Champagnat Heat Problems

Temporary solutions and long range suggestions on the winter freezing conditions at Champagnat Hall have been reached. The real problem of the crisis lies in the poor construction of the building, its insulation and ventilation systems. For the past week, the heating systems have been on and pushing full capacity. A survey of the building showed that the cold air was rushing in from open cracks in the windows and other areas by the poor construction of the building; especially the upper hall causing the windows, which was originally intended for washing use only.

The immediate problem is the inability of the north side of the building to withstand the high winds and below-freezing temperatures.

Student action came on Monday after almost all north side residents complained about not being able to sleep, study, or live in their rooms on Sunday night, when the wind chill factor dropped temperatures to 15 below zero.

After unsuccessful attempts to contact the right people, Jim Landolle and Terry Curtin organized a survey of crew to study the Hall, and try to settle the issue. A Monday night meeting of about 150 students was held and a general feeling of "nothing done" continued another cold night" prevailed. Students were advised to sleep in warmer rooms, but a hope for extra blankets from the campus was fruitless. The Campus Center could have been opened for anyone wishing to use it. It was a unanimous feeling, however, that something had to be done to correct the "tomorrow night's inconveniences." Students at the meeting offered many suggestions, ranging from a "Let it be" attitude to more radical suggestions, and decided to draw up a proposal and meet with President Foy and the maintenance department.

After the meeting, a committee was formed which included Landolle, Curtin, John Lyons, Ed O'Connell and Bill Owens. Thomas Strain, Joseph Roener, Patrick Martin, and Raymond Langer also assisted in drawing up the proposal of the students. The committee met after midnight with Mr. Patrick Forsyth and Residence Director Mr. Fred Lambert. The two administrators agreed with the immediate proposal which was to build around the suggestion that the building be immediately supplied with polyethylene sheets to cover the windows, and for maintenance to immediately avert its attention to fixing up certain complaints which had mounted for weeks.

The same feeling was held when the five members met with President Foy, Mr. Andrew Pavelko, director of maintenance, and Mr. Fred Lambert. All agreed that immediate action must be taken, and two hours later, polyethylene sheets were being distributed to the upper floor of Champagnat on a trial basis. A student work force was organized to help maintenance with its cutting and distribution.

Mr. Lambert and residents in these rooms agreed that the polyethylene sheets were very useful. By Thursday, all north side students should have access to these sheets.

The maintenance department was also alerted to the need for more concentrated effort of its daily schedule to the corrections of complaints in the building.

A realization that the problem has occurred before caused a discussion of long range priorities. The maintenance members made many suggestions and felt that reducing the heat loss was of prime concern. Engineers will be consulted soon to help out with the skin of the building, possibly an early summer project.

A full-scale study of the numerous suggestions will be the "expense of the summer." Mr. Foy has agreed to consider all of them and within his power will be done before September. Neither one of these are a similar situation in future years.

Residence Living

By Jim Keegan

Since September Mamet has been faced with many problems concerning the resident student population. The dormitory direction is in which it is heading. Many myths have been created concerning students dropping out, dormitories being closed, and financial disaster on our doorstep. But, before we do panic, let's take the time to seriously analyze the problems facing us.

It has been said that a good number of resident students have left campus, especially our student leaders, and a real dormitory will have to be closed down in order to compensate for the loss. That's not true. With the enjoyment and fun of the off-campus life in which we live, it is commonly thought that the students who go off campus are academically inferior to those who stay, but that does somewhat imply that a good number of the college's resident students are academically involved and staying in the dormitory. Another rumor that must be cleared up is that of a dormitory closing to accommodate for resident students leaving. According to Residence Director Fred Lambert "no dormitory is scheduled to be closed down for next semester and if students from the Culinary Institute and Dutchess Community College wish to live on campus they may do so provided there are the places available."

Unlike most other small dormitories in the college, the living at Mamet is following a unique pattern. In contrast to most of the other colleges in our category we are closing dorms and desperately trying to fill empty spaces. Mamet has expanded our dormitories by opening new dorms such as: "Foreman," "Common," and "Mystic." Although by some it might be considered as economically disastrous to move to keep those dorms open, the three latest residences have proved to be an interesting alternative in living at a time when the future of the small private college has become a major problem in American education.

Upon reading the aforementioned one is led to realize the life at Mamet as being much more important than what is being said. It is true that the resident life at Mamet has come a long way in only a year's time, but the progress made is only representative of the dormitory. The need for more resident administrators who see great value in residence living.

Now is your chance to have a formal picture taken if you wish. The photographer from Classic Studios will be here to take them for you. There will be no charge to take them, and you can order special packages from him if you want. These can be taken in a cap and gown or a suit or your favorite dress. He will be here on Feb. 19th from 10:00 a.m. to 3:00 p.m. and 7:00 p.m. in room 181 in the Campus Center.

Space Planning

By Brian Morris

The recommendations of the Ad Hoc Space Planning Committee are now in and subject to the approval of the full membership of the Marist Community. The Ad Hoc committee was composed of Joe Breneman, Fred Lambert, Ann Hoy, Kevin thawley, Andrew Pavelko, and Bill Roberts, who submitted a four-page report. One of the recommendations which, if enacted would totally change both the present use of building space and planning.

Hinged primarily on the need to release the library to make room for expansion, the recommendations would alter space configurations in Donnelly, Fontaine, and Adrin halls and might possibly affect use of the Champagnat library as well. The committee has suggested that the library be moved to Fontaine Hall where its services could be more easily met. The present office of the comptroller in Finlan should be removed and a new one installed in Donnelly. The area vacated by the library should be used for additional space.

The hope of the committee is to make a decision on the number of outlines of the plan. Perhaps it may be acceptable as is; perhaps certain changes are needed; perhaps the entire plan is out of date. A feedback from the feedback can help the committee. Once the board of directors has been established, the committee will meet with the board. The advisor will meet, with engineering and architectural help prefered. The board will also determine how the plan is to be phased, whether the available capital, engineering feasibility, and

Ward's Words

By Mike Ward

The Presidential election seemed to last a long time. It seemed to send us into a state of confusion and uncertainty. This has been a time of doubt and uncertainty. The country is divided, and it's hard to say what will happen next. But one thing is clear: we need to move forward and work together to build a better future for all Americans.

The election was a reminder of the importance of engaging in the political process. We need to remain vigilant and be active in our communities. It is not enough to simply vote in November; we must also stay informed and participate throughout the year. The issues that affect our lives are complex, and we need to work together to find solutions.

As we look ahead, we must remember that we are stronger together. We need to come together and find common ground. It's time to put aside our differences and work towards a better future for all Americans.

Homeward Bound

Environmental Madness

By Mark

At one time, the college community was made up of students who were environmentally conscious. They were concerned about the impact of their actions on the environment and were committed to making changes that would help protect it. But now, it seems that these values have been forgotten. The college community has become more focused on personal convenience and has lost sight of the bigger picture.

The problem is that we are all connected. What happens in one part of the world can have a direct impact on another. We need to take responsibility for our actions and work together to find solutions. It is time for us to come together and make a commitment to protecting our planet for future generations.

Greenhaven Think Tank

PART OF 1 A 2 PART ARTICLE

From The Third World Alliance

The Greenhaven Think Tank is an alternative to traditional political parties. It is a group of activists who believe that the old political systems are broken and that we need new ways of thinking about politics. The Greenhaven Think Tank is committed to creating a world that is more just, peaceful, and sustainable.

The Think Tank is made up of a diverse group of people from different backgrounds and cultures. They come together to discuss ideas and find ways to make the world a better place. They believe that we can create a new kind of politics that is based on cooperation and unity.

The Greenhaven Think Tank is working on a number of projects. They are currently working on a new political party that will represent the needs of the third world. They are also working on a campaign to bring attention to the issue of climate change and the need for urgent action.

The Greenhaven Think Tank is an organization that is committed to building a better future for all people. They are dedicated to working towards a world that is more equitable, just, and sustainable. They believe that we can create a better world if we work together and stand up for what we believe in.

Latino Challenge

By Ricardo Ramirez

Latino issues are important in today's society. Latinos are a growing population in the United States and their voices are being heard more and more. They are making strides in politics, education, and the workplace.

Latino politicians are playing a significant role in shaping the future of the country. They are making changes that benefit their communities and are working towards a more just and equal society. Latinos are also playing a major role in the labor movement. They are standing up for their rights and demanding fair treatment.

The Latino Challenge is a call to action. It is a call to all Latinos to come together and work towards a better future. It is a call to all people to support the Latino community and stand up for their rights.

For The Judiciary

A Quiet Year

By Michael Harrison

A Quiet Year is a novel that explores the themes of justice and the legal system. It follows the career of a young lawyer who is tasked with defending a wealthy client accused of murder.

The novel is a powerful story that examines the flaws in the legal system and the impact that they have on individuals and society. It raises important questions about justice and the role of the lawyer in society.

The novel is a must-read for anyone interested in the legal system and the issues of justice. It is a thought-provoking and engaging story that will keep you on the edge of your seat.

Film Garbage

Dear People,

It seems that the only thing the movie industry is good at is creating garbage. Every year, we are treated to a parade of films that are lazy, derivative, and unoriginal. The only thing these movies have in common is that they are all terrible.

I was so appalled by the recent movie that I watched that I had to write this letter. It was a movie that I had been looking forward to for months, but it turned out to be a disaster. The acting was wooden, the dialogue was forced, and the plot was a complete mess.

I urge you to avoid these movies at all costs. They are a waste of time and money. Instead, support the filmmakers who are dedicated to creating high-quality, original films. They are the ones who are值得 of our support.

Thank you,

T.W.A. Chairman of the Board

Environmental Madness

By Mark

Environmental issues are becoming more and more important. We need to start thinking about how we can protect our planet and create a sustainable future. It is time for us to come together and take action.

We need to start making changes in our daily lives. We need to be mindful of our consumption and try to reduce our impact on the environment. We need to support businesses that are committed to sustainability and avoid those that are not.

We need to start thinking about how we can protect our planet. This is a challenge that we all need to take seriously. It is time for us to come together and work towards a better future for all people.
Ward's Words

The Presidential election seemed like a long time ago. The campaign, the promises, the mudslinging. Yet it's hard to believe that it was less than a year ago. Considering the incensedness of the last campaign, it's remarkable that the situation has not only remained calm, but has improved. Much has been said and done to alleviate the controversy of that campaign. Whether or not this is true, the results are apparent. Many people are now more informed about the issues and their importance. In a way, this is a victory for the American people. We are a nation of free speech, but we must be careful about using this freedom to spread misinformation.

Environmental Madness

by Beth Mark

At one time, the college campus was covered with wildflowers and native plants. The student union was a small, simple building where students could study and socialize. Today, the campus is covered with concrete and steel. The student union is a large, modern facility that houses a variety of services for students. While some students may appreciate the new building, others long for the old one.

We should not lose sight of the importance of nature in our lives. Nature provides a sense of peace and tranquility, and it is essential for our mental and physical well-being. The college community should work to preserve the natural beauty of our campus.

Greenhaven Think Tank

PART I OF A 2 PART ARTICLE

From the Third World Alliance

The Greenhaven Think Tank is an alternative to traditional private prisons. The Greenhaven Think Tank was founded in response to the social and economic problems that have emerged from the privatization of prisons. The Greenhaven Think Tank is committed to developing alternative strategies for organizing and managing the prison system. The Greenhaven Think Tank believes that the private prison industry is responsible for many of the problems that we face today. The Greenhaven Think Tank is committed to working towards a future where prisons are no longer necessary.

Latino Challenge

by Kevin Lee

The Latino community in America is one of the fastest-growing groups. They are making a significant impact on politics, culture, and society. Latino advocacy groups are working to ensure that their voices are heard. The Latino community is working towards equality and representation.

Film Garbage

by Michael Harrigan

If you're looking for a movie with substance, think again. The average movie these days is a thoughtless and carefree mess. It's time for Hollywood to start producing movies that are actually worth watching.
Varsity Splits

by Juan Campos

Last Wednesday night, the Red Foxes (10-6) buried the "Hawks" of Medford High School (9-7) at Dutchess Community College. The Foxes shot 55 percent from the floor with accurate shooting and a dazzling display of fine passes from the talented hands of Allen "The Bone," Fairhurst and his running mate, Jerry "The Joker," Firestone. In the first half, the Hawks seemed to keep pace with the Red Foxes because of center soft fair, Firestone's fourteen points and nee rebounding, but he ran into real trouble and thereby eliminated the Hawks' only chance of defeating the Red Foxes. The start of the second half, with the score 40-41 in favor of Marist, freshman Horry "Ar-chie" Williams and captain John Dillon began "bounced back." Frank Sydney led the Red Foxes to a 9-1 victory over Medford's leading scorer, Marist was doing everything right, with leads of 33, 43, 48, and 50 points. For Marist it snapped a six-game home winning streak and dropped them out of competition for the league championship. Dillon boosted their league record to 6-3 and were led by Matt Johnson's 20 points.

Despite the loss, Marist showed strong determination and pace for young team. They have good individual personnel and have proven that they can be contenders in the remaining games and in 1974.

Marist Indoor Track Team

The Marist indoor track team made its strongest showing yet in the Collegiate Track and Field meet of the Regional Annual Carnival of the CTCU Saturday at Packer College. The two relay teams placed fourth in the 4x440 yard relay, and were led by Frank Sydney who turned in a strong 2:05.95 clocking. This tied the team record set by Frank Sydney and turned in a time of 1:31.56, Jim McCrosland a 1:31.73, and Terry Whiting a 3:23.04 for the other splits of the race. The 4x110 yard relay team broke the old Marist indoor record with Jim Gillen running a 2:02.9 mile, Matt McGarr and Mike Stanhous running 2:25.0 and John Carbery a 2:25.8 half mile. The one mile relay team featured four runners who had already run during the meet. Three of the times were set in the first hour of their last distance run in the Distance Medley Relay. Therefore the times were not impressive, but still they surpassed the time put in by the mile relay team last week in Albany. Jimmy Weber led off with a 54.4 quarter, followed by Mark Hotrelia with a 59.4 and Brian Weisbach with a 61.1, thus setting a total mile record in 3:23.5. The best performance of the day was turned in by the Distance Medley Relay team which turned out the old Marist record in 11:12.2 with over thirty seconds with their 1:26.2 leg mile. Jimmy Weber led off with a 2:09.5 half which again equaled Marist's old half mile leg record of 4:20.7. Jimmy Weber then ran his quarter mile in 56.6 for a great time, followed by Chris Williams' anchor time of 1:40.7 in the mile. This time by Williams was Marist's fastest indoor mile run in four years and puts him within five seconds of the four-year-old Marist indoor mile record. Williams is a transfer from Kansas State University. The combined team effort placed the teams second in both of their fields of seven teams in the JV Division, including C.W. Post, Montclair, and Central Connecticut State College who placed one, two, and three. Marist was battling for third place throughout the entire race and just missed third place by under ten seconds. It was a true team effort as both two team members turned in by all four runners for a new Marist indoor record. Coach Steve Ferrante let all four members of the Distance Medley Relay take as much as they can handle, and as well as Dufty. Stevens was pleased with the improvement turned in by Matt McGarrill and Jim Gillen during the meet. Frank Sydney and Jim McCrosland turned in good times for the season start and will definitely help the team in the future as they progressively improve. The team has been weak, he noted, in sprint this year.

Marist will be training for next week's upcoming triangular indoor meet with Queens College and Iona to be held at Queens on Saturday, February 24.

Fontaine Openings

For those of you who are as yet undecided as to where you will be living next Fall, Fontaine House is open. Upon receipt of the application by the student, the room will be con-
ducted. These interviews are not meant to discourage anyone from applying but merely to insure that all prospective residents are genuinely interested in contributing to the excitement and atmosphere of the House, i.e., to create a cord pre-
prehensile home suitable for the pursuit of both academic and social endeavors.
We do nothing to be a 'living-learning experience' but as most people are familiar with Fontaine will agree, the House offers a living style unique to the Marist dormitory system.

Applications are available through the Resident Director's office and when completed can be left at room 3323, Fontaine.

Space Planning, from 1 to 2 minimal disruption to the ongoing life of the college. It is the final year of Marist College that sufficient time is permitted for capital construction. In order for the student body's living environment to produce positive feedback is essential, so please direct your opinion to any of the members on the Ad Hoc Com-
mittee.

Hart Makes E.C.A.C. Team

Sophomore basketball star, Mike Hart, was named to the E.C.A.C. Division III Team of the week for his performances at the Bloomfield, Monmouth and Dowling games. Also from Marist was Jerry Firestone who made honorable mention as the Book of the Week.

Hart poured in 62 points and collected 27 rebounds in these games. His highest game was against Bloomfield in which he tallied 35 points and pulled down 12 rebounds. Hart is the Central Atlantic Conference's leading scorer averaging 21.3 points per game. Jerry Firestone's pressure defense and ball-handling in the new Marist gun and run offense gated him the honorable mention recognition. In these games he raised 15 points per game average to the second highest on the team at 18.3.

The Other Team

One of the many reasons for the J.V.'s success - Frank Joe Nebbia.

I wanted to write this article to give credit to a team that has not been given enough recognition - The Jayvee Basketball Team. This team has a combination of hard work, talent, and endure-

ing against some real tough competition. The long hours of conditioning and practice has paid off in some impressive wins over some same chokes like Manahan and Iona. This team is probably the best junior team in Marist history and gives great promise for the future of basketball at Marist.

This well-balanced team is led by leading scorer and rebounder #3 Ray Murphy. Ray is a dedicated player and a true student of the game. He is averaging 14.4 points per game with 13.6 rebounds and is a former Holy Cross high school star. Another former Holy Cross star is #2 Dave Sullivan. Steve is a tough rebounder and has a mean outside shot, currently averaging 8.0 points per game with 5 rebounds. The guard that makes this team go is #21 Joe Nebbia. He is averaging 1.9 points per game and is tied for the lead in steals. Joe comes to Marist from Dan Baker's H.S. in Ramsey, N.J. which has sent former great Joe Scott and Bill Spaulding to Marist. Another smooth guard is #23 Rich Schan, from the North Suburban New York High School. RC is currently averaging 7.7 points per game. Rich is also known for his great defensive work. A solid back to guards is #10 Bucky Kalnikis. Luck is very quick and is regularly in or out of the lineup. He is from East Chester High School where he played ball with varsity for four years. Luck has just started playing this semester but has already contributed much to this team's success. He is a strong rebounder and has the second highest point game average with 13.6. The key player on this frontcourt is rich in talent. #3 Jim Dinscler, a former star at Cardinal Spellman H.S., can hit those boards and score equally well with his high game 18 against King's College. Adding to this bench is #6 transfer student Dave Shaw. Dave came from Palm Beach Junior College in Florida, and will add great strength in the rebounding department. Rounding out the depth is #7 Lou Baas. Lou played at Yonkers H.S., where he played with Ben Goldstein, and can also hit the boards. Finally there is #22 Jim Golden from Aviation H.S. in Brooklyn. Jim has a real nice outside shot.

This team along with the young players on varsity provide a solid framework for basketball in the future. This team has played well and deserves a lot of credit and support on their work and the prestige they have added to the basketball program at Marist.

To give all credit to this team would be a gross injustice to a talented and dedicated man as Coach Masapepe, the brains behind the board, his long hours of working with and for the team has payed off, and he deserves much of the credit and congratulations.

Matmen Defeated

Giving away three weight classes by forfeit, the wrestling team suffered defeat at the hands of Hunter College. 34-0. This has been the second straight 0-3 season for the wrestlers as they have been crippled by the lack of manpower. The winners for Marist were Bob Farrell in the 125 lb. class and the two co-
captains: Jim Laverty at 170 and the Iona class. The 190-pound class. All three wins were by decision.
