Gov’t Vaccinations Available Here

By John Gavigan

The virus which causes influenza continues to plague mankind. The virus mutates every few years, so man cannot build up immunity. In order to prevent a world-wide epidemic, the government has established a “Mass Immunization Program.” The nation’s top scientists and medical authorities encourage everyone to take part.

Melissa Nurse Helen O’Connor says, “The flu immunization consists of two shots, two weeks apart. The side effects are cold-like fever, and sore arm lasting for a few days.”

There is no insurance with the vaccination, but it reduces the possibilities of obtaining the flu, says Nurse O’Connor. She also cautions “anyone who is allergic to eggs, should check with their private physician.”

U.S. Department of Health says, “The national influenza immunization program of 1976 is solidly based on scientific evidence and past experience with the disease. It is designed to protect every individual against a potentially serious threat.”

Temperatures Rising

By Wendy Stark

Resident students, mainly in Champlain and Craig classes, have complained about cold radiators in the dorms on cool nights. These students are awaiting October 15th, the rumored date when heat will be turned on.

Mr. Andrew Pavelko, Physical Plant Director of Marist College, October 15th is only an index. a gauge set by the weather bureau for turning on heat because of the temperature prevailing.” He said if the temperature dropped before October 15th the heat would be turned on before that date.

Pavelko said that the federal government has urged the public to conserve energy. He says that by keeping the centrally controlled heating system thermostat at 68 degrees, Marist is conserving fuel. “The only time when energy can be conserved is in this season when the temperature can drop. If you can’t be in the dead of winter at 68 degrees, and conserve energy.”

Pavelko hopes that students will not complain about the government’s recommendation and wear warmer clothing at night. “I’ve taken the attitude that there are no concentrations to conserve energy, but if I get many complaints I have to give in. We don’t want occupants to get frostbite or frost-bite.”

Unfortunately, the aluminum and glass walls of Champlain and Leo tend to loose heat. “We’ve been putting the heat on when we’ve had serious complaints. Some buildings are colder than they should be, especially the northern sides of Leo and Champlain because they’ve been sheltered.”

Pavelko says Marist is not trying to save money on the students expenses. “We’re not landlords running an apartment house looking to save money; our basic concern is to keep students as comfortable as possible.”

Residents... do not tolerate warm weather during colder weather. “We’ll definitely keep the temperature in winter,” Pavelko. If a student’s room is cold, Pavelko at that time means complain. My office is always open to talk to students.”

New Schedule Proposed

By Cathy Ryan

In September of 1977 a new master time schedule will go into effect. The major change will be regularly scheduled classes on Wednesdays.

There are four schedules being considered which include 60 minute classes held three times a week, and 75 minute classes scheduled twice a week. All models contain two free time slots, one on Tuesday and Thursday.

The proposed schedules all have the same concept, except for the times of the two, five periods, and the classes on Fridays. The class days will still end at the same time, except later on Tuesdays. There is also a 9-11 a.m. time-slot scheduled for Saturdays.

“The schedule is not a disaster, there is concern by all faculties that a new schedule be explored,” said John Dwyer, Registrar. He said that although it would be difficult to design a schedule that would satisfy all people, an attempt is being made to serve as many people as possible.

A committee of faculty, students, members of the Consumer Union and Student Affairs met last spring, and after studying tentative schedules came up with four possibilities. These models were sent out to all department chairman, student groups and program directors. “Presently we’re waiting for more feedback,” Dwyer said.

October 15th there will be a general meeting, at 1:10 p.m. in Donnelly room 206 to explain the schedule and receive any comments.

Under the present schedule, which began in the fall of 1969, 75 minute classes are held twice a week and certain three hour courses are held on Wednesdays. In order to measure the effectiveness of the present schedule, a number of surveys were conducted. According to Dwyer, results showed there’s been an underuse of campus facilities on Wednesdays, and a misuse of extended free periods for expansion of academic and cultural activities.

Dwyer also reported that students from non-traditional areas are not being attracted to once a week classes on Wednesdays. Resident and commuter activities were measured, and found to be the same.

Dwyer said the results of studying class attendance on Wednesdays showed higher absenteeism. Business at Frank’s, on Thursday nights was also observed and the results indicated that the free time students to socialize more.

“As a result of the survey there seemed to be a real need for change,” said Dwyer. So far most departments have expressed interest in it, particularly certain language and skill periods that feel three meetings a week would be better for teaching the material.

“All groups have had adequate time to respond and express any negative feelings, before anything is implemented,” Dwyer said. “If people chose not to respond, it’s unfortunate, because there’s been adequate time and ample opportunity.”

Dwyer said that if the new schedule is implemented, it will be accepted. If it is unacceptable, it will be reconsidered and changed if necessary.

Parking Woes Over

By Phil Colangelo

Cars parked illegally after Tuesday will be given tickets according to Philip McCready, head of security. The fieldhouse parking lot, completed this week, eliminates the parking problem. “The only problem associated with the lot which is adjacent to the Sheahan lot has just been blacktopped last week, and on the first clear day this week lines will be painted,” explained Mr. McCready.

Together the Sheahan and parking lot should be able to accommodate 400-500 cars.

On the north side of campus when the Champlain lot is filled, additional cars can now park in the lot opposite the old swimming pool. This also goes for the art and music, and the library.

Mr. McCready also emphasized the fact that the Donnelly lot is reserved for the faculty, staff and administrators.

“In a short time lights will be erected in the new parking lot. They have been ordered, we just ask you to be patience and a little while longer,” says Mr. McCready.

If everyone obeys, it will not be necessary to write tickets. That’s usually only as a last resort. If you don’t adhere to the rules, if we all make a conscious effort to try the rules the parking situation will be 98 percent improved,” says Mr. McCready.

IBM Grants

$150,000

By Jerry Bichner

Mastin College received a grant from the IBM Corporation. The college was given a check for $50,000 with a promise of $100,000 more from Mr. Louis Neiman, the Vice-President of the System Products Division of IBM.

This grant is part of the Student Capital Campaign Drive, which has a long range goal of $15 million. The money will be used for the new Meadows Recreation Center, made possible by a $1.25 million grant from the McCann Foundation.

Vikings Victorious Over Fairleigh Dickinson, 40-0
College Curriculum To Be Studied

By Jim Herde

Marist College has been joined by the Student Senate, the Board of Trustees, the Academic Senate and the Enrollment Development Committee for the unveiling of Marist's current curriculum. This grant was awarded to Marist by the late Dr. John G. Toomey, a member of the Academic Senate, Public Affairs Committee.

The College's curriculum is designed to provide students with the opportunity for meaningful and challenging study. The Board of Trustees has established a committee to study the curriculum and to make recommendations to the Academic Senate for future curricular changes. The committee is composed of representatives from each of the college's academic departments and is chaired by Dr. John G. Toomey.

Alumni Celebrate

By Maurice Bell

On March 15th, the highlight for last weekend, the annual Alumni Reunion was held in the Marist Sports Complex. The reunion lasted from 3:00 PM to 5:00 PM and was well attended by alumni from all classes. The event was organized by the Alumni Relations Committee and was open to all alumni who had graduated from Marist.

The reunion included a buffet dinner, speeches by current Marist students, a video presentation, and a dance. The evening concluded with a fireworks display over the Marist campus.

Science Majors May Bet B.S.

By Andrew Green

There is a chance for science majors to gain a Bachelor of Science degree (B.S.) in the upcoming academic year. A new program is being developed that allows students to take courses in the sciences that are not currently available to them.

The new program will allow students to take courses in fields such as biology, chemistry, physics, and mathematics. The program will be open to all science majors and will be available starting in the fall semester.

Goal '76 Still Underway

By Fred Hartley

What has become of Goal '76, the program that was supposed to provide new learning resources and improve the overall curriculum? In the words of the goal's chair, Dr. John G. Toomey, "Goal '76 is an important part of our plans to improve the quality of education for all students."

The goal was established with the aim of increasing the number of minorities and women in the sciences and humanities. It was also designed to improve the quality of instruction and to provide more opportunities for students to participate in research.

Key Case Stagnates

By Pat Larkin

"Nothing has changed. I don't see any change of attitude," said the student who was interviewed for the key case.

The student was asked about the current state of the case. "Nothing has changed. I don't see any change of attitude," was the response.

Room Checks

By Sherry Smith

The dormitory is in the process of privatizing the dormitories. The current system of dormitory management is being replaced by a new system that will allow students to check into their rooms and pay for their housing costs online.

The new system will also allow students to communicate with their dormitory staff and to report any issues that arise during their stay. The system is designed to be user-friendly and to provide students with a more convenient way to manage their housing costs.

Constitution Okayed

By Larry Shrago

The student body has approved the new constitution. The constitution includes a number of changes that were recommended by the Student Senate and the Academic Senate.

The new constitution includes provisions that were not included in the original constitution. These provisions include the right to freedom of speech and the right to a fair trial. The new constitution also includes provisions that were recommended by the Student Senate and the Academic Senate.
Alumni Celebrate

By Maurice Tully

Coming home on last weekend, we had an opportunity to say hello to friends and to see the campus. As a result, we decided to hold our own alumni social event on Saturday evening. The event was held at the Marmot Inn and was well attended by alumni.

Science Majors May Bet B.S.

By Glenn Wind

B.S. degrees in science are becoming more popular among students. However, many students are uncertain about the future of their degrees. According to a recent survey, 70% of science majors believe their degrees will not lead to well-paying jobs.

Inter-House Council Elected

By Pat Larkin

The Inter-House Council is an organization that unites the four houses in the community. The council is elected by the students and is responsible for organizing events and activities.

Key Case Stagnates

By Pat Larkin

The case of the missing student has been delayed due to a lack of evidence. The police are still searching for the student and have not released any new information.

Room Checks

By Sherry Smith

A new system for room checks has been implemented to ensure the security of the students' belongings. The system involves checking each room regularly to prevent theft.

Constitution Okayed

By Larry Strigel

The constitution of the student government has been approved by the board. The constitution outlines the responsibilities and duties of each position in the student government.

Room Checks

By Sherry Smith

The new system for room checks has been implemented to ensure the security of the students' belongings. The system involves checking each room regularly to prevent theft.

WMCR To Begin Broadcasts

By Phil Colgan

The campus radio station will be starting broadcasts soon. The station will be broadcasting music and news to the campus.

College Curriculum To Be Studied

By Jim Hirdes

The college has received funding to study its curriculum. The study will be conducted by an external consultant to ensure objectivity.

Alumni Social

By Maurice Tully

On Saturday evening, the alumni social event took place at the Marmot Inn. The event was well attended by alumni and was a great opportunity to reconnect with old friends.

Editorial: It's All About Time... What Do You Want?

The Circle editors think it's ironic that only two years after the implementation of the proposed schedule, a "too much time" schedule is being considered for the Fall '77 semester. The fact that the two proposals are virtually indistinguishable is the only slight difference. What is different is how the ideas are presented to the students.

In fact, since the proposal was first presented to the students, several arguments have been presented in favor of the "too much time" schedule. Among these arguments are:

1. It allows for more time to be spent on the individual's major areas of interest.
2. It provides a more flexible schedule, allowing students to take more credit hours in one semester.
3. It reduces the amount of time spent in class, giving students more time to work or study.

However, the proposal also has its critics, who argue that:

1. It could lead to a decline in academic standards, as students would have to spend less time in class.
2. It could lead to a decrease in student participation, as students might be less motivated to attend classes.
3. It could lead to a increase in the number of dropouts, as students might be less motivated to continue their studies.

In conclusion, the "too much time" schedule is a proposal that has both its supporters and its critics. It is up to the students to decide which proposal they prefer.

$low T.A.P.$

By Charles Yates

Dale Roberts, associate director of the computer science department, is planning to develop a new system to help students with their coursework. The new system, called "T.A.P.," stands for Time Analysis Program. It is designed to help students manage their time more effectively and avoid procrastination.

T.A.P. is currently under development and is expected to be ready for the Fall '77 semester. The system will allow students to input their daily activities and track their time usage. It will also provide recommendations for time management and suggest ways to improve productivity.

"Our goal is to help students make the most of their time," said Dale Roberts. "We want to help them avoid wasting time on non-productive activities and focus on the important tasks."
Editorial:
It's All About You... What Do You Want?
The CIRCLE editors think it is ironic that two years after the implementation of the present school schedule, a "new" master time table is even considered for the Fall '76 semester. The fact that the present one was just adopted barely eighteen months ago is of little relevance in the discussion. What is even more ironic is the discussion's lack of real significance. With a few exceptions, most student voices were contrary to the new plan, but in terms of the situation at hand... I believe that all students will agree, that any improvement in the educational atmosphere should be tested at Marcy High School before anywhere else. The number of students involved is appreciably greater than approximately 400 in each school, and the situation is more complex in the educational atmosphere. What is more, the educational system is based on the assumption that a greater number of students will be affected if any changes are made. The situation is that the students, who currently receive no money from the School, want to extend their work, and the students who want to benefit from any change in the educational atmosphere should be tested there. I feel that this is a legitimate issue, and that the students, who currently receive no money from the School, should be the ones to benefit from any change in the educational atmosphere. 

$low T.A.P.
By Charles Yates

"Another year has passed, and we now find ourselves in the midst of the annual salary negotiation process. This year, with the economy in a state of flux, the negotiations have become more complex and challenging. The School Administration and the Teachers' Association have presented different proposals, and the negotiations have reached a stalemate. The School Administration has offered a two-year contract with raises based on a point system. The Teachers' Association has a three-year contract with raises based on a percentile system. The negotiations will continue until a resolution is reached.

Mosaic Together
By Suzanne Bruce

The Mosaic, a campus literary magazine, was founded in 1971 by Marcy High School students. It is a magazine that is devoted to the creative works of students and teachers. The magazine has been in existence for 50 years and has published numerous works of fiction, poetry, and essays. The Mosaic has been recognized for its high-quality, innovative, and thought-provoking content. In addition, the Mosaic has been a platform for students to express their creative ideas and to showcase their talents.

Tracy's Girls
By Beverly Smith

"My whole family loves this show and we have a great time watching it. It is a great show that has something for everyone. We love the characters and their adventures. We also love the music and the way the show is put together. We highly recommend it to everyone. It is a great show that everyone should watch."
Career Classes
By Lisa McFarland
"It's a start on the road to get a job," said Warren Green, an intern in the career counseling office, about the class sponsored by that office. "Some people have problems starting over, and this class gives them an outlet and somewhere to turn to for support."

The purpose of the class is to help students who are beginning to look for work. The counseling office provided the class with a series of exercises designed to help students learn about themselves. The exercises included how to arrange to take a college placement test, and how to write a resume.

Several students were interviewed about their participation. Warren Green and another intern, who were both interviewed, said they found the class to be helpful.

"They're very informal," said Green, "we present the information and try to do the best for them wherever we can."

There is a limit of 15 students per class, but as of the time this was written, only 4 students had signed up for the class. The class met every Monday through Wednesday at 1 p.m. in the career counseling office.

Parent Weekend Set
By Adrienne Howard
Parents weekend is scheduled to begin on Friday, November 13. The weekend includes activities such as lunch, tours of the campus, and a special presentation for parents. Parents are also invited to participate in various activities on campus. The weekend ends on Sunday, November 15 at 1 p.m. The presenters are to be announced.

Booters Beats Kings, Fairf ield

By TOM MCTERNAN

Marist goalie Jay Metzer recorded three assists and Zenene Naltiz continued his scoring spree as the Red Foxes booted the Bulldogs 3-0 in the first game of the two-match week last week.

Last Wednesday, Marist trounced Kings 5-0 in their CACC home opener. The result is enough to put the largest crowds ever to witness a soccer game here. The Red Foxes defeated the Bulldogs with 5-0 scores. The same result was achieved on Saturday with a 5-0 score.

University of Massachusetts Amherst Homecoming Weekend.

"Psychologically, states are very vulnerable," said coach "Doc" Goldman, whose team has balanced the scales of a sustainable offense and defense. "We know that, they're vulnerable to us, and they're vulnerable to us."

Zenene Naltiz, a 35-goal scorer in 1975, tallied a goal in each game and has scored nine goals in the four games this year. Metzer, who scored the first goal of the second half with a 1:4 lead, has Spark 8.0 goals against average along with the three shutouts.

The Red Foxes have outlasted their opponents 13-2 for this season, and Metzer was never really challenged until late in the second half. The Bulldogs, who were outscored 5-0 on penalty kicks, led the Bulldogs 2:0 in that span, but the Red Foxes took over in the second half and Metzer later set up Firmino for the final score.

On Saturday, Marist scored both of its goals in the first half, but Goldman had a poor start with their overall play in the period.

"We are not playing the kind of soccer I expected," he said.

Zenene scored both goals, the first on a 1:4 lead, but Goldman said he was not doing the kind of soccer he expected. "I think we didn't play the way I expected," he said.

That was the only goal the Red Foxes had that the Bulldogs couldn't score on, but Goldman said he was not doing the kind of soccer he expected.

Marist was outplayed by Fairfield. 3-0 in the game.
