Water main burst; third this year
by MEREDITH KENNEDY  Staff Writer
Waterline breaks are becoming as frequent as Old Faithful on campus in recent weeks.
Monday, the South end of campus discovered that they were out of water as construction workers struck a main water line on the edge of the former Champlain parking lot facing Water Works Road.
Workers were preparing the groups of pipes for new sidewalks when they accidentally hit the line, ripp- ing a ten-foot hole in the pipe, releasing a 26-foot-high gush of water.
"We turned the corner and there was this fountain of water gushing from the pipe. It was going straight up in the air," said sophomore Jennifer Pratt.
The city's Poughkeepsie installa- tion the line in 1865 when the Marist布洛和工程，but never recorded the exact location of the pipe.
The line runs below the southern curb of the road. The break occurred across the street from the lower section of the new townhouses.
This section of townhouses is in the "capture" area of the city, according to Jim Rainer, director of Housing and Residential Life. However, the exact locations of these two lines are still unknown.
The broken main pipe supplied water to the entire south end of campus, including Campus Street, Great Grove and excluding the McCann Center.
"The water pressure was reduced and then turned off at about 8 a.m. and regained at 1 p.m.
"Losing the water is an uncom- fortable situation for everyone in- volved. I just hope it doesn't hap- pen again," said Jim Rainer, director of housing and residential life.
"Right now, the water is being filtered and recirculated," said Peter Pietrucha, Pizzagalli's project engineer.
"A secondary line is being used while the main line is being repaired, which could take as long as six weeks to be completed," said Rainer.
The 128 year old line is not be- ing replaced, just repaired. The connection must be made outside to fit the surrounding pipe.
"There will be water main breaks occurred this year. All of these were designed to feed water to on-campus buildings. Monday's break occurred to a line originally intended to supply water to the town, but not now service buildings.
"We've discovered in doing a massive project like this, that many pipes date back to the 1800s or even earlier," said Sullivan. "So, is part the breaks are caused by corrosion, but also because of age.

Campus housing not guaranteed to all upclassmen
by LYNN WIELAND  Staff Writer
While Marist continues to ex- pand the number of students accepted, the Housing Department is facing the difficulty of finding enough available housing for the students wishing to live on campus.
With housing spots available next year to upclassmen, it has been reduced to Housing that five percent of students requesting

Student leads second effort to start hotline
by JULIE MARTIN  Associate Editor
After last year's frustrating debut of the rape hotline, junior Tina Pace said she will try again this year to get the hotline going.
Pace said a senior wanted to start the program as a part of her sophomore year thesis; however, she wanted undergraduates who would be around for a while to work on it.
Pace, along with seniors Sarin Opella and Laurie Ferrarso, took on the project.
"I met the hotline at the end of our freshman year and took the project sophomore year," Pace said. "We had intensive training including self-defense, we talked to counselors, we had help from the Poughkeepsie Police Department.
Pace said it was a lack of student interest that led to the demise of the hotline last year. "We offered training to those students who were interested, but as training went on, people dropped off," Pace said.
However, this year amid, after

Students examine rape prevention
by JULIE MARTIN  Associate Editor
"About 55 to 60 students, both male and female, came to a meeting with the Sexual Violence Prevention Task Force to voice their concerns and of- fer solutions. The students met with a panel of faculty, members from the Task Force, and Pace for an open forum on the topic," Roberta Amato, director of counseling services, and Pace plans for the hotline.
"Students came to us and asked what is going on with the hotline," she said. "It's a shame it took something like a rape to get it together, but we're very hopeful, we can get it off the ground."
Pace said she plans to get together with Roberta Amato, director of counseling services, and discuss plans for the hotline.
"We are surprised by the news, Amato said that the rape hotline was not under contract with the campus because of finances and inconvenience. It is not assumed guaranteed housing, need to live on campus," said Pace.
"We are looking into the proposal that was made last year for a hotline. Hopefully, it will happen," Pace said. "If it's a situation that they don't have enough space for students, they should keep Canter- bury," she added.

With the new Champagnat Suites scheduled for construction, 324 spaces for students will open up, however when Marist gives up the Canterbury Garden apart- ments, Housing will lose 300 placements.
This summer, 64 spots were lost when the North Road houses were taken down. The new townhouses,...

Duo enjoys Scorseses’s “Age of Innocence” 
by ANDREW BORDIS and COLLEEN MURPHY

Andrew B., 9, and Colleen M., 8, of 102 Finch Road, could not have been more excited about visiting the new Scorsese film, “Age of Innocence.” They have been looking forward to seeing the movie for weeks and were thrilled when they got the chance to attend a special screening at the local cinema.

The film, set in early 20th century New York, tells the story of a young woman who falls in love with a man she knows is not the one for her but who is too societal and his true veins and desires are drawn to the film and its characters.

At least, sitting alone, with their feet on the ground, they could feel the same Page 2

Nirvanas no flute: “Utero” smells like a second hit 
by DANA BUONCONTI

If you have ever smelled a flute, you know it’s a very strong smell, and there are many people who don’t like it. But if you have a nose, you will be able to smell a flute, and you will love it. It’s a very strong, earthy smell, and it’s very pleasant. If you want to smell a flute, you should try “Utero.”

In an attempt to keep up with wife, Moore, Big Bruce bombs with “Distance” 
by JENNIFER GIANDALONE

Bruce Moore and his wife, Moore, have been trying to keep up with each other lately. They are both very busy and have a lot on their plates, but they still try to make time for each other.

Most students have had the experience of not knowing what day of the week it is, or how much sleep they got the night before. Townhouse residents, the pit bull of daily life, are the living proof. The laundry facilities are in-demand because a lack of supplies is one of the main factors of the complex.

Fashion interns to visit Paris
by LYNN WELAND

Two Martin interns are preparing to travel to Paris for our annual fashion show. The Leonie House is a local fashion house that has been in operation for many years. They are known for their high-quality designs and their unique flair.

The location of the new late night cafe seems to be a problem for a few students. One student, who wishes to remain anonymous, said, “I don’t think I’ll be stopping by there very often.” Another student, who also wishes to remain anonymous, said, “I’m not really into late night cafes.”

Former Trek writer gives students insights into sci-fi

by MOREN MOGNEW

"Star Trek: The Next Generation," "Deep Space Nine," "Babylon 5" and "The Benefit" all have one thing in common: They all star the same actor, who is more commonly known as "Kirk Greendale." Greendale is a former Trek writer who has written for several of the above-mentioned shows. He recently spoke to the students about his experiences in the world of sci-fi writing.

**Why did you decide to become a sci-fi writer?**

Greendale: I've always been fascinated with science fiction. It's a genre that allows me to explore new ideas and concepts, and it's a way to express my creativity. I've always loved the idea of creating a world that's different from our own, and sci-fi writing allows me to do that.

**How did you get started in the industry?**

Greendale: I started writing when I was in college. I wrote my first story when I was 18, and I've been writing ever since. I started writing for a local sci-fi magazine, and that's how I got my foot in the door. I've worked my way up to writing for some of the biggest sci-fi shows in the industry.

**What's the biggest challenge you've faced as a sci-fi writer?**

Greendale: One of the biggest challenges I've faced is coming up with new ideas. Every time I write, I have to come up with something new and different. It's a constant struggle to keep the stories fresh and exciting.

**What advice do you have for aspiring sci-fi writers?**

Greendale: My advice is to read as much sci-fi as you can. The more you read, the more ideas you'll get. Also, don't be afraid to take risks with your writing. Don't be afraid to try something new. And most importantly, have fun with it. Writing is supposed to be fun.
**Freshmen election today and tomorrow**

**by JEFFREY T. ROSE**

Staff Writer

Marist is only recently emerging its administrative apparatus, but it is still in the process of forming committees and subcommittees, and 12 committee members, there is no need for it to the freshman class.

For the second time in as many years, Marist hosted a debate among candidates seeking the presidency of the Class of 1994. The debate was held in the library lounge of the facility.

Two of the three candidates running for the presidency were shown to be in agreement with the line of thinking of the administration.

It was a bit of a surprise to see the students and faculty members of the administration.

The campus has proposed three changes to the December term, and they will be made at the end of the year. The changes are: the administration will require all students to have a new computer, and the school will require all students to have a new computer.

The cosmic energy that King is subject to the communicative energy of the earth is a natural energy that King is subject to. We are the communicative beings and are the first to change and evolve. The cosmic energy is the energy of the cosmos and is a natural energy of the cosmos.

The new computer will add a new dimension to the communications department.

Since King didn't decide to leave the communications department, the computer was not available to conduct a media interview for the position.

The students of the communications department are all interested in the computer.

This new computer will be a great addition to the communications department.

Instead of being subject to the cosmic energy and the earth, they are subject to the communication of the cosmos. The students of the communications department are all interested in the computer.

The cosmic energy is the energy of the cosmos and is a natural energy of the cosmos.

The key is that the students of the communications department are all interested in the computer.

Is Bill's plan healthy?

Voltaire once said, "The art of mediocre conversation is a state in which the art of no conversation is no better than the art of no art." However, today, the art of mediocre conversation is the rhetoric used throughout this campus. The art of silence is the true voice of this generation. Bill Clinton's plan is one of the lowliest notions in the world, but we have one of the lowest standards of conversation in the world. There are times when silence is the truest form of communication. "Not saying anything" is not just one of the most profound acts of Bill Clinton's presidency; it is one of the most profound acts of any politician in the world.

There is no question that Bill Clinton's plan is one of the world's greatest notions. He has the ability to say nothing and make us believe he is saying something. When he does say something, he usually says the opposite of what he means. If this is what Bill Clinton's plan means, then we should support it.

The question is whether or not Bill Clinton's plan is healthy. In terms of the terms of the plan, it is basically negated. More than a week ago, President Clinton announced a plan to build around-beds health-care plan to the nation.

What was the impact?

In terms of the press, it was basically ignored. Although the plan is not the end of the world, it is still a step in the right direction. Our local politicians should be praised for their support of this plan.

**Editorial**

The evolution of the best way to combat crime has been a long and ongoing process. However, in the last few years, we have seen a significant shift towards the use of technology in crime prevention.

With the exception of the most recent crime spike, which has led to increased calls for action, the community remains confident in the police’s ability to keep us safe.

**Marist Viewpoint**

Crimped dorm—junior’s vision

When you hear about crime on campus—whether it’s theft or assault—it’s easy to feel scared. However, it’s important to remember that crime is not always preventable, and that the best way to protect yourself is to stay aware and take necessary precautions.

Crime hotspots are often targeted because they are perceived as vulnerable or not monitored closely. By being vigilant and taking action, we can help reduce the risk of becoming a victim.

Fare-nane for the cattle

As a student, I have noticed a significant increase in the number of assaults on campus. This is concerning because it is evident that some people are not taking the necessary precautions to protect themselves.

In conclusion, we must remain vigilant and take action to prevent crime. By working together, we can create a safer environment for everyone who calls the Marist community home.

Gridders lose big; fall to Post, 31-10

By ROBERT E. HUNTINGTON

Senior defensive and Jeremy Saturday, March student Marshall's defense in key to past, is a 4-0 start. 

"We're ready to go," said senior linebacker Justin White. "This team is ready to go." 

The Gridders were defeated by the Newport Post, 31-10, last Saturday. The team had been aiming for a 4-0 start, but fell short in the final game of their season. 

"We were hoping for a 4-0 start," said senior quarterback John Phillips. "But we didn't get it this week." 

The Gridders will now focus on next season and try to build on their experience from this year. 

"We have to learn from this season," said senior wide receiver Timmy Jones. "We have to be better next year." 

---

Red Foxes star year undefeated: mark 4-0

One possible key to the success of the Red Foxes this season has been the strong defense led by senior linebacker Justin White. 

"He's been a great leader for us," said senior quarterback John Phillips. "We really missed him last season." 

The Red Foxes have only allowed 21 points in four games this season, which is a significant improvement from last year. 

"We've really been working hard on defense," said senior defensive end Timmy Jones. "We want to keep this streak going." 

With this, you can save for years.

With these, you can save right now.

A Whole New Perspective on Marist Sports.
Spikers triumph; streak hits four
by TERI L. STEWART
The women’s volleyball team has discovered the winning formula. Marist has won four in a row to raise its record to 6-0. The Red Foxes streak hit its peak on Sunday after the team posted a 15-9, 15-11, 15-10 victory over St. Peter’s. Marist needed to be alive because Rider leads the Northeast Conference in efficiency, kills, assists and aces. According to senior co-captain Moea Breen, it is easy to get psyched when you compete against opponents they do not like. “Screaming in each other’s faces and seeing the other team as the enemy helps,” she said. Breen, who was tied for first place in the Northeast Conference in assists, said Marist was not able to compete with the same intensity as Rider did. The four game ruin match began in a seemingly endless struggle for the first point. Both teams combined for nine errors in the first six games. Freshman Moea Beth Herman served the first three perfect serves to open the match. A high number of side outs is not uncommon, this was according to junior Christin McKeon.

Netters Drop St. Francis (NY); record 6-0
by JIM DERVAN
The women’s tennis team increased its undefeated streak to six games with a 6-1 victory over St. Francis (NY) on Saturday, at the Dutchess Tennis Center. With the victory, Marist raises its record to 6-0 (6-0 in the Northeast Conference). The Red Foxes dropped its first two matches. Freshman Cara McCaffrey lost the singles with a 6-4, 6-2, 6-4, Senior Katie Steward lost the second match, 6-2, 6-4, 6-4. The Kary Steward match was the most competitive match of the day, according to Coach Ken Harrison. “The second match was the most exciting match of the day, though she lost.” Harrison said. Marist went on to win the next four singles matches. Sophomore Kim Zilai noticed a 6-4, 6-0 victory. Freshman Eric O’Neill chipped in with an impressive performance, adding a 6-2, 6-1 victory to balance the charge.

Zilai said she was able to grind out the win over her opponent. “It didn’t matter who had more consistency or who had the longer shots,” she said. “She was a good player — just a little outplayed.”

Ann Henry said she was able to bring together a solid match despite playing against a weaker player. “It was a good match,” she said.

“Seemed like a weaker tennis player.”

Freshman Amanda Charles won out to win the sixth singles match, 6-4, 6-1. Marist only needed to take one out of the doubles matches to win. Zilai and McCaffrey won the first match, 8-4 to ice the win for the Red Foxes, O’Neill and Henry lost the second doubles match, 8-6. Kary and McCaffrey won the match, 8-6. Amanda Charles and Amanda and Amanda won the match, 8-6. “Kim and Ann are undefeated in singles matches and have been the strongest players for us,” she said. The team turned its game up another notch, according to some of the players.

Everyone played really, really well," said Seward. “In the matches we played, we were at a high level.

The team is very competitive, and we strive to win,” Henry said. “We’re a good team in general, with some powerful players.”

“It usually happens when you play a team like this in the season,” she said. “We had to outsmart what offense was working and how their defense was working.” The defense seemed to fall apart after a 5-3 tie and Marist used the breakdown to its advantage to pull away and win the game.

Head Coach Sally Johnston said Marist went on to concentrate. “You have to concentrate on your game and play your game,” she said. “I forgot about the other team.”

Marist quickly began the second game with a two point lead. Rider came out strong and kept the game close until a 10-10 tie.

Both teams appeared to be playing on even terms, until the Red Foxes exploded. “After winning the first two games, Marist looked like they were falling apart in the third and fourth games of the fourth game.” The third set was close, early, but Rider went out to a strong lead. Marist did keep themselves alive by playing good defense and forcing side-outs.

Down 4-1, Marist scored the next three points, making it not ten enough, said McKeon, who had eleven kills on the day, said the team lost its concentration in the third game. ...see WOVL page 11

Boots win snap slump; Iona today
by ANDREW HOLMLUND
Head Coach Howard Goldman said he was excited to snap a bit easier heading into this afternoon’s contest against Iona at 4:00 on the Fordham distance track. It is because the men’s soccer teams have earned their first victory after seven unsuccessful efforts by beating the Siena Saints, 3-0, on a rainy, soggy afternoon in Poughkeepsie. Marist, who is currently 1-7-0 (0-4 in the Northeast Conference), was led by senior midfielder Mazzella with two goals, while senior midfielder Jeff Ullrich added one.

The Red Foxes opened its home schedule Saturday, Nov. 3, with a 1-0 victory over Rider College, 4-1. After Rider scored a goal at the 20:30 mark, Marist was able to tie the match with a goal scored by freshman midfielder Kevin Hardy, assisted by Ullrich at 7:00.

The Broncos responded eight minutes later with another goal in a span of two minutes. Despite the loss, Goldman said he was fully satisfied with his team’s performance. “It was a tough match,” said the head coach, who is in his 31st season. “We did some positive things in the second half.”

Marist traveled to Jamaica, NY last night to get head-to-head against St. John’s University, the last year’s winning 3-2 season finale.

However, the Foxes were unable to get the upper hand against the Redmen this time, losing 4-0.

Besides being shut out, the Red Foxes were outshouted by a substantial margin, 27-11.

Hardman said “It’s flat-out beat us.”

Although his team did not come out on top, Goldman said he saw some signs of improvement, especially from senior understudy Ryan Smith, who made 13 saves. “He did a good job,” Goldman said. “Hopefully we can build off of this at times and make some big saves.”

Smith has been assigned the starting job, after an injury sustained by senior Matt Palmer.

"Vision" one, campus sports facilities nothing

The tennis courts have been destroyed.

The Garland basketball courts have now been detonated. Where can everyday students play?

I have an idea. They can play King of the Hill on all the rock and dirt piles in what was formerly the Champaigna parkin lot.

But we have to work.

The school has put up hedges for the old townhouse and one in between Marist and Champaigna parkin.

Those places give a lot of room.

There is still some green fields out on campus where students can play, but, until someone can change their vision, it is not going to be significantly.

Between the townhouse, the school will have new tennis and basketball courts built by next year. Right.

So we are on this vision stuff, however, not a good gym built solely for students who are not involved in organized team sports.

Predictions
Here are our predictions on the National Football Conference playoff teams. Next week, the American Football Conference.

The Philadelphia Eagles will play in the NFC East because the team was predicted to do great things this year.

The Eagles will not do one of their late season divisors ever again. There is no pressure on them to succeed. The Eagles will not recover quickly enough from their 4-2-1 record (0-1 against the high flying Eagles) to catch the high flying Eagles.

The Detroit Lions will win the NFC North. It will be close enough to be emergence of quarterback Jake Delhomme.

The New Orleans Saints will win the NFC West because the San Francisco 49ers are not good enough.

The Saints have already proven they can win the NFC West (see last week’s 16-13 win over the 49ers).

Football fall
The football team came crashing down to earth losing 31-10 to C.W. Post.

There were a few trends that must be disturbing Head Coach John Fagh. First, penalties killed Marist. How can you have 12 men on the field when your team is getting ready to punt the football? Marist did.

It might be permissible if the blockers were running the two plays and were trying to get a quick punt, but neither was the case.

Mental mistakes separate the good teams from the great teams.

The offense was also unable to convert on its numerous scoring opportunities.

Marist is a team whose trademark is running the football and playing the game. This did not happen nearly enough when the Red Foxes were inside the red zone (inside the 20-yard line).

It is only one game, but Parady’s squad must stop these tendencies, Marist ran off four consecutive wins to take the match.

Head Coach Ken Harrison’s ten- nis team has been the most im- pressive, The Red Foxes had an im- pressive 6-0 (4-0 in the Northeast Conference) record before Tues- day’s match against Army. Marist has won four im- pressive victories because the team is balanced in both singles and doubles competition.

Marist’s depth was the main reason why the team defeated con- fidence foe, St. Francis (NY). After losing the first two singles matches, Marist ran off four consecutive wins to take the match.

There are three women’s teams have been winning lately.

Head Coach Ken Harrison’s ten- nis team has been the most im- pressive, The Red Foxes had an im- pressive 6-0 (4-0 in the Northeast Conference) record before Tues- day’s match against Army. Marist has won four im- pressive victories because the team is balanced in both singles and doubles competition.

Marist’s depth was the main reason why the team defeated con- fidence foe, St. Francis (NY). After losing the first two singles matches, Marist ran off four consecutive wins to take the match.

The team played to Army Tues- day. Points were not available at press time.

“Army will be the toughest team we play all year, the only tougher one will be Mt. St. Mary’s,” he said. “If the Army match is like last year’s match, we won’t win, but you never know we’re on a good run.”

Zilai also said Army will pose a difficult challenge for the team.

“They’re a good strong team and they’re real fast,” she said. “But if we play like we’ve been playing, we’re, should be alright.

Seward said she feels optimistic about the Army match.

“I’m thinking really positive about the Army match. They could be tough, but again they might not be," she said. “Last year was a tough match, but I think we will probably Army will be in good condition, but they skill level isn’t as good as ours.”
