The Faculty Votes in New Core & Major

Political Science Offered

With an unwavering vote the faculty, at a recent plenary session, approved a proposal for the initiation of a major in political science, the major will be available in September 1969. It will be offered within the Department of History.

Approval of the major climaxes several years of expanded, and in some cases, unorganized political science offerings and of increasing library holdings in this field.

The major should be of particular interest to students interested in careers in teaching, government, law and related fields.

Students interested in the newly instituted major should consult with Professor Zuccarello. Majors will be accepted from students presently at Marist and from incoming freshman.

Debates in intercollegiate cooperation and the establishment of government internships in the future would

All But One Vote "Yes"

The Academic Policy Review Committee, meeting on Friday, January 28, 1969, presented their latest core proposal by a slim margin of 49 votes to 44. The only dissenting vote was expressed by Dr. Cardan of the Math department.

Majors in English, Modern Languages, History, Political Science, and American Studies will take a minimum of 56 credits and a maximum of 50 credits. Philosophy and Religion, History and Economics at the same time. Psychology and Sociology still hold at two and Math - Science is being cut to nine. Large enough to the almost unchanged as students beginning at 1969 will take 12 credits of one foreign

The F.P.C. Discusses Tenure, Leave, Etc.

The Faculty Policy Committee under the chairmanship of Dr. Morley, considers a testimony with regards to policies on leaves of absence and on the tenure of non-faculty in a committee on Jan. 28th, 1969, held in Donnelly.

The first proposal mainly concerned leaves with compensation and the leave without compensation. Compensation is necessary to obtain sabbaticals, which, represent an important and approval of many faculty members. The F.P.C. believes that it is necessary for the future of his professional duties. The subcommittee is based on a competitive level.

In support of this plan, summer research grants were discussed for those making a Ph.D. Dr. Balch, a member of the FPC, felt that this would be an excellent incentive for Marist faculty who generally must teach in the summer. One of the critics of this proposal thought it right to give grants to Ph.D. candidates, since once achieving the Ph.D. they might look for greener pastures.

A major issue on the agenda of the FPC committee concerned the tenure of non-faculty. The FPC which works to gain the trust and responsibilities of teachers would let the CFD handle the matter of evaluation. The Committee on Faculty Evaluation would give ratings to professors requesting promotion and pass their recommendations on to the department chairman or the Academic Dean. A critical phase of the CFD would be the appraising of their non-faculty colleagues requesting tenure and for some their subsequent dismissal. The CFD does not exist as a hiring or firing committee but will be a research agent to facilitate the college president's decision on granting tenure to aspiring faculty.

Co-ed Report Announced

By Campus Life Committee

P.S.C. Forms Available

Students receiving financial aid from any of the Federal Government programs, (Educational Opportunity Grants, National Defense Student Loans and Work-Study Jobs) are reminded that applications for the 1969-70 school year are now available at the Registrar's Office in Adrian.

The Marxist application and a Parents' Confidential Statement must be filed each year. The deadline for receipt of these is May 1st. Since it takes months to get the P.S.C. report from Princeton, all applications should be filed by March 15th.

Student whose P.S.C. or applications are received after May 1st have no chance of receiving aid.

Marist's application for federal funds is due in November. Although we do not yet know how much we will receive, we expect to get less than last year, since Congress cut appropriations for all these programs. Eligibility for grants has been tightened so that it will be very difficult for an upper classman to qualify for an initial grant. Renewal grants will be given on the same basis last year. Since grants depend upon parental income, in many cases recipients whose family income has increased will receive smaller grants.

We have been requested to spot check the income tax report of grant recipient's family this year so some applicants will receive a request to furnish a photocopy copy of the 1968 tax report before they are given an EOA.

All applicants will be notified by May 15th of any aid to be received. This will give time to secure a Work-Study job before school closes and a chance to arrange for other necessary funds during the summer.

Math Dept To Hold Lecture

The Department of Mathematics here has extended an invitation to Vasan, New York 11217, to present a talk to the Marist Community, Mount Saint Mary, Long Island College and the U.S. Military Academy at West Point to attend a lecture being delivered by Dr. Leopoldo Sanchis on Thursday, May 15th, Professor Alpert, who heads the Math Department here, expects close to one hundred people from math departments in the Mid- Hudson area to attend. Dr. Torgalla will deliver his lecture at 8 p.m. in the Student Center. He is expected to expand upon results of his recent studies in the field of surface area.

Want to increase our student body in a similar fashion? F&M plans to do it.

We would not necessarily build more dormitory space, but most of the students could be housed in the dormitory. This would provide the possibility of off-campus residence. We would not necessarily build more dormitory space, but most of the students could be housed in the dormitory. This would provide the possibility of off-campus residence, which might also have an appeal to some female students. What we need is a plan and a way of increasing the number of the female population.

A.G. PROGRAMS have a study cites four major academic areas which an increase in enroll could have a significant effect: 1- Curriculum: we may find ourselves in need of new courses to handle the increased female population - e.g., courses in ballet to replace phys. ed., or a strengthening of French and Romance, for instance. In general, it could be said that there would be no need for changes, but we should be aware of the possibilities.

2- Population shift within the institutions: we may find a shift in the number of people taking particular courses. Women tend to take courses not just for themselves, but also for others, as the accompanying chart shows. The F&M study shows that women are more likely than men to take courses in the various departments, and plan accordingly. Here again the number of women of the female population increases, Marist could be significant.

3- Faculty staffing: This is not included in the A.G. above. Part 2 of the article in the campus paper: Comparing the enrollment of M.A. above.

Honor USN Style

Commander Lloyd M. Bunker after returning from the jungle assignment of the North Korean Communist group must have a spot of red in the center of his bald spot. His returned from the assignment and was awarded the Silver Star for his gallantry and valor in action. The Silver Star is a decoration given to members of the Armed Forces who perform acts of heroism and valor in action. Commander Bunker was commended for his outstanding service and dedication to his country.

LEHRMAN'S SCHEME

Any of the parties, the Student Government Administration, the Student Senate, or the Student Governments, which is all in theory and purpose, is the Student Senate the administrator of the student government and the Student Government Administration the executor of the student government's policies. According to Lehrman, the S.G.R. would be a body of 79,000 students, the S.G. would be a body of 79,000 students, and the Student Senate would be a body of 79,000 students. Lehrman points out that the Student Senate can do nothing without the consent of the Student Government Administration.

TALKING ABOUT CLIMATE CHANGE

The climate is changing, and students are becoming more aware of the issue. In order to address climate change, it is important to understand the science behind it and the impact it has on our daily lives. The importance of education in this context cannot be overstated. The more students learn about climate change, the more they can take action to combat it. It is crucial for students to be informed and engaged in the fight against climate change.

LETTERS TO THE EDITOR

The Who and What of Marist

In a continuing series of columns, the College's student newspaper, the Marist Scholar, will focus on the role of the President of the College, who is the ultimate leader of the College. The column will explore the role of the President in the governance of the College, as well as the impact of the President on the College's academic and extracurricular programs.

Shame

Dear Editor,

Another editorial triumph has been accomplished by the Marist College student body. (Get it? In the last two days and it was a great one.) This is something that we all should be proud of. The whole world is looking at us, and we are not letting them down.

James Victory

The Imman Nightmare

I sat there last night, staring at the screen and wondering what the future holds for me. It seemed like a never-ending cycle of dreams and waking up, only to return to the same cycle again. I felt like I was trapped in a nightmare that never ends.

The Cremery

Cremery students are calling for a change in the current system of parking and transportation on campus. They argue that the current system is outdated and unfair, and that it needs to be reevaluated to better meet the needs of the student body.

LETUS GATHER THE LIGHT

by Steve Lauts

Let Us Gather the Light

"Let us gather the light," with the words written in the sky, the words written in the sky, the words written in the sky. This is the title of the poem that the poet celebrates in the poem "Let Us Gather the Light." The poem is about the importance of gathering the light and sharing it with others.

MOVIE REVIEW "In a
"

A young woman is on a mission to save her best friend's life. She must cross the border into Mexico to find a doctor who can help her. The mission is dangerous, but she is determined to succeed. The movie is a dramatic and intense story about the power of love and its ability to overcome even the most difficult obstacles.

ELECTION '90

The College wants to know who the up and coming student council candidate will be analyzed by Dr. John Toole, F.M.S.

Anyone interested in helping him, should contact the College through the campus mailbox at Box 87.

THE CIRCLE

February 7, 1989

The Circle is a student publication that covers news and events on campus. It is published on a weekly basis and is available at the student center and in dormitories. The Circle is an important source of information for students, faculty, and staff.

The battle still wages on as our precious library is under threat. A superb effort of the individuals involved was accomplished with a courtesy reading list and getting "dented" on the main stacks. You could go on to carefully examine the titles on the list and decide not to include them. You could be included in the library and not be included in the plans. Take your own end of the battle, make it known that you are not included in the plans. Your side needs to be heard, your side needs to be seen.

"I think that this is a serious issue, and the administration needs to take it seriously," said one student. "We need to work together and find a solution that benefits everyone."

The main point is that the library is under threat and we need to take action to protect it. The students should be included in the decision-making process and have a say in what happens to the library.

The students should be informed and be given a voice in the decision-making process. They should not be left out and left to wonder what will happen to their precious library. It is a matter of the students' rights and they should be respected.

The administration needs to take the students' concerns seriously and work with them to find a solution that benefits everyone. It is a matter of fairness and justice and the students should not be left out in the cold.

Honor USN Style

Commander Lloyd M. Busher after returning from the salute honoring the South Korean President and meeting with the South Korean government officials, expressed his gratitude for the hospitality and the opportunity to strengthen the USN-USOE relationship. Commander Busher's visit was an opportunity to enhance the cooperation and mutual understanding between the two nations.

Shame

Dear Editor:

Another sad tale has been added to the list of medical school "success stories." The system of grading in medical schools is so complex and subjective that it is difficult to determine what grades really mean. The only way to escape the system is to fail, but this is not an option for most students. A better system needs to be put in place to evaluate the performance of medical students.

Louis C. Barry

The Who And What Of Marist

In a continued series on change and the issues facing Marist College, we will focus on a few areas that are currently being addressed.

Marist's new president, Dr. John G. Jellinek, has been named to the position after serving as interim president since 2015. His appointment is expected to bring a new perspective to the college and help address some of the challenges it faces.

Jellinek has been a long-time friend of the college and has been involved in many of its activities. His appointment is seen as a positive move for the college and its students.

The Iman: Nightmare

I saw that night, they all died just like me, with their nails and their teeth, and their toes and their fingers. Their eyes were burning. They burned the sky and everything. It's all around me. Me, my family, and my friends. They were not mine. They were not ours. They were not our friends. They were not our family. They were not our neighbors. They were not our country. They were not our world. They were not our planet. They were not our universe. They were not our reality.

The Cremery

The Cremery is a new addition to the campus, providing a place for students to relax and enjoy a variety of food and drink. It is located in the center of campus, making it easily accessible to everyone.

Let Us Gather the Light

"Let us gather the light." With these words, President Nixon began his long-awaited speech at the White House. The President is expected to address the nation on a series of important issues, including the Vietnam War and the Watergate scandal.

Movie Review: Inga

Inga is a film that explores the story of a young woman's struggle to find her place in society. The film is directed by Ingmar Bergman and stars Ingrid Bergman and Jean Gabin.

The Search

By Bernad

WASHINGTON (CPS) - The young man in the 18-year-old car pulled up to the curb in front of the hotel. He was looking for a place to park his car, and he saw something he liked. The hotel was located in the center of town and had a big parking lot. He pulled into one of the spaces and got out of his car.

The man was dressed in black and carried a bag over his shoulder. He was looking for a place to stay for the night, and he saw the hotel. He walked into the hotel and approached the reception desk.

"I need a room for the night," he said.

The receptionist looked at him and said, "What's your name?"

"It's John Doe," the man replied.

"Okay, Mr. Doe, your room is number 204." The receptionist handed him a key.

The man thanked her and went to his room. He settled in for the night and slept soundly.

The next morning, he left his room and went down to the breakfast buffet. He ate a hearty breakfast and then left the hotel.

The man was satisfied with his stay and would definitely return to the hotel in the future.

Albany and Ethics: 1984

By Vin Freeman

The Albany State Legislature is currently embroiled in a series of debates and proposals for ethical reform. This is the perfect opportunity for voters to consider the ethical implications of their legislation. Ethical reform is not just a matter of personal integrity or moral character, but also a systemic issue that affects the entire community. Voters must ensure that their representatives are committed to ethical principles and accountable to the public. Only through a commitment to ethical reform can we ensure a fair and just society.

Albany and Ethics: 1984

by Vin Barone

The Albany State Legislature is currently embroiled in a contentious debate over the proposed sale of the state's largest prison, the Albany Correctional Center. The sale, which has garnered significant public attention, is being closely scrutinized due to its potential implications for the state's prison system and the rights of inmates.

While some advocates argue that the sale will provide much-needed financial resources for the state, others worry that it could lead to overcrowding and a reduction in the quality of care for inmates. The debate has also raised concerns about the possibility of privatization and its potential impact on public safety.

The debate highlights the ongoing challenges faced by the state as it grapples with issues of cost containment and the provision of high-quality care for its incarcerated population. It remains to be seen how the legislature will proceed, and what the ultimate impact of the sale will be on the state's prison system.
Foxes Win Big One

Marist was able to secure at least a share of the CAC basketball championship last Monday night with a most impressive 101-85 victory over Bloomfield College of New Jersey.

Both teams started fast and kept up the run-and-gun style of play until after the second half was about five minutes old. At this point, Marist took command and threw back all of Bloomfield's attempts to come back.

Marist put together a very balanced attack evidenced by five men in double figures. The high scorers were Kenny Thompson - 20, Ray Chafton - 18, Bill Goew - 16, Joe Scott - 14 and Tony Jackson - 14. As a team, the Marist 46 field goals were scored after the insertion of Tom Waldbillig and Ray Chafton. Combined with the pressing defense of Kenny Thompson, Marist jumped out by eleven mid-way through the second half and held that lead and more to the end.

The rebounding was scarce due to Bloomfield's good floor percentage. High men were Bill Goew - 9, Bill Spela - 8 and Joe Scott - 7. Scott came off the bench in the second half and did one of the few rebounds he scored eight points during his short stint.

Others who showed themselves valuable were Ken Thompson and Ray Chafton as the Marist four men, respectively.

Much of Marist's victory can be attributed to the fine all-around play of Tom Waldbillig and Ken Thompson. Thompson was the real floor general. His pressing defense caused numerous turnovers which led to many Marist baskets.

Hendrick Waldbillig was shot at the arm near the end of the game as he had some important buckets and defensive rebounds which kept the lead quite secure.

The first victim of last night came on Wednesday night to Lourdes High School. It was not the Marist of last night. Things were story from the first as Nuyak, hill climber, came through the opening minutes of play. This was short lived though, as Petro and Company opened up the offense, settled down to hard scoring, and blew the game wide open long before the half-time buzzer sounded.

With Kenny Thompson and new-comer Ray Chafton running like some well known NBA guards, they were able to come away with 57-30 lead at the half. The second half was even better as Marist took complete control of the game. The team was barely warded and won by a 91-67. High scorers were Bill Goew with 19, Ray Chafton 16, and Ken Thompson 15.

As a whole, the team shot a respectable 42% from the floor.

The rebounding was an especial bright spot everyone seems to be hitting the edge of the Marist 537.5 rebounds. High were Bill Goew, 8 and Bob Maguire, 6.

The new additions to the team, Chuck Marlier and freshman Joe Scott proved to be valuable assets. Chafton, a former Marist, is in keeping with Kenny Thompson's type of hustling and aggressive game of basketball. He should prove to be a most important part of the Marist basketball team.

Days later, Marist journeyed down to Newark where they again scored a relatively easy 86-54 victory. Things were tight at first but behind Clarke's excellent ball-handling and rebounding, they proceeded to pull away. Clarke led the scoring with 15 points besides firing 5 assists. McMichael again came through with a double figure performance and Dennis Curtin led the rebounding.

Clarke's pace and Cuiffic were apatives. Shackle played a fine game in a game in the backcourt. Despite the strange position, he performed quietly at his usual level.

Continued on 7

Frosh Still Strong

Since semester break the freshmen have continued to rate methodically and offensively, the latest ones against Nuyak, Newark Rutgers, and Bloomfield.

The Nuyak game was strictly a laugher at Marist simply outrating the visitors all the way for an easy 110-43 win. High scorers were Benvin (21 pts.), Shackle (17 pts. and 15 rbs), Dennis Curtin (16 pts., 13 rbs), Terry McMichael (13 pts. 8 rbs) and Mark Schmidt (10 pts., 14 rbs). Ray Clarke had 7 assists as he played an excellent floor game.

John Windmuller led the bench with 20 points.

Three days later, Marist journeyed down to Newark where they again scored a relatively easy 86-54 victory. Things were tight at first but behind Clarke's excellent ball-handling and rebounding, they proceeded to pull away. Clarke led the scoring with 15 points besides firing 5 assists. McMichael again came through with a double figure performance and Dennis Curtin led the rebounding.

Clarke's pace and Cuiffic were apatives. Shackle played a fine game in a game in the backcourt. Despite the strange position, he performed quietly at his usual level.

Continued on 7

COED 1

These problems would be long-term ones, but should be anticipated. RE: STUDENT SERVICES AND PHYSICAL ACTIVITIES.

Here is where we find our biggest problem. Financial aid and counseling services would probably remain constant, whether we have more women or not. There are three areas of concern, however. First, the problem of cultural and social activities: we might find a need for increased recreational and social activities; where couples can meet, etc. 6-2 would be the present lounge areas be sufficient? What would we have cadies living here? This depends on how we plan.

Second, the Phys. Ed. requirement: do we have facilities for an athletic program for females? This is something that has to be worked out with the ApG and the Phys. Ed. departments - perhaps the Phys. Ed. requirement would be dropped for co-eds.

Third, and most important at present, is housing. How many women do we want to accommodate on campus, and how many will be willing to accommodate? We have to consider the facilities that we now have. The Gutter houses will hold 64, but one of these units is rented (to the Brockett). Will 32 units be enough, even in September? Should we plan on turning over some of the dorms to single use, or new use? How much more space would we need? We should probably need a new dorm.

QUESTION 2

Frosh Still Strong

Five times and suffering very few turnovers.

Thursday night they again faced Bloomfield. After a shaky first half which ended 22-22, the frosh pulled away for an easy 81-54 win. High scorer for Marist was Clarke with 17 points. He off-shoulder by McMichael (16 pts., 12 rbs.), McGoowan (15 pts., 15 rbs.) and Shackle (10 pts., 14 rbs.). Mark Schmidt (9 pts., 8 rbs.) and Rich Talies (5 assists, 8 rbs.) also played well. Ollie Greene, whose second-ton was virtually unstoppable, led Bloomfield with 24 minutes.

Thus, the frosh have rolled off 8 straight victories since their opening loss to Ulster Community College, and the fact that they have lost two of their starters (Joe Scott and Ron Wilson) hasn't seemed to dull their performance. In the absence of Wilson, Ray Chafton has had to take on the playmaking job and has made use of the opportunity to show his true ability. He has played a strong game, as well as his scoring has picked up along with his passing. With the loss of Joe Scott and Rich Talies, McGoowan and McMichael have continued their fine performances.

Joe Scott's return lends a new spark and McMichael have continued their talented position. With a few breaks the frosh could go undefeated the rest of the way.

Unpressed with the long-term needs, the Frosh leaders hoped for a Carmel valley extension area on the outskirts of Marist's campus.

The Marist grapplers found New Jersey an ill-starred mission last week after two long treks to the Garden State gained them nothing but more experience.

Both Fairleigh-Dickinson at Madison, and Newark Rutgers built up big leads in the early going to Terry Rockich's club with respective 23-18 and 24-11 leads.

F.D.U. really came out strong. In the 125 B. class Ward caught Johnny Eisenhardt in 1:13 to give him a 50 yard lead. Mike Horner, 130 lbs., hit the mat in an even quicker 1:03. The box set the Reids back 100. Freshman Phil Davis nearly pulled the outright only to be decided by F.D.U.'s Burke 87 in the 177 lb. class. F.D.U. now held a 140 lead and appeared ready to come.

Bill Moody had other ideas when he came up with a big effort to end the impending rout and a successful match by pinning Picutete in 5:24. Bob Krenn quickly followed suit by defeating C.D. in 1:15. Couple these wins with an F.D.U. forfeit in the 180 lbs. class and the hustling Marist squad had tied the meet at 13-13.

F.D.U. responded quickly and evened both at a 147 lb. Mans, Fred William pinned Fred Wagner in 1:47.

Two Relays For Colby

The mile relay, which is set for the Damen Institutional this Friday, has been scheduled for action on March 1, in the Colby College Invitational Track Meet, to be held at Waterville, Maine. This time the original four will probably be split up at Marist College a mile relay and a two mile relay.
