Drug use smolders among Marist students

by Molly Ward

Editor’s note: The names of the students interviewed in this story have been changed or omitted.

When Chris Spencer came to Marist to continue his education, he was also continuing something else—a cocaine habit that began in high school.

“Having cocaine was the drug of choice,” he said. “Here it wasn’t as popular, but I knew about five or six people who did it in once in a while.”

Now an upperclassman, Chris no longer uses cocaine or any other illegal drug. “Initially it got too expensive and then after a while I didn’t feel the urge to do it; too many people get out of hand with it,” he said.

While most students interviewed agreed that alcohol is the most prevalent drug at Marist, they said illegal drugs, especially marijuana, and to a lesser degree, acid, cocaine, and mescaline, are used by Marist students.

Although the number of students who use drugs cannot be accurately determined, students themselves suspect it’s a considerable percentage.

Among 30 students asked, most estimated the percentage of students who use illegal drugs is 25 to 35 percent. Eight students said they smoke marijuana and one admitted using mescaline.

Those students who use drugs said they get them on campus from other students, and some said they went off campus to the Main Mall of Poughkeepsie and New York City.

“It seems pretty easy to get on campus,” one junior said. “The harder stuff is probably gotten off campus.”

According to a study by the U.S. Department of Health and Human Services, drug use by college students decreased between 1986 and 1988.

Some 37 percent of college students polled said they had used marijuana, down from 41 percent in 1986. Cocaine use decreased from 17 percent to 13.7 percent, according to the poll.

In the five years he has been at Marist, Steve Sanseau, the director of housing and residence life, said he believes there has been a downward trend in drug use.

“Education has a lot to do with that,” he said. “Students are more

Special athletes score big points with student help

by Julie Callahan

Playing soccer and softball are lots of fun for many people, but Marist students found a new meaning for sports when they coached, supported and cheered at Special Olympics athletes Saturday.

About 70 Marist students arrived at the New York State Special Olympics in Saugerties, at 8 a.m. Saturday morning. Waking up at 6 a.m. was worth the appreciation and excitement they received from both athletes and organizers.

“We would be nothing today without the volunteers from Marist,” said Bernie Carle, host director of the Special Olympics. “Marist really came through in a pinch.”

At 11 a.m., three soccer fields and four softball fields came alive with athletes, coaches and students kicking, throwing and catching balls. On other fields individual competitions for soccer and softball skills took place, and students forgot about their lack of sleep Friday night.

Tau Kappa Epsilon Fraternity members made up almost half of the Marist population at the games. Bob Carino and Brendan McDonald, both juniors and TKE members, were looking forward to the day and found it to be everything they expected and more.

“I was expecting to have fun, but not this much,” said Carino, 20, from Hyde Park, N.Y., between cheers for the athletes that he and his partner, McDonald, had coached in the morning.

McDonald, 22, from Bettel, Conn., has volunteered for Special Olympics in the past and knew he’d enjoy it, but said he was lucky to get such a fun group of athletes.

McDonald and Carino escorted a group of five athletes to the softball competition in fielding, throwing and base running. High fives, thumbs up and hugs followed each run around the bases.

On the soccer field, the competition got very hot as players and coaches cheered and yelled out plays.

Abortion advocates, foes rally
Molly Yard main speaker at pro-choice march

By Kelly Woods
Pro-choice activists called for a rally on Sunday to educate and encourage the public in participating in the pro-choice movement.

"The doomsday scenario is not at all what we're talking about," said Yard. "We're talking about a woman's right to choose.

As her speech came to an end, the crowd cheered. "We're back," Yard said. "We're right. Our voices are not to be silenced.

Many of the demonstrators were opposed to the government's interference in the medical decisions of pregnant women.

At the end of the rally, Yard said, "We're a strong group of people who are ready to stand up and fight for our rights."

Sunny skies shine above Marist’s “Brighton Beach”

Now, if you tell me that I would not be in Florida or some other winter-warm wintering hole on Saturday night, the answer would be yes. But I would be in the Marist Theatre Department. This year, there’s been a change for me and you, as well. We would be in the Marist Theatre Department. The main event is that, for the first time since I’ve been here, Marist students have produced a full-length play. It’s a remarkable achievement, particularly given the challenges of producing a play in a time when the world is still reeling from the effects of the COVID-19 pandemic. But the students have managed to pull it off, and the results are impressive.

The play is “Brighton Beach,” a classic American play by Neil Simon. It’s the story of a family living in Brighton Beach, Brooklyn, in the 1930s. The main character is Eugene Jerome (played by Methuselah Bingham), a young man who is struggling to find his place in the world. His family is his only support, and he is forced to take care of his sick mother and younger sister. But Eugene’s life changes when he falls in love with an older woman, and he must decide whether to follow his heart or stay with his family.

“Brighton Beach” is a play about family, love, and the struggles of growing up. It’s a story that resonates with people of all ages and backgrounds. The Marist Theatre Department has done a fantastic job of bringing this story to life, and I highly recommend seeing it if you have the chance.

Ed McGarry

This is a known fact that...

Sunny skies shine above Marist’s “Brighton Beach"

Now, if you didn’t think that I would not be in Illinois or Ohio after wanting both on Saturday night, then I think I would be in the Marist Theatre on Thursday night, where I have known you. Well, there’s no reason to think otherwise since the movie no longer exists. In fact, if you missed it there might still be a white screen available for the movie. I guess you can say that we always have a great performance.

Jack Jarrin, played by Ed Boudreau, speaks with his son, Nestor, played by John Furey, in the Marist College Council on Theatre Arts production of “Brighton Beach Memoirs” in the theater box seat.

Drugs

Cautions from page 3

"I am aware today of the dangers of drugs!"

Last year six students were caught with illegal drugs on campus. Community Director Dr. James Lawrence said that the circumstances were not the same as those. For the students who were caught, face of getting caught doesn’t seem to be a concern.

"I have no idea what I am doing," said Jarrin. "I was only thinking of my own problems."

Students who do not use drugs are busy with their own studies, while those who do are busy with their own problems. It is not easy to escape the temptation of using drugs.

"I have never really considered my problem to be a matter of a problem at all," said Lawrence. "I am sure, however, that there is a problem, particularly with one of my friends."

"I have one friend who gets high all the time and sleeps a lot of the time."

"If I am in a bad mood, I want to escape from my problems," she said. "And I think that is why I used drugs."

"The student who uses drugs is a place for students who have problems with drugs to speak in a professional manner."

Barbara Filer, who has been a counselor at Marist for ten years, said fewer than 10 students have admitted to her the use of illegal drugs. However, she said that the problem of using illegal drugs is much greater.

"I believe that the problem of using illegal drugs is much greater than what we are aware of," she said. "I think that the problem is much more than what we are"
A matter of honor

As the Science of Mass curriculum, the college’s staff filled in the program, which is a new one-time course credit that will provide students with an international experience since the Science of Mass is a required course for all students.

Meanwhile, this year’s freshman class was the third to enter Marist without the necessity to attend an honors program since the Science of Mass was folded.

As the Academic Affairs Committee studies proposals for a replacement honors program, one of which was submitted early last year, increasing numbers of students have decided to attend a new and better honors program.

But some students who are at a higher academic level than their counterparts in the honors curriculum do not feel that they have the potential to just as the college prepares itself for a review of its accreditation, the importance of an honors program should be a priority.

Letters to The Circle

Racism Response

Editor:
I am writing this letter because I am a student at Marist College and I was present at The Circle on the day of the incident. I feel that it is important to address this issue and share my thoughts on the matter.

The incident occurred during a conversation about the connection between race and privilege. As a student at Marist College, I feel that it is important to address this issue and share my thoughts on the matter.

The student who was the target of the racist attack has expressed that she feels that the incident was not only a personal attack but also a reflection of the broader issue of racism on campus.

I believe that it is important for Marist College to take a strong stance against racism and to take concrete steps to address the issue. This includes providing resources and support for students who may be feeling marginalized or discriminated against.

I am hopeful that Marist College will take this incident as an opportunity to work towards a more inclusive and welcoming campus community.

Soviet leader shows U.S. how things should be done

Winston Churchill once described the Soviet Union as "a riddle wrapped in a mystery inside a mystery." The Soviet Union was ruled by Joseph Stalin, a leader who was known for his brutal policies and his suppression of dissent. Churchill’s description accurately reflects the complexity of the Soviet Union during the Cold War.

Much has changed since then, but in some ways, the Soviet Union still exists today. The legacy of Joseph Stalin and his policies continues to influence the world, and the history of the Soviet Union is still being written.

Corrections

Editor:
In last week’s Circle, an error occurred when we reported that “The College of the City” was a part of Marist College. We apologize for the error and have made the necessary corrections.

The SGA is a student organization that represents the students of Marist College. The SGA is responsible for a wide range of activities, including hosting events and representing the interests of students to the college administration.

Aircraft are not often associated with the world of fashion. However, the trend of using aircraft as inspiration for clothing and accessories has been growing in recent years. The relationship between aviation and fashion is multifaceted and has roots in the early history of aviation.

Aircraft are often featured in fashion campaigns and runway shows, as well as in advertising and editorial shoots. The use of aircraft in fashion can be seen in the design of clothing, accessories, and even the setting of a shoot.

Musical copyrights detract from the way oldies should be heard

Kieran Fagan

In the last few years, the popularity of classic rock has been on the rise. The genre, which was once dismissed as “oldies,” has now become a mainstream and popular force in the music world.

However, the rise in popularity of classic rock has also led to some challenges. One of the biggest challenges is the issue of copyright.

The issue of copyright is a significant problem for classic rock artists. The original songs from the 1960s and 1970s are still under copyright, meaning that they cannot be performed or played without permission from the copyright holders.

The copyright system was designed to protect the rights of artists and songwriters, ensuring that they receive fair compensation for their work. However, the system also has the unintended consequence of limiting the availability of classic rock music.

In many cases, classic rock songs are not available for commercial use or for use in public performances. This has led to a growing number of complaints from classic rock fans who feel that they are unable to enjoy their favorite songs.

There are some solutions that could help to address this issue. One potential solution is to seek permission from the copyright holders to use the songs. This would allow classic rock artists to continue to perform and play the music they love, while also respecting the rights of the copyright holders.

Another potential solution is to create a new system for handling copyright issues. This could involve creating a special category for classic rock songs, allowing them to be used in a more flexible and accessible way.

It’s important to remember that copyright is a complex and multi-layered issue, and finding a solution that works for everyone is not easy. But with continued effort and innovation, we can find a way to ensure that classic rock remains a beloved and accessible part of our musical landscape.

In your ear

Kieran Fagan is The Circle’s music columnist.
Letters to The Circle

Racism Response

I am a student at the University of Chicago, a school that prides itself on its diversity and inclusivity. However, recent events have highlighted the need for deeper reflection and action on issues of racism and discrimination.

The recent incident on campus involving a group of students perpetrating racist comments has caused widespread outrage and alarm. As a student, I feel it is crucial to address these issues head-on.

Racism is not just a matter of individual behavior; it is a systemic issue deeply ingrained in societal structures, institutions, and culture. We must work together to dismantle these structures and create a more equitable and inclusive environment.

This is not just about changing individual attitudes; it requires systemic change. We need to challenge and educate ourselves, our peers, and our institutions about the ways in which racism manifests and how we can disrupt it.

As students, we have the power to make a difference. We can start by examining our own actions and beliefs, and actively working to create a more inclusive community.

Sincerely,
[Your Name]

Singers to converge for Eastern Europe tour

by Julie Callahan

"...Dr. R. Frommelt has agreed to bring a large group of students to the United States this summer for a five-week tour of the United States and Canada..."

As the Maritime College of Louisiana prepares for the 1989-90 academic year, it has already announced a number of plans for next fall. One of these plans includes a tour of Eastern Europe by the university's new choir, the Maritime College Singers. The choir, which is under the direction of Dr. R. Frommelt, will be traveling to Eastern Europe later this year to perform at various venues throughout the region.

The choir is comprised of students from various disciplines across the university, including music, history, and languages. The tour will provide an opportunity for the students to experience different cultures and gain a deeper understanding of Eastern European history and society.

Under the direction of Dr. Frommelt, the choir will study the music of various Eastern European countries and will perform a variety of classical and contemporary pieces. The choir will also have the opportunity to collaborate with local musicians and ensembles, further enriching their musical experience.

The Maritime College Singers' tour is expected to be a huge success, and the university is excited to see how the students will react to their experiences abroad. This is a great opportunity for them to expand their horizons and gain valuable insights into different cultures and traditions.

New faculty offer the 'real world' to Marist

by Ted Shepardson

The Maritime College of Louisiana is pleased to announce the arrival of two new faculty members in the fall of 1989. These faculty members, Dr. Robert D. Frommelt and Dr. Linda Callahan, will bring a wealth of experience and knowledge to the Maritime College community.

Dr. Frommelt is a renowned expert in the field of marine affairs and has extensive experience in the maritime industry. He will be teaching courses related to maritime law and policy. Dr. Callahan, on the other hand, is a talented musician and will be teaching music courses.

The addition of these two faculty members will undoubtedly enhance the educational experience for our students. We are excited to welcome them to the Maritime College family and look forward to their contributions to our community.

Our Midas Touch

Thursday, November 22

Dr. Frommelt received his B.A. from the University of New Orleans and his M.A. and Ph.D. from Tulane University. He has taught at several universities, including the University of New Orleans, Loyola University, and Tulane University. His research interests include international relations, international law, and security studies.

His work has been published in numerous journals and he has presented papers at conferences around the world. Dr. Frommelt is a respected scholar in the field of international relations and his contributions to the field have been widely recognized.

Dubbing his new role as Dean of Social and Behavioral Sciences, Dr. Frommelt is looking forward to his new responsibilities. He is excited to work with the faculty and staff to develop innovative programs and initiatives that will benefit our students.

The addition of Dr. Frommelt to the Maritime College community is a significant milestone. We are excited to have him on our team and look forward to his contributions to the university.

I hope this information is helpful to you. If you have any additional questions, please don't hesitate to contact me.

Best regards,

"Great American musical numbers and marvels always comes at a chance for audience"
Gridders sunk by Coast Guard

by Mike O'Farrell

Two of the best defenses in Division III got together last week and what resulted was a combined 730 yards of total offense. The United States Coast Guard Academy visited Lehigh Field last Saturday and handed the Red Foss a 35-14 loss — their worst defeat of the 1989 campaign — dropping them to 3-2-1. The Red Foss will take on RPI Saturday at Leodolf Field and will be looking to avenge last year's 40-0 loss at the hands of the Engineers.

Saturday's game will also be the last home contest of the year for Marist and will feature a ceremony before the game. The seniors on the Red Foss squad — Steven Merenda, Chris Douglass, Curtis Bailey, Dan McDiarmid, Pat Norman, Pat Kerr, Brian Podolsky, Mike Conforti and Stephen LoCicero — will be honored before they play in their last home game as players at Marist.

Last Saturday, Coast Guard brought a high-powered wishbone offense and a strong defense to defeat Marist 35-14.

Coach Ricketty said his team may have lost any time in putting points on the board either. After recovering the opening kick off, the Bears' Dave Brown took a pitch from quarterback Rick Horner and scrambled 72 yards up the right sideline to put Coast Guard up 6-0 after just 15 seconds. The point after attempt failed. However, the Red Foss refused to back down.

After Doug Sanders returned the ensuing kickoff 85 yards, Marist quarterback Dan O'Donnell found an open Steve LoCicero streaking up the left sideline for a 38-yard touchdown reception. LoCicero was able to sustain his concentration and haul in the catch even though he was being tipped by Coast Guard at the last second. The kick failed, and just 39 seconds into the game, the score was tied 6-6.

Coach Rickerty said he was pleased with the way the offensive unit responded after Coast Guard was able to get on the board so quickly.

"The offense came out real well," he said. "They did a great job after (Coast Guard's) quick score.

Coast Guard refused to be discouraged after the Red Foss quick comeback — the wishbone offense went to work and Marist was unable to stop it.

Fullback Michael Murphy carried most of the load for the Bears on both offense and defense carrying the ball seven times for 40 yards — including a 5-yard poindown run where Murphy blocked the drive to give the Bears a 12-6 lead. Coast Guard made it 14-6 when Horner was successful on his two-point conversion run. Once again, Marist refused to back down.

The Red Foss moved the ball 40 yards in 4:30 minutes before losing possession on downs.

On the first play of their third possession, Horner cumbled out of bounds for 66 yards, putting the Bears in scoring territory again. Two plays later, Murphy scored his second touchdown of the day to put the visitors up 20-6.

Marist then took over and the defense continued to perform extremely well. It took the Foss only 4 play — three passes — to go 67 yards and cut the lead to 20-12.

LoCicero scored his second touchdown of the day when he hauled in a 40-yard strike from O'Donnell. O'Donnell then found Walter Cook in the endzone for the score 20-14 in favor of the Bears. Ironically, neither team could amount any offense for the rest of the half.

Marist had one solid chance, though, when Thomas Cymes recovered a Coast Guard fumble.

Marist's Scott DeFalen (40) carries the ball for the Red Foss as Mike Corsetti (81) blocks upfield to block. Corsetti is one of the nine seniors to be honored at Saturday's final home game.

**Getting America's team on winning track**

What is wrong with America's team?
The management down in Texas seems to know what it's doing but it needs a new marketing department.
The beginning of the season saw first-year coach Jimmy Johnson bring an exciting attitude to the Dallas Cowboys. Now most fans are just looking for an exciting game from the 5-0-1989 team.

It is too bad that Johnson is coaching like he was when he was back at the University of Miami. This is the pros, Jimmy — you have to utilize all the talent to best of your ability.

It appears that Johnson is waiting for number-one-quarterback Troy Aikman to come back to the fold so he can trade Steve Walsh.

And, boy, Jimmy, don't you remember what a Heisman Trophy was?

When one of the players on your team has earned that award — use him!

You've made a lot of moves down there that could be good for the team in the long run — but it doesn't look like the public relations department is keeping up with you.

You have probably figured out by now that I will be bringing up the Heirachal Walker trade — right out for you.

At the beginning of the year Johnson explained the idea behind having two prime quarterbacks — both Aikman and Walsh — on the team at the same time. The way he figured it, since there are no one quarterback looks coming out of college in the next couple of years, why not give him both — up trade value that is. If the champion keeps Walsh in stock for a while, they can make a mint from him.

It seems that is what the Cowboys have in mind for Walker from the start. They have a great player that could do everything — run, block and receive — and they traded him for twelve players. (Although some of the draft choices of the draft are conditional, we will take them for granted here.)

OK, so Johnson is building the team the way he wants it, he is off to a good start. But if he keeps trading all the stars in deals like the Walker one, what will be left with him?

Not only will he not have any good players left, but he will also have more players than the roster can hold — thus forcing him to make cuts and waste the trades.

Also, if he keeps dealing players for draft picks down the road, how long does he expect the Cowboys fans to put up with him.

Tom Landry was honest about his rebuilding of the team and told people he was on a three-year plan. He was canned after the second.

To Johnson's credit, you don't rebound from a 3-13 season over night — but you should rebound before the next year or the next time the Yankees win a pennant, a championship.

Johnson had been a collegiate coach exclusively before going to Dallas. That had many folks wondering if he could handle the job of being an NFL boss.

His squad provided an impressive preseason and that seem ed to quiet the critics. Now — in the regular season — he is 0-6, earning the unique distinction of leading the Cowboys to their worst start since 1966.

You say you are in charge and can hack the NFL. Jimmy. How long do we have to wait for you to bring America's team back up?

There is not much more you can say about Winky Grezka the other.

The guy enters the NFL, begins a press campaign, gets own deal, and surprises. Gordy Howe's career scoring record — amazing.

Cano's record for single season accomplishments — how about Don Yaz' single-season record for single-season record.

Marist currently has three key players out of the starting line-up for medical reasons.

Sophomore Phil O'Hara left the St. Francis game with a twisted ankle. He joined leading scorer Shawn Scott — who left the first two games after being out for games last week's Head of the Connecticut Regatta. Marist finished sixth in the 23-team field.

Booters over .500 for first time since mid-Sept.

by Chris Shea

For the first time since mid-September, a Buffalo soccer team is over the .500 mark.

Last Friday the Red Foss rolled easily over St. Francis (Pa.) by the count of 3-0 to move their overall record to 5-1-2.

Mark Edwards led the charge with two goals in a team that has been on a tear lately with seven points — three goals and one assist — in the last four games.

Rich Kane rounded out the scoring for Marist with his first goal of the year, Greg Healy, Tim Flininger and Eric Ron each had an assist. Coach Howard Goldman was impressed with his team's play, however he downplayed the recent success.

"We played well, but this game was not a true test," he said. "St. Francis is struggling right now. They're trying to build for the future. I can't worry about what will happen the last three or four games, we'll just take it one game at a time.

The Red Foss will have to keep their "one game at a time" when considering the rest of the schedule.

Included in the schedule are the University of Hartford and Central Connecticut State University — two of the top teams in New England.

Marist also has games at Hobart University — 4-1 lifetime versus the Red Foss — and against Long Island University — a sure bet to make the Northeast Conference playoffs.

Goldsman said he is also worried about the timing of his team's schedule.

"Two games in a week is a lot for a soccer team," he said. "Add to that the fact of mid-year being being the end of the week's game player's minds. And then there's exams.

Marist currently has three key players out of the starting line-up for medical reasons.

Sophomore Phil O'Hara left the St. Francis game with a twisted ankle. He joined leading scorer Shawn Scott — who left the first two games after being out for games last week's Head of the Connecticut Regatta. Marist finished sixth in the 23-team field.

Both have strained knees and are out indefinitely.

The Red Foss would just like to
