Students test computer network

by J.W. STEWART
Associate Editor

The plans for a new dormitory, townhouses and renovations for the current campus center, which may include an art gallery, continue in hopes of bringing all stu-
dent residents back on campus, said Mark Sullivan, executive vice president.

The new residence hall will be five stories high and located on the sloping land north of the current student center. It will house approximately 900 students with six students to a suite, said Sullivan.

According to Sullivan, the suites, which will be divided into eight "houses," will include one double-bed and a living room and a bathroom.

One major concern to students, said Tom Birdseye, an architecture student from in Eindhoven, Yaffee and Prescott located in Albany, was that there be a quiet study space and other "multi-purpose" rooms.

"Students expressed a desire to have a quiet and comfortable lounge," said Bird-
seye. "We are also trying to fit in more recrea-
tional space which would include pool tables and video games."

Other plans for the residence hall include: seminar and classroom space, a laundry room, an exercise room, a vending area, trash rooms and a "middle common level"

which will be connected to the student center and allow public access to the classrooms and offices according to a recent report publish-
ed by Eindhoven, Yaffee and Prescott.

As for the student center, which will be located to the left of the residence hall and include many different innovations and addi-
tions, said Sullivan.

In the three-story building will be an art gallery, a project the college had previously no room for, which is planned to be on the first level, said Sullivan.

According to Sullivan, other additions to the student center include: additional dining space to accommodate the 300 student in the new residence hall, a two-story bookstore, a cabaret with a stage and dance floor, a "Council of Clubs" room and five additional club rooms and other production rooms to accommodate music rehearsals, the yearbook, the radio station and other groups.

"We are also planning a corridor on the second level which would lead to the enter-

of the existing dining area," said Sullivan.

"We are also thinking about putting a plaza around the courtyard outside the din-
ing area, maybe a food court kind of thing."

Plans to build townhouses where Benoit and Gregory are now also another place for students to live.

The project consists of five townhouses, two two-story and three one-story buildings, and will house eight each and 256 in total, said Sullivan.

Each unit will consist of four double bed rooms, a kitchen and dining area and two bathrooms, he said.

According to Birdseye, students said they were concerned about kitchen space, good bathrooms in the rooms and locations of the various rooms.

"We are trying to accommodate all the student suggestions," he said. "They made suggestions as to where living rooms and bathrooms should be, that being said should be better in the lower rooms. We are also trying to get the bedrooms out of the lower floor, and put them on main floor or upper floor."

As the question of where parking is go-
ing now that the current hangar parking lot might be going to be a great advantage, Sullivan admits that finding spaces "will be a challenge."
Kids are tough critics for 'Wizard of Oz'

By TARA MASON  Staff Writer

If you’ve ever heard the phrase “the grass is always greener on the other side,” you’d better think twice before taking the words literally. According to new research, the grass is always greener on the other side of the TV, and if you watch it long enough, you’ll see exactly what you’ve been missing.

The researchers, led by Dr. John Q. Grassy, and his team of greenologists, have conducted extensive studies on the phenomenon, and have found that the grass on the other side of the TV is not only greener, but also more vibrant, more lush, and more inviting than the grass you see in your own backyard. They have also found that the grass on the other side of the TV is more nutritious, and contains a higher concentration of vitamins and minerals than the grass you see in your own yard.

The researchers have also found that watching TV can actually improve your mood, and reduce stress levels. In fact, they have found that the grass on the other side of the TV is actually more soothing to the eyes than the grass in your own yard. They have also found that watching TV can improve your cognitive function, and even improve your memory.

But don’t take our word for it. Watch the grass on the other side of the TV, and you’ll see what we mean.

The researchers also recommend that you try and watch the grass on the other side of the TV for at least an hour a day, and you’ll see how much better you feel.

For more information, please visit the Grass Research Institute, or call Dr. Grassy at the Grass Hotline, 1-800-GREEN-3219.

The Division of Arts and Letters will be reduced by a new division of arts and letters split.

In the Office of the Vice President, the Academic Affairs Committee (AAC), charged with reviewing the division of arts and letters, will meet next week. According to the AAC, the committee will be meeting on Tuesday, April 3, at 4 p.m. to discuss the division of arts and letters. The meeting will be held in the President’s Conference Room, 2nd floor, Press Hall.

AAC members will include the President of the Arts and Letters Committee, the Provost, the Vice President for Instruction, the Vice President for Research, the Vice President for Student Affairs, and the Vice President for Finance. The meeting will be open to the public, and the public is welcome to attend.

The AAC will discuss the division of arts and letters, and will also consider the future of the division of arts and letters. The AAC will make a recommendation to the President, who will then make a decision on the future of the division of arts and letters.

Safety Briefs

By RICH NASS  Staff Writer

A student was arrested last week after he was accused of threatening to shoot up the campus.

On Monday, April 2, a student was arrested on campus after police received a report of a student threatening to shoot up the campus. The student, a 21-year-old male, was arrested after police found a loaded gun in his possession. The student was charged with possession of a firearm on campus, and was taken to the hospital for a mental health evaluation.

The incident is under investigation, and the Police Department is asking for anyone with information to contact them immediately.

Teen drivers have no idea about

By DONNA SCIARRA  Staff Writer

After Lori’s Mother’s Day night Convent was cancelled, the new student club the Theatre Club was created to attract new students to the arts and culture field to finish off her life. She was excited to be there.

With her pants broken in and her head already full of stress, Edie Black and the New Neighborhood Adventures (NUNA) decided to use their after-school activities to make a difference. They decided to bring the students to the movies to watch “The Da Vinci Code” and work for their movie in art form.

Edie, a student at the high school, was excited to be there.

Edie Black decided to make the movie the best one ever, and the students were excited, and so was I. It was the most fun I ever had at a movie.

This movie is a true reflection of how we’ve been living and how the world is changing. I think we’ve all experienced this and that’s what I think it means to make this movie the best one ever.

Steak Diner is a true reflection of how we’ve been living and how the world is changing. I think we’ve all experienced this and that’s what I think it means to make this movie the best one ever.

The most popular minors

By DONNA SCIARRA  Staff Writer

The most popular minors at the university are Psychology, Business Administration, and Computer Science. Psychology is the most popular minor, followed by Business Administration and then Computer Science.

In the 2007-2008 academic year, Psychology had 3,500 students enrolled, Business Administration had 2,800 students enrolled, and Computer Science had 1,500 students enrolled.

The popularity of Psychology as a minor is due to the high demand for psychology majors in the job market. Many students choose Psychology as a minor because they want to work in fields related to psychology, such as counseling, therapy, or research.

Business Administration is also a popular minor, with many students choosing it because it provides a strong foundation in business and finance, and can lead to successful careers in accounting, marketing, or management.

Computer Science is another popular minor, with many students choosing it because it provides a strong foundation in technology and can lead to successful careers in software development, computer engineering, or information technology.

The most popular majors

By DONNA SCIARRA  Staff Writer

The most popular majors at the university are Business Administration, Computer Science, and Psychology. Business Administration is the most popular major, followed by Computer Science and then Psychology.

In the 2007-2008 academic year, Business Administration had 3,900 students enrolled, Computer Science had 3,200 students enrolled, and Psychology had 2,800 students enrolled.

The popularity of Business Administration as a major is due to the high demand for business and finance professionals in the job market. Many students choose Business Administration as a major because they want to work in fields related to business, such as management, accounting, or marketing.

Computer Science is also a popular major, with many students choosing it because it provides a strong foundation in technology and can lead to successful careers in software development, computer engineering, or information technology.

Psychology is another popular major, with many students choosing it because it provides a strong foundation in mental health and can lead to successful careers in counseling, therapy, or research.
Kids are toughest critics for ‘Wizard of Oz’

BY TARA MASON
Staff Writer

If now you’re reading this article, you may not have noticed it. On April 3, the newest addition to the Wizard of Oz cast was introduced on stage and received a standing ovation from the audience. The new cast member, a young child, was the latest in a long line of performers who have taken on the role of Dorothy.

The members of the cast have been receiving training and preparation for the role of Dorothy for several weeks. They have been learning the songs, dances, and lines that are necessary to bring the character to life.

“Children are a more difficult audience than adults,” said one of the performers. “They don’t always respond the way we expect them to.”

The cast members have been working hard to make sure that they are prepared to perform the role of Dorothy.

“All of us have been practicing for this role,” said one of the performers. “We’ve been working on our lines, our movements, and our singing. It’s been a lot of work, but we’re excited to see how it all comes together.”

Democratic primary has implications on national race

BY JULIE MARTIN
Associate Editor

As the April 7, 2022, primary election approaches, candidates are seeking the highest level of support possible. California Governor Jerry Brown and Arizona Governor Bill Clinton — two of the wealthiest politicians in the country — are vying for nominations in their respective states.

The candidates are neck and neck in the polls, with both having strong support from both urban and rural voters. The campaign has been intense, with both candidates spending heavily on advertising and outreach. The primary election is set for April 7, and the winner will determine the next governor of California.

The candidates have been active on the campaign trail, making appearances at rallies and debates. They have been discussing their platforms, which include education, healthcare, and immigration.

Both candidates have been active on social media, using platforms like Twitter and Facebook to connect with voters. They have also been appearing on news programs, where they have been discussing their platforms.

The winner of the primary election will face a tough battle in the general election. California is a Democratic stronghold, and the winner will likely face a Republican opponent in the general election.

A suspect was arrested in the area of the mini-mart on March 31, 2022, after police received reports of a robbery. The suspect, identified as John Smith, was carrying a knife and was seen attempting to rob a customer at the mini-mart.

The police were able to quickly respond to the scene and arrest the suspect. Smith was taken into custody and is currently being held in the county jail.

The mini-mart is located in the heart of the city and is a popular spot for locals and tourists alike. Police are提醒 residents to be aware of their surroundings and to report any suspicious activity.

Minors can play a role in academic life

BY DONNA SICILIA
Assistant Editor

As the academic year comes to an end, it is important to recognize the role that minors can play in the academic life of the institution.

Minors, defined as those under the age of 18, can contribute to the academic life of the institution in a variety of ways. They can participate in extracurricular activities, engage in research projects, and even participate in academic conferences.

Many institutions have policies in place to ensure that minors are properly supervised and that their participation is safe and productive. For example, some institutions require minors to be accompanied by a legal guardian during their participation in academic activities.

In conclusion, minors can play a valuable role in the academic life of the institution. By recognizing and supporting their participation, institutions can ensure that all students have the opportunity to contribute to the academic community.
Marist offers two Japanese courses
by JENNIFER KAYE

Two new Japanese courses are being offered next fall to encourage Marist students to become more globally aware, according to the Japanese Language Program's Harry Wood, director of undergraduate studies.

The courses were added because of a growing interest among students in the world of Japan. "I've noticed a lot of students who are interested in the Japanese language," Wood said, "so we thought it would be a good thing to add these courses." 

The first course, "Introduction to Japanese," will be offered in the fall of this year. It will cover basic Japanese grammar and vocabulary, and is designed for students who have no prior experience with the language.

The second course, "Beginning Japanese," will be offered in the spring of this year. It will build upon the knowledge gained in the fall course and introduce more advanced vocabulary and grammar.

Wood believes that these courses will help to increase the number of students who study Japanese at Marist. "I think these courses will attract a lot of students who are interested in learning about Japan," he said.

The Japanese Language Program is located in the 4th floor of the Teacher's College Building.
Marist offers two Japanese courses
by JENNIFER KAYE

Two new Japanese courses are being offered next fall to encourage Marist students to become more globally aware, according to Asian Studies Chair Harry Wood, director of undergraduate studies in Asian Studies.

The courses, which will be offered in both the fall and spring semesters in the College of Arts and Sciences, are part of the larger effort by the university to enhance its international focus.

According to Wood, the courses will be offered to students of all majors and will be taught by faculty members who are experts in the field.

The courses will cover a range of topics, including Japanese culture, history, and society, and will provide students with a deeper understanding of the language and its role in the global community.

"We hope that these courses will help our students think about the world in a new way," Wood said. "By studying Japanese, they will gain a greater appreciation for the diversity of cultures and the importance of communication in today's interconnected world."
Despite what many think, campus recruiting isn’t business as usual

By JENNA RACELA

Senior Staff Writer

Every August, Career Development offers a recruitment week so that students who may or may not know what they want to do can get a feel for the different opportunities. This hands-on week helps students find out if a field is actually something they would be interested in pursuing.

"I think a lot of students do kind of wishbone,“ Career Development Coordinator Jennifer Hebert said. "They may not have a degree yet, but they may be interested in a salary bonus or they may be interested in a degree that is an area by business, and they end up going in a different direction just because of the bonus at the end of the day. So, the recruitment week helps them see if there’s anything they might enjoy doing and how they can meet new people that might have something they want to do.

"I think there’s a lot of pressure to find a job after graduation. That’s the first time you’re like, ‘Okay, I have to go look for a job.’ And there’s a lot of pressure to find the most lucrative job. Career Development’s mission is to help students find the job that’s right for them and to help them figure out what they want to do. The recruitment week is just one of the ways we do that. It’s a great way to introduce students to different careers and to see if they want to go into business or if they want to go into a different field. It’s a great way to get students interested in different careers and to help them figure out what they want to do.

By NELLA LICARI

"Without a doubt your mind on vacation this summer, there’s an opportunity to earn extra credits at any of these military academies. You’ll have the chance to travel and explore new places, meet new people, and gain valuable experience. The military academies offer a unique opportunity to learn about the military and the different careers available.

"You’ll be able to experience the military lifestyle, learn about different aspects of military life, and gain valuable leadership skills. You’ll also have the opportunity to earn college credits and make valuable connections. The military academies offer a unique opportunity to learn about the military and the different careers available.

Every August, Career Development begins the annual recruitment schedule for students, who are looking to find jobs for the following school year. This booklet contains the names of employers who will be holding interviews on campus, as well as information on how to get them. Because the booklet contains mostly on-campus employers, students often use it as a guide on whom to interview with. But this booklet is also available online. The website is called Career Development’s website, and accessing it allows students to see all the employers who are interviewing on campus. The website also contains career advice and resources for students.

Career Development’s website is a great resource for students, as it contains career advice and resources for students.

There are two types of companies: outside and domestic.

Outside companies are those that are located outside of the United States. These companies tend to be larger and offer higher salaries and benefits. Domestic companies are those that are located in the United States. These companies tend to be smaller and offer lower salaries and benefits.

The outside companies are more popular among students, as they tend to offer higher salaries and benefits.

Bill and Ed(mund’s) Excellent Adventure

Once again college students are watching an election not only asking “Who will win?” but “Will we Care?”

A lot of people don’t know Jerry Brown’s real name is Edmund G. Come to think of it, a lot of people don’t know a lot about him. No wonder they’re running for president as a progressive candidate — what that means Brown likes it. The less information the media supplies on Brown means the more you can supply his own information — the information and money he wants you to have.

Did you know Jerry Brown is a native of Sherman’s India or that studied Zen with Buddhists in Japan? Did you know that he studied with a former political candidate, governor of California and chairman of the Democratic Party. Did you know he introduced a bill to limit collective bargaining in public service — as an idea to start with? Yet, Brown has been running for a $250 million campaign to which one might add: “Who cares anymore?”

While not many people will agree this message, some are recognizing that an election that is not a political campaign is really true to life as he is just another wolf in sheep’s clothing.

So far, in 1970 New York tradition, the people believe the wolf.

A recent Martin Institute of Public Opinion has Clinton ahead of Brown 37 percent to 24 percent.

However, polls taken two weeks ago in Connecticut also had Clinton scoring Brown, but as it turned out, the polls went off and Brown put a big scare in the Connecticut state house and turned it Republican.

In comparison with Brown, there’s Bill Clinton or “Black Willie” as the Yale students have called him. Brown’s problem is that he’s not as well known and has not had quite the same political experience, so he has spent his career trying to catch up.

For now, it appears if Democrats have a choice to find a candidate to run against George Bush who only has to define the election to win re-election. Running against the incumbent, for the Democratic Party’s other Bill or Edward or either, many voters are likely to say on the words of the original Bill and Ted, “Boogey, Boogey.”

Signs of a political battle have been predicted for years but between here at Merle: a short chronicle on the election between friends, some polls, data and other items to save you a trip to the website is a news story.

Bill and Ed(mund's) Excellent Adventure

Once again college students are watching an election not only asking "Who will win?" but "Will we Care?"

A lot of people don't know Jerry Brown's real name is Edmund G. Brown.

Come to think of it, a lot of people don't know a lot about how things are done in professional presidential candidacies — that's how Brown does it. The less information the media supplies on Brown means the more he can supply his own information — the image and message he wants you to have.

Did you know that Brown was born in Persia in 1860? (That's right, in Iran) or that he studied Zoroastrianism under Zoroaster? Did you know that he is a founder of a political candidate, governor of California and chair of the California Democratic Party. Did you know that Jerry Brown is a great friend of the great man himself, the great man, Jerry Brown? Did you know that Jerry Brown is the only man in California history to have been governor of the state? Did you know that Jerry Brown is a great friend of the great man himself, the great man, Jerry Brown?

People use to say Jerry Brown is a great friend of the great man himself, the great man, Jerry Brown. But now people use to say Jerry Brown is a great friend of the great man himself, the great man, Jerry Brown.

And that's all I have to say on the matter.

Marleeh

Tensions rise as finals approach; vandals threaten computer usage

by JOSPEH T. GRAY
Staff Writer

‘It’s not so easy to put a dollar figure on it,” Cough said. “When you consider the time, the cost to other students, the cost of replacing the software, it’s impossible to quantify that.”

Cough said that the vandalism may be the result of a student’s frustration in the computer centers. “Somebody was annoyed enough to do it,” he said.

Cough said that the computer center has received more than 20 reports about vandalism in the past month. He said that the center is investigating the cases and that it is working with the computer science department to find a solution.

Cough said that the center hopes to install a new security system in the near future. He said that the center is also considering hiring more security officers to prevent future incidents.

There are hundreds of questions on the GMAT, GRE and LSAT. This checklist will help you answer all of them.

Kaplan makes test prep convenient. With 130 courses and thousands of class schedules, the odds are you’ll be ready to take them when and where you need them to be.

Kaplan helps you manage your time. Customized plans and personalized help ensure you make the most of your time.

Kaplan offers the best value. Our courses are competitively priced and offer the complete preparation you need to feel confident.

Tensions rise as finals approach; vandals threaten computer usage

by JOSEPH T. GRAY

Staff Writer

Whether it is from malfunctions in the computer’s components, or plate vandals, the Marist College community is beginning to take computer theft more than lightly.

Florida's college towns may not be the only ones to suffer from computer theft, but Marist is certainly not immune, according to Comm Services.

Cough said vandalism is a major problem in his community and is working to enhance the visibility of the Marist College computer center. It is also considering installing computer monitors on the computer towers to deter potential thieves.

The vandals included transmitted signals or even completely destroying the computer’s components.

As a result, Comm Services has increased its surveillance of the computer towers, with additional security personnel keeping an eye on the towers.

The philosophy of the Marist College computer center is to provide a safe and secure environment for students to use the computers, according to Comm Services.

The Marist College computer center has taken several steps to prevent computer theft, including increasing the number of security personnel and installing additional security measures.

The computer towers are monitored 24/7, with security personnel patrolling the area.

The computer center also provides a backup system to ensure that students can access their files, even if the computer is missing.

The computer center is also working with Comm Services and local law enforcement to identify and apprehend potential thieves.

The computer center is also taking steps to improve the security of its computer towers, including installing additional locks and cameras.

The philosophy of the Marist College computer center is to provide a safe and secure environment for students to use the computers, according to Comm Services.

Marist brother evaluates Japanesehighschool

By FRANCIS CECATTILO
Staff Writer

Evaluating the educational situation of Japan and the United States has become a topic recently, especially by Brother James Kenny, director of teacher education, who is evaluating in Japan, because before this term overseas, had more to do with education than training. 

The most striking thing to me is how different the two countries are in terms of educational standards. In Japan, the emphasis is on individuality and creativity, whereas in the United States, the emphasis is on memorization and rote learning. 

In the United States, the curriculum is highly standardized, whereas in Japan, there is more emphasis on flexibility and adaptability. 

The schools in Japan are also much more-oriented towards the students, whereas in the United States, the schools are more-oriented towards the community. 

In Japan, there is much more emphasis on group work and teamwork, whereas in the United States, there is more emphasis on individual achievement. 

Overall, I think that the educational system in Japan is more effective and efficient, and produces better results. 

The schools in Japan are also much more oriented towards the students, whereas in the United States, the schools are more oriented towards the community. 

In Japan, there is much more emphasis on group work and teamwork, whereas in the United States, there is more emphasis on individual achievement. 

Overall, I think that the educational system in Japan is more effective and efficient, and produces better results. 

On the other hand, the United States has a much more flexible curriculum, which allows students to explore their interests and passions. 

In conclusion, I think that both systems have their strengths and weaknesses, and there is no one-size-fits-all approach to education.

Vandalism plagues parking area

By MARK STACKOW
Staff Writer

An increase in vandalism has been reported at the Mid-Hudson Civic Center, where the Silver Needle Fashion Show will be held. The problem has been most noticeable in the parking lot, where several cars have been spray-painted with graffiti.

According to the security staff, the vandals are mostly teenagers, who seem to be targeting cars with letters or numbers painted on them. In some cases, the graffiti has been so heavy that it has obscured the car's license plates.

The security staff has put up signs requesting that people report any incidents of vandalism to them immediately. They are also working to increase security measures, such as adding more lights and cameras to the area.

Overall, the problem is a concern to those who attend events at the Civic Center, and the security staff is working to address it as quickly as possible.
Touring U2 rocks sellout crowds

BY SUE VANZUS AND JUSTIN SERENET

It’s been a year since U2 went on tour, and they’re still rocking venues all over the world. On March 21, they brought their Zoo TV show to New York City’s Madison Square Garden, playing to a sellout crowd of 18,000.

It was a big show, but the audience was simply mesmerized by the band’s performance. U2 is known for their unique sound and style, and they didn’t disappoint on this tour.

When the show was over, the audience erupted in cheers and applause. It was a night to remember for all those who were lucky enough to be there.

---

WIZARD (continued from page 2)

The other tracks included in the album are:

- "While You Sleep"
- "In Winter"
- "Electric Life"
- "Time"
- "The More You Ignore Me, the Closer I Get"

This album is sure to be a hit with fans of the band. The tracks are a mix of upbeat and emotional, with the lead singer’s powerful vocals and the band’s signature sound.

Vandalism plagues parking area

BY MARK STACKOW Staff Writer

Ed Czechawsky, a 22-year-old college student, was walking on campus one evening when he noticed a group of kids vandalizing his car. He immediately called the police, and officers arrived on the scene.

"They were spray-painting graffiti all over my car," Czechawsky said. "I was really upset, I had just bought this car a few weeks ago."

The police officers said that this is not an isolated incident, and that vandalism has been a problem on campus for some time.

Marist brother evaluates Japanese high school

BY FRANCIS GIACETTINO Staff Writer

Evaluating the Japanese education system isn’t something a college student would typically do. But that’s exactly what one Marist student did when he went to Japan to evaluate a Japanese high school.

"It was a unique opportunity to see how the education system works in Japan," he said. "I was able to see firsthand how the students learn and how the teachers teach."

The student evaluated the school’s curriculum, teaching methods, and overall atmosphere. He found that the school was well organized and that the students were highly motivated.

Laxmen start slow, lose first five

by TED HOLMUND
Staff Writer

Fives games into the season, the #10 Laxmen had dropped their first five.

Marcie dropped to 6-0 overall Saturday evening, as the Laxmen fell to #7 Boston College, 10-6. The game was moved to Boston College's Alumni Stadium due to rain at the Laxmen's home field at the Rhodes Pool.

Second-year Head Coach Tom Davis said the team will use the game as a learning experience.

"We played well enough, but we have to learn to control our emotions," Davis said. "We are a young team, and we are still learning to play as a team."
Track sprints sprout in inaugural season

by MATT MARTIN
Staff Writer

The Mariot track team knew starting a program from scratch would be like running into a wind.

On Saturday, the Red Foxes faced the elements head-on while competing at the Army Spring Meet at West Point last Saturday. Braving the 30-mile-per-hour wind and a 20 degree wind chill factor, the track program began its inaugural season under less than ideal conditions.

“It was like watching people run in water out there,” said Coach Phil Kelly. “It was just like going into a 40 mph wind.”

Dwayne Edwards, a junior, was dismayed when he first measured the triple jump field.

“It was a forty foot board,” said Edwards. “I had never jumped from a 40-footer before. I had to psych myself up for it.”

The new board didn’t have a negative effect on Edwards. The junior soared to a new school record of 42 feet, four-and-one-half inches, good enough for fourth place.

Edwards’ teammate, freshman Darren Rash, finished close behind in sixth place, closing out Mariot’s best event of the day.

Senior Firey, a junior from Millrose, MA., also turned in a solid personal assist.

Feneley followed an eighth-place finish in the 5,000-meter run with a third place sprint to the finish line, 45 seconds behind.

“That is an exceptional time into the wind,” said Kelly. “I don’t think any other runner attempted both events, because the 5,000 is so physically demanding.”

Junior Jen VonSusklik finished a third-place finish in 5,000 meter, despite falling 45 seconds behind previous for his personal best.

However, the wind was not a factor for Lori Keys. The senior finished in the second place on her way to a seventh-place finish in the shot put.

Keys was one of the members of the basketball team, pushed the 15-pound sphere to a record 35 feet, four-and-a-half inches through the stuffed guts off the neighboring Hudson River.

***

ICERS SKATE TO FIRST-EVER MET CHAMPIONSHIP

by TED HOLMLUND
Staff Writer

The hockey club did this year what no other Mariot hockey team had ever done - win the Metropolitan Conference championship.

The team was invited to four consecutive playoff wins including a 9-2 victory in the championship game against Wagner College.

Junior Scott Brown led the Mariot attack, as he has done so often this year, scoring three goals and two assists.

For his efforts, Brown was named as the Outstanding Offensive Player.

Senior John Lloyd chipped in with two goals and three assists while sophomore John Walker also notched two goals and added an assist.

The first line of Brown, Walker, and senior Doug Miller has scored 12 goals and seven assists.

Despite the team’s impressive performance by the Red Foxes, both the coaching staff and the players said the team’s one new-two defense implemented solely for the playoffs was the key to the championship drive.

“The new scheme, said Matius, aimed specifically to stop Southern Connecticut State University, the regular season Empire Division Champion, who beat Mariot twice during the regular season.”

Matius said the defense was designed to make two defensive stands - one at Southern Connecticut’s blue line and another at Mariot’s own blue line.

“Southern Connecticut has some talented forwards,” said Matius. “We (our defense) forced them to dump the puck and get possession.”

Junior assistant coach Kevin Walsh also said the defense was effective during the playoffs.

“It (the one-two-defense) seemed to work against Siena,” Walsh said. “It came when the defense was confronted against Southern Connecticut’s forwards.”

Brown, who played through the playoffs with a slightly separated shoulder, said the team’s defensive change during the playoffs was a big factor in the team’s championship run.

“The defense was the factor,” he said. “Everyone stuck to the rules of the defensive scheme. It’s a good system - it works.”

Matius said that the win over Southern Connecticut was the key victory in the playoff run, but the team had to avoid a let down in its last two games against SUNY Stonybrook and Wagner.

The Southern-Mariot win was going to be the league champion,” Matius said. “The war was against Southern, but we knew we had some cleanup to do against Stonybrook and Wagner.”

Matius’ victory celebration was tainted due to a game ending scuffle among Mariot and an apparently frustrated Wagner squad.

With 22 seconds remaining in the championship game, a Wagner player swung a stick at a Mariot player, which led to four game disqualifications against Wagner for fighting.

The Red Foxes did not have any game disqualifications.

Senior Captain Scott Doyle said the championship was four years in the making.

“We’ve thought about it (the championship) until near the end of the season,” he said. “After we’d been thinking about it if we keep playing this way that no one can take it from us.”

Matius had a guarded optimism about the prospects of repeating in a Metropolitan Conference championship.

“Are we at the mercy of what other teams do,” Matius said. “If we’re organized as a team and know our goal, we always have a shot.”

Brown also said the team has legitimate chance of winning the championship next year.

“I think we have a really good shot,” he said. “We have a lot of depth.”

Brod Kemp, the starting goalie for the Red Foxes for most of the season, was also named as the first goalie in the Empire Division.

Brown was selected to the Metropolitan Conference All-Star squad.

The three b’s: baseball, basketball and boxing

This is usually the time of year I bow down my past predictions upon you. However, due to last season’s performance — see The Circle, April 11, 1991 — I have to confess my annual idea and fill your head with other interesting nuggets from the sporting world.

I wonder what Don King is going to do for the next three years now that Mike Tyson is in jail. Hee, hee, a really bad idea.

The only thing I care about is Tyson serving his sentence for the rape he committed.

He owes a debt to society for what he did, but not to Mike Tyson.

The scary thing about the entire ordeal is that Tyson doesn’t believe he hurt anyone.

The dumbest heavyweight champion said there were no black eyes or cuts or bruises.

The dumbest heavyweight champion didn’t hurt anyone. Wrong again, Mike.

I think Mr. Tyson is going to have a rude awakening when he gets to his first holding cell.

When he does get released, don’t be surprised if he’s fighting for his title again.

After all, look at elder statesmen Larry Holmes and George Foreman. If Tyson is out in three years for good behavior, he’ll be 32, 33 and ready to regain his heavyweight title.

Who else cares that the National Hockey League is on strike? As far as I am concerned about hockey season be directed to the Mariot hockey club.

Western Connecticut State University — could not stop the Red Foxes from reaching their championship.

This team showed that when it wanted to, it could dominate any team it faced.

The question now is, can it repeat.

Did you recover from watching the Duke/Kentucky game?

That has to have been the best college basketball game I have seen in recent memory. Simply amazing.

As Beatroot Fever sweeps the United States, one has to wonder if Coach Bob Knight can beat coach (Student) Coach.

As much as I like Indiana, Duke should be able to advance to the Final Four.

There is a possibility the Blue Devils could meet the "Palm Five" from Michigan in the championship game. That would be quite a ballgame since the freshmen nearly knocked of Duke earlier in the season before losing in overtime.

The NAACP has been all over the country for a picture that appeared in a New Mexico newspaper. The picture showed Knight playfully whipping Calbert Chanez with a ball guff to Knight by his head.

When the picture was published, the NAACP called for an apology from Knight saying the picture portrayed slavery.

Come on. First of all, the team bought him the whip. Secondly, Chanez initiated the whipping by bending over and then returned the favor with a towel at the end of the Hoosiers’ victory over UCLA.

Jerry Tarkanian’s name has been mentioned as a possible candidate for a job in the NBA. Shouldn’t he be a tough look for the Shaq. After all, he’s been coaching professionals all his life.

I feel as if I should say something about the recent incidents surrounding the Cleveland Indians, but what do you say about a bunch of perverts?

We go back to our long season, Yankees fans.

When is a team a true starter? Come on, the guys’ at Rockford.

That’s OK, but Buck ShoWare will be a starter, except for hitting, with number four man Jeff Montgomery and number five man Pat Maloney having to do about any pitching problems.

If you thought baseball would be able to escape without long-term eating any baseball, you’re way overthinking it.

With the addition of Kevin Mitchell, the Mets are in the American League West this year.

It’s just too bad.

Mike O’Farrell is The Circle’s sports editor.
