Post editor highlights TV conference

by Julie Cullman

Professional members of the media community addressed the issue of "Info-tainment and the News" at a day-long Radio-Television News Directors Association (RTNDA)/Marist Advisory Council conference Saturday in the Campus Center.

A panel discussion began the conference at 10 a.m. followed by a luncheon featuring Jerry Nachman, editor of the New York Post, as the keynote speaker. Adult student Anthony Rhexhore received the student essay award of $300 for an essay contest on "Info-tainment and the News." Later in the afternoon mock interviews established what is and isn't advised for job interviews.

During a panel discussion of the tube's impact on industries, the pros and cons of technological advances affecting the news process was addressed by representatives from WTZA-TV, WABC radio, U.S. Cablevision, Newsday (N.Y.) and "Inside Edition."

The news business has become a profitable business for banks and investors rather than a service to the public, said Ed Lowe, columnist for Newsday (N.Y.) and 1967 graduate of Marist. Since the media has used gimmickery, simulation, the potential for lying, and a general rise to society, is there, he said.

"I can't tell my kids that something they see on the TV news is true," said Lowe. "I guarantee it is damaging. I'm very frightened of what will happen when we let the market dictate reality."

But Kathy Maloney, news director of WABC and John Tomlin, TV Producer of "Inside Edition," agree that as long as the public wants radio and television it will be here.

"I don't think we're (the media) morons," said Maloney. "Most of the available technology will enhance the media rather than hold us back. I really don't think we can stifle technology."

Tomlin said he believed there wasn't anything wrong with simulation as long as the truth is told, and the public won't accept such tabloid television as the "Morton Downey Jr. Show."

Tomlin also accused those critical of the trend toward tabloid media of not giving the audience enough credit.

In his keynote address, Nachman spoke not only on the subject of "info-tainment" but also on education and preparation for careers in the media.

Nachman had three tips for students: "One: read everything, two: read everything, three: read everything."

By reading students will learn "stuff" which is the main ingredient necessary to become a journalist. Stuff, Nachman defined, are the less thought-of names and definitions that are imperative to articulate journalists, he said.

Nachman urged students to Continued on page 5

Circle vet wins award, gives advice

by Maureen Kramer

The man credited with starting The Circle, Edith Lowe, was honored with this year's Marist Alumni Award at the Radio and Television News Directors Association conference held Saturday in the Campus Center.

Lowe, who has been a columnist since 1977, and who currently writes for Newsweek, doubled his writing abilities when he graduated from Marist in 1967.

"Although the reputation of The Circle often died in only one year and wrote for The Circle for two years, I couldn't see myself as a journalist when I graduated from Marist. I wanted to write, but I knew nothing about it," he said. After graduation Lowe went on to be a teacher, still holding onto his eagerness to be a writer.

"The dream just stayed, it drove me more than I drove it," Lowe said.

Through a series of events that he could not have foreseen, his dream came true when he finally met the challenge of becoming a professional writer.

Because journalism is such a highly competitive field, to Continued on page 5

Students give mmo system mixed review

by Maureen Kerr

Imagine this. At 10 a.m., a sleepy-eyed Marist student stumbled into the Marist Computer Center to complete her 10-page marketing and research paper.

Tirelessly typing her conclusion, she is suddenly distracted by an alien message appearing in a small white box at the top of her screen.

"Hey you bodacious looking babos. What are you doing tonight?"

Startled and perplexed, she cautiously glances around the room in search of the unknown.

"Where did this message come from, and who sent it?"

She represents a growing number of Marist students, who were unexpectedly introduced to a new function in the MUSIC software system called TELLS. TELLS, command, which scans a line of mainframe users in Donnelly, Marian and Champagne Halls to communicate Continued on page 2

Vandals trash dorm computers

by Jennifer Becker

Two computer terminals were removed from Champagne Hall due to vandalism only weeks after their installation.

According to Karen Flowers, manager of the Information Center, a total of four terminals were damaged, but only two of them were able to be repaired. Computers on the fifth and ninth floors could not be salvaged.

"There are no suspects yet, Flowers said. Vandals not replaced unless extra computers are found, she said.

Terminals will be removed, and a sign, informing students that the vandalism was due to vandalism, will take their place.

"Hopefully this will encourage students to report any vandalism to Security," Flowers said. "Otherwise, there is a chance that there will potentially be no computers left for the students to use."

One of the machines was damaged with ink while the keys of the other were ripped from the keyboard, Flowers said. Students said she is not sure if the damage was intentional, but it is likely the computers were destroyed by vandals.

"Originally, we were planning on adding new machines, such as P.C.'s, hooked to the mainframe," Flowers said. "This incident proves that the students aren't going to be responsible."

Computers, located in dorm study lounges, are not monitored, but neither is the Donnelly computer facility. Students have access to the Donnelly computers after the supervisors leave, and there have been no reports of vandalism.

Supreme Court Justice Sandra Day O’Connor will speak in Phoenix to promote prevention programs for teen tobacco use at 10 a.m. today at the Phoenix Convention Center.

O’Connor will arrive at the Barringer Grand Hyatt Phoenix (hotel area, second floor) to address students and parents about controlling teen tobacco use.

High Court justice scheduled to appear by Bill Johnson

Supreme Court Justice Sandra Day O’Connor will speak in Phoenix to promote prevention programs for teen tobacco use at 10 a.m. today at the Phoenix Convention Center.

O’Connor will arrive at the Barringer Grand Hyatt Phoenix (hotel area, second floor) to address students and parents about controlling teen tobacco use.

Phoenix police said John DeKelaita also said security measures will be in place to keep the teens from disrupting the proceedings, but "we are not a no-show justice," he added.

O’Connor’s appearance is in response to a suggestion by Justice Antonin Scalia, whose appearance is scheduled for the Bar Association of Arizona’s 100 Years of Law Opening.

Several Maricopa students will serve as hosts for O’Connor, who will be joined by the Justice Antia, premier justice and young professionals in the field.

A reception at the Arizona Club, 177 Church St., will follow the event. Tickets for the reception are available for $75.
**Dissoned sheds light on China killing**

by Amelie Llana

Would you attend a college if you had to go to bed at 8:00 p.m. and wake up to study calculus at 8:00 a.m., only to be followed by a 30-minute nap? Of course, this is a far cry from Marist, where early-morning wake-ups call for 6:30 a.m. classes. But it is part of college life in Communist China.

Last Thursday, the College of the Holy Cross, a member of the New England Council of Independent Colleges and Universities, hosted a public forum titled “China’s Global Presence,” which featured a panel discussion on the symbolic and political significance of China’s presence in the world. "It is a time of change," said Dr. Jack Gross, director of the Center for International Relations and Public Policy.

A large majority of students were isolated from the outside world by the Chinese government. "The Chinese government is keen on presenting a positive image of China to the world," said Xue, a student at the Center for International Relations and Public Policy. "However, this is not the case for the Chinese students who are forced to live in this isolated environment."

The panelists agreed that the Chinese government is trying to control the flow of information. "The government is very sensitive about the way news is reported," said Xue. "This is because they want to prevent any negative news from spreading outside of China."

The Chinese government also tries to control the students' lives on campus. "The university provides a very structured environment," said Xue. "The students are not allowed to leave the campus without permission."

The panelists concluded that the Chinese government is trying to control the students' minds. "The government is trying to create a positive image of China," said Xue. "However, this is not the case for the students who are forced to live in this isolated environment."

**Rown' Along**

by Bill Johnson

The Supreme Court Justices will be joining in an unusual event—a joint session of the U.S. Senate and the House of Representatives. The Justices will be sworn in to the Senate by the Chief Justice of the United States and the Speaker of the House, respectively. The joint session will be held at 11:00 a.m. on Tuesday, May 1, in the Statuary Hall of the Capitol.

The Justices will be participating in the joint session as a sign of their constitutional authority to interpret the laws of the United States. The joint session will also be an opportunity for the Justices to address the Congress on issues of national importance.

---

**High Court justice scheduled to appear**

by Janice Thompson

The Supreme Court has announced that Justice Antonin Scalia will be appearing before the American Bar Association's Section of Legal Education and Admissions to the Bar (SEAL). The appearance will be held on Thursday, May 5, at 8:00 a.m. in the Grand Ballroom of the Marriott Marquis in Washington, D.C.

Justice Scalia is expected to discuss the role of the Supreme Court in the judicial process and the importance of legal education. The event is open to the public and is free of charge. Tickets will be available on a first-come, first-served basis.
Poll accurately predicts Giuliani's near comeback

by Debbie McGeady

A late surge by Republican candi-
date Rudolph W. Giuliani, the
New York City mayor, has put him
in the lead in the New York Democ-
rat primary, according to an exit-poll
survey conducted in New York State
last week.

Giuliani's rise has been dramatic,
with polls showing him catching up to
the Democratic front-runner, Sen.
Barack Obama, and then surpassing
him in the final weeks of the campaign.

The new poll, conducted by the
Marist Poll, found that Giuliani
received 45% of the vote, compared to
Obama's 43%. The margin of error was
within 4 points.

Giuliani's rise is significant because
he is the only Republican in the field
with a substantial lead in the primary.

The results are likely to boost his
chances of winning the nomination,
although he still faces a tough battle
with Obama, who has substantial
support in the black and Hispanic
communities.

The poll was conducted among 1,000
registered voters in New York State,
who were contacted by phone.

The full results of the poll are available
on the Marist Poll website.

Fraternity takes blood, gives hand to county
by Kelly Woods

Sigma Phi Epsilon once again helped fulfill the wish of a Valdosta student
by donating blood.

The fraternity generously sponsored Blood Drive from 10 a.m. to 2 p.m.
Saturday, March 12, at Valdosta State University's Student Center.

The students worked tirelessly to ensure a successful event.

One of the highlights was the live auction, which included donated items such
e as books, DVDs, and gift certificates.

The event was a huge success, with over 100 people participating and
raising money for a good cause.

A total of 56 pints were collected during the day.

War on illiteracy declared by Dutchess County group
by Jennifer Johnson

One measure of civilization is literacy. And just as one of the most
critical issues is poverty, so too is illiteracy.

The Dutchess County Literacy Council declared a "war on illiteracy" last
year, and has made significant strides in improving literacy levels.

They have established community-based programs, including one at the
local prison, to help individuals gain the skills they need to succeed in life.

And they have received a grant to support their efforts.

An estimated 250,000 people in the area struggle with reading and writing
difficulties, and the Council is working to provide the resources they need.

Their goal is to increase literacy rates by 10% over the next five years.

One way they are doing this is through partnerships with local schools and
businesses.

War on illiteracy declared by Dutchess County group

by Jennifer Johnsonson

A measure of education in the United States is the percentage of adults who can read and write. According to the U.S. Census Bureau, 10 percent of the population is functionally illiterate.

The War on Illiteracy in Dutchess County, led by the Dutchess County Literacy Council, is working to combat this problem.

War on Illiteracy in Dutchess County, led by the Dutchess County Literacy Council, is working to combat this problem. The council, which is funded by grants and donations, offers classes in reading, writing, and basic math to adults who need help improving their literacy skills.

The War on Illiteracy in Dutchess County is a grassroots movement that was formed in 1987.

"It's not just about teaching people to read," said Jane Reilly, executive director of the Dutchess County Literacy Council. "It's about empowering them to improve their lives." ...
Vandalism

If Marist students do not want to be turned like children, they have a strange way of showing it.

Two weeks ago, containers were installed in Chamaguilla Hollow for student use. They were set in the main dining room to discourage any further damage to the furniture of the dining hall. Some students showed their appreciation by damaging two terminals beyond repair.

Marist students are fond of saying the college treats them like children. Their parents are not present to discipline them, only the administration would trust them, they would be responsible.

Thousands of dollars worth of damaged equipment says otherwise.

Letters to The Circle

Registration

To the Editor,

During these years at Marist I have always been highly impressed by the professionalism of the Marist staff. They have always done an excellent job of keeping our registration procedures moving and the entire registration process efficient.

Sincerely,

[Signature]

Tearing down the walls brings danger with hope

Another round is fired in the great Canterbury war

by Paul Lawrence

According to Phil Karpel (his last name is pronounced with a silent "p"), in the 1960's, he was in a serious relationship with a woman who was the leader of the New Left. He met her while he was a student at the University of California, Los Angeles, and she was the editor of a student newspaper called The Daily Bruin. After they broke up, she continued to write articles for the paper, and he continued to write articles for the Daily Bruin.

Phil wrote an article about his experiences with the woman and the paper for the Daily Bruin, and it was published. The article was very critical of the Daily Bruin and its leadership, and it was also critical of the University of California, Los Angeles, and its administration.

Students at the University of California, Los Angeles, were outraged by the article. They went to the administration and complained about it. The administration was also outraged, and they complained to Phil.

Phil was asked to remove the article from the paper. He refused. The administration then removed his article from the paper and replaced it with an article that was more favorable to the University of California, Los Angeles.

Phil was not happy about this, and he continued to write articles for the Daily Bruin that were critical of the University of California, Los Angeles, and its administration.

Phil was eventually expelled from the University of California, Los Angeles, after he was caught writing an article that was critical of the University's president.

Phil has written several books about his experiences with the University of California, Los Angeles, and its administration.

The worst thing is that Phil is still writing about it.

Drinking reductive

To the Editor,

BeoDeans bring rock back to its roots

Kieran Fagan

The BeoDeans, a popular rock band, are set to perform at Marist College's annual concert. This will be the first time the band has played on campus, and it is sure to be a big hit with students.

The BeoDeans were formed in 1987, and they have been playing together ever since. They are a four-piece band, consisting of lead singer and guitarist John O'Connor, lead guitarist and keyboardist Pat McSweeney, bassist and vocalist Derek McDonald, and drummer Tim Quinn. They have released four albums, and they have been touring extensively.

The BeoDeans are known for their high-energy performances, and they are sure to put on a great show when they perform at Marist.

Kieran Fagan is the Circle's music columnist.
**Vandalism**

If Marist students do not want to be treated like children, they have a strange way of showing it.

Two weeks ago, someone viciously vandalized the Chapelle Hall lounge for student use. We then met the resistance organized by the Local Action Committee. Some students showed their appreciation by damaging two terminals beyond repair.

Marist students are fond of saying the college treats them like children. Their parents pay the tuition, only the administration would treat them, they would be reasonable. Thousands of dollars worth of damaged equipment signifies a more serious problem than vandalism.

The answer isn’t to form a complete Marist supervision of the Computer Center and the terminals in Chapelle. People who work at the Computer Center are paid to help solve computer problems, not to play babysitter.

Ultimately, students must take responsibility for their actions. Only with increased responsibility will the true cost be realized.

---

**Registration**

To the Editor:

During the past year Marist I have had the privilege of reading the T.C. My opinion of the paper has been very good. I was, however, disappointed with the way some of the writers did not allow the time to get the facts straight — ’twas too bad. It’s too bad.

The problem is a big one, I believe. I don’t think it’s everyone.

The problem is that the system current on campus bears a resemblance to the ‘60’s in the ‘60’s. The system in question is that in the current registration that is underway.

The faculty has agreed to make a great deal of work in order to better the system. Who knows what the future may bring?

Robert L. Scheyer

---

**Tearing down the lines**

Last Sunday, I wrote a column advocating reorganization in East Campus, saying that things could turn around at any time and that the hard work was the key to the successful situation of this campus.

This is a column that was written on the spur of the moment. I am not sure if it made any sense.

Tied to this is the problem of some of our students wanting to see the upset of this campus instead of the new order of things.

In the hurry of events, I believe that some are not taking the proper time to consider the situation carefully. I believe that in the future this could be avoided.

Now, in the case of the current registration, I believe that things could be greatly improved. It is my belief that the system is not as bad as it seems.

Robert L. Scheyer

---

**Viewpoint**

Another round is fired in the great Canterbury war

by Paul Lawrence

According to Phil Karpel (his last name) in a recent issue of the T.C., there is one side in Canterbury that has what is known as a "war council." The war council is made up of a group of people who are said to "own" the council. They are the ones who make the decisions, and the rest of the students have no say.

Not everyone is aware of the war council’s existence, but it is a fact that it exists and it is a problem at our school.

One of the reasons why this war council is so important is that it has the ability to control the lives of the students. They can dictate what happens in the school and even the city.

The war council is run by a group of people who are said to be "in charge." They are the ones who make the decisions and the rest of the students have no say.

If you want to learn more about this war council, you should read the T.C. and speak to your friends. They can tell you more about it and how it works.

Paul Lawrence

---

**Drowning our heads with hope**

Raising awareness about a war that should never be forgotten

by Tom A. LaValle

Sometimes people forget. Forgotten is the war in Vietnam, the war in Iraq, the war in Afghanistan, and the war in Yemen. Forgotten is the war in Syria, the war in Libya, and the war in Yemen. Forgotten is the war in Yemen, the war in Syria, and the war in Iraq.

We have all heard of the war in Iraq, the war in Afghanistan, and the war in Yemen. But what about the other wars? The wars that we have forgotten. The wars that we should never forget.

The wars in Yemen, Syria, and Afghanistan are some of the wars that we should never forget. These wars have caused untold suffering and loss of life. They have cost us billions of dollars and they have taken a toll on our economy. They have also taken a toll on our society.

We must remember these wars and the sacrifices that were made. We must remember the brave men and women who fought and died for our country. We must remember the families who lost loved ones.

These wars are not over. They are still happening today. We must not forget about these wars. We must not let history repeat itself.

Tom A. LaValle

Lady Foxes control first exhibition game by Chris Sills

Lady Foxes control first exhibition game by Chris Sills

Lady Foxes control first exhibition game by Chris Sills

The Lady Red Foxes, after a 58-46 win over the first half, earned their scoring in this contest.

"I told them they were playing against our opponents, and our opponents are tough," said Coach Sills. "They were out of sync in the first half, and we were able to take advantage of that.

Edwin had three of his 13 points in the first half, and Sills had eight of his 13 points.

"We have a good feel for the game," said Sills. "And we definitely have a good feel for the game."

"We have a good feel for the game," said Sills. "And we definitely have a good feel for the game.

Cagers sign two in early session by Mike O’Reilly

Wade W199-20 season is the last time Coach Sills was with the Lady Red Foxes, helping them for two seasons. Last week, two players signed national letters of intent to play for the Lady Red Foxes.

"I call it a day when one of our top players commits," said Sills. "They have been working hard and are ready to play.

Marist will officially open its season in November when it travels to the United States to play a small school.

GAP THE GAP INC. will be on campus Tuesday, December 5, 1989. We will be interviewing December and Spring graduates for MERCHANDISING TRAINEE positions.

We LOOK FORWARD TO MEETING YOU!
Gridders close out season with solid win
by Mike O’Farrell

The Marist football team finished in third place in the same way they started the season — with a victory. The Red Foxes downed the University of Wisconsin-Oshkosh, 24-6, to seal their 6-4-0 regular season mark with a 4-1-1 record.

The Red Foxes, who finished second in the Atlantic Collegiate Football Conference with a 3-3-1 mark, next week will travel to Madison, Wis., to play the Wisconsin Badgers.

Coach Don O’Donnell’s team was led by senior quarterback John Callahan, who threw for 143 yards and two touchdowns. Junior running back Mike McIlvain added 105 yards on the ground.

The Red Foxes, who are currently ranked 17th in the nation, will face a tough challenge in their next game against the University of Wisconsin-Madison, who is currently ranked 12th.

Playing games with major league contracts

Sports is a business and business is war. There has never been more evident than in the recent past as television ratings have shifted the look of sports to being the airwaves in the next decade.

CBS recently grabbed the contract for major league baseball out from under NBC, who had the deal for 43 years.

After the Red Sox, the Cubs, and the Yankees, the Red Sox said they were looking at a $1 billion contract to bring the baseball games into the American public for the next four years. This deal is sure to bring in a lot of money to the network.

Now that the baseball contracts have been signed, the network can now focus on other sports like football and basketball.

Thursday Morning Quarterback

Jay Reynolds

CBC, with Johnny Bench joining Musburger in the booth, may have a tougher time with its baseball broadcasts.

Musburger is not the most enthusiastic and entertaining announcer and Bench can do only so much to bring the color. Though baseball is the nation’s pastime, it is not the fast-paced game that basketball is, and Musburger will need to adjust to that. As these two deals weren’t enough to remind everyone just how money-conscious the networks are, the bidding for the college baseball tournament.

NBC just landed the NBA contract and they already have a substantial college lineup and the network has announced that they will get the NCAA tournament.

As far as color goes, it doesn’t appear that NBC has a great deal to worry about — it will not be too difficult to find someone to work with the personal Costs.

Some have thrown at Al McGuire’s name into the mix, but the network says that McGuire — who has been NBC’s college analyst in recent years — will remain at the college level.

Good move NBC.

Boofter end season under .500 mark
by Chris Shea

The Marist soccer team round out its season on Saturday with a 1-0 decision to Central Connecticut State College and ending any hope of finishing with a .500 record.

Central scored the only goal of the game with 17:28 remaining in regulation.

Coach Joe Cordero said it was a game that Marist could have won.

"Although our club was outplayed in the second half, we still had our chances to win the game," he said.

Marist had the year with an overall record of 7-9-3. In conference play the Red Fox record was 0-3-1, placing them in sixth place overall in the Northeast Conference.

The first half of the game saw Marist and Central tied at 0. Marist had possession of the ball and was able to attack early.

In the second half, however, Central began to show off its domination power.

"We lost control in the second half," Cordero said.

"The ball was in our end most of the time. They had a dominant team, and we found out that." In the second half, Marist was able to muster only one shot on goal while Central had two on goal from Paul Stento, who was making his first start of the year in goal.

Stento is also one of the seniors who the Marist soccer is losing to graduation, Greg Healey, Andrew Scarano, Sean Cullen, Joe Pichucro and leading scorer Mark Edwards will also be lost to graduation.

"We are losing some key players," Cordero said. "They are not the type of players who are so obvious to bereal players in the future.""We have some excellent freshmen," he said. "Some of them are going to be real players in the future."

Goldman stressed that for Marist to have a chance to win another game, the team must find consistency in their lineup and stay focused.
