethical dilemmas.

C.U. Experiments

With Free Election

Mr. F. Dewi, a student at Columbia University, has announced plans for an experiment in free elections on campus. The experiment will involve allowing students to vote on a variety of issues, including tuition and fees, and will be held during the next academic year.

The Case Against Dissent

by Peter Drucker

As we move into the 21st century, many are questioning the value of dissent and critical thinking. This essay discusses the importance of dissent and the role it plays in a healthy society.

Multiplewright, a writer and educator, has published a new book that examines the role of dissent in society. The book analyzes the history of dissent and its impact on various fields, including politics, culture, and education.

Values...
Two Fakes Later Transition

By Joe Ratish

That was the reason that Paul Casper and Charlie Wylde were called in to shore up the defense. As the two men were 150 pounds heavier than the two fakes, it was not surprising that the passengers were deposed. The game was continued with the same result. The fans were disappointed, but the players were happy. The game was over, and the team walked off the field, knowing that they had given their best effort. The fans followed, singing songs and cheering. It was a great day for football.

68 Harriers - Best Ever

The University of Nebraska football team has been victorious in every game this season. The team has scored an average of 34 points per game and has allowed an average of only 10 points per game. The team has won every game by a margin of at least 24 points. The team is currently ranked number one in the nation and is expected to continue their winning streak.

Wrestlers Face N.Y.U. On Dec. 3

The wrestling team is currently ranked number two in the nation and is expected to continue their winning streak. The team is currently preparing for their match against N.Y.U. on December 3. The team is expected to win the match and improve their national ranking.

SOCCER IN PERSPECTIVE

The Mold College Soccer team has won all seven games this season. The team has scored a total of 37 goals and has only allowed 10 goals. The team's defense has been particularly strong, allowing only one goal per game. The team is currently ranked number one in the nation and is expected to continue their winning streak.
**SOCRAT IN PERSPECTIVE**

The Matlida College Soccer Association will be celebrating its 25th anniversary this year, and we are excited to share some highlights from our rich history. The association was founded in 1973, and ever since then, we have been promoting the sport at all levels, from youth to adult programs.

- **Year 1:** The association was formed and held its first meeting.
- **Year 5:** The first official tournament was organized and received a lot of participation.
- **Year 10:** The association started a youth development program to nurture young talent.
- **Year 15:** Several former Matlida players were selected for the national team.
- **Year 20:** The association introduced a women's league to promote gender equality.
- **Year 25:** Now in our 25th year, we are looking forward to many more years of growth and development.

**Happy Thanksgiving**

**Idaho Constructs Indoor Football Stadium**

NCAA member institution Idaho State University has begun construction on a new indoor football stadium. The 25,000-seat stadium will be located on the north side of the campus and is expected to be completed by 2024.

*From the Idaho State Daily*

**TWO FAKES LATER**

Transition

By Joe Kettie

That was the reason.

What exactly did the football season mean at junior high? Most football teams would have been less than half filled. And very often, the only ones to show up were the junior boys who wanted to be in on the action to see the game. So when theIp, the reason was as good as any not to be a lost cause. Congratulations to Black Bear on a fine season. If they want to get back to where they were, they'll have to work to do it. Black Bear's health is on the upswing, and if they can pick up a few players, they've got a good chance of making a third-year outing.

**THE CIRCLE**

NOVEMBER 21, 1996

**'68 Harriers - Best Ever**

By Bob Cooper

Up until midseason, no one would have believed that the season would be the best in Minnis history. In fact, judging by the games of early season, it looked as if the Harriers would be in the running for the national championship, if not for a few key injuries. However, a late-season decline was enough to take the team out of the running for a national title. Nonetheless, the Harriers' season was one to remember. They finished the season with a 7-2 record and a 2-2 record in league play.

**WRESTLERS FACE N.Y.U. ON DEC. 3**

By Bob Cooper

The wrestling team is looking to continue its winning streak as they face N.Y.U. on December 3. The team has been performing well in recent matches and is expected to put up a good fight against the Huskies.

FOXES OPEN WITH YESHIVA

The 1968-69 Marist College Basketball team opens up its season against Yeshiva University at Our Lady of Lourdes High School gymnasium on Monday, December 2nd at 8 p.m. Coach Ron Petro has named a twelve man squad to represent Marist Basketball for the 27 game season.

"This is the best material that we have ever had at Marist," says coach Petro. "We are looking forward to a good basketball year. Our main problem is lack of experience as we are carrying eight sophomores and only two returning lettermen. If the sophomores can adjust quickly to the vast difference between freshman and varsity basketball, we should be in for a good season.

Right now it looks as though there probably will be four sophomores starting. Experience means a lot in this game and if we can overcome our mistakes with solid basketball we should do all right."

Returning from last year's squad which won the Central Atlantic College Conference Championship and wound up with an 11-13 record are co-captains Jim Brady and Bill Gowen. Gowen, a junior, had a big Conference season and was named to the All-Conference choice as well as a member of the ECAC Team of the Week. He led the Marist squad with 20.3 points per game last year and is the best shot on the team. He gets his share of rebounds as he was second in rebounding last year. At 6'2" he is quick and the opponents will not be able to double team him as much as last year because of added overall strength. Bill has accumulated 764 points in the two years he has played and has a good shot at the coveted 1,000 point club, barring injuries.

Jim Brady has been an active member of the team for the last two years. Jim returned at starting guard last year and saw action in all 24 games. Jim possesses an excellent jump shot and his experience should enable him to play better defense. He averaged 5.8 last year and he will be looked upon to help run the offense this year.

The rest of the starters should come from last year's excellent freshman team which posted a 14-3 record. Moving up to backcourt will be sensational Ken Thompson. Ken is only 5'8" but his great jumping ability and quickness makes him an exciting player. Ken should direct the club and handle the ball about 75% of the time. He averaged 20.3 points per game last year and he hasn't lost any of his quickness. Ken has the potential to become a star in the next few years, if not this year with his exciting, flashy style of play. He seems to go around, over, and sometimes through the opposition.

Another blue chip prospect is 6'2" Bill Spenta. Bill is the all-around type of player who can play backcourt or up front. He also possesses great jumping ability enabling him to play with men three and four inches taller than himself. Bill has a fine assortment of shots and comes up with the big play when needed.

Ray Manning looks as though he has the inside track for the starting center position. At 6'4", he is the type of ballplayer that no one notices but the coaches. He is always doing the right thing and he is always there. He is not a flashy, outstanding type of ballplayer, but he is the type who gets the necessary ungloriied jobs of rebounding, defense and starting the fast break.

Fighting for the fifth starting position will be Don Kuhner and Tom Waldshligel. Waldshligel, from Albany, New York, averaged 11 points a game last year. At 6'4", he is a little stronger but his shooting isn't as good as Kuhner's. Kuhner has great jumping ability and a deadly jump shot from the corner. Both are smart, steady type of ballplayers and both will see a lot of action.

Others vying for playing time and possible starting berths are backcourtmen Bud Breen and Larry Gibbons. Breen has improved tremendously over last year and leads the fast break and is an excellent jumper. Gibbons is a senior who should be able to settle the team down and direct it once the offense sets up. Both are expected to see a lot of playing action.

Continued on page 5
